6. *Claims for loss.* (a) In lieu of section 11(c) of the policy, the following shall apply: Losses shall be determined separately for each insurance unit (hereinafter called "unit"). The amount of loss with respect to any unit shall be determined by (1) multiplying the insured acreage on the unit by the applicable production guarantee per acre, which product shall be the production guarantee for the unit, (2) subtracting therefrom the total production to be counted for the unit, (3) multiplying the remainder by the insured interest, and (4) multiplying this result by the applicable price for computing indemnities: *Provided,* That, if for the insurance unit the insured fails to report all of his interest or insurable acreage, the amount of loss shall be determined with respect to all of his interest and insurable acreage, but in such cases or otherwise, if the premium computed on the basis of the insurable acreage and interest exceeds the premium on the reported acreage and interest, or the acreage and interest when determined by the Corporation under section 2 of the policy, the amount of loss shall be reduced proportionately.

The total production to be counted for an insurance unit shall be determined by the Corporation and shall include all vined or combined production and any appraisals made by the Corporation for unharvested or potential production, poor farming practices, uninsured causes of loss, or for acreage abandoned or put to another use without the consent of the Corporation: *Provided,* That the total production to be counted for any acreage not harvested nor considered as harvested within the meaning of the term "harvested" shall not be less than 25 percent of the production guarantee for such acreage: *Provided further,* That the production to be counted for any acreage of peas which is abandoned or put to another use without the consent of the Corporation shall be the production guarantee provided on the county actuarial table for such acreage: *Provided further,* That the production to be counted for any acreage of peas which is undamaged and not harvested as green peas shall not be less than the production guaranteed for such acreage.

(b) Notwithstanding the provisions of paragraph (a) of this section: All production to be counted shall be adjusted to the pound equivalent of the quality guarantee shown on the county actuarial table as follows:

Green peas—By relating the processor contract price for the quality of the actual or appraised production to the processor contract price for the production of the quality guaranteed.

Dry peas—By relating the value to the applicable green pea processor contract price for the production of the quality guaranteed, as determined by the Corporation.

7. *Meaning of terms.* For the purpose of insurance on canning and freezing peas the terms:

(a) "Processor contract field of peas" means a field of canning or freezing peas designated or described under a contract of, or for, sale between the insured and a processor for delivery in the current crop year, as determined by the Corporation from such contract.

(b) "Insurance unit," notwithstanding section 21(g) of the policy, means the insurable acreage on each processor contract field of peas in the county in which the insured has an interest.

(c) "Harvest" or "harvested" means the swathing or cutting of the vines for vining the green peas or combining the dry peas. For the purpose of determining any loss under the contract any acreage shall not be considered as harvested unless the Corporation determines that at the time of harvest the production equivalent harvested therefrom equals not less than 25 percent of the production guarantee for such acreage.

(d) "Vining" means separating the peas from the pods.

8. *Cancellation, termination for indebtedness, and discount dates.* (a) For each crop year of the contract the cancellation date shall be the December 31 and the termination date for indebtedness shall be the March 1 immediately preceding the beginning of the crop year for which the cancellation or the termination is to become effective.

(b) For the 1962 crop year only the discount date shall be December 31, 1962.

9. *Annual premium.* For the 1962 crop year only, notwithstanding the provisions of section 4(e) of the policy to the contrary, the discount therein provided shall be inapplicable under this endorsement.

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U.S.C. 1506, 1516)

Adopted by the Board of Directors on February 16, 1962.

[Amdt. No. 32]

PART 401—FEDERAL CROP INSURANCE

Subpart—Regulations for the 1961 and Succeeding Crop Years

CORN

Pursuant to the authority contained in the Federal Crop Insurance Act, as amended, the above-identified regulations are amended effective beginning with the 1962 crop year in the following respects:

1. The corn endorsement shown in § 401.20 of this chapter is amended effective beginning with the 1962 crop year by adding a new section 9 to read as follows:

9. *Special provisions applicable only in McLean and Livingston Counties, Illinois, Fillmore County, Minnesota, Henry and Wood Counties, Ohio, and Walworth County, Wisconsin.* (a) For the 1962 or any succeeding crop year any insured in McLean and Livingston Counties, Illinois, Fillmore County, Minnesota, Henry and Wood Counties, Ohio, and Walworth County, Wisconsin, may elect that the provisions of this section 9 shall apply to his contract of insurance in lieu of the provisions of section 5 of this endorsement by notifying the county office in writing of such election prior to the termination date for indebtedness for such crop year or he may terminate any such election by notifying the county office in writing prior to such date. In the event of such election the reference in the third sentence of section 4 of this endorsement to section 5 shall be deemed to be a reference to subsection (c) of this section 9.

(b) The provisions of section 3 of the policy with respect to guaranteed production and amounts of insurance per acre shall not be applicable under this endorsement if the insured elects that the provisions of this section 9 shall apply to his contract of insurance. For each crop year of the contract the bushel guarantee, and the price at which indemnities shall be computed shall be those established by the Corporation and shown on the county actuarial table.

At the time the application for insurance is made, if the applicant elects that the provisions of this section 9 shall apply to his contract of insurance, he shall also elect a price per bushel at which indemnities shall be computed from among those shown on the county actuarial table. Any insured with a contract in force prior to the 1962 crop year or commencing with the 1962 crop year who elects that the provisions of this section 9 shall apply, shall also elect the price per bushel to be in effect beginning with the 1962 crop year. If any such applicant or such insured fails to make an election or elects a price per bushel not shown on the actuarial table, the price per bushel which shall be in effect shall be the amount provided on the county actuarial table for such purposes.

As to any succeeding crop year any such insured may change the price per bushel which was in effect for a prior crop year and make a new election by notifying the county office in writing of such election before contracts are terminated for indebtedness for the crop year for which the election is to become effective. If no such change is made, the price per bushel at which indemnities shall be computed shall be the price most recently in force under the contract but for any crop year shall not exceed the maximum price per bushel as shown on the county actuarial table.

(c) In lieu of section 11(c) of the policy, the following shall apply: Losses shall be determined separately for each insurance unit. The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insured acreage of corn on the insurance unit by the applicable bushel guarantee per acre, which product shall be the bushel guarantee for the insurance unit, (2) subtracting therefrom the total production to be counted for the insurance unit, (3) multiplying the remainder by the insured interest, and (4) multiplying this result by the applicable price per bushel for computing indemnities: *Provided,* That if for the insurance unit the insured fails to report all of his interest or insurable acreage the amount of loss shall be determined with respect to all of his interest and insurable acreage, but in such cases or otherwise, if the premium computed on the basis of the insurable acreage and interest exceeds the premium on the reported acreage and interest, or the acreage and interest when determined by the Corporation under section 2 of the policy, the amount of loss shall be reduced proportionately.

The total production to be counted for an insurance unit shall be determined by the Corporation and, subject to the provisions hereinafter, shall include all harvested production and any appraisals made by the Corportion for unharvested, or potential production, poor farming practices, uninsured causes of loss, or for acreage abandoned or put to another use without the consent of the Corporation: *Provided,* That the total production to be counted on any acreage of the insured crop which is appraised by the Corporation and planted to dry edible beans, flax, grain sorghum or soybeans in the current crop year with the consent of the Corporation shall be not less than one-half of the guaranteed production provided for such acreage: *Provided, further,* That the production to be counted for any acreage of corn which is harvested for silage or fodder, or for the purpose of wet storage, or which is abandoned or put to another use without the consent of the Corporation shall be the guaranteed production provided for such acreage, except that where the insured has complied with the provisions of section 4 of this endorsement, the total production to be counted from any acreage of corn which is appraised by the Corporation and harvested for silage or fodder, or for the purpose of wet storage, shall be the total of such appraisal but not to exceed the guaranteed production for that acreage.

(d) Notwithstanding the provisions of paragraph (c) of this section for determining production to be counted, the production of corn to be counted, excluding corn harvested for silage, fodder, wet storage or any appraisal of production made prior to normal harvesttime, which has a moisture content of 29 percent or more due to insurable causes occurring during the insurance period, shall be adjusted as hereinafter provided. The production of any such corn with a moisture content of: (1) 29 percent through 31.9 percent shall be adjusted by multiplying the number of bushels by 75 percent, (2) 32 percent through 34.9 percent shall be adjusted by multiplying the number of bushels by 50 percent, (3) 35 percent through 37.9 percent shall be adjusted by multiplying the number of bushels by 25 percent and (4) 38 percent or more shall not be counted.

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U.S.C. 1506, 1516)

Adopted by the Board of Directors on February 16, 1962.

[SEAL] EARLL H. NIKKEL,
Secretary,
Federal Crop Insurance Corporation.

Approved on February 21, 1962.

ORVILLE L. FREEMAN,
Secretary.

Chapter VIII—Agricultural Stabilization and Conservation Service (Sugar), Department of Agriculture

[Sugar Determination 878.14]

SUBCHAPTER I—DETERMINATION OF PRICES

PART 878—SUGARCANE; VIRGIN ISLANDS

Prices; 1962 Crop

Pursuant to the provisions of section 301(c)(2) of the Sugar Act of 1948, as amended (herein referred to as "act"), after investigation and due consideration of the evidence obtained at the public hearing held in Christiansted, St. Croix, Virgin Islands, on November 17, 1961, the following determination is hereby issued:

§ 878.14 Fair and reasonable prices for the 1962 crop of Virgin Islands sugarcane.

A producer of sugarcane in the Virgin Islands who is also a processor of sugarcane (herein referred to as "processor"), shall have paid, or contracted to pay, for sugarcane of the 1962 crop grown by other producers and processed by him at rates not less than those determined in accordance with the following requirements, or at a combined rate of not less than the sum of the rates determined in accordance with the following requirements:

(a) *Definitions.* For the purpose of this section, the term:

(1) "Raw sugar" means raw sugar as made converted to a 96° basis.

(2) "Settlement period" means the two-week period in which sugarcane is delivered by the producer to the processor. The first such period shall start on Monday of the week grinding commences and successive periods shall start at two-week intervals thereafter. Odd days at the end of the grinding season shall be included in the preceding period if less than 7 days and if 7 days or more shall constitute a separate settlement period.

(3) "Price of raw sugar" means the simple average of the daily spot quotations for sugar deliverable under the New York Coffee and Sugar Exchange No. 7 domestic contract (bulk sugar) for the settlement period, except that, if the Director of the Sugar Division determines that any such price quotation does not reflect the true market value of raw sugar because of inadequate volume or other factors, he may designate the price to be effective under this determination, which he determines will reflect the true market value of raw sugar.

(4) "F.o.b. mill price" means the price of raw sugar minus selling and delivery expenses actually incurred by the processor in marketing raw sugar of the 1962 crop.

(5) "Yield of raw sugar" means the quantity of raw sugar recovered per 100 pounds of sugarcane determined for each settlement period in accordance with the following procedure:

(i) A representative sample shall be taken of each producer's daily deliveries of sugarcane during the settlement period and ground by a laboratory power mill. The juice extracted therefrom shall be analyzed for Brix and sucrose content by standard methods of analysis.

(ii) Application shall then be made of the formula, $R=(S-0.3B)F$, where:

R = Yield of raw sugar.
S = Sucrose content of the laboratory power mill juice obtained from the sugarcane of each producer.
B = Brix of the laboratory power mill juice obtained from the sugarcane of each producer.
F = Yield factor which is determined as follows:

(*a*) Determine the "tentative recovery of raw sugar" for each producer delivering sugarcane during the settlement period, from the product of the formula (S—0.3B), and the number of hundredweights of sugarcane; and

(*b*) Divide the pounds of raw sugar, 96° basis, produced and estimated from all sugarcane received and tested during the settlement period by the sum of the "tentative recoveries of raw sugar" for all producers to obtain the yield factor F.

(iii) In the event any sugarcane was not processed during the settlement period in which it was received and tested, the quantity of sugar produced during such period shall be increased by attributing to such sugarcane an estimated quantity determined by multiplying the number of tons of such unprocessed sugarcane by the average percentage of sugar, 96° basis, that was recovered from all sugarcane processed during such settlement period. The quantity of sugar so estimated shall be deducted from the sugar produced during the subsequent period.

(b) *Payment for sugarcane.*

(1) The payment for sugarcane delivered by the producer to the processor during a settlement period shall be calculated on the basis of the f.o.b. mill price for that portion of the raw sugar determined by applying not less than the following applicable percentage to the yield of raw sugar from the producer's sugarcane:

Pounds of raw sugar per 100 pounds of sugarcane:	Percentage
6.0	62.0
7.0	64.0
8.0	66.0
9.0	68.0
10.0	77.0
11.0	86.0
12.0	89.0

Intermediate points within the scale are to be interpolated to the nearest one-tenth point. Points below 6 pounds or above 12 pounds of raw sugar are to be in proportion to the immediately preceding interval.

(2) The processor shall pay to the producer for each 100 pounds of sugarcane delivered an amount for molasses computed by applying the following applicable percentage to the product of 10.50 cents per gallon and the average number of gallons of blackstrap molasses produced per 100 pounds of sugarcane of the 1962 crop:

Pounds of raw sugar per 100 pounds of sugarcane:	Percentage
6.0	62.0
7.0	68.0
8.0	74.0
9.0	68.0
10.0	62.0
11.0	56.0
12.0	50.0

Intermediate points within the scale are to be interpolated to the nearest one-tenth point. Points below 6 pounds or above 12 pounds of raw sugar are to be in proportion to the immediately preceding interval.

(c) *Delivery point and transportation allowances.* The price for sugarcane established by this section shall be applicable to sugarcane delivered to the mill. For each 100 pounds of sugarcane delivered to the mill the processor shall make an allowance to the producer for loading and transporting such sugarcane in an amount not less than one-half of the loading and transportation rate applicable to the 1961 crop. The rates and allowances shall be posted at the mill by the processor.

(d) *Reporting requirements.* The processor shall submit in duplicate to the Caribbean Area Agricultural Stabilization and Conservation Service Office, Santurce, Puerto Rico, for approval a certified statement itemizing the actual expenses deducted in determining the f.o.b. mill price of raw sugar.

(e) *Subterfuge.* The processor shall not reduce the returns to the producer below those determined in accordance with the requirements of this determination through any subterfuge or device whatsoever.

STATEMENT OF BASES AND CONSIDERATIONS

(a) *General.* The foregoing determination establishes the fair and reasonable price requirements which must be met, as one of the conditions for payment under the act, by a producer who processes sugarcane of the 1962 crop grown by other producers.

(b) *Requirements of the act.* Section 301(c)(2) of the act provides as a condition for payment, that the producer on the farm who is also directly or indirectly a processor of sugarcane, as may be determined by the Secretary, shall have paid, or contracted to pay, under either purchase or toll agreements, for sugarcane grown by other producers and processed by him at rates not less than those that may be determined by the Secretary to be fair and reasonable after investigation and due notice and opportunity for public hearing.

(c) *1962 price determination.* This determination continues the provisions of the 1961 determination except that the amount of the allowance by the processor to producers for transporting sugarcane from the farm to the mill is based on rates which are not less than those applicable to the 1961 crop and the molasses payment to producers is based on 10.5 cents per gallon instead of 10.75 cents per gallon.

A public hearing was held in Christiansted, St. Croix, Virgin Islands, on November 17, 1961, at which interested persons were afforded the opportunity to testify with respect to fair and reasonable prices for the 1962 crop. The representative of the Virgin Islands Corporation recommended that the molasses payment to producers be based on the actual price received by the processor from the sale of molasses. The witness stated that the Corporation does not produce enough molasses to supply the needs of the local distiller; that during 1961 the Corporation negotiated a new contract with the distiller establishing a formula whereby the price for molasses produced by the Corporation would be 2 cents per gallon less than the price paid for the first 500,000 gallons of molasses imported by the distillers during the year; that if no molasses were imported and the parties were unable to reach an agreement the contract provides for arbitration of the price for molasses; that the quantity of 500,000 gallons was agreed upon as representing a reasonable volume of molasses on which to base a price; and that the deduction of 2 cents per gallon from the price of imported molasses was one-half of the estimated 4 cent cost if the Corporation shipped its molasses out of the Virgin Islands. The witness testified that the Corporation paid producers a higher percentage share of the sugar recovered from 1961 crop sugarcane than was required by the determination and proposed to pay such higher share for the sugar recovered from 1962 crop sugarcane; that the molasses payment to producers was based on the price for molasses specified in the 1961 determination which was higher than the actual price for molasses received by the Corporation; that the new dock facilities permit the loading of raw sugar on board ship by a conveyor system which is expected to reduce marketing expenses about $2.00 per ton of sugar; that the allowance paid to producers for loading and transporting sugarcane was increased 20 percent for the 1961 crop as compared with the 1960 crop and the Corporation had agreed with producers to review such rates with a view to a possible further increase for the 1962 crop; that on the basis of current estimates the Corporation made a profit of $166,000 on the production of 1961-crop sugarcane but sustained a loss of $213,000 on its milling operation, resulting in an overall loss of $47,000 even though a record crop was produced; and that the loss for the 1962 crop probably would be greater since a considerably smaller crop is in prospect.

Consideration has been given to the recommendations made at the hearing, to the returns, costs, and profits of producing and processing sugarcane obtained by field study, and to other pertinent factors. The returns, costs, and profits of independent producers and the processor, obtained by survey for prior years, have been recast to reflect prospective price and production conditions for the 1962 crop. This analysis indicates that the sharing relationship provided in this determination will be favorable to independent producers.

The Virgin Islands Corporation is the largest producer and only processor of sugarcane in the Virgin Islands. Since its formation in 1949 the Corporation's sugarcane growing operation has shown a profit in 1956, 1957, 1959, and 1961. However, the sugarcane processing operation has sustained losses ranging as high as $400,000 in 1960, when the crop was severely affected by drought. The profit on the sugarcane producing operation in 1957 was sufficient to offset the processing loss, and in that year only was a profit realized on the overall sugar operations.

As a result of an analysis of a study of returns, costs, and profits of the producing and processing operations of the Virgin Islands Corporation, the 1958 determination provided for a reduction of about 10 percent in the producers' share of sugar recovered from their sugarcane. A study of the returns, costs, and profits of independent producers' sugarcane operations confirmed that the reduced sharing relationship was equitable to producers and such relationship has been continued in subsequent determinations.

The provision of the prior determination which related the price of molasses, upon which the molasses payment to producers was based, to the most recent 5-year average net proceeds from sales of molasses by processors in Puerto Rico is continued. This method was first adopted in the 1958 determination inasmuch as contractual arrangements of the Corporation required that most of its annual production of molasses be marketed to Island distillers at negotiated prices, and since there were only one or two local buyers the establishment of a local market price was not practicable. Under the present pricing arrangement between the Corporation and the distiller the price of molasses is contingent upon importations from foreign countries, and if no molasses is imported the price must then be agreed upon or arbitrated. In these circumstances it is deemed desirable to continue a fixed price in the determination based upon the net proceeds realized in Puerto Rico where competitive marketing practices prevail.

With regard to any difference in the price for molasses actually realized and that specified in the determination, it is again pointed out that if the combined payments for sugarcane determined on the basis of the producers' share of raw sugar as authorized by the Board of Directors of the Corporation and on the actual sales price of molasses are equal to or in excess of the total payments computed in accordance with the formulae provided in the determination, the minimum requirements of the determination will have been met.

The 1961 determination provided that sugarcane loading and transportation allowances to producers be based on rates which were 20 percent higher than in 1960, and that the rates were to be posted at the mill. The Corporation agreed with producers to pay the higher rates in 1961 and indicated that it would review the rates with a view to a further increase for the 1962 crop. The arrangement for the 1962 crop has not yet been announced. This determination establishes a minimum requirement that loading and transportation allowances are to be based on rates not less than those applicable in 1961.

On the basis of an examination of all relevant factors, the provisions of this determination are deemed to be fair and reasonable.

Accordingly, I hereby find and conclude that the foregoing price determination will effectuate the price provisions of the Sugar Act of 1948, as amended. (Sec. 403, 61 Stat. 932; 7 U.S.C. Sup. 1153. Interprets or applies sec. 301, 61 Stat. 929; 7 U.S.C. Supp. 1131.)

Signed at Washington, D.C., on February 20, 1962.

ORVILLE L. FREEMAN,
Secretary.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Grapefruit Reg. 3]

PART 909—GRAPEFRUIT GROWN IN ARIZONA; IN IMPERIAL COUNTY, CALIF., AND IN THAT PART OF RIVERSIDE COUNTY, CALIF., SITUATED SOUTH AND EAST OF WHITE WATER, CALIF.

Limitation of Shipments

§ 909.303 Grapefruit Regulation 3.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and

Order No. 909, as amended (7 CFR Part 909), regulating the handling of grapefruit grown in the State of Arizona; in Imperial County, California; and in that part of Riverside County, California, situated south and east of White Water, California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations of the Administrative Committee (established under the aforesaid amended marketing agreement and order), and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 1001–1011), because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective date. The Administrative Committee held an open meeting on February 15, 1962, to consider recommendations for a regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such open meeting; necessary supplemental economic and statistical information upon which this recommended regulation is based was received by the Fruit Branch on February 20, 1962; information regarding the provisions of the regulation recommended by the committee has been disseminated to shippers of grapefruit, grown as aforesaid, and this section, including the effective time thereof, is identical with the recommendation of the committee; it is necessary, in order to effectuate the declared policy of the act, to make this section effective on the date hereinafter set forth so as to provide for the continued regulation of the handling of grapefruit; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) During the period beginning at 12:01 a.m., P.s.t., February 25, 1962, and ending at 12:01 a.m., P.s.t., March 11, 1962, no handler shall handle:

(i) From the State of California or the State of Arizona to any point outside thereof any grapefruit of any variety grown in the State of Arizona; in Imperial County, California; or in that part of Riverside County, California, situated south and east of White Water, California, unless such grapefruit grade at least U.S. No. 2: *Provided*, That included in the tolerances for defects permitted by such grade not more than 5 percent, by count, shall be allowed for grapefruit having peel more than one inch in thickness at the stem end, measured from the flesh to the highest point of the peel; or

(ii) From the State of California or the State of Arizona to any point outside thereof in the United States, any grapefruit, grown as aforesaid, which measure less than $3^{11}/_{16}$ inches in diameter, except that a tolerance of 5 percent, by count, of grapefruit smaller than the foregoing minimum size shall be permitted which tolerance shall be applied in accordance with the provisions for the application of tolerances, specified in the revised United States Standards for Grapefruit (California and Arizona), §§ 51.925–51.955 of this title: *Provided*, That, in determining the percentage of grapefruit in any lot which are smaller than $3^{11}/_{16}$ inches in diameter, such percentage shall be based only on the grapefruit in such lot which are of a size $4^{2}/_{16}$ inches in diameter and smaller.

(2) As used herein, "handler," "variety," "grapefruit," and "handle" shall have the same meaning as when used in said amended marketing agreement and order; the term "U.S. No. 2" shall have the same meaning as when used in the aforesaid revised United States Standards for Grapefruit; and "diameter" shall mean the greatest dimension measured at right angles to a line from the stem to blossom end of the fruit.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: February 20, 1962.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F.R. Doc. 62-1911; Filed, Feb. 26, 1962; 8:48 a.m.]

PART 971—LETTUCE GROWN IN LOWER RIO GRANDE VALLEY IN SOUTH TEXAS

Approval of Expenses and Rate of Assessment

Notice of rule making regarding proposed expenses and rate of assessment, to be effective under Marketing Agreement No. 144 and Order No. 971 (7 CFR Part 971; formerly Order No. 134, Part 1034) regulating the handling of lettuce grown in the Lower Rio Grande Valley in South Texas, was published in the FEDERAL REGISTER November 17, 1961 (26 F.R. 10773). This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice, which proposals were adopted and submitted for approval by the South Texas Lettuce Committee, established pursuant to said marketing agreement and order, it is hereby found and determined that:

§ 971.202 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred by the South Texas Lettuce Committee, established pursuant to Marketing Agreement No. 144, and this part, for its maintenance and functioning during the fiscal period November 1, 1961, through October 31, 1962 will amount to $30,000.00.

(b) The rate of assessment to be paid by each handler pursuant to Marketing Agreement No. 144 and this part shall be two cents ($0.02) per carton of lettuce handled by him as the first handler thereof during said fiscal period.

(c) Terms used in this section shall have the same meaning as when used in Marketing Agreement No. 144 and this part.

It is hereby found that good cause exists for not postponing the effective time of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 1001–1011) in that (1) the relevant provisions of said marketing agreement and this part require that rate of assessment fixed for a particular fiscal period shall be applicable to all assessable lettuce from the beginning of such period, and (2) the current fiscal period began on November 1, 1961, and the rate of assessment herein fixed will automatically apply to all assessable lettuce beginning with such date.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: February 21, 1962.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F.R. Doc. 62-1913; Filed, Feb. 26, 1962; 8:48 a.m.]

PART 990—HANDLING OF CENTRAL CALIFORNIA GRAPES FOR CRUSHING

Expenses of the Grape Crush Administrative Committee and Rate of Assessment

Notice was published in the February 9, 1962, issue of the FEDERAL REGISTER (27 F.R. 1217) regarding a proposal to approve expenses of the Grape Crush Administrative Committee for the period beginning on August 26, 1961, and ending on June 30, 1962, and fix the rate of assessment for that period, pursuant to the provisions of Marketing Agreement No. 133 and Order No. 990 (7 CFR Part 990), regulating the handling of Central California grapes for crushing. This marketing agreement and order program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). Interested persons were afforded opportunity to submit written data, views, or arguments with respect to the proposal. The prescribed time has elapsed and no such communications have been received.

After consideration of all relevant matters presented, including the information and recommendations submitted by the committee, and other available information, it is hereby found and determined that the authorized expenses of the Grape Crush Administrative Committee and the rate of assessment during the aforesaid period shall be as follows:

§ 990.201 Expenses of the Grape Crush Administrative Committee and rate of assessment.

(a) *Expenses.* Expenses[1] in the amount of $189,178 are reasonable and are likely to be incurred, pursuant to § 990.71, by the Grape Crush Administrative Committee during the period beginning on August 26, 1961 and ending on June 30, 1962 of the initial crop year, for the maintenance and functioning of the committee and the Grape Crush Advisory Board, and for such other purposes as the Secretary may, pursuant to the provisions of this part, determine to be appropriate.

(b) *Rate of assessment.* The rate of assessment for the period beginning on August 26, 1961, and ending on June 30, 1962, of the initial crop year, which each handler shall, pursuant to § 990.72, pay with respect to all free tonnage (including tonnage of those varieties exempted from volume regulation by § 990.202) grapes for crushing, including such grapes of his own production, received by him during such period is fixed at 33.5 cents per ton of fresh grapes and the equivalent amount of 34.5 cents per ton of raisin residual material.

It is hereby further found that good cause exists for not postponing the effective time of this action until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 1003(c)) in that: (1) The relevant provisions of said marketing agreement and order require that a rate of assessment fixed for a particular crop year shall be applicable to all free tonnage (including tonnage of those varieties exempted from volume regulation by § 990.202) grapes for crushing, including such grapes of his own production, received by him during such period; and (2) this period began on August 26, 1961, and the rate of assessment herein fixed will automatically apply to all such grapes for crushing beginning with that date.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: February 20, 1962.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division.

Title 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket C–10]

PART 13—PROHIBITED TRADE PRACTICES

Smolowitz & Benkel, Inc., et al.

Subpart—Misbranding or mislabeling: § 13.1185 *Composition:* § 13.1185–90 *Wool Products Labeling Act;* § 13.1212 *Formal regulatory and statutory requirements:* § 13.1212–90 *Wool Products Labeling Act.* Subpart—Neglecting, unfairly or deceptively, to make material disclosure: § 13.1845 *Composition:* § 13.1845–80 *Wool Products Labeling Act;* § 13.1852 *Formal regulatory and statutory requirements:* § 13.1852–80 *Wool Products Labeling Act.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, secs. 2–5, 54 Stat. 1128–1130; 15 U.S.C. 45, 68) [Cease and desist order, Smolowitz & Benkel, Inc., et al., New York, N.Y., Docket C–10, Oct. 23, 1961]

In the Matter of Smolowitz & Benkel, Inc., a Corporation, and Nathan Smolowitz and Samuel Small, Individually and as Officers of Said Corporation

Consent order requiring New York City manufacturers to cease violating the Wool Products Labeling Act by labeling as "50 percent wool, 50 percent reprocessed wool", men's and boys' caps which contained a substantial quantity of nonwoolen fibers; by failing to disclose on labels the true generic names of fibers present in such caps, and the percentage thereof; by failing to disclose the fiber composition of knitted ear covers of different fiber composition from the caps themselves; and by failing in other respects to comply with requirements of the Act.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That Smolowitz & Benkel, Inc., a corporation, Nathan Smolowitz and Samuel Small individually and as officers of the said corporation, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction or manufacture for introduction into commerce, or the offering for sale, sale, transportation, distribution, or delivery for shipment, in commerce, of wool products, as "commerce" and "wool products" are defined in the Wool Products Labeling Act of 1939, do forthwith cease and desist from misbranding wool products by:

1. Falsely or deceptively stamping, tagging, labeling or otherwise identifying such products as to the character or amount of the constituent fibers included therein.

2. Failing to securely affix to, or place on, each such product, a stamp, tag, label or other means of identification showing in a clear and conspicuous manner each element of information required to be disclosed by section 4(a)(2) of the Wool Products Labeling Act of 1939.

3. Failing to disclose by sections and to separately set forth on the required stamp, tag, label or other means of identification the character and amount of the constituent fibers contained in each section of such wool products as required by Rule 23(b) of the rules and regulations promulgated under the aforesaid Wool Products Labeling Act of 1939.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Issued: October 23, 1961.

By the Commission.

[SEAL] JOSEPH W. SHEA,
Secretary.

PART 13—PROHIBITED TRADE PRACTICES

Ludwig, Inc., et al.

Subpart—Invoicing products falsely: § 13.1108 *Invoicing products falsely:* § 13.1108–45 *Fur Products Labeling Act.* Subpart—Misbranding or mislabeling: § 13.1212 *Formal regulatory and statutory requirements:* § 13.1212–30 *Fur Products Labeling Act.* Subpart—Neglecting, unfairly or deceptively, to make material disclosure: § 13.1645 *Composition:* § 13.1845–30 *Fur Products Labeling Act;* § 13.1852 *Formal regulatory and statutory requirements:* § 13.1852–35 *Fur Products Labeling Act;* § 13.1865 *Manufacture or preparation:* § 13.1865–40 *Fur Products Labeling Act;* § 13.1900 *Source or origin:* § 13.1900–40 *Fur Products Labeling Act:* § 13.1900–40(b) *Place.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 8, 65 Stat. 179; 15 U.S.C. 45, 69f) [Cease and desist order, Ludwig, Inc., et al., Boston, Mass., Docket C–8, Oct. 23, 1961]

In the Matter of Ludwig, Inc., a Corporation, and Herbert Ludwig, and Alvin Ludwig, Individually and as Officers of the Said Corporation

Consent order requiring Boston furriers to cease violating the Fur Products Labeling Act by failing to disclose in labeling and invoicing fur products when the fur was dyed; failing to show on invoices the true animal name of the fur and the country of origin of imported furs; and failing in other respects to comply with labeling and invoicing requirements.

The order to cease and desist, together with order requiring report of compliance therewith, is as follows:

It is ordered, That Ludwig, Inc., a corporation and its officers, and Herbert Ludwig and Alvin Ludwig, individually and as officers of the said corporation, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction into commerce, or the sale, advertising, or offering for sale in commerce, or the transportation or distribution in commerce of fur products, or in connection with the sale, advertising, offering for sale, transportation, or distribution of fur products which are made in whole or in part of fur which has been shipped and received in commerce, as "commerce," "fur," and "fur product," are defined in the Fur Products Labeling Act, do forthwith cease and desist from:

1. Misbranding fur products by:

- A. Failing to affix labels to fur products showing in words and figures plainly legible all of the information required to be disclosed by each of the subsections of section 4(2) of the Fur Products Labeling Act.

B. Failing to set forth separately on labels affixed to fur products composed of two or more sections containing different animal furs the information required under section 4(2) of the Fur Products Labeling Act and the rules and regulations promulgated thereunder with respect to the fur comprising each section.

C. Failing to set forth on labels the item number or mark assigned to a fur product.

2. Falsely or deceptively invoicing fur products by:

A. Failing to furnish invoices to purchasers of fur products showing in words and figures plainly legible all of the information required to be disclosed by each of the subsections of section 5(b)(1) of the Fur Products Labeling Act.

B. Failing to set forth on invoices the item number or mark assigned to a fur product.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Issued: October 23, 1961.

By the Commission.

JOSEPH W. SHEA,
Secretary.

[Docket No. C-9]

PART 13—PROHIBITED TRADE PRACTICES

Joe D. Riff and Riff's

Subpart—Advertising falsely or misleadingly: § 13.155 *Prices:* § 13.155-40 *Exaggerated as regular and customary;* § 13.155-45 *Fictitious marking.* Subpart—Invoicing products falsely: § 13.1108 *Invoicing products falsely:* § 13.1108-45 *Fur Products Labeling Act.* Subpart—Neglecting, unfairly or deceptively, to make material disclosure: § 13.1852 *Formal regulatory and statutory requirements:* § 13.1852-35 *Fur Products Labeling Act;* § 13.1900 *Source or origin:* § 13.1900-40 *Fur Products Labeling Act:* § 13.1900-40(a) *Maker or seller.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 8, 65 Stat. 179; 15 U.S.C. 45, 69f) [Cease and desist order, Joe D. Riff trading as Riff's, Longview, Tex., Docket C-9, Oct. 23, 1961]

Consent order requiring a furrier in Longview, Tex., to cease violating the Fur Products Labeling Act by failing to identify on labels the manufacturer or seller of fur products; by advertising prices of fur products as reduced from usual prices which were, in fact, fictitious; by failing to keep adequate records as a basis for price and value claims; and by failing in other respects to comply with labeling and invoicing requirements.

The order to cease and desist, including order requiring report of compliance therewith, is as follows:

It is ordered, That Joe D. Riff, an individual trading as Riff's or under any other trade name and respondent's representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction into commerce, or the sale, advertising, or offering for sale in commerce, or the transportation or distribution in commerce of fur products, or in connection with the sale, advertising, offering for sale, transportation, or distribution of fur products which are made in whole or in part of fur which has been shipped and received in commerce, as "commerce", "fur" and "fur product" are defined in the Fur Products Labeling Act, do forthwith cease and desist from:

1. Misbranding fur products by:

A. Failing to affix labels to fur products showing in words and figures plainly legible all the information required to be disclosed by each of the subsections of section 4(2) of the Fur Products Labeling Act.

B. Setting forth on labels affixed to fur products information required under Section 4(2) of the Fur Products Labeling Act and the rules and regulations promulgated thereunder mingled with non-required information.

C. Failing to set forth on labels the item number or mark assigned to a fur product.

2. Falsely or deceptively invoicing fur products by:

A. Failing to furnish invoices to purchasers of fur products showing in words and figures plainly legible all the information required to be disclosed by each of the subsections of section 5(b)(1) of the Fur Products Labeling Act.

B. Failing to set forth on invoices the item number or mark assigned to a fur product.

3. Falsely or deceptively advertising fur products through the use of any advertisement, representation, public announcement or notice which is intended to aid, promote or assist, directly or indirectly, in the sale, or offering for sale of fur products and which:

A. Represents directly or by implication that the regular or usual price of any fur product is any amount which is in excess of the prices at which respondent has usually and customarily sold such products in the recent regular course of business.

B. Misrepresents in any manner the savings available to purchasers of respondents fur products.

4. Making claims and representations of the types covered by subsections (a), (b), (c), and (d) of Rule 44 of the rules and regulations promulgated under the Fur Products Labeling Act unless there are maintained by respondent full and adequate records disclosing the facts upon which such claims and representations are based.

It is further ordered, That the respondent herein shall, within sixty (60) days after service upon him of this order, file with the Commission a report in writing setting forth in detail the manner and form in which he has complied with this order.

Issued: October 23, 1961.

By the Commission.

[SEAL] JOSEPH W. SHEA,
Secretary.

Title 14—AERONAUTICS AND SPACE

Chapter III—Federal Aviation Agency

SUBCHAPTER E—AIR NAVIGATION REGULATIONS

[Airspace Docket No. 61-LA-13]

PART 600—DESIGNATION OF FEDERAL AIRWAYS

PART 601—DESIGNATION OF CONTROLLED AIRSPACE, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS, AND POSITIVE CONTROL AREAS

Alteration

On February 2, 1962, Federal Register Document 62-1538 was published in the FEDERAL REGISTER (27 F.R. 1411) amending Part 600 and § 600.1613 or the regulations of the Administrator by designating VOR Federal airway No. 538 from Twentynine Palms, Calif., to Las Vegas, Nev., and by realigning VOR Federal airway No. 1613 from Mission Bay, Calif., to Las Vegas. These amendments are effective April 5, 1962.

Subsequent to the publication of this document, the name of the navigation facility serving San Diego has been changed from "Mission Bay" to "San Diego". In addition, action to designate control areas associated with Victor 538 was omitted from this document. Therefore, action is taken herein to alter § 600.1613 to reflect the name change and to add § 601.6538 to Part 601 of the regulations of the Administrator.

Since these alterations are minor in nature and impose no additional burden on any person, notice and public procedure hereon are unnecessary and the effective date of the final rule as initially adopted may be retained.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 12980), effective immediately, Federal Register Document No. 62-1538 is altered as follows:

In Item No. 2, delete "Mission Bay" wherever it appears and substitute "San Diego" therefor.

Add Item No. 3 to read:

3. In Part 601 (14 CFR Part 601) the following section is added:

§ 601.6538 VOR Federal airway No. 538 control areas (Twentynine Palms, Calif., to Las Vegas, Nev.).

All of VOR Federal airway No. 538.

(Sec. 307(a), 72 Stat. 749; 49 U.S.C. 1348)

Issued in Washington, D.C., on February 21, 1962.

LEE E. WARREN,
Acting Director,
Air Traffic Service.

[F.R. Doc. 62-1916; Filed, Feb. 28, 1962; 8:48 a.m.]

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER C—DRUGS

PART 130—NEW DRUGS

Change in Names of Organizational Units

Pursuant to section 701(a) of the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055; 21 U.S.C. 371(a)) and under the authority delegated to the Commissioner of Food and Drugs by the Secretary of Health, Education, and Welfare (25 F.R. 8625): *It is ordered*, That the new drug regulations (21 CFR 130; 25 F.R. 2506) be amended in the following respects:

1. The name "New Drug Branch" is changed to read "Division of New Drugs" wherever it occurs in Part 130 of this chapter.

2. The name "Veterinary Medical Branch" is changed to read "Division of Veterinary Medicine" wherever it occurs in Part 130 of this chapter.

Effective date. This order is effective on the date of signature.

(Sec. 701(a), 52 Stat. 1055; 21 U.S.C. 371(a))

Dated: February 19, 1962.

WINTON B. RANKIN,
Assistant Commissioner of Food and Drugs.

[F.R. Doc. 62-1909; Filed, Feb. 26, 1962; 8:47 a.m.]

Chapter II—Bureau of Narcotics, Department of the Treasury

[T.D. 67]

PART 305—OPIATES

Termination of Ethyl 1-(2-carbamylethyl-4-phenyl-4-piperidinecarboxylate as an opiate

Notice is hereby given pursuant to the provisions of section 4731(g)(2) of the Internal Revenue Code, as amended, of the revocation of the finding heretofore made declaring the drug known as Ethyl 1-(2-carbamylethyl)-4-phenyl-4-piperidinecarboxylate (and its salts) as an opiate. This determination has been made after considering the technical advice of the delegate of the Secretary of Health, Education, and Welfare who has advised that this drug (and its salts) does not in fact have an addiction-forming or addiction-sustaining liability similar to morphine or cocaine nor is it capable of conversion into a drug having such addiction-forming or addiction-sustaining liability with relative technical simplicity and degree of yield as to create a risk of improper use.

Accordingly, § 305.2 is amended by deleting therefrom the words "Ethyl 1-(2-carbamylethyl)-4-phenyl-4-piperidinecarboxylate".

Because this amendment of § 305.2 relieves restrictions and is within the exception of section 4(c) of the Administrative Procedure Act it is found unnecessary to issue this Treasury Decision with notice and public procedure thereon.

Effective date. This Treasury Decision shall become effective upon the date of its publication in the FEDERAL REGISTER.

(26 U.S.C. 4731(g)(2), sec. 4(b), Pub. Law 86-429 (74 Stat. 57); sec. 17, Pub. Law 86-429 (74 Stat. 67))

[SEAL] H. J. ANSLINGER,
Commissioner of Narcotics.

Approved: February 16, 1962.

JAMES A. REED,
Assistant Secretary of the Treasury.

[F.R. Doc. 62-1923; Filed, Feb. 26, 1962; 8:49 a.m.]

Title 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T.D. 55574]

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

Articles Returned After Exportation for Repairs, Alterations, or Processing

A certificate of registration (customs Form 4455) is required to be filed in connection with entries under paragraph 1615(g) of the Tariff Act of 1930, as amended, for articles exported from the United States for repairs, alterations, or processing and returned to the United States. To prescribe the procedure to be followed when articles exported and registered at time of exportation are returned in several shipments at a port or ports other than the port from which exported, § 10.8(j) of the Customs Regulations is hereby amended by adding at the end thereof the following: "When articles are exported and registered on a customs Form 4455, as provided for in this section, and the articles are reimported at a port other than the port from which exported, the duplicate Form 4455 may be used in making entry at such port of reimportation. Where entry at such port is to be made for only a portion of the merchandise covered by the duplicate Form 4455, the collector may make an extract for use at his port and transmit the duplicate Form 4455 with notation of the extract to the collector at the port of exportation. With respect to additional entries to be made at the same or other ports of reimportation, the collector at the port of exportation (where the original Form 4455 is filed) will, upon request by the importer or the collector at the port of reimportation, issue to the collector at the port of reimportation, an extract of Form 4455 for use in making entry at that port."

(Secs. 201 (par. 1615), 624, 46 Stat. 674, as amended, 759; 19 U.S.C. 1201 (par. 1615), 1624)

[SEAL] PHILIP NICHOLS, JR.,
Commissioner of Customs.

Approved: February 20, 1962.

JAMES POMEROY HENDRICK,
Acting Assistant Secretary of the Treasury.

[F.R. Doc. 62-1922; Filed, Feb. 26, 1962; 8:48 a.m.]

Title 26—INTERNAL REVENUE

Chapter I—Internal Revenue Service, Department of the Treasury

SUBCHAPTER A—INCOME TAX

[T.D. 6591]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

PART 18—CERTAIN INCOME TAX MATTERS UNDER THE TECHNICAL AMENDMENTS ACT OF 1958

Prepaid Subscription Income

On December 14, 1960, a notice of proposed rule making regarding the regulations under section 455 of the Internal Revenue Code of 1954, relating to prepaid subscription income, effective for taxable years beginning after December 31, 1957, was published in the FEDERAL REGISTER (25 F.R. 12833). After consideration of all such relevant matter as was presented by interested parties regarding the rules proposed, the regulations as so published are hereby adopted, subject to the changes set forth below. Such regulations supersede § 18.1-6 of Treasury Decision 6335 (26 CFR Part 18), approved November 19, 1958 (23 F.R. 8981).

PARAGRAPH 1. Section 1.455-4 is revised.

PAR. 2. Paragraph (a) of § 1.455-5 is revised by deleting subparagraph (2) and renumbering subparagraph (3) as (2).

PAR. 3. Paragraph (b) of § 1.455-6 is revised.

[SEAL] MORTIMER M. CAPLIN,
Commissioner of Internal Revenue.

Approved: February 21, 1962.

STANLEY S. SURREY,
Assistant Secretary of the Treasury.

The following regulations relating to prepaid subscription income, effective for taxable years beginning after December 31, 1957, are hereby prescribed under section 455 of the Internal Revenue Code of 1954, as added by section 28 of the Technical Amendments Act of 1958 (72 Stat. 1625):

Sec.
1.455 Statutory provisions; prepaid subscription income.
1.455-1 Treatment of prepaid subscription income.
1.455-2 Scope of election under section 455.
1.455-3 Method of allocation.
1.455-4 Cessation of liability.
1.455-5 Definitions and other rules.
1.455-6 Time and manner of making election.

AUTHORITY: §§ 1.455 to 1.455–6 issued under sec. 7805, I.R.C. 1954; 68A Stat. 917; 26 U.S.C. 7805.

§ 1.455 Statutory provisions; prepaid subscription income.

Sec. 455. *Prepaid subscription income*—(a) *Year in which included.* Prepaid subscription income to which this section applies shall be included in gross income for the taxable years during which the liability described in subsection (d)(2) exists.

(b) *Where taxpayer's liability ceases.* In the case of any prepaid subscription income to which this section applies—

(1) If the liability described in subsection (d)(2) ends, then so much of such income as was not includible in gross income under shall be included in gross income for the taxable year in which the liability ends.

(2) If the taxpayer dies or ceases to exist, then so much of such income as was not includible in gross income under subsection (a) for preceding taxable years shall be included in gross income for the taxable year in which such death, or such cessation of existence, occurs.

(c) *Prepaid subscription income to which this section applies*—(1) *Election of benefits.* This section shall apply to prepaid subscription income if and only if the taxpayer makes an election under this section with respect to the trade or business in connection with which such income is received. The election shall be made in such manner as the Secretary or his delegate may by regulations prescribe. No election may be made with respect to a trade or business if in computing taxable income the cash receipts and disbursements method of accounting is used with respect to such trade or business.

(2) *Scope of election.* An election made under this section shall apply to all prepaid subscription income received in connection with the trade or business with respect to which the taxpayer has made the election; except that the taxpayer may, to the extent permitted under regulations prescribed by the Secretary or his delegate, include in gross income for the taxable year of receipt the entire amount of any prepaid subscription income if the liability from which it arose is to end within 12 months after the date of receipt. An election made under this section shall not apply to any prepaid subscription income received before the first taxable year for which the election is made.

(3) *When election may be made*—(A) *With consent.* A taxpayer may, with the consent of the Secretary or his delegate, make an election under this section at any time.

(B) *Without consent.* A taxpayer may, without the consent of the Secretary or his delegate, make an election under this section for his first taxable year (i) which begins after December 31, 1957, and (ii) in which he receives prepaid subscription income in the trade or business. Such election shall be made not later than the time prescribed by law for filing the return for the taxable year (including extensions thereof) with respect to which such election is made.

(4) *Period to which election applies.* An election under this section shall be effective for the taxable year with respect to which it is first made and for all subsequent taxable years, unless the taxpayer secures the consent of the Secretary or his delegate to the revocation of such election. For purposes of this title, the computation of taxable income under an election made under this section shall be treated as a method of accounting.

(d) *Definitions.* For purposes of this section—

(1) *Prepaid subscription income.* The term "prepaid subscription income" means any amount (includible in gross income) which is received in connection with, and is directly attributable to, a liability which extends beyond the close of the taxable year in which such amount is received, and which is income from a subscription to a newspaper, magazine, or other periodical.

(2) *Liability.* The term "liability" means a liability to furnish or deliver a newspaper, magazine, or other periodical.

(3) *Receipt of prepaid subscription income.* Prepaid subscription income shall be treated as received during the taxable year for which it is includible in gross income under section 451 (without regard to this section).

(e) *Deferral of income under established accounting procedures.* Notwithstanding the provisions of this section, any taxpayer who has, for taxable years prior to the first taxable year to which this section applies, reported his income under an established and consistent method or practice of accounting for prepaid subscription income (to which this section would apply if an election were made) may continue to report his income for taxable years to which this title applies in accordance with such method or practice.

[Sec. 455 as added by sec. 28, Technical Amendments Act 1958 (72 Stat. 1625)]

§ 1.455–1 Treatment of prepaid subscription income.

Effective with respect to taxable years beginning after December 31, 1957, section 455 permits certain taxpayers to elect with respect to a trade or business in connection with which prepaid subscription income is received, to include such income in gross income for the taxable years during which a liability exists to furnish or deliver a newspaper, magazine, or other periodical. If a taxpayer does not elect to treat prepaid subscription income under the provisions of section 455, such income is includible in gross income for the taxable year in which received by the taxpayer, unless under the method or practice of accounting used in computing taxable income such amount is to be properly accounted for as of a different period.

§ 1.455–2 Scope of election under section 455.

(a) If a taxpayer makes an election under section 455 and § 1.455–6 with respect to a trade or business, all prepaid subscription income from such trade or business shall be included in gross income for the taxable years during which the liability exists to furnish or deliver a newspaper, magazine, or other periodical. Such election shall be applicable to all prepaid subscription income received in connection with the trade or business for which the election is made; except that the taxpayer may further elect to include in gross income for the taxable year of receipt (as described in section 455(d)(3) and paragraph (c) of § 1.455–5) the entire amount of any prepaid subscription income if the liability from which it arose is to end within 12 months after the date of receipt, hereinafter sometimes referred to as "within 12 months" election.

(b) If the taxpayer is engaged in more than one trade or business in which a liability is incurred to furnish or deliver a newspaper, magazine, or other periodical, a separate election may be made under section 455 with respect to each such trade or business. In addition, a taxpayer may make a separate "within 12 months" election for each separate trade or business for which it has made an election under section 455.

(c) An election made under section 455 shall be binding for the first taxable year for which the election is made and for all subsequent taxable years, unless the taxpayer secures the consent of the Commissioner to the revocation of such election. Thus, in any case where the taxpayer has elected a method prescribed by section 455 for the inclusion of prepaid subscription income in gross income, such method of reporting income may not be changed without the prior approval of the Commissioner. In order to secure the Commissioner's consent to the revocation of such election, an application must be filed with the Commissioner in accordance with section 446(e) and the regulations thereunder. For purposes of subtitle A of the Code, the computation of taxable income under an election made under section 455 shall be treated as a method of accounting. For adjustments required by changes in method of accounting, see section 481 and the regulations thereunder.

(d) An election made under section 455 shall not apply to any prepaid subscription income received before the first taxable year to which the election applies. For example, Corporation M, which computes its taxable income under an accrual method of accounting and files its income tax returns on the calendar year basis, publishes a monthly magazine and customarily sells subscriptions on a 3-year basis. In 1958 it received $135,000 of 3-year prepaid subscription income for subscriptions beginning during 1958, and in 1959 it received $142,000 of prepaid subscription income for subscriptions beginning after December 31, 1958. In February 1959 it elected, with the consent of the Commissioner, to report its prepaid subscription income under the provisions of section 455 for the year 1959 and subsequent taxable years. The $135,000 received in 1958 from prepaid subscriptions must be included in gross income in full in that year, and no part of such 1958 income shall be allocated to the years 1959, 1960, and 1961 during which M was under a liability to deliver its magazine. The $142,000 received in 1959 from prepaid subscriptions shall be allocated to the years 1959, 1960, 1961, and 1962.

(e) No election may be made under section 455 with respect to a trade or business if, in computing taxable income, the cash receipts and disbursements method of accounting is used with respect to such trade or business. However, if the taxpayer is on a "combination" method of accounting under section 446(c)(4) and the regulations thereunder, it may elect the benefits of section 455 if it uses an accrual method of accounting for subscription income.

§ 1.455–3 Method of allocation.

(a) Prepaid subscription income to which section 455 applies shall be included in gross income for the taxable years during which the liability to which the income relates is discharged or is deemed to be discharged on the basis of the taxpayer's experience.

(b) For purposes of determining the period or periods over which the liability

of the taxpayer extends, and for purposes of allocating prepaid subscription income to such periods, the taxpayer may aggregate similar transactions during the taxable year in any reasonable manner, provided the method of aggregation and allocation is consistently followed.

§ 1.455–4 Cessation of taxpayer's liability.

(a) If a taxpayer has elected to apply the provisions of section 455 to a trade or business in connection with which prepaid subscription income is received, and if its liability to furnish or deliver a newspaper, magazine, or other periodical ends for any reason, then so much of the prepaid subscription income attributable to such liability as was not includible in its gross income under section 455 for preceding taxable years shall be included in its gross income for the taxable year in which such liability ends. A taxpayer's liability may end, for example, because of the cancellation of a subscription. See section 381(c)(4) and the regulations thereunder for the treatment of prepaid subscription income in a transaction to which section 381(a) applies.

(b) If a taxpayer who has elected to apply the provisions of section 455 to a trade or business dies or ceases to exist, then so much of the prepaid subscription income attributable to such trade or business which was not includible in its gross income under section 455 for preceding taxable years shall be included in its gross income for the taxable year in which such death or cessation of existence occurs. See section 381(c)(4) and the regulations thereunder for the treatment of prepaid subscription income in a transaction to which section 381(a) applies.

§ 1.455–5 Definitions and other rules.

(a) *Prepaid subscription income.* (1) The term "prepaid subscription income" means any amount includible in gross income which is received in connection with, and is directly attributable to, a liability of the taxpayer which extends beyond the close of the taxable year in which such amount is received and which is income from a newspaper, magazine, or other periodical. For example where Corporation X, a publisher of newspapers, magazines, and other periodicals makes sales on a subscription basis and the purchaser pays the subscription price in advance, prepaid subscription income would include the amounts actually received by X in connection with its liability to furnish or deliver the newspaper, magazine, or other periodical.

(2) For purposes of section 455, prepaid subscription income does not include amounts received by a taxpayer in connection with sales of subscriptions on a prepaid basis where such taxpayer does not have the liability to furnish or deliver a newspaper, magazine, or other periodical. The provisions of this subparagraph may be illustrated by the following example. Corporation D has a contract with each of several large publishers which grants it the right to sell subscriptions to their periodicals. Corporation D collects the subscription price from the subscribers, retains a portion thereof as its commission and remits the balance to the publishers. The amount retained by Corporation D represents commissions on the sale of subscriptions, and is not prepaid subscription income for purposes of section 455 since the commissions represent compensation for services rendered and are not directly attributable to a liability of Corporation D to furnish or deliver a newspaper, magazine, or other periodical.

(b) *Liability.* The term "liability" means a liability of the taxpayer to furnish or deliver a newspaper, magazine, or other periodical.

(c) *Receipt of prepaid subscription income.* For purposes of section 455, prepaid subscription income shall be treated as received during the taxable year for which it is includible in gross income under section 451, relating to general rule for taxable year of inclusion, without regard to section 455.

(d) *Treatment of prepaid subscription income under an established accounting method.* Notwithstanding the provisions of section 455 and § 1.455–1, any taxpayer who, for taxable years beginning before January 1, 1958, has reported prepaid subscription income for income tax purposes under an established and consistent method or practice of deferring such income may continue to report such income in accordance with such method or practice for all subsequent taxable years to which section 455 applies without making an election under section 455.

§ 1.455–6 Time and manner of making election.

(a) *Election without consent.* (1) A taxpayer may, without consent, elect to treat prepaid subscription income of a trade or business under section 455 for the first taxable year—

(i) Which begins after December 31, 1957, and

(ii) In which there is received prepaid subscription income from the trade or business for which the election is made.

Such an election shall be made not later than the time prescribed by law for filing the income tax return for such year (including extensions thereof), and shall be made by means of a statement attached to such return.

(2) The statement shall indicate that the taxpayer is electing to apply the provisions of section 455 to his trade or business, and shall contain the following information:

(i) The name and a description of the taxpayer's trade or business to which the election is to apply;

(ii) The method of accounting used in such trade or business;

(iii) The total amount of prepaid subscription income from such trade or business for the taxable year;

(iv) The period or periods over which the liability of the taxpayer to furnish or deliver a newspaper, magazine, or other periodical extends;

(v) The amount of prepaid subscription income applicable to each such period; and

(vi) A description of the method used in allocating the prepaid subscription income to each such period.

In any case in which prepaid subscription income is received from more than one trade or business, the statement shall set forth the required information with respect to each trade or business subject to the election.

(3) See paragraph (c) of this section for additional information required to be submitted with the statement if the taxpayer also elects to include in gross income for the taxable year of receipt the entire amount of prepaid subscription income attributable to a liability which is to end within 12 months after the date of receipt.

(b) *Election with consent.* A taxpayer may, with the consent of the Commissioner, elect at any time to apply the provisions of section 455 to any trade or business in which it receives prepaid subscription income. The request for such consent shall be in writing, signed by the taxpayer or its authorized representative, and shall be addressed to the Commissioner of Internal Revenue, Attention: T:R:C, Washington 25, D.C. The request must be filed on or before the later of the following dates: (1) 90 days after the beginning of the first taxable year to which the election is to apply or (2) May 28, 1962, and must contain the information described in paragraph (a)(2) of this section. See paragraph (c) of this section for additional information required to be submitted with the request if the taxpayer also elects to include in gross income for the taxable year of receipt the entire amount of prepaid subscription income attributable to a liability which is to end within 12 months after the date of receipt.

(c) *"Within 12 months" election.* (1) A taxpayer who elects to apply the provisions of section 455 to any trade or business may also elect to include in gross income for the taxable year of receipt (as described in section 455(d)(3) and paragraph (c) of § 1.455–5) the entire amount of any prepaid subscription income from such trade or business if the liability from which it arose is to end within 12 months after the date of receipt. Any such election is binding for the first taxable year for which it is effective and for all subsequent taxable years, unless the taxpayer secures permission from the Commissioner to treat such income differently. Application to revoke or change a "within 12 months" election shall be made in accordance with the provisions of section 446(e) and the regulations thereunder.

(2) The "within 12 months" election shall be made by including in the statement required by paragraph (a) of this section or the request described in paragraph (b) of this section, whichever is applicable, a declaration that the taxpayer elects to include such income in gross income in the taxable year of receipt, and the amount of such income. If the taxpayer is engaged in more than one trade or business for which the election under section 455 is made, it must include, in such statement or request, a declaration for each trade or business for

which it makes the "within 12 months" election. See also paragraph (e) of § 1.455–2.

(3) If the taxpayer does not make the "within 12 months" election for its trade or business at the time prescribed for making the election to include prepaid subscription income in gross income for the taxable years during which its liability to furnish or deliver a newspaper, magazine, or other periodical exists for such trade or business, but later wishes to make such election, it must apply for permission from the Commissioner. Such application shall be made in accordance with the provisions of section 446(e) and the regulations thereunder.

Title 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

PART 12—AMATEUR RADIO SERVICE

International Telecommunication Convention (Geneva, 1959)

The Commission having under consideration the amendment of Part 12 of the rules governing the Amateur Radio Service to effect the editorial changes described below;

It appearing, that the Atlantic City Radio Regulations have been superseded by the Geneva (1959) Radio Regulations; and

It further appearing, that Appendix 2 to Part 12 refers to the Atlantic City Radio Regulations; and

It further appearing, that the amendment herein ordered makes no substantive change, and being editorial in nature, the prior Public Notice and effective date provisions of the Administrative Procedures Act are not applicable; and

It further appearing, that the amendment adopted herein is issued pursuant to the authority contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, and section 0.341(a) of the Commission's statement of delegations of authority:

It is ordered, This 21st day of February 1962, that effective February 21, 1962, Appendix 2 to Part 12 is amended as set forth below.

(Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U.S.C. 303)

Released: February 21, 1962.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Acting Secretary.

Appendix 2 to Part 12 is amended to read as follows:

APPENDIX 2—EXTRACTS FROM RADIO REGULATIONS ANNEXED TO THE INTERNATIONAL TELECOMMUNICATION CONVENTION (GENEVA, 1959)

ARTICLE 41—AMATEUR STATIONS

SECTION 1. Radiocommunications between amateur stations of different countries shall be forbidden if the administration of one of the countries concerned has notified that it objects to such radiocommunications.

SEC. 2. (1) When transmissions between amateur stations of different cquntries are permitted, they shall be made in plain language and shall be limited to messages of a technical nature relating to tests and to remarks of a personal character for which, by reasoh of their unimportance, recourse to the public telecommunications service is not justified. It is absolutely forbidden for amateur stations to be used for transmitting international communications on behalf of third parties.

(2) The preceding provisions may be modified by special arrangements between the administrations of the countries concerned.

SEC. 3. (1) Any person operating the apparatus of an amateur station shall have proved that he is able to send correctly by hand and to receive correctly by ear, texts in Morse code signals. Administrations concerned may, however, waive this requirement in the case of stations making use exclusively of frequencies above 144 Mc/s.

(2) Administrations shall take such measures as they judge necessary to verify the technical qualifications of any person operating the apparatus of an amateur station.

SEC. 4. The maximum power of amateur stations shall be fixed by the administrations concerned, having regard to the technical qualifications of the operators and to the conditions under which these stations are to work.

SEC. 5. (1) All the general rules of the Convention and of these Regulations shall apply to amateur stations. In particular, the emitted frequency shall be as stable and as free from spurious emissions as the state of technical development for such stations permits.

(2) During the course of their transmissions, amateur stations shall transmit their call sign at short intervals.

Proposed Rule Making

DEPARTMENT OF THE TREASURY

Coast Guard

[46 CFR Part 32]

[CGFR 62–3]

VENTING OF COFFERDAMS IN TANK VESSELS

Public Hearing on Proposed Changes

1. The Merchant Marine Council will hold a public hearing on Monday, March 12, 1962, commencing at 9:30 a.m., in the Departmental Auditorium, between 12th and 14th Streets on Constitution Avenue NW., Washington, D.C., for the purpose of receiving comments, views, and data on the proposed changes in the navigation and vessel inspection regulations, as set forth in Items I to IX, inclusive, in the Merchant Marine Council Public Hearing Agenda, CG–249, dated March 12, 1962, and another notice of proposed rule making published January 23, 1962 (27 F.R. 657–665). In Item V (page 182, CG–249) and paragraph 75 of the published notice of proposed rule making (27 F.R. 662) are the changes originally proposed to 46 CFR 32.55–45 regarding "Venting of Cofferdams." In a review of the printed Agenda (CG–249) it was found that necessary additional changes to 46 CFR 32.55–1 and 32.55–45 had been unintentionally omitted. Therefore, in addition to the changes to 46 CFR 32.55–45 previously published, the following proposals will be considered by the Merchant Marine Council as a part of the material on "Venting of Cofferdams" in Item V—Tank Vessels:

a. It is proposed to amend 46 CFR 32.55–1(a) by deleting the word "and" and inserting a comma in the phrase "water tanks and cofferdams," and by inserting a phrase "and voids" after the word "cofferdams" so it will read as follows:

§ 32.55–1 Ventilation of tank vessels constructed on or after July 1, 1951—TB/ALL.

(a) On all tank vessels, the construction or conversion of which is started on or after July 1, 1951, all enclosed parts of the vessel other than cargo, fuel and water tanks, cofferdams and voids shall be provided with efficient means of ventilation.

b. It is proposed to designate the proposed text in 46 CFR 32.55–45 as paragraph (a) and to add a new paragraph (b) to read as follows:

§ 32.55–45 Venting of cofferdams and voids of tank vessels constructed on or after November 10, 1936—TB/ALL.

* * * * *

(b) On unmanned barges not fitted with a fixed bilge system in the cofferdams and voids, vents for cofferdams and voids will not normally be required but may be required in unusual circumstances.

2. The changes proposed to 46 CFR 32.55–45 in Item V of the Agenda (page 182, CG–249) and in 46 CFR 32.55–1 in this document are intended to clarify requirements for flame screens in vents for spaces not literally defined as cofferdams, i.e., rake ends and void wing spaces. The Coast Guard follows the policy that, while rake compartments and voids are not literally defined as cofferdams, they serve the same purpose. In addition the proposed change designated 46 CFR 32.55–45(b) is to clarify the requirements for unmanned tank barges. It is the present consensus of Coast Guard personnel and industry that vents for certain voids on unmanned barges are not necessities for such spaces and therefore vents will be required for safety only in unusual circumstances.

3. The authority for prescribing regulations governing tank vessels is in R.S. 4405, as amended, 4417a, as amended, and 4462, as amended; 46 U.S.C. 375, 391a, 416. These regulations also interpret or apply sec. 3, 68 Stat. 675; 50 U.S.C. 198; and E.O. 10402, 17 F.R. 9917, 3 CFR, 1952 Supp.

4. Comments on the proposed regulations described in this document are welcomed. However, acknowledgments of the comments are not normally furnished because personnel are not available to handle the necessary correspondence involved. Each person who desires to submit written comments, views or suggestions in connection with the proposed regulations should submit them so that they will be received prior to March 9, 1962, by the Commandant (CMC), United States Coast Guard Headquarters, Washington 25, D.C. Comments, views or suggestions may be presented orally or in writing at the hearing before the Merchant Marine Council on March 12, 1962.

Dated: February 21, 1962.

[SEAL] A. C. RICHMOND,
Admiral, U.S. Coast Guard, Commandant.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 33]

SPORT FISHING

Washita National Wildlife Refuge, Oklahoma

Notice is hereby given that pursuant to the authority vested in the Secretary of the Interior by the Migratory Bird Conservation Act of February 18, 1929, as amended (45 Stat. 1222; 16 U.S.C. 715), it is proposed to amend 50 CFR 33.4 by the addition of the Washita National Wildlife Refuge, Oklahoma, to the list of wildlife refuge areas open to public sport fishing as legislatively permitted.

It has been determined that regulated public sport fishing may be permitted on the Washita National Wildlife Refuge without detriment to the objectives for which the area was established.

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rule making process. Accordingly, interested persons may submit written comments, suggestions, or objections, with respect to this proposed amendment, to the Director, Bureau of Sport Fisheries and Wildlife, Washington 25, D.C., within 30 days of the date of publication of this notice in the FEDERAL REGISTER.

Section 33.4 is amended by the addition of the following area as one where sport fishing is authorized.

§ 33.4 List of open areas; sport fishing.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 959]

[959.302 Amdt. 1]

ONIONS GROWN IN SOUTH TEXAS

Miscellaneous Amendments

Notice is hereby given that the Secretary of Agriculture is considering approval of the amendment to the limitation of shipments hereinafter set forth, which was recommended by the South Texas Onion Committee, established pursuant to Marketing Agreement No. 143 and Order No. 959 (7 CFR Part 959).

This marketing agreement and order program regulates the handling of onions grown in designated counties in south Texas, and is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Consideration will be given to any data, views, or arguments pertaining thereto which are filed with the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D.C., not later than 10 days following publication of this notice in the FEDERAL REGISTER.

The proposed amendment is as follows:

In § 959.302 (27 F.R. 1451) delete paragraphs (a) and (h), and substitute in lieu thereof new paragraphs (a) and (h) as set forth below.

§ 959.302 Limitation of shipments.

• • • • •

(a) *Grades.* (1) From February 19, 1962, through March 20, 1962: U.S. No. 2, or better, grade.

(2) From March 21, 1962, through June 30, 1962: not to exceed 20 percent defects of U.S. No. 1 grade, or better quality.

• • • • •

(h) *Definitions.* The terms "U.S. No. 1" and "U.S. No. 2" shall have the same meanings as set forth in the United States Standards for Bermuda-Granex Type Onions (§§ 51.3195–51.3209 of this title), or United States Standards for Grades of Onions (§§ 51.2830–51.2850 of this title), whichever is applicable to the particular variety, including the tolerances for decay and sizes set forth therein. In percentage grade lots, tolerances shall not exceed 2 percent decay. Double the lot tolerance shall be permitted in individual packages. All other terms used in this section shall have the same meaning as when used in Marketing Order No. 959 (Part 959 of this title).

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: February 21, 1962.

FLOYD F. HEDLUND,
Director,
Fruit and Vegetable Division.

[F.R. Doc. 62–1940; Filed, Feb. 26, 1962; 8:50 a.m.]

[7 CFR Part 980]

ONION IMPORTS

Notice of Proposed Rule Making

Notice is hereby given that the Secretary of Agriculture is considering an amendment to § 980.100 *Onion Regulation No. 1* (formerly § 1070.1; 26 F.R. 10632, 11287), applicable to the importation of onions into the United States. This regulation is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674; Public Law 87–128).

Under Section 8e of the act, whenever two or more marketing orders for a commodity are in effect, the importation of such commodity shall be prohibited unless it complies with the grade, size, quality and maturity provisions of the order which, as determined by the Secretary of Agriculture, regulates the commodity produced in the area with which the imported commodity is in most direct competition.

It is hereby determined that imports of onions into the United States during the spring marketing season are in most direct competition with onions produced in the South Texas onion production area as defined in Marketing Order No. 959 (7 CFR Part 959), and that import regulations for onions during such period shall be based on regulations effective under said Order No. 959.

Consideration will be given to any data, views, or arguments, pertaining to the proposed amendment which are filed with the Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington 25, D.C., not later than 15 days following publication of this notice in the FEDERAL REGISTER. The proposed amendment is as follows:

In § 980.100, Onion Regulation No. 1 (formerly § 1070.1, 26 F.R. 10632, 11287), delete paragraphs (a), (b), and (h), and substitute in lieu thereof new paragraphs (a), (b), and (h) as set forth below.

§ 980.100 Onion Regulation No. 1.

(a) *Import restrictions.* During the period from March 21, 1962, to June 30, 1962, both dates inclusive, no person shall import dry onions, except red onions, unless such onions are inspected and meet the requirements of not to exceed 20 percent defects of U.S. No. 1 grade, or better quality. The minimum size for white onions shall be 1 inch in diameter, and for all others 1¾ inches in diameter.

(b) *Condition.* Due consideration shall be given to the time required for transportation and entry of onions into the United States. For onions with transit time from country of origin to entry into the United States of ten or more days, onions otherwise meeting import quality and size requirements may be entered if they meet an average tolerance for decay of not more than 5 percent.

• • • • •

(h) *Definitions.* For the purpose of this part, "onions" means all varieties of Allium cepa marketed dry, except onion sets, green onions, and pickling onions. Onions commonly referred to as "braided," that is, with tops, may be imported if they meet the grade and size requirements except for top length. The term "U.S. No. 1" shall have the same meaning as when used in the United States Standards for Onions (§§ 51.2830–51.2850 of this title), or United States Standards for Bermuda-Granex Type Onions (§§ 51.3195–51.3209 of this title), whichever is applicable to the particularly variety, including the tolerances set forth therein. Double the lot tolerance shall be permitted in individual packages. Onions meeting the requirements of Canada No. 1 grade shall be deemed to comply with the requirements of the U.S. No. 1 grade. "Importation" means release from custody of the United States Bureau of Customs.

Dated: February 21, 1962.

FLOYD F. HEDLUND,
Director,
Fruit and Vegetable Division.

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Chicago, Illinois, on January 17, 18, and 19, 1962, pursuant to notice thereof issued on January 8, 1962 (27 F.R. 314).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Assistant Secretary on February 7, 1962 (27 F.R. 1272; F.R. Doc. 62–1406) filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues on the record of the hearing relate to:

1. Basic formula prices used to compute Class I prices (and Class II prices in the Chicago order),

2. Basic butterfat test in certain markets, and

3. Conforming changes in order language.

Findings and conclusions. The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. The monthly average price received by farmers for manufacturing grade milk in Minnesota and Wisconsin as published by the Department on about the 5th day following the month (adjusted to 3.5 percent butterfat) should be the basic formula price from which the Class I milk price is computed in each of the Federal orders named herein. This basic formula price should also be used in the computation of the Class II milk price under the Chicago order.

Class I prices in Federal order markets are established under the authority of the Agricultural Marketing Agreement Act. The standards for milk order prices described in the Act require that such prices reflect economic conditions which affect market supply and demand for milk in the marketing area. In accordance with these standards, Class I milk pricing formulas have been developed for use in the several Federal orders.

Class I milk price formulas, in markets here considered, employ a basic formula price representing a manufacturing milk value. To this is added a price differential, and in most of these markets a further adjustment is made to reflect the changing relationship of milk supplies to Class I milk disposition. The latter adjustment is commonly referred to as a supply-demand adjustment. Six of the orders considered here do not have basic formula prices, since the Class I prices thereunder are established at differentials from the Class I prices of other orders. Six additional orders contain basic formula prices but do not use them to compute prices for Class I milk. Prices under these orders are likewise maintained in fixed relationship to those of other orders.

Among the several markets, there is a considerable diversity of basic formulas employed. All of the basic formulas include alternative computations of which the highest is the effective formula. In each of these formulas the average Midwest condensery paying price is one of the alternatives. Also, each basic formula (except in the Chicago order for a few recent months) uses a butter-powder formula computation. Eight different butter-powder formulas are employed in the several orders. Five of the orders use computations based on butter and cheese prices, of which there are three variations. In five orders, paying prices reported by local manufacturing plants is an alternative computation.

Producer groups and handlers generally supported the adoption of a uniform basic formula for all the orders. The average price for manufacturing grade milk f.o.b. plants in Wisconsin and Minnesota as reported by the Department was supported by many of the producer groups as a basis for achieving such uniformity. Some producer groups and handlers favored use of a butter-powder formula either as the basic formula price or as an alternative computation.

Proponents of the Wisconsin-Minnesota manufacturing grade milk price as a basic formula price supported its adoption for the following reasons: (1) Current basic formulas are subject to certain defects or weaknesses; (2) the proposed price is a better measure of manufacturing milk values; and (3) a single basic formula price in all the orders would provide a desirable basis for price alignment among the several orders.

The lack of uniformity among the various basic formulas and the consequent diversity of results produced in Class I prices constitutes a serious problem with respect to coordination of prices among these markets. The extent to which the Midwest condensery price, common to all orders, has been the effective price, has mitigated this problem in the past.

The Midwest condensery price was originally based on reports by 18 plants. From time to time individual plants have ceased operations. Recently, eight plants (6 in Wisconsin and 2 in Michigan) have been reporting prices. Four of these are operated by a single firm and two others by another firm. A further reduction in number of plants included is anticipated. The plant at New Glarus, Wisconsin, is reported to be ceasing operations. In addition to the effect that reductions in the number of plants have had in impairing this average price as a representative value of manufacturing milk, there is substantial evidence that the posted pay prices reported for the two Michigan plants in the series do not currently reflect the total cost of milk to such plants. As a consequence of these developments the Midwest condensery price can no longer be considered fully reliable as an accurate measure of manufacturing milk values.

The formula computations based on butter and nonfat dry milk prices are intended to reflect a manufacturing milk value based on prices of these products. Among the eight butter-powder formulas used, yield factors representing the amount of nonfat dry milk obtained from 100 pounds of milk vary from 7.0 pounds to 8.2 pounds. Also the amount deducted to give recognition to cost of processing varies among the formulas. Such cost factors are rigid elements in these formulas which do not respond to changes in efficiency.

The formulas based on prices of butter and cheese are affected by considerations similar to those in connection with butter-powder formulas.

Local plant paying prices have tended to play a lesser role in establishing basic formula prices. Generally they have been lower than other alternative formula computations. Since different groups of plants are used in each order, uniformity of pricing among orders cannot be attained by use of such prices.

Uniformity of basic formulas is desirable for the purposes of aligning prices among related markets and promoting understanding of order pricing methods among parties in the industry. Further, in view of the disadvantages inherent in the existing formulas based on product prices and the lessening representation provided by the Midwest condensery prices, it is imperative that a sounder basis for determining basic formulas be provided.

The price for manufacturing grade milk in the two-state area of Wisconsin and Minnesota is issued by the State-Federal Crop Reporting Service on about the 5th day of each month for milk received at manufacturing plants in these states in the previous month. Plant operators report the total pounds of manufacturing grade milk received from farmers, the butterfat content, and total money paid to farmers for the milk. The two-state area is one in which there is a heavy concentration of manufacturing grade milk and where many plants are competing for such supply. In Minnesota about 80 percent of the milk sold off farms is manufacturing grade and in Wisconsin, about 65 percent. About 50 percent of the manufacturing grade milk sold off farms in the United States is produced in these two states.

The average price for manufacturing grade milk in Minnesota and Wisconsin, as available on the 5th day following the month, better meets the requirements for a basic formula price than other formulas now used. It is representative of prices paid to farmers for about half of the manufacturing grade milk produced in the country. It is a price level determined by competitive conditions which are affected by demand in all of the major uses of manufactured dairy products. The system of reporting has been developed so that a reliable average price is available promptly and thus it provides just as current a basis for pricing milk as existing basic formulas.

It is concluded that the average price for manufacturing grade milk in Wisconsin and Minnesota, as reported by the Department on about the 5th day of the following month should be adopted as the basic formula price in these orders, excepting those whese prices are determined on the basis of differentials from other markets.

Inasmuch as the manufacturing milk price for the two-state area is reported by the Department as the price at actual butterfat test, a method for adjustment to the butterfat test (3.5 percent) used in these orders must be adopted. For this purpose a generally recognised value of butterfat, 0.12 times the average wholesale price for 92-score butter at Chicago, should be used. Such a method of adjustment was favored by producer groups at the hearing. A handler representative suggested that adjustment by direct ratio method would be more representative of the practice among plants purchasing manufacturing milk. It was shown, however, that at 116 manufacturing plants in Wisconsin, payment for manufacturing grade milk was made on the direct ratio basis by only 21 of the plants. Ninety-one of the plants adjusted from 3.5 percent prices by use of butterfat differentials which, if used for conversion of the Minnesota-Wisconsin price to a 3.5 percent basis, would result in a price no less than that resulting from the differential proposed herein.

The proposal to use a butter-powder formula as an alternative basic formula computation is not adopted. To be effective, such a butter-powder formula would need to be constructed so that it represents about the same level of price as the Minnesota-Wisconsin manufacturing milk price. To the extent that it did become effective, it would tend to represent milk values in these particular uses rather than the general value in all major uses represented by the Minnesota-Wisconsin manufacturing milk price. Thus, it would tend to be less truly representative of manufacturing milk prices. Accordingly, such an alternative computation is unnecessary and undesirable.

Representatives of producer interests in these markets asked that certain adjustments be made in the Class I price differentials which are added to the basic formula price if the Minnesota-Wisconsin manufacturing milk price were used as the basic formula. Based upon average relationships in a seven year period (1955–1961) they asked that Class I differentials in individual markets be increased by amounts ranging from 2–3 cents in most markets to 10–13 cents in markets for which basic formula prices of the orders now include or have included particularly favorable butter-powder or butter-cheese alternative formulas. A number of handlers argued that the conversion should be based strictly upon current relationships prevailing for either the last five months of 1961 or for some portion of that period, and that action be such as to provide no current increase of price from the conversion. On this basis a suggestion was offered that the Class I differentials of most orders be reduced 10 cents, and that no change be made in the differentials of those few orders in which the butter-powder formula price currently exceeds the Minnesota-Wisconsin price.

Because of the variety of basic formulas among the various markets, a uniform basis for considering a need for such adjustments is not possible. Further, the existing basic formulas have not maintained precise relationships with the Minnesota-Wisconsin series during the years 1955 through 1961. In view of the variations in such relationships it is not possible to establish with any precision relationships which might be expected to obtain in the future.

In the Chicago order, effective beginning with September 1961, the price for manufacturing grade milk in Wisconsin and Minnesota became an alternative, along with the Midwest condensery price, for the basic formula price. This formula is accordingly reflected in eight markets whose prices are based on Chicago. These markets included Cedar Rapids-Iowa City, Des Moines, North Central Iowa, Ozarks, Quad Cities-Dubuque, Rockford-Freeport, St. Louis and Suburban St. Louis.

The transition to pricing Class I milk on the basis of the Minnesota-Wisconsin manufacturing milk price has already been accomplished without change in Class I differentials with respect to the Chicago market and the eight markets previously named in which the Class I price is established at a differential above or below the Chicago price. Because the Midwest condensery price has been lower than the Minnesota-Wisconsin price, the latter has established the level of Class I price. The price data for both series (condensery and Minnesota-Wisconsin) do not provide any basis for adjusting the Class I level in the Chicago order from that currently established on the basis of the Minnesota-Wisconsin price and existing Class I price differentials. For the three most recent years, 1959, 1960, and 1961, the Midwest condensery price has averaged 1 cent less than the Minnesota-Wisconsin price. Except for the latter part of 1961, the Midwest condensery price and the Minnesota-Wisconsin price represented virtually the same level of price. During recent months the Midwest condensery price has been below its former relationship with paying prices in the area, and has not reflected its usual relationship to values of manufactured dairy products. This relative weakness of the condensery price is a symptom of its progressive failure to represent accurately manufacturing milk values. In view of this situation it would not be appropriate to decrease Class I differentials in these markets to reflect recent levels in the condensery price.

For those orders which use the same basic formula price as contained in the Chicago order prior to the September 1, 1961, amendment, the same method of transition should be used. This will provide the best method of maintaining price alignment among markets. These markets include Milwaukee, Michigan Upper Peninsula, Northeast Wisconsin, Duluth-Superior and South Bend-LaPorte-Elkhart.

The Paducah order basic formula differs from those of the orders in this group only in the use of local plant prices. Since the local plant prices have been lower than the alternative computations they have not been effective as a basic formula. Accordingly, the same method of transition to the new basic formula would apply for the Paducah order as other markets with basic formulas which differ only in not including local plant prices.

The transition for 13 other markets considered at this hearing represents a problem similar to that in markets just discussed which have basic formulas of the type in the Chicago market prior to the September 1, 1961, amendment. These markets include:

Northeastern Ohio.	Muskegon.
Toledo.	Upstate Michigan.
Fort Wayne.	Kansas City.
Wheeling.	St. Joseph.
Clarksburg.	Minneapolis-St. Paul.
North Central Ohio.	Youngstown-Warren.
Southern Michigan.	

Among these, St. Joseph has a Class I price based on the price under the Kansas City order. Although the order contains a basic formula price this is not used to establish Class I prices. The Youngstown-Warren order similarly contains a basic formula price which is not used, since the price is established by relationship to the price under the Northeastern Ohio order. The North Central Ohio order contains no basic formula price, and the Class I price is based on the Class I price under the Northeastern Ohio order.

For all of these 13 markets, the effective basic formula prices in recent months have been only slightly different from the basic formula prices in markets with the type used in the Chicago order prior to September 1, 1961. The average difference of the basic formulas from the Wisconsin-Minnesota manufacturing milk price in the years 1959, 1960, and 1961 has been less than one cent. It is concluded that the transition to the new basic formula should be made without change in the Class I price differentials. Proposed reductions in the Class I differentials for some of these markets are denied because (1) such reductions would result in distortion of present price alignments among markets, and (2) the differentials should not be reduced to reflect the current weakness in condensery prices cited elsewhere in this decision.

In some markets basic formula prices in recent months have exceeded the Minnesota-Wisconsin manufacturing milk price. These markets include Dayton-Springfield, Cincinnati, Columbus, Indianapolis, Louisville-Lexington, and Ohio Valley. In the Memphis and Central Arkansas markets, also, this relationship has existed, but a recommended decision has been issued (October 20, 1961; 26 F.R. 9860) which would change the basic formula price to conform to that under the Paducah order. With respect to Dayton-Springfield and other markets of this group (excluding Memphis and Central Arkansas) an adjustment of the Class I price differentials should be made such that substitution of the Minnesota-Wisconsin manufacturing milk price as a basic formula would not have resulted in lower Class I prices in recent months. (These months would include those beginning with August 1961, which was the first month for which the Minnesota-Wisconsin manufacturing milk price was published on current basis, and through December.) For the Dayton-Springfield, Indianapolis, Ohio Valley, Louisville-Lexington and Cincinnati markets this would be accomplished by an upward adjustment of 4 cents per hundredweight in the stated differentials. For the Columbus market this would be accomplished with an upward adjustment of 1 cent per hundredweight.

The suggested adjustment of Class I price differentials based on a comparison of order basic formula prices with the Minnesota - Wisconsin manufacturing milk price in earlier years does not provide a valid basis for transition from current levels of the existing basic formula prices. The suggested comparison does not allow for recognized changes in the industry. The butter-powder formulas contained in these orders do not reflect the increasing efficiency of manufacturing plants. The margin of such butter-powder price formulas over the Minnesota-Wisconsin series during the 1955–61 period has shown a trend towards convergence. During the year 1960 the relationship was reversed and

for several months the Minnesota-Wisconsin manufacturing price was the higher of the two.

No amendment will be required to carry out the conclusions of this decision with respect to eleven of the orders affected. There are no basic formulas included in the orders for the Cedar Rapids-Iowa City, Des Moines, North Central Iowa, Quad Cities-Dubuque, Rockford-Freeport, or North Central Ohio markets. The North Central Ohio Class I price is in fixed relation to that of the Northeastern Ohio order and Class I prices of the other orders named are in fixed relation to the Chicago price. Basic formulas in the St. Louis, Ozarks, Suburban St. Louis, St. Joseph, and Youngstown-Warren orders are not used in the computation of prices for Class I milk, as Class I prices in these markets are also maintained, either directly or indirectly in fixed relationship to other markets for which amendments are herein provided.

Amendments to carry out the conclusions of this decision with respect to this issue and issue number two with respect to orders for the Memphis, Tennessee, and Central Arkansas orders (Parts 1097 and 1100) are being combined with those resulting from decisions relative to issues of other hearings for which recommended decisions were issued October 17, 1961 (26 F.R. 9860) and February 7, 1962 (27 F.R. 1287). Accordingly, no amendments with respect to these orders are attached hereto.

Amendments to carry out the conclusions of this decision with respect to the Ohio Valley and Louisville-Lexington, Kentucky, orders (Parts 1046 and 1095) are in the form of amendments to the "order regulating the handling of milk in the Louisville-Lexington-Evansville marketing area" attached to the decision issued with respect to proposed consolidation of such orders.

Amendment provisions included in the recommended decision with respect to the Milwaukee, Wisconsin, order (Part 1030), and the Northeastern Wisconsin order (Part 1045) represented further modifications of provisions included in recommended decisions issued with respect to issues of prior hearings in these markets, and the omission of an amendment to the Michigan Upper Peninsula order (Part 1044) was in conformity with provisions included in such a recommended decision. It is now unlikely that mandatory action with respect to such proceedings will be completed by the time that action must be taken in these markets with respect to the conclusions of this decision. Accordingly, the amendatory provisions included herein are stated as modifications of presently existing regulations.

Conforming changes are required in a substantial number of the remaining orders to continue without change the pricing provisions for milk classified in classes other than Class I (or Class II under the Chicago order). In a few orders conforming changes have been adopted to avoid duplication of language. For uniformity, the basic formula price has been defined as the manufacturing milk pay price for the current month. All orders in which one month's basic price is now used to compute the Class I price for the succeeding month will continue that practice.

2. Prices under the Central Arkansas and Memphis orders should be stated on a 3.5 percent butterfat basis.

Class prices and producer prices under these orders are presently stated on a four percent butterfat basis. In order that the uniformity of basic formula prices provided herein may be maintained prices in these markets should be stated at the same butterfat content, 3.5 percent, as for other markets involved in this hearing. The Class I price in these orders is presently adjusted from 4.0 percent to other butterfat tests by a butterfat differential identical with that herein proposed for conversion of the Minnesota-Wisconsin pay price from the price reported at test to a 3.5 percent basis.

In order that change in the basic fat test will not affect the level of the Class II price at any given test it is provided that the price presently computed at 4.0 percent butterfat be converted to a 3.5 percent price by use of the Class II butterfat differential of the order. Producer prices under the order should also be announced at a 3.5 percent test to avoid confusion. Cooperative associations will not thereby be prevented from using the 4.0 percent basis in distributing returns to their members producers. The producer price at any given test will remain the same whether computed on a 3.5 percent or a 4.0 percent basis.

Evidence was also received concerning use of a 3.5 percent pricing basis in the orders for the Louisville-Lexington and Ohio Valley marketing areas. Subsequent to this hearing a recommended decision was issued on the basis of evidence received at a public hearing held September 17–21, 1961, in which merger of these orders into a single regulation with prices stated on a 3.5 percent basis was recommended. This record corroborates the findings of that decision with respect to the basic butterfat test to be used.

Rulings on special appearance and on proposed findings and conclusions. In a special appearance entered on behalf of certain handlers in a single market (Cincinnati), objection was raised that the location and duration of the hearing did not afford "reasonable opportunity to be heard" and that the notice of hearing was not sufficiently specific. Such objections are hereby overruled. The location of the hearing was central for the 36 markets at issue. All witnesses who desired to testify were heard. There was no request for extension of time or change in location of the hearing. No evidence was received with respect to changes in those provisions concerning which the objector claimed that additional preparation and testimony would be required.

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General findings. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreements and the orders, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing areas, and the minimum prices specified in the proposed marketing agreements and the orders, as hereby proposed to be amended, are such respective prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreements and the orders, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Rulings on exceptions. In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

Marketing agreements and orders. Annexed hereto and made a part hereof are forty-four documents entitled respectively, "Marketing Agreement Regulating the Handling of Milk in the Greater Wheeling Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Greater Wheeling Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Clarksburg, W. Va., Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Clarksburg, W. Va., Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Chicago, Illinois, Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Chicago, Illinois, Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the South Bend-La Porte-Elkhart, Indiana, Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the

South Bend-La Porte-Elkhart, Indiana, Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Greater Cincinnati Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Greater Cincinnati Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Dayton-Springfield, Ohio, Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Dayton-Springfield, Ohio, Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Columbus, Ohio, Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Columbus, Ohio, Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Northeastern Ohio Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Northeastern Ohio Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Milwaukee, Wisconsin, Marketing Area", "Order Amending the Order Regulating the Handling in the Milwaukee, Wisconsin, Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Southern Michigan Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Southern Michigan Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Toledo, Ohio, Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Toledo, Ohio, Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Muskegon, Michigan, Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Muskegon, Michigan, Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Upstate Michigan Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Upstate Michigan Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Michigan Upper Peninsula Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Michigan Upper Peninsula Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Northeastern Wisconsin Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Northeastern Wisconsin Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Louisville-Lexington-Evansville Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Louisville-Lexington-Evansville Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Fort Wayne, Indiana, Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Fort Wayne, Indiana, Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Indianapolis, Indiana, Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Indianapolis, Indiana, Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Greater Kansas City Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Greater Kansas City Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Minneapolis-St. Paul, Minnesota, Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Minneapolis-St. Paul, Minnesota, Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Duluth-Superior Marketing Area", "Order Amending the Order Regulating the Handling of Milk in the Duluth-Superior Marketing Area", "Marketing Agreement Regulating the Handling of Milk in the Paducah, Kentucky, Marketing Area", and "Order Amending the Order Regulating the Handling of Milk in the Paducah, Kentucky, Marketing Area", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That all of this decision, except the attached marketing agreements, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreements are identical with those contained in the respective orders as hereby proposed to be amended by the attached orders which will be published with this decision.

Determination of representative period. The month of December 1961 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the attached orders amending the orders regulating the handling of milk in the Greater Wheeling; Clarksburg, W. Va.; Chicago, Illinois; South Bend-LaPorte-Elkhart, Indiana; Greater Cincinnati; Dayton-Springfield, Ohio; Columbus, Ohio; Northeastern Ohio; Milwaukee, Wisconsin; Southern Michigan; Toledo, Ohio; Muskegon, Michigan; Upstate Michigan; Michigan Upper Peninsula; Northeastern Wisconsin; Louisville-Lexington-Evansville; Fort Wayne, Indiana; Indianapolis, Indiana; Greater Kansas City; Minneapolis-St. Paul, Minnesota; Duluth-Superior; and Paducah, Kentucky, marketing areas, respectively, are approved or favored by producers, as defined under the terms of the respective orders as hereby proposed to be amended, and who, during such representative period, were engaged in the production of milk for sale within the aforesaid respective marketing areas.

Signed at Washington, D.C., on February 21, 1962.

CHARLES S. MURPHY,
Under Secretary.

Order[1] Amending the Order Regulating the Handling of Milk in the Greater Wheeling Marketing Area

§ 1008.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Greater Wheeling marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Greater Wheeling marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1008.50 and substitute therefor the following:

§ 1008.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the Chicago butter price for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1008.51 [Amendment]

2. Delete § 1008.51(b) and substitute therefor the following:

(b) *Class II milk price.* The Class II milk price shall be the highest of the prices computed pursuant to subparagraphs (1), (2), and (3) of this paragraph, rounded to the nearest whole cent.

(1) The average of the basic or field prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department:

Company and Location

Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(2) The price resulting from the following computation:

(i) Multiply by 6 the simple average as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the Department of Agriculture during the month for which prices are being computed;

(ii) Add an amount equal to 2.4 times the simple average as published by the Department of Agriculture of the prices determined per pound of "Cheddars" on the Wisconsin Cheese Exchange for the trading days that fall within the month; and

(iii) Divide by 7 and to the resulting amount add 30 percent; and then multiply by 3.5;

(3) The price per hundredweight computed by adding together the plus values of subdivisions (i) and (ii) of this subparagraph:

(i) From the Chicago butter price, subtract 3 cents, add 20 percent thereof, and multiply by 3.5.

(ii) From the simple average as computed by the market administrator of the weighted averages of the carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department, deduct 5.5 cents and multiply by 8.2.

Order[1] Amending the Order Regulating the Handling of Milk in the Clarksburg, W. Va., Marketing Area

§ 1009.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Clarksburg, W. Va., marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Clarksburg, W. Va., marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1009.50 and substitute therefor the following:

§ 1009.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the Chicago butter price for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1009.51 [Amendment]

2. Delete § 1009.51(b) and substitute therefor the following:

(b) *Class II milk price.* The Class II milk price shall be the highest of the prices computed pursuant to subparagraphs (1), (2), and (3) of this paragraph, rounded to the nearest whole cent.

(1) The average of the basic or field prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department:

Company and Location

Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(2) The price resulting from the following computation:

(i) Multiply by 6 the simple average as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the Department of Agriculture during the month for which prices are being computed;

(ii) Add an amount equal to 2.4 times the simple average as published by the Department of Agriculture of the prices determined per pound of "Cheddars" on the Wisconsin Cheese Exchange, for the trading days that fall within the month; and

(iii) Divide by 7 and to the resulting amount add 30 percent; and then multiply by 3.5.

(3) The price per hundredweight computed by adding together the plus values of subdivisions (i) and (ii) of this subparagraph:

(i) From the Chicago butter price, subtract 3 cents, add 20 percent thereof, and multiply by 3.5; and

(ii) From the simple average as computed by the market administrator of the weighted averages of the carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department, deduct 5.5 cents and multiply by 8.2.

Order[1] Amending the Order Regulating the Handling of Milk in the Chicago, Illinois, Marketing Area

§ 1030.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Chicago, Illinois, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Chicago, Illinois, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1030.50 and substitute therefor the following:

§ 1030.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by the butterfat differential pursuant to § 1030.82. The basic formula price shall be rounded to the nearest full cent.

§ 1030.52 [Amendment]

2. In § 1030.52 (a) and (b) change the phrase "the basic formula price plus" to "the basic formula price for the preceding delivery period plus".

3. Replace § 1030.52(c) with the following:

(c) *Class III milk.* The price per hundredweight for Class III milk shall be the basic formula price.

Order[1] Amending the Order Regulating the Handling of Milk in the South Bend-La Porte-Elkhart, Indiana, Marketing Area

§ 1031.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the South Bend-La Porte-Elkhart, Indiana, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the South Bend-La Porte-Elkhart, Indiana, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1031.51 and substitute therefor the following:

§ 1031.51 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1031.53 [Amendment]

2. In § 1031.53 immediately after the words "basic formula price" insert "for the preceding month".

§ 1031.54 [Amendment]

3. Delete § 1031.54(a) and substitute therefor the following:

(a) The average of the basic or field prices reported to have been paid, or to be paid, per hundredweight for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department:

Present Operator and Location

Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

§ 1031.55 [Amendment]

4. In § 1031.55 change "§ 1031.51(a)" to "§ 1031.54(a)."

Order[1] Amending the Order Regulating the Handling of Milk in the Greater Cincinnati Marketing Area

§ 1033.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Greater Cincinnati marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Greater Cincinnati marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1033.50 and substitute therefor the following:

§ 1033.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the Chicago butter price for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1033.51 [Amendment]

2. In § 1033.51(a) change "$1.30" to "$1.34".

3. Delete § 1033.51(b)(2) and substitute therefor the following:

(2) From the average of carlot prices per pound for nonfat dry milk, spray process, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th of the immediately preceding month through the 25th day of the current month by the United States Department of Agriculture, deduct 5.5 cents and multiply the result by 8.2.

4. Delete § 1033.52(c) and substitute therefor the following:

(c) *Class III milk.* (1) Multiply the Chicago butter price less 5.0 cents by 120;

(2) Subtract the amount computed by deducting 6.4 cents from the average price for nonfat dry milk, spray process, described in § 1033.51(b)(2) and multiply the result by 8.2; and

(3) Divide the result by 1000: *Provided,* That for each of the months of September through February, the butterfat differential for Class III milk other than that used to produce butter shall be the same as the butterfat differential for Class II milk for such month.

Order[1] Amending the Order Regulating the Handling of Milk in the Dayton-Springfield, Ohio Marketing Area

§ 1034.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Dayton-Springfield, Ohio, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Dayton-Springfield, Ohio, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1034.50 and substitute therefor the following:

§ 1034.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the Chicago butter price for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1034.51 [Amendment]

2. In § 1034.51(a) change "$1.20" to "$1.24".

Order[1] Amending the Order Regulating the Handling of Milk in the Columbus, Ohio, Marketing Area

§ 1035.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Columbus, Ohio, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Columbus, Ohio, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1035.50 and substitute therefor the following:

§ 1035.50 Basic formula prices.

(a) The basic formula price for Class I milk shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

the Chicago butter price for the month. The basic formula price shall be rounded to the nearest full cent.

(b) The basic formula price for Class II and Class III milk shall be the higher of the prices as computed to the nearest one-tenth of a cent by the market administrator pursuant to subparagraphs (1) and (2) of this paragraph:

(1) The arithmetical average of the basic (or field) prices per hundredweight reported to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices are reported to the market administrator or to the Department by the companies listed below:

Company and Location

Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(2) The price per hundredweight computed by adding together the plus amounts calculated pursuant to subdivisions (i) and (ii) of this subparagraph:

(i) From the Chicago butter price, subtract 3.5 cents, and multiply the difference by 4.2; and

(ii) From the nonfat dry milk price, subtract 4 cents and multiply the difference by 8.2.

§ 1035.51 [Amendment]

2. In § 1035.51(a) change the phrase "basic formula price for the preceding month, plus $1.10" to "basic formula price computed pursuant to § 1035.50(a) for the preceding month, plus $1.11".

3. In § 1035.51 (b) and (c) change the phrase "basic formula price" to "basic formula price determined pursuant to § 1035.50(b)".

4. In § 1035.51(d) change the reference "§ 1035.50(b) '(1) and (2)" to "§ 1035.50 (b)(2) (i) and (ii)".

Order[1] Amending the Order Regulating the Handling of Milk in the Northeastern Ohio Marketing Area

§ 1036.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Northeastern Ohio marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Northeastern Ohio marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1036.50 and substitute therefor the following:

§ 1036.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture for the month. The basic formula price shall be rounded to the nearest full cent.

2. Delete § 1036.52 and § 1036.53 and substitute therefor the following:

§ 1036.52 Class II milk prices.

The minimum price per hundredweight to be paid by each handler, f.o.b. his plant, for producer milk of 3.5 percent butterfat content received from producers or from a cooperative association during the month, which is classified as Class II utilization, shall be the higher of the prices per hundredweight of milk of 3.5 percent butterfat content computed by the market administrator pursuant to paragraphs (a) and (b) of this section, plus 30 cents.

(a) The average of the basic (or field) prices ascertained to have been paid per hundredweight for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator by the Department of Agriculture or by the companies indicated below:

Company and Location

Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed by adding together the plus amounts pursuant to subparagraphs (1) and (2) of this paragraph:

(1) From the average of the daily wholesale selling prices per pound (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter for the month as reported by the Department of Agriculture for the Chicago market, subtract 8 cents, add 20 percent of the resulting amount and then multiply by 3.5; and

(2) From the simple average of the weighted averages of the carlot prices per pound of spray and roller process nonfat dry milk solids for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department of Agriculture, deduct 8.5 cents, multiply by 8.5 and then multiply by 0.965.

§ 1036.53 Class III milk prices.

The minimum price per hundredweight to be paid by each handler, f.o.b. his plant, for producer milk of 3.5 percent butterfat content received from producers or from a cooperative association during the month, which is classified as Class III utilization, shall be the basic formula price, as computed pursuant to § 1036.50, but in no event shall the Class III price exceed the price computed pursuant to § 1036.52(b) plus 10 cents.

Order[1] Amending the Order Regulating the handling of Milk in the Milwaukee, Wisconsin, Marketing Area

§ 1039.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Milwaukee, Wisconsin, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Milwaukee, Wisconsin, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1039.50 and substitute therefor the following:

§ 1039.50 Basic formula price.

The basic formula price shall be the average price for hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by the butterfat differential pursuant to § 1039.81 and rounded to the nearest full cent.

2. In § 1039.51 (a) and (b) change the phrase "basic formula price" to "basic formula price for the preceding month".

3. Delete § 1039.51(c) and substitute therefor the following:

(c) *Class III milk.* The price for Class III milk shall be the average of the prices per hundredweight reported to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the U.S.D.A. or to the market administrator.

Present Operator and Location

Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Co., Manitowoc, Wis.
White House Co., West Bend, Wis.

Provided, That when the price for Class IV milk for the month is higher than the price computed pursuant to this paragraph, the price for Class III(a) milk shall be the latter price and the price for all other Class III milk shall be the price for Class IV milk.

4. Delete § 1039.51(d) and substitute therefor the following:

(d) *Class IV milk.* The price for Class IV milk shall be the price per hundredweight computed from the following formula:

(1) Multiply by 4.24 the simple average as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) for Grade AA (93-score) bulk creamery butter per pound at Chicago, as reported by the U.S.D.A. during the month: *Provided,* That if no price is reported for Grade AA (93-score) butter, the highest of the Grade A (92-score) butter prices for that day shall be used in lieu of the price for Grade AA (93-score) butter;

(2) Multiply by 8.2 the weighted average of carlot prices per pound of spray process nonfat dry milk solids, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the U.S.D.A.; and

(3) From the sum of the results arrived at under subparagraphs (1) and (2) of this paragraph subtract 75.2 cents.

Order[1] Amending the Order Regulating the Handling of Milk in the Southern Michigan Marketing Area

§ 1040.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Southern Michigan marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Southern Michigan marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1040.50 and substitute therefor the following:

§ 1040.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture for the month. The basic formula price shall be rounded to the nearest full cent.

2. Delete § 1040.52 and substitute therefor the following:

§ 1040.52 Class II milk price.

The minimum price per hundredweight to be paid by each handler, f.o.b. his plant, for milk of 3.5 percent butterfat content received from producers or from a cooperative association during the month which is classified as Class II utilization shall be as follows:

(a) In the months of February through September the higher of:

(1) The average of the prices per hundredweight reported to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from farmers during the month at the following plants, except any which meet the qualification of § 1040.16, for which prices have been reported to the market administrator:

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedures governing proceedings to formulate marketing agreements and marketing orders have been met.

Present Operator and Location

Borden Co., Mt. Pleasant, Mich.
Carnation Co., Sheridan, Mich.
Carnation Co., Sparta, Mich.
Fairmont Foods Co., Bad Axe, Mich.
Kraft Foods, Clare, Mich.
Kraft Foods, Pinconning, Mich.
Nestle Co., Ubly, Mich.

or

(2) The price per hundredweight computed by subtracting 18.3 cents from the sum of the plus amounts computed pursuant to subdivisions (i) and (ii) of this subparagraph:

(i) From the average of the daily wholesale selling prices per pound (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter for the month as reported by the Department of Agriculture for the Chicago market, subtract three cents, add 20 percent of the resulting amount and then multiply by 3.5; and

(ii) From the simple average of the weighted averages of the carlot prices per pound of spray and roller process nonfat dry milk solids for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department of Agriculture, deduct 5.5 cents, multiply by 8.2; and

(b) In the months of October, November, December and January, add 20 cents per hundredweight to the price determined pursuant to paragraph (a) of this section.

Order[1] Amending the Order Regulating the Handling of Milk in the Toledo, Ohio, Marketing Area

§ 1041.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Toledo, Ohio, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified, in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Toledo, Ohio, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

§ 1041.50 [Amendment]

1. Delete § 1041.50(b) and substitute therefor the following:

(b) *Class II milk price.* The Class II milk price shall be the highest of the prices per hundredweight for milk of 3.5 percent butterfat content computed pursuant to subparagraphs (1) and (2) of this section.

(1) The average of the basic (or field) prices reported to have been paid or to be paid per hundredweight for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department on or before the 5th day after the end of the month by the companies indicated below:

Companies and Location

Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(2) The price per hundredweight computed by adding together the plus values pursuant to subdivisions (i) and (ii) of this subparagraph:

(i) From the Chicago butter price subtract three cents, and multiply by 4.2; and

(ii) From the arithmetical average of the carlot prices per pound for nonfat dry milk (not including that specifically designated animal feed), spray and roller process, f.o.b. manufacturing plants in the Chicago area, as published by the Department during the month, deduct 5.5 cents, and multiply by 8.2, except that if such agency does not publish such prices f.o.b. manufacturing plants, there shall be used for the purpose of this computation the arithmetical average of the carlot prices thereof delivered at Chicago, Illinois, as published weekly by such agency during the month; and in the latter event the figure "7.5" shall be substituted for "5.5" in the above formula.

2. Delete § 1041.51 and substitute therefor the following:

§ 1041.51 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the Chicago butter price for the month. The basic formula price shall be rounded to the nearest full cent.

Order[1] Amending the Order Regulating the Handling of Milk in the Muskegon, Michigan, Marketing Area

§ 1042.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Muskegon, Michigan, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified, in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Muskegon, Michigan, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1042.50 and substitute therefor the following:

§ 1042.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential computed at 0.12 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture for the month. The basic formula price shall be rounded to the nearest full cent.

Order[1] Amending the Order Regulating the Handling of Milk in the Upstate Michigan Marketing Area

§ 1043.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Upstate Michigan marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Upstate Michigan marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1043.50 and substitute therefor the following:

§ 1043.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1043.51 [Amendment]

2. Delete § 1043.51 (b) and (c), and substitute therefor the following:

(b) *Class II milk.* The Class II milk price shall be the highest of the prices computed pursuant to subparagraphs (1), (2), and (3) of this section.

(1) The average of the basic or field prices per hundredweight reported to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the USDA:

Present Operator and Location

Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(2) The price per hundredweight computed by adding together the plus values computed pursuant to subdivisions (i) and (ii) of this subparagraph:

(i) From the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the mid-point of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the USDA during the month; subtract 3 cents, add 20 percent thereof and multiply by 3.5.

(ii) From the simple average, as computed by the market administrator, of the weighted averages of carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f.o.b. manufacturing plants in Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the U.S.D.A., deduct 5.5 cents and then multiply by 8.2.

(3) The average of the basic or field prices per hundredweight reported to have been paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants:

Kraft Foods Co., Cadillac, Mich.
Borden Co., Mount Pleasant, Mich.
Carnation Co., Sparta, Mich.
Kraft Foods Co., Clare, Mich.

(c) *Class III milk.* The Class III milk price shall be the Class II milk price less 20 cents.

§ 1043.62 [Amendment]

3. In § 1043.62 change "§ 1043.50(b) (1)" to "§ 1043.51(b) (2) (i)".

Order[1] Amending the Order Regulating the Handling of Milk in the Michigan Upper Peninsula Marketing Area

§ 1044.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Michigan Upper Peninsula marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Michigan Upper Peninsula marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1044.50 and substitute therefor the following:

§ 1044.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture for the month. The basic formula price shall be rounded to the nearest full cent.

2. Delete § 1044.52 and substitute the following:

§ 1044.52 Class II milk price.

Subject to the provisons of § 1044.54, the minimum price to be paid by each handler for milk received at his fluid milk plant from producers or from the fluid milk plant of a cooperative association, during the month and utilized as Class II milk shall be the higher of the prices computed pursuant to paragraphs (a) and (b) of this section:

(a) The average of the basic or field prices per hundredweight reported to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the USDA:

Present Operator and Location

Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed from the following formula:

(1) Multiply by 4.24 the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade AA (93-score) bulk creamery butter per pound at Chicago, as reported by the USDA, during the month: *Provided*, That if no price is reported for Grade AA (93-score) butter, the highest of the prices reported for Grade A (92-score) butter for that day shall be used in lieu of the price for Grade AA (93-score) butter.

(2) Multiply by 8.2 the weighted average of carlot prices per pound for spray process nonfat dry milk, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding delivery period through the 25th day of the current delivery period, by the USDA; and

(3) From the sum of the results arrived at under subparagraphs (1) and (2) of this paragraph subtract 75.2 cents and adjust to the nearest full cent.

3. In § 1044.53 delete "§ 1044.50(b)" and substitute therefor "§ 1044.52(b)".

Order[1] Amending the Order Regulating the Handling of Milk in the Northeastern Wisconsin Marketing Area

§ 1045.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Northeastern Wisconsin marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Northeastern Wisconsin marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1045.50 and substitute therefor the following:

§ 1045.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture for the month. The basic formula price shall be rounded to the nearest full cent.

2. Delete § 1045.52 and substitute therefor the following:

§ 1045.52 Class II milk price.

Subject to the provisions of § 1045.54, the minimum price per hundredweight to be paid by each handler for milk received at his pool plant from producers or the pool plant of a cooperative association during the month and utilized in Class II milk shall be the higher of the prices computed as follows:

(a) The average of the basic or field prices per hundredweight reported to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the USDA:

Present Operator and Location

Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price computed from the following formula:

(1) Multiply by 4.24 the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade AA (93-score) bulk creamery butter per pound at Chicago, as reported by the USDA, during the month: *Provided*, That if no price is reported for Grade AA (93-score) butter, the highest of the prices reported for Grade A (92-score) butter for that day shall be used in lieu of the price for Grade AA (93-score) butter;

(2) Multiply by 8.2 the weighted average of carlot prices per pound for spray process nonfat dry milk, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the USDA; and

(3) From the sum of the results arrived at under subparagraphs (1) and (2) of this paragraph subtract 75.2 cents and adjust to the nearest cent.

2. In § 1045.53 delete "§ 1045.50(b)" and substitute therefor "§ 1045.52(b)".

Order[1] Amending the Order Regulating the Handling of Milk in the Louisville-Lexington-Evansville Marketing Area

§ 1046.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the orders regulating the handling of milk in the Louisville-Lexington, Kentucky and Ohio Valley marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Louisville-Lexington-Evansville marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as attached to the decision of the Under Secretary of Agriculture issued February 15, 1962, and as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1046.50 and substitute therefor the following:

§ 1046.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the Chicago butter price for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1046.51 [Amendment]

2. In § 1046.51(a), in the language preceding subparagraph (1), delete "$1.25" and substitute "$1.29".

Order[1] Amending the Order Regulating the Handling of Milk in the Fort Wayne, Indiana, Marketing Area

§ 1047.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Fort Wayne, Indiana, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof the handling of milk in the Fort Wayne, Indiana, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1047.50 and substitute therefor the following:

§ 1047.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the Chicago butter price for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1047.51 [Amendment]

2. Replace § 1047.51(b) with the following:

(b) *Class II milk price.* The price for Class II milk of 3.5 percent butterfat content shall be the higher of the prices per hundredweight of milk of 3.5 percent butterfat content computed by the market administrator pursuant to subparagraphs (1) and (2) of this paragraph rounded to the nearest cent:

(1) The average of the basic (or field) prices ascertained to have been paid per hundredweight for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator by the Department or by the companies indicated as follows:

Present Operator and Location

Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(2) The price per hundredweight computed by adding together the plus amounts pursuant to subdivisions (i) and (ii) of this subparagraph:

(i) From the Chicago butter price, subtract three cents, and then multiply by 4.2; and

(ii) From the simple average of the weighted averages of the carlot prices per pound of spray and roller process nonfat dry milk solids for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

Department, deduct 5.5 cents and multiply by 8.2.

Order[1] Amending the Order Regulating the Handling of Milk in the Indianapolis, Indiana, Marketing Area

§ 1049.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Indianapolis, Indiana, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Indianapolis, Indiana, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1049.50 and substitute therefor the following:

§ 1049.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the butter price for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1049.51 [Amendment]

2. Delete § 1049.51(a) and substitute therefor the following:

(a) *Class I milk price.* The price for Class I milk shall be the basic formula price for the preceding month, plus $1.29.

3. Delete § 1049.51(b) and substitute therefor the following:

(b) *Class II milk price.* The price for Class II milk shall be the higher of the prices, rounded to the nearest cent, computed as follows:

(1) The average of the basic or field prices reported to have been paid or to be paid per hundredweight for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department:

Present Operator and Location

Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(2) The sum of the amounts computed pursuant to subdivision (i) and (ii) of this subparagraph.

(i) Multiply the butter price by 4.2.

(ii) From the arithmetical averages of the weighted average of carlot prices per pound of spray and roller process nonfat dry milk for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the preceding month through the 25th day of the current month by the Department, deduct 5.5 cents and multiply by 8.2.

Order[1] Amending the Order Regulating the Handling of Milk in the Greater Kansas City Marketing Area

§ 1064.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Greater Kansas City marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Greater Kansas City marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1064.50 and substitute therefor the following:

§ 1064.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1064.52 [Amendment]

2. In § 1064.52 (a) and (b), and in § 1064.82, delete "§ 1064.50(b)(1)" and substitute therefor "§ 1064.50".

Order[1] Amending the Order Regulating the Handling of Milk in the Minneapolis-St. Paul, Minnesota, Marketing Area

§ 1068.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Minneapolis-St. Paul, Minnesota, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Minneapolis-St. Paul, Minnesota, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1068.51 and substitute therefor the following:

§ 1068.51 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1068.53 [Amendment]

2. In § 1068.53 change the phrase "basic formula price" to "basic formula price for the preceding month".

3. Delete § 1068.54 and substitute therefor the following:

§ 1068.54 Class II price.

The price per hundredweight for Class II milk shall be the basic formula price.

Order[1] Amending the Order Regulating the Handling of Milk in the Duluth-Superior Marketing Area

§ 1069.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Duluth-Superior marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Duluth-Superior marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1069.50 and substitute therefor the following:

§ 1069.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1069.51 [Amendment]

2. Replace § 1069.51(b) with the following:

(b) *Class II milk.* The Class II price per hundredweight of milk of 3.5 percent butterfat content shall be determined each month as follows:

(1) Multiply by 4.24 the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade AA (93-score) bulk creamery butter per pound at Chicago, as reported by the Department, during the delivery period: *Provided*, That if no price is reported for Grade AA (93-score) butter, the highest of the prices reported for Grade A (92-score) butter for that day shall be used in lieu of the price for Grade AA (93-score) butter;

(2) Multiply by 8.2 the weighted average of carlot prices per pound for spray process nonfat dry milk solids, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month, by the Department; and

(3) From the sum of the results arrived at under subparagraphs (1) and (2) of this paragraph subtract 75.2 cents and adjust to the nearest full cent.

Order[1] Amending the Order Regulating the Handling of Milk in the Paducah, Kentucky, Marketing Area

§ 1099.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Paducah, Kentucky, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Paducah, Kentucky, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1099.50 and substitute therefor the following:

§ 1099.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture for the month. The basic formula price shall be rounded to the nearest full cent.

§ 1099.51 [Amendment]

2. Delete § 1099.51(b) and substitute therefor the following:

(b) *Class II milk price.* The highest of the prices computed pursuant to subparagraphs (1), (2), and (3) of this paragraph shall be the Class II price during the months of August through March, and such price shall be reduced ten cents during the months of April through July: *Provided,* That in no case shall such price be less than the price determined in subparagraph (3) of this paragraph.

(1) The average of the basic or field prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture:

Present Operator and Location

Pet Milk Co., Wayland, Mich.
Pet Milk Co., Coopersville, Mich.
Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Belleville, Wis.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(2) The sum of the amounts determined pursuant to subdivision (i) and (ii) of this subparagraph less 75 cents.

(i) Multiply by 4.24 the simple average, as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) of 93 score bulk creamery butter per pound at Chicago, as reported by the Department of Agriculture, during the month: *Provided,* That if no price is reported for 93 score butter, the highest of the prices reported for 92 score butter for the day shall be used in lieu of the price for 93 score butter.

(ii) Multiply by 8.2 the weighted average of carlot prices per pound for spray process nonfat dry milk solids, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department of Agriculture.

(3) Or the price shall be the average of the basic (or field) prices reported to or ascertained by the market administrator to have been paid, or to be paid, without deductions for hauling or other charges to be paid by the farm shipper, for milk of 4.0 percent butterfat content received during the month by the Pet Milk Company at its manufacturing plant located at Mayfield, Kentucky, less 5 times the butterfat differential calculated pursuant to § 1099.52(b).

[F.R. Doc. 62-1942; Filed, Feb. 26, 1962; 8:50 a.m.]

[7 CFR Part 1097]

[Docket No. AO-219-A9-A10]

MILK IN MEMPHIS, TENN., MARKETING AREA

Decision on Proposed Amendments to Tentative Marketing Agreement and to Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), public hearings were held at Memphis, Tennessee, and Little Rock, Arkansas, on July 18-20, 1961, pursuant to notice thereof issued on June 23, 1961 (26 F.R. 5803), and at Chicago, Illinois, on January 17-19, 1962, pursuant to notice thereof which was issued January 8, 1962 (27 F.R. 314).

Upon the basis of the evidence introduced at the July hearing and the record thereof, the Assistant Secretary of Agriculture, on October 17, 1961 (26 F.R. 9860; F.R. Doc. 61-10032) filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto. On February 7, 1962, the Assistant Secretary filed with the Hearing Clerk his recommended decision containing notice of opportunity to file written exceptions thereto with respect to the issues heard and the evidence introduced at the Chicago, Illinois hearing, January 17-19, 1962 (27 F.R. 1272; F.R. Doc. 62-1406).

The material issues on the records of the hearings relate to:

1. Class I price;
2. Basic butterfat test;
3. Handler location differentials;
4. Plants subject to another order; and
5. Class I price for milk distributed in another marketing area.

Findings and conclusions. The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Class I price.* The Class I price should be revised to (1) change the basic formula price, (2) provide some seasonal adjustment to the Class I price differential, and (3) revise application of the supply-demand adjuster.

The present Class I price is determined by adding to the basic formula price for the preceding month a Class I differential of $1.74. Such price is further adjusted by a supply-demand adjuster. The basic formula price is the higher of the following alternative price formulas: (1) The Midwest condensary prices, (2) a butter-powder formula, and (3) a butter-cheese formula.

The handlers regulated by the order proposed that the Memphis Class I price be closely aligned to the Paducah, Kentucky, Class I price. It was proposed that the Memphis Class I price be 16 cents over the Paducah Class I price at 4.0 percent butterfat content. They contended that a Paducah handler had a substantial increase in his sales within the marketing area during the past 18 months because of the disparity between the Paducah and Memphis Class I prices. The producer associations supplying the market proposed that no changes be made in the present Class I pricing structure.

The supply of producer milk presently is adequate in relation to the Class I disposition. During the past 30 months producer receipts ranged from a high of 129 percent to a low of 105 percent of Class I disposition. For the years 1959 and 1960 the relationship of producer receipts to Class I sales averaged 118.6 and 112.6 percent, respectively. For the most recent 12-month period of July 1960 to June 1961, it averaged 118.9 percent. When the receipts and Class I sales which the cooperative association marketed outside the order are added to

the producer receipts and Class I sales, the average relationship of receipts to Class I sales was 117.6 percent in 1959, 118.9 percent in 1960 and 115.5 percent in the most recent 12-month period.

Producer milk used in Class I has increased proportionately to increased total deliveries of producers largely because handlers have increased sales outside the Memphis marketing area. Out-of-area sales rose 18 percent from 1959 to 1960 compared to a 5 percent increase in in-area sales. During the first six months of 1961 out-of-area sales rose 31 percent compared to a 3 percent increase in in-area sales.

Despite the relatively constant ratio of producer milk to Class I sales in recent years producers supplying the Memphis market have lost sales through the increased sales within the Memphis marketing area by handlers from other markets. Class I disposition in the Memphis marketing area by handlers regulated under other Federal orders increased 27 percent from 1959 to 1960 and another 15 percent during the first six months of 1961. The sales for the most part were made by handlers regulated under the Central Arkansas and Paducah orders. Lower returns to Memphis producers would result from this continuing loss of Class I sales. This situation should be rectified by price alignment with nearby markets.

The Class I prices in Memphis and Little Rock have been identical during this period but the Memphis Class I price has exceeded the Paducah price for milk of the same butterfat content by more than the cost of transporting milk from Paducah to Memphis. The difference in price has been accentuated in 1960 and 1961 because the basic formulas used in computing the Class I prices in the two markets differ.

The disparity between Memphis Class I prices and prices in Paducah, St. Louis and Suburban St. Louis (alternative milk supply areas for the Memphis market) which has resulted from the varying basic formulas used in these markets, if allowed to continue, could result in a significant reduction in Class I sales in Memphis for Memphis producers. This price disparity in the long run would tend to reduce returns to Memphis producers.

The issue of an appropriate basic formula for determining Class I prices in Memphis, Tennessee, and 35 other central United States markets was the subject of a hearing held at Chicago, Illinois, January 17-19, 1962. On the basis of that hearing record a recommended decision that the basic formula to be used in these markets should be the monthly average price (adjusted to 3.5 percent butterfat) received by farmers for manufacturing grade milk in Minnesota and Wisconsin as published by the Department on about the 5th day following the month was issued February 7, 1962 (27 F.R. 1272; F.R. Doc. 62-1406). The material issues, findings and conclusions, rulings, and general findings of the final decision in that proceeding issued concurrently herewith, insofar as they pertain to the basic formula to be used in the Memphis, Tennessee, Federal milk order, are hereby approved and adopted as if set forth in full herein.

In view of the present relationship of producer receipts to Class I sales and the increase in Class I sales by Memphis handlers, the level of the Class I differential should not be reduced.

However, the Class I differential should be adjusted seasonally to reduce seasonal differences in the Memphis Class I price compared to markets to the north from which milk is available to the Memphis market. The Class I differential in the Paducah, Kentucky, order is $1.50 during the months of August through February, $1.20 in March and July and $0.90 in April, May and June. The Class I prices in St. Louis and Suburban St. Louis are tied directly or indirectly to the Chicago, Illinois, Class I price. The St. Louis Class I price is 50 cents more than the Chicago Class I price while the Suburban St. Louis Class I price is 10 cents less than the St. Louis price and the Ozarks price varies seasonally from 20 to 27 cents less than the St. Louis Class I price. The Chicago Class I differential is 70 cents in March through June, 90 cents in July and December through February, and $1.10 in August through November.

The Class I differential in the Memphis order should be changed to $1.84 in August through February and $1.60 in March through July. Although the annual average of these Class I differentials will remain at $1.74, the prices will be somewhat more closely aligned with the pattern of prices in these other markets.

Changes in the production and Class I sales of milk for the market should be reflected in the current supply-demand computations. The present supply-demand adjustor must have a deviation from the base utilization range in the same direction for three consecutive months before any monetary adjustment is made in the Class I price. This limitation should be deleted so that any increase or decrease in receipts or sales may be reflected immediately. However, the adjustment should be limited to six cents in any given month more or less than the adjustment for the previous month. This would allow the supply-demand mover to move only two percentage points per month outside the base utilization range. This curb on the adjustment will eliminate any erratic movement yet will reflect the trend of the supply-sales relationship. Such a provision would have been effective only during the months of July, August and September 1960, in which it would have reduced the Class I price 6, 12, and 6 cents, respectively.

2. *Basic butterfat test.* Prices should be computed and announced for milk of 3.5 percent basic butterfat content.

Class prices and uniform prices to producers are presently stated on a four percent butterfat basis. In order to accomplish the uniformity of basic formulas found to be necessary and desirable, prices for all markets within a region should be stated at the same butterfat content. In order that all prices are announced on a comparable basis, Class II prices and uniform prices to producers, as well as Class I prices should be computed and reported for milk of 3.5 percent butterfat content.

3. *Location differentials.* No change should be made in the location differential provisions.

The cooperative association proposed that the location differential credit to handlers be limited to 20 cents per hundredweight. Handlers proposed the elimination of the location differential at Jackson, Tennessee.

The proposal by the cooperative association would inhibit the movement of milk into the market from distant points when the milk might actually be needed in the market. The location differentials are designed to reflect the cost of moving milk to the market regardless of the distance. The Memphis market at times has had to import milk from other markets to the north. Such a proposal would arbitrarily establish a price for milk at distant plants greater than the Memphis price adjusted by transportation costs. Therefore, the proposed amendment is denied.

The proposal by the handlers to eliminate the location differential at Jackson, Tennessee, should also be denied. The present location differential at Jackson, Tennessee, is 13.5 cents per hundredweight. The rate of 13.5 cents per hundredweight reflects experience relative to the additional cost of moving milk to Memphis area plants rather than to Jackson, Tennessee, plants from farms located in and afound Jackson.

4. *Milk subject to pricing under other Federal orders.* The proposal to change the current Memphis, Tennessee, order language with respect to plants subject to another order is denied. Under the present provision, a plant that has sales in the Memphis marketing area and in the marketing area of another Federal order will not become a handler regulated under the Memphis order unless a volume of Class I milk was disposed of from such plant during the six-month period immediately preceding to retail and wholesale outlets (except fluid milk plants) in the Memphis, Tennessee, marketing area greater than the volume disposed of in the marketing area regulated pursuant to such other order. The Mid-South Milk Producers Association advocated the deletion of the words "during the six-month period immediately preceding" thus putting the pool status of a handler of another market selling in the Memphis marketing area on a month-to-month basis.

The present order language was designed to prevent a shift back and forth between the Central Arkansas and Memphis orders on a month-to-month basis. A pool plant shifting between order regulations creates uncertainty and undue hardships for the producers concerned.

The proposal to use only the current month performance was designed to regulate the Paducah handler under the Memphis order if, in a single month, his sales in the Memphis area exceeded those in the Paducah area. Such a change in regulation would relieve the handler from regulation under the Paducah order which operates on a market-wide pool and make him subject to the Memphis regulation which is an individual handler pool. Since the Mem-

phis market operates on an individual handler pool basis the blend prices received by producers who regularly supply the Memphis market would not be affected by such a shift in regulation. The shift would affect the blend prices received by producers in the Paducah market. Therefore, the shift in regulation from one market to the other should be made only when it is established that a handler has maintained greater sales in the Memphis marketing area for a six-month period.

5. *Class I price for milk distributed in another marketing area.* A proposed amendment by the cooperative association to add a new section to the Memphis, Tennessee, order whereby the price of Class I milk distributed in another Federal order marketing area be the higher of the Memphis Class I price or the price determined pursuant to the other Federal order is denied.

The Class I prices in each Federal order market are established at levels which will obtain an adequate supply of milk for the respective market. These prices reflect prices of alternative supplies of milk and local supply and demand conditions. The prices are established at the plant where such milk is received from producers. Even though some of the milk received for the Memphis market is actually disposed of in another Federal order marketing area its value remains the same as if it were disposed of in Memphis. Therefore, the Memphis Class I price should apply to all Class I milk received from producers regardless of the area in which it is sold.

Rulings on proposed findings and conclusions. Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General findings. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreements and the orders, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to Section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreements and the orders, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreements and the orders, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Rulings on exceptions. In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement Regulating the Handling of Milk in the Memphis, Tennessee Marketing Area", and "Order Amending the Order Regulating the Handling of Milk in the Memphis, Tennessee Marketing Area", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which will be published with this decision.

Determination of representative period. The month of November 1961 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the attached order amending the order regulating the handling of milk in the Memphis, Tennessee, marketing area, is approved or favored by producers, as defined under the terms of the order, as hereby proposed to be amended, and who, during such representative period, were engaged in the production of milk for sale within the aforesaid marketing area.

Signed at Washington, D.C., on February 21, 1962.

CHARLES S. MURPHY,
Under Secretary.

Order[1] Amending the Order Regulating the Handling of Milk in the Memphis, Tennessee, Marketing Area

§ 1097.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), public hearings were held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Memphis, Tennessee, marketing area. Upon the basis of the evidence introduced at such hearings and the records thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof the handling of milk in the Memphis, Tennessee, marketing area shall be in conformity to and in compliance with the terms and conditions of the order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete § 1097.50 and substitute therefor the following:

§ 1097.50 Basic formula price.

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plant in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the Chicago butter price for the month. The basic formula price shall be rounded to the nearest full cent.

2. Delete § 1097.51(a) (1) and (2) and substitute therefor the following:

(1) Add $1.60 in each of the months of March through July and $1.84 in all other months.

(2) Add if the net utilization percentage calculated pursuant to subparagraph (1) of this paragraph is less than, or equal to, if it is more than the base utilization range, an amount determined by multiplying such net utilization percentage by three cents: *Provided*, That the amount added or subtracted shall not vary more than six cents from the amount added or subtracted during the immediately preceding month.

3. In § 1097.51(b) delete the period at the end of the paragraph and add: "and from which shall be subtracted 5 times the butterfat differential for the respective month computed pursuant to § 1097.52(b)".

4. In §§ 1097.52, 1097.71, and 1097.92, delete "4.0" wherever it appears and substitute therefor "3.5".

[F.R. Doc. 62-1943; Filed, Feb. 26, 1962; 8:51 a.m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

[9 CFR Part 301]

[Docket Nos. AO-336 and AO-337]

TURKEYS AND TURKEY HATCHING EGGS

Notice of Recommended Decision and Opportunity To File Written Exceptions With Respect to a Proposed Marketing Agreement and Order

Pursuant to the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk, United States Department of Agriculture, a recommended decision with respect to a proposed marketing agreement and order regulating the handling of turkeys produced in all States of the United States except Alaska and Hawaii, to become effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U.S.C. 601 et seq.) hereinafter called the "Act."

Interested persons may file exceptions to this recommended decision with the Hearing Clerk, Room 112, Administration Building, United States Department of Agriculture, Washington 25, D.C., not later than the close of business on the fifth day after publication of this recommended decision in the FEDERAL REGISTER. Six copies of exceptions should be filed.

Preliminary statement. A public hearing on the record of which the proposed marketing order is formulated was held at the several locations and on the days enumerated below, pursuant to notice thereof which was published in the FEDERAL REGISTER on November 2, 1961 (26 F.R. 10286), the supplemental notice of the hearing published in the FEDERAL REGISTER on November 8, 1961 (26 F.R. 10516), the second supplemental notice of hearing published in the FEDERAL REGISTER on November 17, 1961 (26 F.R. 10772), the notice reopening the hearing published in the FEDERAL REGISTER on January 18, 1962 (27 F.R. 518), and the notice amending the notice of reopening published January 27, 1962 (27 F.R. 834). The public hearing was held at Richmond, Virginia, November 20 to 22; Des Moines, Iowa, November 24, 25, 26, 27; Las Vegas, Nevada, November 29, 30, and December 1; Oklahoma City, Oklahoma, December 4, 5, and 6; Chicago, Illinois, December 8 and 9; Albany, New York, December 12 and 13, 1961, and Kansas City, Missouri, January 29 through February 1, 1962. Such notices set forth proposed marketing agreements and orders relating to the provisions of a proposed marketing agreement and order regulating the handling of turkey hatching eggs and a proposed marketing agreement and order regulating the handling of turkeys under the terms of the Agricultural Marketing Act of 1937, as amended. The National Turkey Federation, and the National Turkey Advisory Committee, after several meetings, had proposed that a public hearing be held upon such proposed marketing agreements and orders.

Material issues. The material issues presented on the record of the hearing are as follows:

(1) The existence of the right to exercise Federal jurisdiction;

(2) The need for the proposed regulatory program to effectuate the declared purposes of the act and whether such purposes would be effectuated by a Turkey or Turkey Hatching Egg program or both;

(3) The definitions of the commodity and determination of the production area to be affected by the marketing agreement and order;

(4) The identity of the persons and transactions to be regulated; and

(5) The specific terms and provisions of the proposed marketing agreement and order including:

(a) Definitions of terms used therein which are necessary and incidental to attain the declared objectives of the act, among which are those applicable to the provisions of the proposed program;

(b) The establishment, maintenance, composition, powers, duties, term of office, and operation of a turkey advisory board;

(c) The establishment, maintenance, composition, powers, duties, and operation of a turkey administrative committee, which shall be the administrative agency for assisting the Secretary in administration of the turkey marketing program;

(d) The selection of the membership of the board and committee;

(e) The authority for the committees to incur expenses and to levy assessments on handlers of turkeys;

(f) The need for establishment of marketing research and development programs for turkeys;

(g) The authority of the board and committee to recommend marketing policy and regulations implementing such policy;

(h) The methods for limiting of the quantities of turkeys which may be handled;

(i) The application of the provisions to persons under the order and exemptions of certain such persons;

(j) The procedure for establishing reporting requirements applicable to handlers and the requirements for recordkeeping;

(k) The requirements of compliance with all provisons of the marketing agreement and order and with regulations issued thereto;

(l) Additional terms and conditions as set forth in sections E 70 through E 80 and T 75 through T 85 and published in the FEDERAL REGISTER on November 2, 1961 (26 F.R. 10286) and further set forth in §§ 301.80 through 301.101 published in the FEDERAL REGISTER on January 18, 1962 (27 F.R. 518), which are common to marketing agreements and orders.

Findings and conclusions. The findings and conclusions on the aforementioned material issues, all of which are based on the evidence introduced at the hearing and the record thereof, are as follows:

(1) Turkey hatching eggs are marketing extensively in interstate commerce. Turkey hatching eggs produced in the State of California, for example, are marketed in almost half of the states of the United States as well as in foreign commerce. Hatching eggs produced in Texas experience similar marketings though perhaps not quite as extensive. California and Texas are two of the major hatching egg production states accounting for approximately one-third of the U.S. production. Almost all States produce some hatching eggs of which varying proportions move in interstate commerce and hatching eggs produced and marketed within the same State are disposed of in direct competition with eggs coming from other States and the prices received for such locally produced eggs are often determined by the price and availability of such out-of-State eggs. The average price received by producers for hatching eggs in December 1961 was 74 percent of the parity price.

From the evidence presented for the record it is concluded that all marketings of turkey hatching eggs are in the current of interstate or foreign commerce or directly burdens, obstructs, or effects such commerce and that there exists the right or power to exercise Federal jurisdiction over a regulatory program for turkey hatching eggs. Further analysis of the record reveals, however, that there was considerable apprehension among producers concerning the provisions of a regulatory program for hatching eggs. The prime concern, although there were others, appeared to be that such a program might have the effect of restricting the supply of eggs, and the poults resulting therefrom, with the result that a condition may be created which could result in inequities turkey producers. In view of this substantial concern the Department is continuing an exhaustive analysis of the evidence of record and the complex administrative problems raised by witnesses concerning a hatching egg order and a recommended decision thereon will be issued at a later date. Accordingly, the recommended decision and proposed order herein will relate to turkeys only.

Turkeys are an important agricultural product which are produced and mar-

keted in all States of the United States. More than $375 million are received annually by U.S. turkey producers from sales of turkeys. Consumption of turkey meat in the United States is estimated at 7.4 pounds per capita in 1961, indicating an increase over the 6.3 pounds in 1960, and 4.4 pounds per capita in 1951, only a decade ago.

Turkeys are produced and marketed each month of the year. They are processed for marketing in three forms, frozen, fresh chilled but not frozen, and as turkey products and parts, such as legs, wings, breasts, canned turkey, turkey rolls, etc. In relation to the frozen and fresh marketings, the marketings of turkey products and parts is relatively minor. The marketing of frozen turkeys far exceeds the fresh. In 1960, 79 percent of all turkeys produced were slaughtered in plants operating under the Federal inspection program and 84 percent of the turkeys processed in such plants were marketed in frozen form. It follows that approximately two-thirds of all processed turkeys are marketed in the frozen state.

The appearance and quality of the frozen bird is similar to that of the fresh unfrozen bird and frozen turkeys compete directly with the fresh commodity for the preference of the consumer. Because unfrozen birds are highly perishable they are generally locally marketed on the wholesale or retail level (often directly by the producer himself) or marketed within a few hundred miles of where they are produced. The evidence of record indicates that fresh unfrozen turkeys move in interstate commerce, as for example, into New York and New England from Virginia, Maryland, Ohio, and Pennsylvania. Frozen birds on the other hand, can maintain their appearance and quality for a considerable period of time, sometimes in excess of a year, without appreciable deterioration. Shippers of frozen turkeys, therefore, have the ability to move such turkeys great distances in interstate and foreign commerce from the areas where they are produced to markets throughout the country. The exportations of frozen turkeys, although still relatively small, have been increasing. The interstate movement of turkeys is dramatically illustrated by market reports indicating the origin of turkeys received in major terminal markets. Turkeys for the New York market in 1960, for example, originated in thirty-four States. The Chicago market received turkeys from thirty States during the same year, and even the Los Angeles market, located in a State which produces a substantial surplus, received turkeys from four other States in that year.

Turkeys are shipped to, sold in, and distributed in all important markets in the U.S. and they are an established commodity in those markets. There is also futures trading in turkeys on the Chicago Mercantile Exchange.

Communications between buyers and sellers, both in terminal markets and at shipping points, are modern and rapid so that the effect of immediate and future supplies are quickly reflected in the price of turkeys in such markets. Shippers follow terminal markets closely and buy from or settle with producers on the basis of market prices reflecting terminal market conditions.

The price and availability of turkeys produced and marketed intrastate have a direct effect on the marketing of all turkeys wherever produced, and the price and availability of turkeys being marketed from other sources of supply have a direct effect upon the marketing conditions of intrastate turkeys.

Some producers who produce, process and sell, either at wholesale or retail levels, generally receive a premium price for their product commensurate with their marketing or merchandising efforts. The premium received, however, is directly affected by the price and availability of fresh or frozen birds produced locally and in other states and thus varies with supply-demand conditions throughout the entire industry.

In the light of the foregoing conclusions, it is necessary to regulate all marketings of turkeys in the production area in order to obtain the objectives of the act.

The record reveals that the production of turkeys increased over 70 percent during the ten years ending in 1961. The average yearly producer prices for turkeys for these years ranged from 60 to 87 percent of the parity price. In 1961 the prices producers received were the lowest since 1941, averaging 60 percent of the parity price.

From these findings on the record evidence it is concluded that all marketing of turkeys is in the current of interstate or foreign commerce, or directly burdens, obstructs, or effects such commerce. In addition, it is concluded that prices to producers have been such that parity limitations of the Act do not preclude promulgation of a marketing order for turkeys. Therefore, the right to exercise Federal jurisdiction in promulgating and administering a marketing order for turkeys is founded in fact and should be exercised.

(2) The conditions existing in the turkey industry clearly indicate a need for a marketing order for turkeys.

The national average annual production of turkeys for the ten-year period beginning in 1952 and ending in 1961 ranged from 59.8 to 106.9 million head of turkeys, the low point in production being in 1953 and the high point in 1961. The production in 1959 was 84.5 million turkeys and they were produced on 86,717 farms.

Production during the ten-year period increased from a low of 59.8 million head in 1953 to a high of 106.9 million head in 1961, or an increase of 79 percent. The annual average producer prices during the same period declined from the high of 33.7 cents per pound in 1953 to a low of about 20.7 cents per pound in 1961, or a decrease of 38 percent. In addition to a decline in average annual prices over the period the range of monthly producer prices within the years have tended to widen. These trends are illustrated in the table below:

Year	Number of turkeys raised (million head)	U.S. average producer price (cents per pound)	
		Annual	Range within the year
1952	62.3	33.6	41.1
1953	59.8	33.7	42.5
1954	67.7	28.8	40.0
1955	65.6	30.2	42.3
1956	76.8	27.2	38.3
1957	81.4	23.4	34.0
1958	79.6	23.0	34.0
1959	84.5	23.9	37.1
1960	84.7	25.4	40.0
1961	106.9	[1] 20.7	34.0

[1] Estimated.

Annual average farm prices for turkeys were less than the parity prices in each of the ten years. The annual average farmer price to parity price relationships ranged from 60 to 87 percent, with the low point in 1961 and the high point in 1953.

During the major marketing months of 1961, i.e., October through December, U.S. average producer prices ranged from 17.4 to 18.6 cents per pound. These prices were the lowest since 1941 and were 50 to 54 percent of the equivalent parity price. The average prices prevailing in 1961 were below the costs of production, not considering returns to labor and management, and resulted in losses of 5 to 6 cents per pound or approximately a dollar per bird.

During the ten year period 1952-61, the turkey industry showed its possibility to adopt scientific and technological advancements and thereby increase the volume of its production to the extent that the volume of turkeys the industry can now produce exceeds a consumer demand for the product which will result in a reasonable price to producers. In 1961 the turkey industry dramatically demonstrated its ability to produce substantially more product than the market would absorb at a profit to even the most efficient producers. Turkey production in 1961 exceeded 1960, the last highest production year, by 26 percent. This volume so exceeded the demand that it resulted in producer prices well below producer costs reported by producers to be about 21 to 23 cents per pound. Substantial losses were sustained by efficient as well as inefficient producers, by small and large producers, and by producers who had held their production at the 1960 level as well as those who had increased their production.

Turkey growers, as individuals, are not in a position to cope with the industry-wide problem of keeping supplies in line with the estimated demand to achieve reasonable profit levels. Cut backs in one area, or by individual producers, are annulled by increases in other producing areas or by other producers.

Statistical reports issued by the Department late in 1960 and early in 1961 clearly demonstrated that the 1961 crop of turkeys would be significantly larger than the 1960 crop. The October 1960 survey of producers' intentions to hold breeder hens for 1961 production, for example, indicated an increase in breeder hens of 23 percent. The number of breeder hens on farms January 1, 1961, which information was available to the industry in mid-February, showed numbers were up 27 percent from a year earlier. A survey of producer intentions to raise turkeys in 1961, issued in mid-January 1961, indicated an increase in production of 20 percent. With this knowledge in hand the industry organizations tried to get producers, on a voluntary basis, to cut back the indicated high level of production. The effort was completely unsuccessful.

The inability of the industry to make adjustments resulting in a stable and orderly marketing condition is occasioned in great part by the development and changes in the pattern of production. The turkey industry has, over a period of years, made continuous progress toward greater efficiency of production and marketing. Better strains of birds, improved feeds, new management and disease control techniques, labor-saving equipment, and larger production units have helped growers produce and market turkeys at a declining per unit cost. Technological gains have thus permitted a continued expansion in turkey output despite a long range downward trend in prices.

The technological developments, and resulting gains in efficiency in the turkey industry have made possible and encouraged a marked trend toward fewer, larger, and more specialized production units. Substantial investments have been made in these units, and there are few, if any alternative uses to which these resources may be directed. These large specialized units operate on a low cost per unit basis and are dependent on large volume production. This condition provides incentive to maintain or increase volume production and a marked tendency to avoid reducing production on the theory that because of their high volume they can survive on a low per unit profit.

Concurrent with the development of large specialized production units has been the development of large hatcheries, feed mills, and slaughterers. Because of the heavy investment in such facilities, every effort is made to keep them operating at capacity. Several methods are being used by such firms to accomplish this objective; the contracting for production, in some cases at a specific price as with a nonloss provision to the producer; the advancing of credit for feed, poults, and other requisites of production, and the integration of the growing operation with the hatchery, feed manufacturing, and processing operations. In many cases these interests, through their contract and credit operations, have had the effect of encouraging production without regard to the need therefore. An assured outlet for poults and feed is an advantage to the producers and purveyors of these products but has not been a corresponding advantage to the grower of turkeys since the increase in turkey production which has resulted therefrom has caused the returns to turkey producers to decline.

Because of the development of the large specialized production units, and the other influences on production discussed above, voluntary production adjustments to obtain a favorable supply-demand relationship cannot now occur as rapidly or to the same degree as in the past. Prior to the development of the large specialized production units made possible by technological developments, the production units were of necessity, usually small and were usually only one of several enterprises on the farm. In this situation voluntary restriction of production by the producer could be and was made without harsh economic effects since another enterprise of the farm would help soften the impact of such adjustment. There are of course, a good many of such small production units presently in operation which could make such an adjustment but so great a percentage of the total volume of annual production is presently produced by the large specialized production units that any voluntary restriction of production by such a small producer would not be sufficient to offset the production of the large volume units. Evidence of this fact is the testimony of many such small producers that they restricted their production for 1961 without noticeable effect on the total volume produced for the year.

Many witnesses at the hearing testified that although overproduction had caused them to lose money on their turkey production, they still felt that the industry could make production adjustments on a voluntary basis to bring production of supply in line with demand. They testified further that such an adjustment is currently taking place in that producer intentions to raise turkeys in 1962, as reported by the Department in January 1962, indicated a 12-percent drop in production from that of 1961. However, if such an adjustment is made, it is further evidence of the fluctuating production and marketing conditions prevailing in the industry which tend to cause disorderly marketing. The evidence of record also reveals that such production adjustments, under the current situation, would in part be accomplished by the small independent producer being forced out of turkey production. The evidence reveals that the small independent producer does not have sufficient financial resources to withstand continuing periods of loss. Such losses can be handled only by the larger segments of the industry who have or can obtain the necessary resources.

It is the declared policy and objective of the Agricultural Marketing Agreement Act of 1937, as amended, to establish and maintain such orderly marketing conditions for turkeys as will provide parity prices to farmers with due regard to the interest of the consumer and provide an orderly flow of turkeys throughout the normal marketing seasons so as to avoid unreasonable fluctuations in supplies and prices. On the facts found, it is concluded, therefore, that need exists for a turkey marketing order as hereinafter set forth and such order will tend to effectuate such declared policy of the act.

(3) The commodity to be regulated by this order is the domesticated fowl commonly known as turkey and technically known as Meleagris gallopavo. Such turkeys are produced in varying quantities in all States of the United States and are commercially marketed throughout the United States. Such term is defined for the purposes of the order to include all varieties or types where grown and marketed within the production area.

"Production area" should be defined to include the 48 contiguous States of the United States and the District of Columbia. Production and marketing methods are similar in all parts of the production area although, primarily because of climatic conditions, and location relative to markets, there are some variations in husbandry and marketing practices. The commercial practices in processing turkeys do not differ to any significant extent throughout the production area. In fact the processing and packaging of frozen birds is so similar that turkeys produced and processed in one State are indistinguishable from those which are produced and processed in another State. As indicated previously a significant proportion of the turkey crop is frozen, a condition which has allowed turkeys wherever produced in the production area to move freely between States and to compete in price and for markets with a locally produced product whether fresh or frozen. An example of such freedom of movement is the marketing in New York of turkeys produced in the states of California and Minnesota.

The proposals contained in the hearing notice dated November 2, 1961 (26 F.R. 10286), included the States of Alaska and Hawaii in the proposed production area. The proposed order herein excludes such States. The Agricultural Census for 1959 reports 4 producers of turkeys with 12 birds produced in Alaska and 122 producers with a total production of 3,891 birds in Hawaii. The contiguous States and the District of Columbia form a natural production area with turkeys moving freely between them to supply the markets in the production area. The States of Alaska and Hawaii are divorced from this natural boundary by their geographic locations. They are further distinguished from the proposed production area in that they, historically, have not been, and are not now, a source of supply for the turkey markets within the production area.

For the foregoing reason there is no reasonable method for dividing the production area into smaller units for purposes of marketing orders. The territory included within the production area constitutes the smallest regional production area that is practicable and consistent with carrying out the policy of the act.

On the facts above found on record evidence, it is concluded the production area should be defined as including all the area in the 48 contiguous States of the United States and the District of Columbia.

(4) "Handle and handler." The handling of turkeys should be defined as the slaughtering of turkeys in the production area for the production of meat. A "handler" is a person who "handles", i.e. slaughters, turkeys. The handler is the person who, under the applicable terms and conditions of the marketing

order, is responsible for slaughtering and processing the turkeys. The "handler" is the person upon whom rests the obligation of complying with the terms and conditions of the marketing order. Before a turkey can be marketed to the consumer it must be slaughtered. Slaughtering is done by persons operating plants for that express purpose, and by persons operating processing plants where turkey is processed for the consumer market and into many types of products including turkey rolls, parts, soups, prepared frozen dinners and a host of other products utilizing turkey meat. Turkeys are also slaughtered and marketed directly by producers themselves. In all instances, however, the turkeys are slaughtered before they are marketed to the consumer.

There are producers who have their turkeys slaughtered and processed by a handler on a fee basis. In such instances the producer retains title to the processed turkeys and markets them himself. This has been referred to as custom processing. Since the actual slaughtering was done by a person other than the producer, the person who did the slaughtering, and not the producer, should be the handler.

Although many persons may be involved in the actual marketing of turkeys in the channels of commerce they must all get their supplies from, or have the supplies processed by, a handler. Accordingly, the point of regulation of the order should be at the handler level.

Handlers, in acquiring turkeys for handling, should be permitted to do so only as prescribed by the order or by regulations issued by the committee pursuant to the order. It is contemplated that the committee will prescribe means, by certificates or otherwise, by which the source of the handlers acquisitions may be identified.

(5) Certain terms applying to specific individuals, agencies, legislation, concepts, or things are used throughout the marketing order. Such terms should be defined and explained for the purpose of designating specifically their applicability in establishing the limitations of their respective meaning whenever they are used.

(a) *Definitions.* "Secretary" should be defined to include not only the Secretary of Agriculture of the United States, but also, in recognition of the fact that it is physically impossible for him to perform personally all of the functions and duties imposed upon him by law, any other officer or employee of the United States Department of Agriculture who is, or who may hereafter, be authorized to act in his stead.

"Act" should be defined within the order to provide a ready and correct legal citation for the statute pursuant to which the marketing order is promulgated and administered. Repetition of the citation, therefore, is unnecessary when used thereafter in the marketing order.

The definition of "person" follows the definition of that term as set forth in the act, thereby insuring that it will have the same meaning as when used in the act.

"Quantity" is defined in the order as meaning the weight of live turkeys at the time of receipt by a handler or other person.

Under the volume regulation provisions of the order producers are equitably apportioned their share of the desirable quantities of turkeys. There are many types or varieties of turkeys produced in the production area. Some, commonly called fryer-roasters, are generally of the Beltsville variety having a live weight of about 8 to 12 pounds. Others, such as Bronze toms, are generally in excess of 18 pounds. The "quantity" definition allows the committee to make apportionment to producers in live weight pounds, rather than by type of turkey. This has the advantage of allowing the producer freedom to change the type of turkey he is producing to meet changes in consumer preferences. Live weights can be readily converted to a very close approximation of the number of head of turkeys involved if the age, sex, and type of birds are known and the committee is authorized to develop and, by regulation, issue conversion ratio figures so that all such conversions can be made on a common standard. Statistics relating to the volume of turkeys produced generally indicate the volume in both head count and live weight.

The quantity definition sets the weight of live turkeys at the time of receipt by a handler or other person. Inclusion of "other person" in the definition recognizes a practice wherein producers sell live turkeys to other producers and to other persons who then arrange for the handling of the turkeys. "Other person" is intended to include other producers. Turkeys so marketed by a producer will be included as part of their historical production for computation of base purposes.

It had been proposed that the quantity definition include "weight at the time of shipment to a handler" as well as weight at time of receipt by a handler. However, receipt of the turkeys by a handler or other person is accomplished when the weight of the turkeys have been established whether at the farm, the plant, or at some public scale in between. Accordingly, the words "at the time of shipment" are redundant and unnecessary and have been omitted.

It had also been proposed that the definition of quantity includes the live weight equivalent of processed turkey. Processed turkey is defined separately and is not necessary in order to determine the quantity of turkeys a handler may acquire. It, therefore, is not included in the proposed definition of quantity.

"Processed Turkey" is defined in the order as eviscerated turkey (ready to cook) or the equivalent thereof of New York dressed or Kosher processed turkey. This definition recognizes that turkeys are processed in different forms to fill consumer preferences and the same turkey will have a different weight depending on the form in which it is processed. Since handlers will be assessed the costs of administering the order and since each handler's pro rata share of such costs must be determined equitably, irrespective of the way the turkeys are processed, the definition of processed turkeys provides for a method of determining and pro rating such costs. The committee by regulation would establish a schedule of conversion factors for the different forms of processed turkeys for this purpose.

"Exempt handler" is a handler who handles (slaughters) less than a quantity of 7,000 pounds or approximately 600 turkeys per year. Handlers in this category are exempt from all except the reporting provisions of the order. This provision recognizes that small quantities of turkeys are handled on the producer's farm, in wholesale establishments, or in some cases, by retail meat outlets. The handlings by these handlers are sporadic and the volume handled will have little noticeable effect on the purposes of volume regulation of the order. Further, the application of the set-aside provisions to these handlers would be a substantial burden upon their operations without noticeably contributing to the volume regulating effect of the set aside.

Such handlers are also exempt from assessments because the amount of their contribution would usually be so little as to be offset, and in some cases exceeded, by the committee's costs in collecting the assessment. Such handlers, however, may be required to file such reports and keep such records as the committee may require to verify the handler's exempt status and furnish information to the committee necessary for the efficient administration of the order.

By being exempt from the volume regulations of the order, the exempt handler may acquire for handling up to 7,000 pounds of turkeys from any source without regard to the volume limitations of turkeys under methods numbers I and II of the order.

"Production facilities" should mean the land, buildings and equipment utilized in the production of turkeys. This definition is necessary to describe the facilities utilized in producing turkeys by a producer-grower and is one of the factors which distinguishes a producer-grower from a contract-producer.

"Market" should mean the disposition by a producer of a quantity of turkeys to handlers, producers or other persons. The word "market" should be used in various provisions of the order and this definition is necessary to prescribe the limitations of the word. In order for turkeys to be marketed such marketing must be done by a producer to a handler, to another producer, or to other persons not qualifying as handlers or producers under the order.

A "producer" under the order is a person, other than a producer-handler, who falls within either of two categories or classes. The first is the producer-grower and the second is the contract-producer.

A "producer-grower" is a person who (1) operates production facilities in a proprietary capacity, (2) produces in excess of a quantity of 3,600 pounds of turkey on such facilities in a year, and (3) markets turkeys to a handler.

A "contract-producer" is a person who has a proprietary interest in turkeys produced by a producer-grower.

In order to qualify as a producer under the order a person must meet each of the applicable conditions set forth in the definition. A person who produces and handles his own production is not a producer since it is considered that the predominant part of such an operation is the handling of the turkeys.

With regard to a producer-grower the first conditions to be met is that a person must operate, in a proprietary capacity, production facilities on which turkeys are produced. Proprietary capacity is used in the defintion to distinguish between the grower and persons merely employed to supervise or manage the production operation. If the farmer or grower has a contract for the production of turkeys where the risk of loss is shared, or is even solely on the other person, the grower would still be a producer since his business, i.e. his proprietary capacity is the farm on which the turkeys are grown. There are many types of financing contracts in use by the industry and some such contracts purport to give control over the production facilities of the grower to the other person, who is usually a contract-producer as defined. However, a test to be applied for the purposes of the order is whether the contract is such that the control of the real estate and facilities is its primary purpose and the turkeys secondary as contrasted with the primary purpose or intent of the contract being to provide financing of turkey production and control over the real estate in production facilities are provided in order to insure participation in the control over the production of turkeys. In the latter case the grower would be the producer-grower under the order.

The second condition which should be met in order to be a producer-grower is that a quantity in excess of 3,600 pounds of turkey is produced on the production facilities of the grower in a year. Any person who produced less than a quantity of 3,600 pounds of turkey would not be a producer; 3,600 pounds amounts to about 200 turkeys using the national average of about 18 pounds per turkey. The total production of such persons is rather small. Using the information supplied by the agricultural census of 1959, and taking the midpoint of production on farms producing under 50 and between 50 and 399 birds, the farm which produced under 200 turkeys would account for less than 4 percent of the national turkey production. In addition the production of such turkeys is sporadic and dispersed widely throughout the production area, and their marketings are usually limited to markets within a few miles of where produced. In view of these conditions marketings of these turkeys are not of such significance as to be included within the realm of the order. The fact that persons producing less than a quantity of 3,600 pounds of turkeys would not be producers under the order would in no way preclude handlers from acquiring their turkeys since such acquisitions by handlers are allowed under regulations of the Committee.

The third condition which should be met to be a producer-grower is that production of such persons must be handled by handlers other than exempt-handlers or producer handlers. Such handling of turkeys by the handler is intended to include all the means by which a handler acquires the production of a producer including the handlers custom processing of turkeys for the account of the grower.

The impact of regulation under the order is upon the handler and volume regulation is effectuated by limiting the quantity of turkeys a handler may acquire or dispose of. Live turkeys are the subject of many transactions between producers and other persons not handlers. Since the order does not regulate producers in their capacity as producers, it does not regulate their transactions. Accordingly, the turkeys produced by producers and such other persons come under the regulation only as they are acquired by handlers. Since the total quantity of turkeys which all handlers may acquire are apportioned equitably among all producers, it is logical to define a producer as one whose production of turkeys is handled by a handler.

To qualify as a contract-producer under the order a person should have a proprietary interest in turkeys from the production of a producer-grower. Accordingly two conditions should be met. The first is that the turkeys in which a contract-producer is involved must be produced by a person who qualifies as a producer-grower under the order. The second condition is that the person must have a proprietary interest in the turkeys produced by a producer-grower. "Proprietary interest" has been defined as sharing in the risk of loss in the production of turkeys. The sharing of such risk is usually occasioned by a contract between a producer-grower and one who furnishes the financing of the production operation. Such financing usually takes the form of an extension of credit for the supplies necessary in the production of turkeys and/or furnishing such supplies. However, in order that such person have a proprietary interest in such turkeys it should be shown that the contract provided that the financing persons shared or bore the risk of loss of the operation. There are a substantial variety of contracts being utilized in the industry and they contain varying provisions on the rights and liabilities of the parties.

Certain of such contracts are the chattel mortgage or security type which result in obligating the turkeys and/or other property as collateral to secure the credit or financing advanced to the producer-grower. In some instances the balance of the debt resulting from the financing may be cancelled by the financier at the completion of marketing of the turkeys if the returns from the turkeys are insufficient to cover the producer-growers costs of supplies. Although this type of situation can be considered as sharing in the risk of loss of the production of turkeys it is not the type of risk which is contemplated under proprietary interest. A test which might be applied to determine proprietary interest risk of loss might be as follows: Under the terms of the contract, is the producer-grower obligated to the financing party for the full amount of financing regardless of the returns from the disposition of the turkeys or does the contract provide that if the returns from the turkeys are less than the financing then the difference shall be shared by the financing party and the producer-grower or borne entirely by the financier.

In the first instance there would be no proprietary risk since the party advancing the financing, by way of credit for feed, poults, supplies, or otherwise, has an enforceable right under the contract to be paid back by the producer-grower the amount which was advanced. In the latter instance the financing party's advances would be legally satisfied by the returns of the sale of the turkeys regardless of whether such returns were more or less than the amount advanced. Title to the turkeys is not necessarily a determining factor since in almost every financing type of contract, whether risk sharing or not, a security title is held by the financing party.

The assumption of sharing of the risk of loss, i.e., having a proprietary interest, in the turkeys is the basis upon which such a person is eligible for producer status under the order. Historically, the entire risk of loss of producing turkeys has been borne by the producer-grower. However, in the last ten years there has been an increasing tendency by the producer-grower to share that risk with others with the result that the producion operation has been divided into two parts. On one hand the producer-grower contributes his time, labor, facilities, and management know how, and the other party contributes the financing. Both are integral parts of the production process. The definition of producer recognizes this fact by including as a producer, a person who has a proprietary interest in the turkeys.

In determining the relative shares of interest of a producer-grower and a contract-producer in a quantity of turkeys for base computation purposes, the order provides that each shall be deemed to be a producer of one-half the turkeys produced under such a contractual arrangement. It is recognized that the proportionate share of risk is a matter of negotiation between parties. However, in determining the actual or real risk of each party would require an analysis of the actual costs of supplies to the contract-producer and a determination of the costs of the producer-grower's labor, management know-how, depreciation of production facilities and other factors. These factors were apparently considered by the proponents of the proposal and by witnesses at the hearing and the one-half split was supported as logical and proper. There was virtually no opposition to this proposal at the hearing. The division of the production between the contract-producer and producer-grower for base computation pur-

poses appears to be equitable under the circumstances.

While the vast majority of the contracts between producer-growers and contract-producers are in writing, there may be some similar arrangements on an oral contract. In such cases the burden of proving the contract should logically be on the party asserting it.

An "exempt producer" should be a person who operates production facilities on which a quantity of not more than 3,600 pounds of turkey are produced in a year. As indicated in the discussion of the definition of "producer", the volume of turkeys produced by an exempt producer does not have a significant impact upon the purposes of the order and handlers, therefore, they may freely acquire for handling such turkeys under procedures issued by the committee.

The order should contain a definition of a producer-handler. This definition recognizes a rather common type of production and marketing in the turkey industry. There are many turkey producers in the production area, notably in the northeast and in areas which are proximate to large urban populations, who slaughter birds of their own production and then retail such birds in such urban areas, usually in fresh unfrozen form. Such producers usually produce for a specific market which they have developed by dint of their merchandizing efforts and their production is relatively minor in relation to the total production of turkeys. Producer-handlers of the size prescribed in the order usually operate handling facilities which are not federally inspected and consequently, their turkeys do not move in interstate commerce but are marketed in areas proximate to where they were produced. Although these turkeys are sold in areas where turkeys from other states, fresh or frozen, are marketed, the producer-handler has, through his merchandizing efforts, and in providing special preferences or services to his customers, developed a special market for his product in which he usually receives a premium price for his product which is in excess of the prices of non producer-handler turkeys being sold in the area. Since the handling and marketing are the key or focal points of a producer-handler operation, a person who produces and handles turkeys in this fashion is considered a handler and not a producer under the order. The application of the assessment, set aside, and handling restriction provisions of the order might tend to force these persons to discontinue their operations. In view of the specialized nature of the operation and markets of a producer-handler, it is desirable to allow such persons to continue providing their services to the consumer. A producer-handler, therefore, is exempted from these provisions of the order. They are, however, subject to the reporting requirements of the order.

The order prescribes definite limitations on a producer-handler in that such a person is defined as one who (1) in his own handling facilities (2) handles a quantity of not more than 100,000 pounds of turkey per year (3) of which not more than 5,000 pounds are other than his own production and (4) must not dispose to other persons a quantity in excess of 5,000 pounds. Each of these conditions should be satisfied before a person can become a producer-handler.

The first requirement is that a person must operate his own handling facilities. A person who has turkeys custom processed would not be a producer-handler. A person with this type of operation would not be a handler under the order and, therefore, would not be regulated.

The next requirement is that such person may not handle a quantity of more than 100,000 pounds of turkeys per year. This is approximately 5,000 head of turkey. The record reveals that the vast majority of persons having a producer-handler type operation fall within this quantity of handling. The total quantity of turkeys so handled is relatively small compared with the total volume handled by handlers and the markets of a producer-handler are usually seasonal and scattered in area so that producer-handler operations of this size will not significantly affect the purposes of the order.

The next two requirements of a producer-handler are that he must not handle more than a quantity of 5,000 pounds of turkey which are not of his own production and must handle all but 5,000 pounds of his own production. This recognizes that disease, weather conditions, and other factors make it difficult, if not impossible, to produce an exact number of pounds of turkeys. The definition allows, therefore, a producer-handler to either buy or sell 5,000 pounds of live birds in order to maintain a stable handling operation. The evidence reveals that a producer can produce within 5,000 pounds of a specific quantity of turkeys.

Some witnesses testified that a producer-handler should be frozen to the quantity of turkeys handled during a given base period, otherwise all producer-handlers would produce and handle the 100,000 pound maximum quantity and that if all did this the effectiveness of the volume regulation provisions would be impaired. The evidence of record, however, reveals that there is little likelihood this situation will occur. The production and handling of producer-handlers has not shown a tendency to increase over the years. In fact their tendency is in the opposite direction in that their production and marketing either has not varied appreciably from year to year or, notably on the eastern seaboard, has shown a marked tendency to decline over the years, their highest quantities being handled during and immediately after the war years. The per unit costs of a producer-handler, both in producing and handling, is higher than individual handler and producer operations so that it is necessary for them to obtain premium prices in order to continue their operations. These factors plus the continued trend of consumer preference to the convenience of handling and storage of frozen turkeys will effectively hamper the growth in size of a producer-handler.

The order, under the section Application of Provisions, requires that starting February 1, 1963 any person not then a producer-handler must make application to the committee for that status. The committee, in determining whether to approve such application may determine the effect of producer-handlers on the volume regulation provisions of the order and may refuse to approve applications for such status if they determine that additional producer-handlers may adversely affect the effectiveness of such volume regulations.

One of the purposes of exempting persons in the producer-handler category is such persons having usually been operating such a business for a number of years and that the impact of assessments, set aside, and restrictions on quantities which they may acquire for handling, would be such as to force them out of business. Such considerations are not applicable to persons not presently a producer-handler and the committee, after a period of operation under the order has the authority to determine whether the purposes of the order would be best served by approving or disapproving such status. February 1, 1963 is the start of a new marketing year. The time between the effective date of the order and February 1, 1963, therefore, gives persons with the producer-handler type of operation who may be outside the prescribed producer-handler limitations a reasonable opportunity to adjust their production and handling to comply with the limitations.

"Year and marketing year" are synonymous and mean the 12 month period beginning February 1 of each year and ending January 31 of the following year. The marketing year has been set up to conform with the recognized marketing year of the industry. The record reveals that producer marketings are at their seasonal low in February. Also that cold storage holdings on February 1 are relatively high and from February through July are generally on the decline. It is during this period that the new crop is being produced for marketing in major volume during the fall and winter. "Year" has been included as part of the definition so as to make it clear that years prior to the effective date of the order would be "marketing year" periods and not calendar year periods in computing allocation basis and for applying the definitions of the order. This will allow for consistency in applying the provisions of the order.

(b) *Turkey Advisory Board.* There should be established a Turkey Advisory Board to provide a broad representation within the industry, with the opportunity of drawing on the advice and knowledge of many persons, to advise the administrative committee on marketing policy and other matters and to provide a means to nominate to the Secretary the members and alternates of such committee. The board should be composed of 57 members and alternates nominated by the industry from the states set forth in the order, and 3 representatives-at-large and their alternates, to be selected at the discretion of the Secretary.

Each of the fifty-seven members of the board selected by nomination should be a producer or handler or an officer or

employee of a corporate producer or handler. A person with such qualifications should be intimately acquainted with the problems of producing or marketing of turkeys, and each may be expected to present accurately the problems incident to production or marketing of turkeys produced in the area or part of the industry which he represents. The qualifications for each alternate should be similar to those for the respective member for whom he may act. Such qualifications should help to assure that the interest of the group from which he is selected will be adequately represented in board and committee deliberations.

The States or groups of States for which the fifty-seven of the board members would be representative were initially proposed by the National Turkey Advisory Committee and it is concluded such grouping is an appropriate basis for providing a fair, adequate, and equitable representation on the board.

The three members of the board who would be representatives-at-large would be selected at the discretion of the Secretary. The Secretary's three selections could very well round out the membership of the board if it is found that the nominees are unbalanced as to producer or handler representation. For instance, the nominees from the Northeast area may turn out to be all handlers (or producers). In such event one of the Secretary's selections could be a producer (or handler) from that area to insure that the board has the benefit of the knowledge and experience of both segments of the industry in that area. Similarly, the board may be further rounded out by a consumer representative appointee.

It is practical and equitable that selection of the fifty-seven board members and alternates should be on the basis of the States and groups of States provided for in the proposed marketing agreement and order. This would provide a geographical basis for selection of such members. Such geographical basis should be, and for purpose of initial membership has been, related to the relative production of turkeys within the United States so that a practical basis for establishing equity has been reached. The proposed distribution of members on the board also would equitably represent producers and handlers in the various producing areas, and would adequately represent the interests of the groups from which each member and alternate would be selected.

Terms of office should be for three-year periods, the term ending on the last day of January. A three-year period recognizes the need for continuity of membership on the board. This continuity is further recognized by having one-third of the board nominated each year. During the three-year period, the board and committee should have full opportunity to determine, test and correct working policies. This could be adversely affected by periodic appointments of inexperienced persons to the board. At the same time the industry by nominating one-third of the membership of the board each year has an opportunity to express their views on the board's policy without resorting to the referendum procedure.

To permit a full complement of members and alternates, each person should serve until his successor has been elected and has qualified by accepting his appointment. At the initial nominations, in order to effect the staggered terms of office, one-third of the board should be nominated for a term of 1 year, one-third for 2 years, and one-third for 3 years. Since the nominations will be made from each of the States of the United States and there may be difficulties in getting all interested persons together to decide on such staggered terms, it is appropriate that such staggered terms be determined by the Secretary or under techniques determined by him.

Nomination meetings for the purpose of selecting nominees for members and alternates on the board should be called and supervised by the committee. The committee functions as the administrative agency of the board and the Secretary for administering the order and its staff and organization make it the logical body to organize and supervise the nomination meetings. However, for the initial nomination meetings, which should be held as soon as practicable, the Secretary should perform the functions of the committee. This is necessary because the committee will not be in existence at the time such initial meetings are held.

The meetings, of course, should be held in the States or group of States listed in the order and reasonable publicity should be provided for such meetings. The meeting should be held at such time as will allow the committee sufficient time to certify the nominations to the Secretary by January 4.

Only producers and handlers as defined in the order should be eligible to vote. The prime purpose of the board is to develop and recommend policies to the Secretary which will directly affect producers and handlers and, therefore, these persons should be the ones to elect nominees for membership on the board. For this reason, also, only producers or handlers should be nominees for membership on the board.

Three nominations should be made for each member position which would also be deemed to be the nominations for such member's alternate. Under this situation the Secretary would have a choice in making selections of the member and the alternate. In addition, if a nominee declines to serve, the Secretary would also have the name of another prospective member or alternate from which to make a selection. Each producer and handler participating in the industry meetings should be limited to one vote for each nominee position. If a person qualifies as both a handler and a producer, such person should have the same number of votes as a person who operates in a single capacity. Otherwise, persons with such dual capacity would have an advantage over persons who operate in a single capacity in determining membership on the board, and, therefore, defeat the purpose of having fair and equitable representation of each segment of the industry on the board.

The committee should certify the election of the nominees to the Secretary and such certification should contain a summary of the nominees' experience and association with the turkey industry. This information is necessary to acquaint the Secretary with the nominees' qualifications so that in making the appointments to the board he can, in so far as possible, assure fair and adequate representation of the various segments of the industry. The certifications should be filed with the Secretary no later than January 4 of each year. This would allow the Secretary a fair and reasonable time to select the membership of the board whose terms of office would begin on February 1.

The duties of the board shall consist of selecting from among its members a chairman and other officers and establishing procedures for performing its functions. This is necessary to allow the board to carry out its functions in an orderly and business like manner.

The board shall also make nominations for membership on the committee and certify those nominations to the Secretary. The major duty of the board also is to make recommendations with respect to marketing policy. This facet of the board's duty is discussed in more detail elsewhere in this decision. In order to avoid a failure to anticipate all the matters which may be placed before the board, there should be a general provision in the order which states that the board may give consideration to such other matters as it deems proper or as the committee or the Secretary may request.

(c) *Turkey Administrative Committee.* There should be established a turkey administrative committee to administer the terms and provisions of the marketing order. Establishment of this administrative committee is desirable and necessary to aid the board and the Secretary in carrying out the declared policy of the Act. Such committee would be the agency which would implement the policy decisions of the board and Secretary and to carry out the day to day administration of the provisions of the order. The committee would consist of 19 members and for each member there should be an alternate member. Only members or alternate members of the board can be eligible for membership on the committee and such member or alternate may continue to serve on a committee only so long as he is serving as a member or alternate member of the board. A committee of 19 is appropriate in that it is approximately one-third of the membership of the board and that number would provide a reasonable representation of the makeup of the board. A committee of 19 is also such that it can operate efficiently. Any larger number would tend to be cumbersome and inadequate to make rapid decisions which the committee may be called upon to make. Of the 19 members of the committee, one of such members shall be the chairman of the board. This individual shall also be chairman of the committee. By having the same individ-

ual as chairman of the board and the committee, effective liaison between the board and committee is accomplished as well as insuring that the board's policies as annunciated are properly interpreted and implemented by the committee.

Nominations for committee membership shall be made by the board from among its members and alternate members. This means that alternate members of the board may also be eligible for membership on the committee. This is reasonable as the board might find that certain of its alternate members may be so qualified that their services as members of the committee may be advantageous to the carrying out of the board's and the committee's functions. All nominations for committee membership should be certified to the Secretary as soon as practicable following nomination so that the Secretary may be appraised of the board's selections. The board should nominate 38 nominees to be certified to the Secretary and the Secretary shall then appoint 19 of the such nominees as members of the committee and 19 to serve as alternate members.

Members and alternate members of the committee shall serve for terms of one year ending on January 31. This period conforms to the marketing period proposed in the order. The terms of office of the committee are such that newly elected members of the board who may be elected to the committee can adequately reflect producer sentiment of the board's policy.

To assure continuity of the committee each such member and alternate member should continue to serve until his successor is elected and has qualified. Such qualification would amount to the nominee for committee membership notifying the Secretary that he is willing to serve in such capacity.

The enabling Act provides in section 608c(7)(C) for the selection by the Secretary of an agency to administer the order and also specifies such agency's powers. These powers should be enumerated in the order and thus would serve to notify the committee and other interested persons, as to extent of its powers. There should also be set forth in the order the several duties which the committee shall have in administering the program. The proposed duties are similar to those specified for other administrative agencies under federal marketing order programs and are essential to enable the committee to function efficiently and discharge its responsibilities. The listing of duties are not all inclusive and other additional duties which may be essential to the full administration of the program may be assigned the committee, by the board or Secretary.

(d) *Selection of board and committee membership.* In making selections for board and committee membership the Secretary shall give major recognition to turkey producers including consideration of the size, nature, and location of their production operations. This will assure that the board and committee in their policy considerations and implementation of such policies will adequately represent the views of all the producing segments of the industry. The Secretary in his selection shall also give consideration to reasonable handler representation on the board and committee so as to insure that the board and committee can have the views of all segments of the industry.

In order to assure the existence at all times of a board and administrative agency to administer the program, the Secretary should be authorized to select members of the board or committee without regard to nominations if for any reason they are not submitted to him in conformance with the procedure prescribed in the marketing order. Such selections should, of course, be on the basis of the representation provided in the marketing order.

Each person selected by the Secretary as a board or committee member or alternate should qualify by filing with the Secretary a written acceptance of his willingness and intention to serve in such a capacity. This requirement is necessary so the Secretary will have definite knowledge that the person appointed is willing to serve and that the position has been filled.

Also to insure that all portions of the production area are adequately represented in the conduct of the board and committee's business and that continuity of operation is not interrupted the marketing order should provide for alternate members to be authorized to act in the place and stead of the member during the member's temporary absence or in the case of death, removal, resignation, or disqualification of the member.

It is also desirable and necessary that the Secretary be authorized to fill committee vacancies without regard to nominations if nominees to fill such vacancies are not made available to the Secretary within 40 calendar days after such vacancies occur. This requirement is necessary to maintain continuity of board and committee operations and to insure that both producers and handlers are adequately represented in the conduct of board and committee business.

A quorum of the board should consist of not less than 30 members and a quorum of the administrative committee should consist of at least 10 members. This would not only insure that a majority of the members must be in attendance at the meeting, but also help assure that representation by present and reflect an accurate and representative cross section of industry thought and attitudes. After the board and committee have been operative for a period of time they may conclude that the effectiveness of the administration of the order program may be improved by changing the quorum requirements. In such case authorization is provided to allow a change in such quorum requirements by the Secretary upon recommendation of the board or committee. Proxy voting is not intended. Therefore all votes other than those cast by mail or telegram should be cast in person in order that all members may participate in the discussions and present the views of their constituents. If for reason a member is unable to attend the meeting he should arrange for his alternate to attend and vote in his stead.

The committee should be authorized to vote by mail or telegram as it may be necessary at times for the committee to act more promptly than a meeting in person would allow. Since the membership of the committee may be from all parts of the United States, these methods are intended to expedite committee action better to meet time necessity. When such vote methods are used, however, the proposition to be voted upon must first be explained accurately, fully, and identically by mail or telegram so that all members will have the same facts upon which to base their decision. However, since this method of voting will not have the advantages of the discussion which would prevail at a personally attended meeting, the quorum to carry such a vote should be set at 14 members in order for the proposition to be carried. Because marketing conditions often change rapidly, it is essential that the committee should be permitted to take prompt action necessary to properly protect the industry's interest.

Board and committee members and alternates while on board or committee business will necessarily incur some expenses. These expenses, which may include travel and living expenses, should be reimbursed so as to avoid personal financial loss to members which might otherwise occur because of his service to the board or committee. Also, compensation at rates to be determined by the committee, with the Secretary's approval, is authorized since committee members may incur additional expense with respect to their own affairs when attending to board or committee affairs. These provisions should also extend to alternate members when performing official duties.

(e) *Expenses and assessments.* The committee should be authorized to incur such expenses as the Secretary finds reasonable and likely to be incurred by it during each marketing year for the maintenance and functioning of such committee, and for such other purposes as the Secretary, pursuant to the provisions in the marketing order, determines to be appropriate. The committee should also be required to prepare a budget and a rate of assessment to be applied to all handlers. Such budget and rate of assessment should be submitted to the Secretary as soon as practicable after the beginning of the marketing year and as often as may be necessary showing estimates of income and expenditures necessary for the administration of the marketing order for such marketing year. Each budget should be presented to the Secretary with an analysis of its components and an explanation thereof. The committee should recommend a rate of assessment to the Secretary designed to return sufficient income each marketing year to cover expenses incurred by the committee. No increase in the total budget should be made without prior committee recommendation and approval of the Secretary. The funds to cover committee expenses should be obtained by levying assessments on handlers. The act authorizes the Secretary to approve the

ing of such expenses by agencies such as the board and Turkey Administrative Committee. The Act also authorizes each marketing order to contain terms and provisions requiring handlers to pay their pro rata shares of the administrative agency's necessary expenses. Each handler should pay the committee, upon demand his pro rata share of such expenses. Such assessments should be based upon the hundredweight of processed turkey which each handler handles in the marketing year. The rate of assessment shall be determined by the Secretary upon the recommendation of the committee but in no event should such assessment exceed 20 cents per hundredweight. The committee should be authorized at any time during a given marketing period to recommend the approval of decreases in the rate of assessment if income exceeds the amount of funds anticipated or increasing the rate to cover unanticipated expenses or a deficit in the anticipated quantity of turkeys handled. Since assessments are a cost to the handler's operation, such cost must be taken into consideration by him in planning the operation of his business and to apply retroactive assessment to a handler may cause undue hardships to handlers in this situation.

Authorization is provided in the order for the Secretary to accept advance payments of assessments from any handler. He does since it is possible that the board in its policy decision may decide not to apply any volume regulation during the marketing year or periods within the marketing year authorization is also provided to allow assessments to continue during such periods. If the committee could not have such authorization it might be forced to discharge certain of its personnel and to give up office space, which trained personnel and office facilities may be difficult to replace when full operation of the committee is again required.

Any excess of assessments collected which remain at the end of such period should, to the extent practicable, be refunded proportionately to the person from whom it was collected. Such refunds may be credited to contributing handlers respectively against the operations of the following fiscal period, unless payment should be demanded, in which event proportionate refunds should be paid.

The committee should also establish a reserve. Such a reserve is necessary in order for the committee to operate on a businesslike basis. It might be appropriate, therefore, that funds remaining at the end of a marketing period, which are in excess of those necessary for payment of expenditures during such period, to be applied to the reserve. The reserve could be effectively utilized by the committee in several ways.

If and when the committee should be required to liquidate its affairs, expenses will necessarily be incurred in the liquidation process. The reserve can be utilized to cover these expenses.

It is generally considered to be good business practice to provide for unforeseen contingencies. For example, it is possible that adverse weather conditions or disease might result in a substantial deficit in the estimated desirable quantity of turkeys for the marketing period. Also, the anticipated quantity of turkeys for any season might conceivably be reduced by other factors. The net effect of such a reduction would be to greatly reduce the quantity of turkeys for marketing and could cause the discontinuance of regulation and the collection of assessments or a reduction in total committee revenue. In order to continue and maintain the nucleus of a committee organization and to assure the performance of a minimum of basic services, the committee should have authority to secure needed extra funds to cover the expense of operation during such a marketing period. Such funds might reasonably be drawn from reserves.

Reserves might also properly serve additional purposes. At the beginning of each marketing period, needs arise for operating monies at a time when there will usually be little, if any, revenue from assessments. It is a customary and sensible budgetary practice, and the committee should be so authorized, to borrow operating funds from the above reserve until such time as assessment collections provide adequate revenue to meet current expenses.

It is contemplated that any such reserve will have a quadruple use; namely, (i) to defray expenses during any marketing year, prior to the time assessment income is sufficient to cover such expenses, (ii) to cover deficits incurred during any marketing year when assessment income is less than expenses, (iii) to defray expenses incurred during any period when any or all provisions of this part are suspended or inoperative, (iv) to cover necessary expenses of liquidation in the event of termination of the order. Proponents testified reserves should be limited to an amount roughly equivalent to the average budget of expenses for one marketing year. Any funds remaining after reasonable provision for liquidation, including any balance remaining in reserve funds, should be refunded to handlers on a pro rata basis. In some cases, however, an individual handler's account will be such a small amount as to make the return thereof impracticable or unduly expensive. Funds of such insignificant nature should be used by the committee for purposes of liquidation or put to such other use as the Secretary considers appropriate in the circumstances.

The committee should provide periodic reports on its fiscal operations. It is expected that audit reports will be requested by the Secretary at appropriate times, such as at the end of each marketing season, or at such other times as might be necessary to maintain appropriate supervision and control of the committee's affairs. Also, monthly financial statements which reflect the current fiscal position of the committee should be furnished members, alternates, and the Secretary. Annual audit reports and monthly financial statements should also be made available on request to persons, such as producers, and handlers, having a valid interest in the committee's affairs. In no case should data of a nature which could be detrimental to the interests of an individual handler or producer be disclosed in releases of fiscal or other reports. If the committee should recommend that the operations of the marketing order should be suspended, or if no regulation should be in effect for a part or all of a marketing season, the committee should be authorized to recommend, as a practical measure, that one or more of its members, or any other person, should be designated by the Secretary to act as a trustee or trustees during such period. This would provide a practical method whereby the committee's business affairs could be taken care of during periods of relative inactivity with a minimum of difficulty and expense.

(f) *Research and development.* The establishment or provision for the establishment of marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption of turkeys is authorized by the act. Such authorization on record evidence found, should be included in the marketing agreement and order.

Through the medium of research investigations, the committee can obtain information which would enable it and the Secretary to determine with a greater degree of accuracy the effects of specific regulations on the market and thereby promote more orderly marketing. As the industry and the committee become more aware of the value of and need for marketing research and development, projects will undoubtedly be initiated, the need for which will not have been foreseen early in committee operations. Therefore, the committee should have the authority to recommend and the Secretary should have the authority to approve the establishment of such projects which are in the best interests of turkey marketing and which would assist, improve, and promote the marketing, distribution, and consumption of turkeys. After approval, the committee should be empowered to engage in or contract for such projects, to spend funds for that purpose, and to consult and cooperate with other agencies with regard to their establishment. All such projects should receive the prior approval of the Secretary.

(g) *Marketing policy.* A marketing order program is necessary, as hereinbefore found, to promote orderly marketing of turkeys as a means of increasing producers' returns toward parity. To this end it is necessary that the Turkey Advisory Board prepare and submit to the Secretary for his approval, at least once each marketing year, a detailed report setting forth its policy which will tend to effectuate the purposes of the order. Members and alternates of the board will bring to board deliberations direct, intimate knowledge, and expert judgment concerning the quantity of available supplies in the production area and the state or condition of the turkey market, not only in its general but also in its unique supply and demand features. Board members and alternates are in a position of direct interest, advantageously situated to determine if and

when quantity or quality limitations on the handling of turkeys would tend to promote orderly marketing and increase producer returns toward parity.

Marketing policy statements should indicate to producers and handlers the general marketing outlook and plans the board and committee intend to follow. Both handlers and producers would benefit by marketing policy statements so adequate preparations may be made for handling within and complying with the regulations which the board indicates may be recommended. Since the marketing of turkeys is of necessity preceded by a period of as long as twelve months for the planning of production for such marketing and since producers cannot plan their production intelligently without a knowledge of the marketing policy required to effectuate the orderly marketing of turkeys, the Turkey Advisory Board should prepare and enunciate its marketing policy in the Fall for the following marketing year.

Although the growing period for turkeys usually does not exceed 6 months, considerable planning must precede the growing period in order that breeder hens will be available at the proper time to produce the eggs to supply the necessary poults for the production of meat birds. Since the planning for production begins with the selection of breeder hens mostly in the Fall and early Winter of the preceding year, the marketing policy for the succeeding year should be prepared and released at that time. Literally thousands of persons are involved in planning for the production of turkeys; breeder hen producers, hatcheries, producers of turkeys, feed manufacturers, processors, and others. Such persons plan independently and together. It is necessary, therefore, that the marketing policy developed by the board be made widely known to persons involved in the production and marketing of turkeys.

Marketing policy relating to volume regulation would be based on long term or marketing year considerations and outlook and considerations relating to quality regulation may be short term considerations to be applied in periods within the marketing year. Orderly marketing is dependent on many factors which are variable in nature. The demand for turkeys, for example, is not static but varies with the seasons and with the supply of competing foods. Although the number of turkeys produced is related to the number of breeder hens, eggs, and poults available, the relationship is only general and can and does change due to such factors as changing weather conditions, variations in the rate of lay of breeders, variations in the fertility of eggs, variations in the mortality rate, etc. For these reasons the board should have the authority to amend its marketing policy from time to time if the conditions change sufficiently to substantially affect the original marketing policy.

The facts and considerations set forth in the marketing order outline appropriate standards for the board's consideration in developing a marketing policy. To the extent that each of the factors set forth therein is applicable to particular problems confronting the board, they should be adequately dealt with in the marketing policy statements.

The committee is charged with authority to develop and recommend to the Secretary specific regulations which would implement the board's marketing policy. It is logical that the committee should have this authority since it is the agency of the board and the Secretary for administering the order and since it is made up of members and alternates of the board it follows that it will reflect the industry's views. In turn, the Secretary, in administration of the marketing program, looks to the committee as the administrative agency offering a reasonable, accurate reflection of the board and industry considerations and judgments on matters pertaining to the marketing order. The board's marketing policy recommendations should be in sufficient detail, supported by facts pertinent thereto, so that the committee would have an adequate standard in its formulation of regulations thereunder. In turn the committee's recommendations of regulations to the Secretary should also be supported by data and information so that the Secretary will be advised as to the considerations of the committee resulting in the recommendations.

Both the board's marketing policy and the committee's regulations should be made available to the industry as soon as practicable using such media as committee bulletins, press releases, newspapers, radio, television and other media available to the committee. The broad and early dissemination of such information to the industry will allow the industry to make its plans accordingly and, therefore, tend to make the marketing policy and implementing regulations more effective.

It has been indicated previously that the board's marketing policy should be issued in the Fall preceding the marketing year in order to allow all segments of the industry to make their plans. It is anticipated that the committee's regulations implementing that policy would also be issued shortly thereafter. However, in developing such marketing policy and regulations certain of the board and committee considerations will have been based on educated estimates such as the quantity of carryover of turkeys into January and other such factors. Accordingly, it would be advantageous for the board and committee to review its policy and regulation when the actual figures are available. Such a review would also serve to acquaint new members of the board and committee, whose terms start February 1, with the actions of the board and committee.

The act under which authority marketing orders are developed and issued gives the Secretary the ultimate responsibility for the administration and enforcement of a marketing order program. As indicated heretofore, the act authorizes the Secretary to be assisted in the administration of the order by a board and committee composed of industry representatives who may make recommendations concerning the type and methods of regulation available under the order which the Secretary may consider, together with other information, in effectuating the purposes of the order and the act.

The evidence of record submitted by producers, handlers, and related segments of the turkey industry indicates that the volume regulation provisions of the order will contribute to the establishment of stable and orderly turkey marketing conditions as a means of accomplishing the objectives of increasing producer returns to parity.

The proposed marketing order for turkeys as contained in the original Notice of Hearing (26 F.R. 10286) provided for only one method of volume regulation. That was the desirable free quantity with set aside percentages method (Method No. II herein). At the various sessions of the hearing held during the period between Nov. 20 and Dec. 13, 1961, modifications to said proposed order were suggested by all segments of the industry. The modification most universally suggested was that a second type of volume regulation be provided which would equitably apportion the desirable quantity of turkeys to producers. Modifications were also suggested which would give special consideration to producer-handlers, small handlers, small producers, primary or foundation breeders, and educational and other institutions producing turkeys for their own use or for research and educational purposes. Subsequently, the hearing was reopened by a notice of reopening of hearing on January 18, 1962 (27 F.R. 518). Attached to said notice was a draft of a turkey marketing order which incorporated the suggested modifications of the industry. Additional evidence on the original proposals and the modifications were submitted at the reopened hearing held January 29, 30, 31, and February 1, 1962.

Witnesses who testified on the allocation base and allotment method (Method No. I herein) were in essential agreement that the quantity of turkeys which handlers may acquire be apportioned equitably among producers. The evidence supported the concept of making such apportionment to producers by establishing historical bases for each producer and apportioning out the amount of turkeys which handlers may acquire for handling on the basis of such bases. This would result in producers being able to plan their production to meet the desirable quantity of turkeys established by the board and committee, and thereby cut down on any excess production on which they might have difficulty in marketing or which might have to be put in set-aside and bring a lower return than on turkeys produced within the desirable quantity. By use of this system the supply of turkeys handled by handlers can be controlled so as to bring the economic factors of supply and consumer demand into an alignment which would increase producer returns. Such alignment of supply and demand would also obviate the quantity of turkeys in excess of the reasonable demand therefore which in the past has resulted in disorderly marketing and a lowering of net returns to producers.

The orderly marketing of turkeys, with the objective of increasing producer returns toward parity also requires that the board and the Secretary have the flexibility and authority for meeting different marketing conditions as they arise. The marketing of turkeys has many facets relating to type or variety of turkeys, sex, size, grade, season of the year, and other factors. The effect of such factors on orderly marketing are not exclusive but frequently relate to each other. Accordingly, authority should be provided in the order for the board and committee, with the approval of the Secretary, to adopt programs which recognize the various and changing conditions in the industry. What the variations are and what the changes may be are not always known in advance hence the necessity for providing for such variations and changes in the regulations and for different handling in a different period or periods. The record indicates that the demand for different types, grades, sizes, etc. of turkeys may vary by season, for instance, institutional size turkeys may be in demand in one period and not another. These situations result in fluctuations of the supply-demand cycles of particular types, qualities, sizes, etc. of turkeys within the established desirable quantity which could result in disorderly or disruptive marketing conditions within such desirable quantity. Accordingly, the order provides authority for limiting the handling of turkeys by particular grades, sizes, or qualities of any and all types of turkeys during a specified period of periods and is an essential factor contributing to orderly marketing and increasing producer returns.

A second method of accomplishing equitable volume regulation is provided in the order. This is the establishing of a desirable free quantity of turkeys and providing that turkeys in excess of this quantity be placed in a set aside. The evidence of record indicates that this would also be an effective method to promote orderly marketing and better producer returns. Under this system a desirable free quantity of turkeys will be established by the Secretary and this quantity will be aligned with the estimated demand for the product expected to provide a reasonable return to the producer. If the board or committee ascertains that turkeys are being produced in excess of this quantity they could divide the total production which handlers may dispose of into a percentage free quantity and the balance percentage representing the excess would be placed in the set aside. The excess or set aside would be removed from normal marketing channels. Since the quantity which is in excess of the demand is one of the prime disruptors of orderly marketing, such removal of the excess from normal marketing channels would promote orderly marketing with a consequent increase of producer return.

It has been shown that under the allocation base and allotment system there may be varying demand and other factors which relate to the handling of particular grades, types, sizes, etc., of turkeys which could be a disruptive influence on the orderly marketing of the desirable quantity of turkeys. These same influences could also affect the orderly marketing of turkeys under the desirable free quantity set aside system. Accordingly, provision is made to authorize limiting the handling of turkeys in a manner similar to that provided under the base and allotment system.

Although both systems discussed above could be used exclusive of each other they could also be utilized advantageously in combination. The desirable quantity under the allocation base system and the desirable free quantity under the set aside system can be set at the same level for the marketing year or period(s) within such year. In the event there are fluctuations, seasonal or otherwise, in the supply and demand the set aside features could be utilized to smooth out the fluctuations. In such situations it might be possible in times of excess supply to move such excess into set aside and feed back such excess during periods of short supply. Since it is not possible to anticipate all the ramifications of supply and demand the board and committee may, after a period of operation, be able to utilize the combination of the two systems to cover a variety of marketing situations.

(h) *Methods of volume regulation.* The order provides that the Secretary may establish, upon the recommendation of the board or other available information, volume regulations on turkeys by any one or both of two methods specified if he determines that regulation by such method or methods may tend to effectuate the declared policy of the act. The order further provides that the method or methods so employed may relate to the marketing year or such other period as he may prescribe and may be based on different desirable quantities or desirable free quantities for different types or sizes of turkeys. In order to provide equity among producers, whatever method or methods used must be applied on the same basis in the establishment of allocation bases and allotments, or percentages. However, since the order may become effective after the beginning of the 1962 marketing year, the method of volume regulation in 1962 is restricted to Method II, as defined in the order, and if such volume regulation is saved the board shall give due consideration to regional differences in production. This provision recognizes the impracticability of establishing bases and allotments, as provided in Method No. 1, for application in the 1962 marketing year due to fact that by the time the order is made effective and the necessary information concerning allocation basis is compiled and allotments computed, a substantial part if not the bulk, of production will already be in the process of production. Such time could be more advantageously utilized by the board and committee in 1962 in preparing for making Method No. 1 operative in 1963. Method No. II, however, would not require such extensive preparation on the part of the board and committee and such method could, therefore, be utilized in 1962 if the board so recommends. It is recognized that the marketing of turkeys varies by season and area where produced and, therefore, that at the time Method No. II is initiated, some areas and some producers may not have started marketing, or may have finished marketing. The board is required to give due consideration to these factors when initiating the regulation so as to provide, insofar as possible under the situation, equity among producers and handlers.

Volume regulation of turkeys by Method No. I requires that the committee, on the recommendation of the board and with the approval of the Secretary, establish the desirable quantity of turkeys which all handlers may acquire for handling from producers in a marketing year. The act provides that such desirable quantity to be handled by handlers may be equitably apportioned among producers based upon amounts sold by such producers in such prior period as the Secretary determines to be representative.

It is determined that the years 1959, 1960, and 1961, are representative of the production of producers. These are the three most recent years of production and they adequately reflect the current pattern of production in the turkey industry. The production from any individual production facility may vary from year to year because of weather, the availability of credit, disease, and economic factors such as the price outlook at the time of marketing. However, by using an average of the production and marketings of three years, as provided in the order, a production and marketing figure is obtained which is a fair representation of such production and marketing during the historical base period.

It had been proposed that the years 1957 and 1958 be included as part of the base period. However, it was not shown that such years would actually be representative of the current patterns of production. In fact, to the extent that they do not reflect the full national pattern of increase in contract production they are not representative. A further factor is that credible records of production and marketing may be difficult if not impossible to obtain for those years. Accordingly, the years 1957 and 1958 are not included in the base period.

It has been proposed that allocation bases for the years 1963 and 1964 be established on the basis of each producer's highest production in the years 1959, 1960, or 85 percent of 1961. The 85 percent of 1961 production recognized that the rate of growth in the turkey industry in 1961 exceeded the previous 10-year annual average rate of growth by 15 percent. Testimony on this method of establishing allocation basis clearly demonstrated that this procedure would cause the total of all allocation basis to greatly exceed the actual level of production in 1961, the industry's highest production year. It was pointed out that this would result in serious inequities among producers especially as between producers who had maintained a relatively steady level of production in the base years as compared to those producers who had either increased their

production sharply or decreased their production sharply during the base years. By having a very large total of allocation basis the allotments resulting therefrom would have to be reduced very sharply to the detriment of the producer with a relatively steady level of production. One witness who testified to this possible situation demonstrated that the bases of producers he serviced in the base years would, if this system of determining allocation bases were to apply, result in the sum of such bases exceeding their actual 1961 production by 36 percent, if 1961 production were adjusted to 85 percent, or by 45 percent if 100 percent of 1961 production were used. Averaging the production and marketing for the three-year period reconciles this problem and also tends to provide equitable treatment to all producers.

It has been shown that there are two types or classes of producers involved in the production of turkeys, the producer-grower and the contract-producer. The allocation of bases and allotments recognizes the distinctive contributions to the production process of the two classes of producers and tends to treat producers within each class equitably as to each other and to treat each class equitably in relation to the other.

With regard to producer-growers, in order to be eligible for an allocation base such producer-grower must have produced turkeys in 1961 or in any two of the three years of the base period. It would be inequitable to exclude a new producer who commenced production in 1961, the last year of the base period, from acquiring a base since, by starting production in that year it was necessary to establish production facilities. Without a base such a producer would encounter considerable difficulty in marketing his turkeys. The provision requiring a producer-grower to have produced and marketed turkeys in any two years of the base period is necessary to exclude any person who produced in only one of those years (not including 1961) and is no longer producing turkeys. It would be inequitable to existing producers to apportion a part of the desirable quantity of turkeys to a person who is no longer producing turkeys.

The turkeys to be included in the base computation must be those which are from the production of a producer-grower. This is necessary to preclude a producer from buying turkeys not produced on his production facilities as a means of expanding his base. Otherwise, the total volume of bases would be increased and such increase would not be representative of the producers' pattern of production and marketing which is the purpose of the base system. It would also result in inequitable treatment to other producers since such an increase in the total base, would result in a decrease in their portion of turkeys apportioned from the desirable quantity. Accordingly, only turkeys produced by a producer and marketed to a handler, other producers, or other persons would be included in the computation of such producers' base.

As indicated heretofore, each producer-grower eligible for an allocation base shall have his base determined by dividing the total quantities of turkeys produced and marketed by him in the base period by three (3). Producer-growers whose production of turkeys were marketed in 1961 only or in 1961 and one other of the base years 1959 or 1960, would have their allocation bases determined similarly except that in such cases their production in 1961 would first be adjusted by multiplying such production by 90 percent. This adjustment is necessary in order to treat producers who produced turkeys in all three base years equitably with those who produced turkeys in 1961, and one other base year or in 1961 only.

Turkey production in the United States in 1959 and 1960 was nearly the same but in 1961 increased by 26 percent. This increase is spread over three years when the total production for three years is averaged. However, when the production of only two years is averaged, one of such years being 1961, the 1961 increase is spread over only two years with the result that two year producers would have a proportionately larger base than three year producers. Equating the results of averaging by two years with averaging by three years has the effect of reducing the 1961 production by approximately 10 percent. Requiring, therefore, that producers whose allocation bases were computed on a one or two year period, with 1961 as the year or one of the years, to use 90 percent of their 1961 production in the computation of bases has the effect of bringing into approximate alignment the allocation bases of the one- and two-year producers with the three year producers with the result that all producers receive equitable treatment regardless of the number of years used in the computation of their bases.

Producer-growers who produced and marketed turkeys in which contract-producers had a proprietary interest in two or more years would first determine the quantity of turkeys produced under such an arrangement. One-half of this quantity would be added to turkeys not produced in conjunction with a contract-producer, if any. This sum would then be divided by two or three, whichever is applicable. This provision again recognizes that the purpose of the base system is to provide a means of ascertaining a representative pattern of production and marketing. It recognizes further that a producer-grower who contracted with a contract-producer for only one year out of the base period is not representative of such producers' operations. Accordingly, such provision is applicable only if a producer-grower contracts for two or more years. In the event that more than two producers have a proprietary interest in the production of turkeys, such quantity of turkeys will be divided by the number of producers involved and such quantity, instead of the one-half, should be utilized in the base computation.

With regard to allocation bases to contract-producers in 1963 and 1964, each such contract-producer to be eligible for an allocation base must have had a proprietary interest in the production of turkeys in 1961 or in two or more years of the base period. As in the case of a producer-grower, it would be inequitable to exclude a contract-producer who commenced his contract operations in 1961. However, requiring at least a two-year participation in the proprietary risk of turkey production again recognizes that more than one year's operation is necessary to provide a pattern of operation for allocation base purposes as such a period would evidence his historical association with turkey production.

The contract-producer's allocation base is computed in the same fashion as that of a producer-grower except that the total production in which the contract-producer is involved is divided by two or by the actual number of producers involved, whichever is applicable. This conforms with the definition of producer whereby each of the two classes of producers share in the turkeys so produced and marketed.

Contract-producers are apportioned an allocation base under the order if they had a proprietary interest in the production of turkeys in 1961 or in two of the three base years 1959, 1960, or 1961. The order thus recognizes the historical relationship between the contract-producer and the producer-grower. This historical relationship can only be assured under the order if contract-producers are limited in the way in which their allocation bases can be utilized. Without some limitation, contract-growers could utilize their allocation bases on production facilities then owned or controlled directly or indirectly by them or obtained by them for this purpose. If this should occur, it would result in serious inequities to the producer-grower in that it would cut in half the quantities of turkeys which could be acquired by handlers from such a producer-grower's production and might result in such producer-grower's production facilities producing only one half of its historical production. Such actions would change the historical relationship existing between contract-producers and producer-growers and would be inequitable as to the producer-growers. For these reasons the order provides that handlers may acquire turkeys produced under a contract-producer's base only if such contract-producer utilized a producer-grower's production facilities in producing such turkeys. This requirement would continue the historical relationship between the two classes of producers.

Considerable testimony is in the record favoring a method of establishing allocation bases which would not tend to freeze the current geographic pattern of production. This could be done by providing for a continuing reallocation of bases in the marketing year 1965 and in each marketing year thereafter. In the marketing year 1965 and thereafter whenever a desirable quantity of turkeys which all handlers may acquire from producers has been established each producer's allocation base shall be determined by taking the average of the highest quantity of turkeys produced and marketed by him in any three of the four years immediately preceding the marketing year for which the allocation base is being determined. In the event that a producer or producers cannot or do not produce up to the allotment which handlers may acquire due to being less efficient or because economic forces in his producing area result in higher cost of production than in other areas, production, over a period of time, will be able to shift from such producers and areas to other producers and areas. This shift will be gradual and the reasons for it will be economic in nature and will be no more than what has occurred over past years. However, by providing for the continuing reallocation of bases, the economic factors which cause shifts in production would be recognized and be provided for.

The order provides that the year 1962 shall not be used in the computation of bases. The testimony at the hearing indicated that for 1962 many producers intended to maintain or even increase their production above the abnormally high production of 1961 in anticipation that 1962 would be used in computing bases under an order and that such level would be maintained even though the experience in 1961 shows that returns to the producer would be the same as 1961 or less. To the extent that 1962 production could be influenced, in part, by producers attempting to make bases, such production would be caused by factors entirely unrelated to the normal economic considerations utilized in planning production. Accordingly, it is concluded that 1962 is not a representative production year and should not be used in the computation of bases.

In addition to not using 1962 as a base year in the computation of allocation bases in 1965 and thereafter it has been determined as advisable to use the allocation base determined for use in 1963 and 1964 as the quantity of turkeys each producer marketed from his production in 1960 and 1961 rather than such producers' actual marketings in these years. The allocation base for each producer in 1965 would be determined by adding together the highest quantity of turkeys in which he had a proprietary interest in any of the three years out of the four years, 1960, 1961, 1963, and 1964. Since two of these years would be prior to the effective date of an order, and hence not affected by the order, and two years would be influenced by the order, it has been determined that equitable treatment of all producers can only be assured by requiring that the actual production and marketing of turkeys in 1960 and 1961 be disregarded and replaced thereby by the established allocation base for 1963 and 1964 when computing allocation bases for 1965 and thereafter. By so doing producers who either had unusually high or unusually low marketings in such years would be treated equitably with all other producers.

It had been proposed that a producer-grower who produced turkeys in conjunction with a contract-producer, and thus had his production split in the apportionment of allocation bases, could, upon application to the committee, have his allocation base adjusted up to the total quantity of turkeys marketed from his facilities in the base years. The purpose of this provision was to allow a producer-grower who contracted to have his allocation base restored to a level comparable to other producer-growers who acquired their allocation bases as independent growers. However, testimony at the final session of the hearing indicated that: (1) The incidence of risk sharing contracting was much greater than had been supposed, (2) the incidence of risk sharing contracting had increased sharply in 1961 relative to a year earlier and, (3) the incidence of risk sharing contracting varied widely as between areas of the country, ranging from almost 100 percent to almost zero. It is clear that the option would result in a gross pyramiding of allocation bases which would be to the detriment of independent producer-growers and would also result in a disproportionate inflation of allocation bases as between one area and another. For these reasons the proposal was not included in the order.

Circumstances may exist which cause a producer's production in one year to be substantially reduced for reasons beyond his control. Such conditions could exist in the case of fire, flood, or other natural damage or when the producer voluntarily ceases production in order to break a disease cycle on his farm or for other sound reasons. Under such circumstances the producer's production is not representative and it would be inequitable to such producers to consider the marketing from such production or lack of production in the calculation of his allocation base. For this reason provision is made for the committee, to revise such producer's allocation base to what the committee determines to be representative of his production and marketing.

A producer-handler is not a producer under the order and therefore is not allocated a base. It is possible, however, that a producer-handler may desire to relinquish his status and become a producer. Provision is made to allow, upon application to the committee, such a producer-handler to be apportioned a base computed upon his past marketing from such production. Allowing the issuance of such bases will not materially affect the allotments to existing producers since the producer-handlers production was considered by the board in setting the desirable quantity.

Persons who do not have a production base history may also acquire bases. However, the quantity of turkeys from which these bases may be apportioned to such persons is limited to that quantity which is the difference between the total of the allotments of the preceding year and the desirable quantity of the succeeding year. This is necessary to prevent new persons from draining away portions of existing producers' allotments. Thus, new producers may enter the industry without causing the marketings of existing producers to be restricted by their entrance.

In submitting an application for an allocation base the new producer must establish an ability to produce. Ability as used in the order contemplates having resources of production. Such resources include not only the land and facilities, but also the finances which are necessary to produce turkeys. The committee, being composed of individuals from the industry are ideally situated to evaluate such new producers' ability.

Computation of allocation bases will be made by the committee based on information supplied by the producer and, in order to allow the committee sufficient time to make the computations before the marketing year starts, such information as is requested for this purpose must be supplied to the committee at least 6 weeks, or earlier if the committee should require, prior to the succeeding marketing year. Since the allocation bases for marketing years 1963 and 1964 will be the same, such information need be supplied only once to cover those years. The committee, or any agency it may select, should have the authority to verify the accuracy of the information submitted by producers for this purpose. If errors are found in the applications the committee should have the authority to correct such errors but should give the applicant reasonable opportunity to discuss with the committee the factors considered in making the correction. The burden of supplying and supporting all information supplied to the committee should rest upon the producers. If errors in application are found and corrections made thereto, such corrections should be reflected in the allotment apportioned to the producer.

Each producer who has an allocation base shall be apportioned an allotment of turkeys which handlers may purchase or otherwise acquire or receive for handling from producers for their account or the account of such producer. In this fashion the total desirable quantity of turkeys established by the Secretary may be apportioned equitably among producers as provided by the Act. Such allotment shall be computed by dividing the desirable quantity of turkeys by the sum of the allocation bases of all producers and then multiplying each producer's allocation base by the resulting percentage figure. In this way each producer will receive his equitable portion of the desirable quantity. The order provides that some means of certification of allotments will be set up by the committee. Under such procedures handlers will be in a position to know whether the turkeys acquired from producers are from the desirable quantity. Such quantities include turkeys produced by a handler in his capacity as a producer. In order to effectuate the purposes of volume regulations, handlers may acquire only that quantity of turkeys so apportioned to the producers and such other quantities of turkeys as specified in the order.

It is recognized that the production and the demand for turkeys may vary within any particular period in a year. The committee should be authorized by the order to take any steps necessary to bring the allotment system in line with such varying production and demand. Accordingly, provision is made in the order to allow the committee to make changes in the quantities of turkeys which handlers may acquire for handling during any period or periods within a marketing year.

In determining the quantities of turkeys which handlers may acquire in such period or periods, consideration shall be given of the seasonal patterns of production of the various regions of the production area. Such consideration is necessary so that the benefits of such regulation may, insofar as possible, be applied to all producers. The committee, because of its make-up and knowledge of the industry, is ideally suited to establish the regions to be affected by this type of regulation.

It will be difficult if not impossible for any producer to produce just the exact quantity of his apportioned allotment. Production is affected by many things including weather, the mortality rate occasioned by the incidence of disease, and other factors. Accordingly, provision is made to allow handlers to acquire for handling from producers an additional quantity of turkeys not exceeding 5 percent of the producer's allotment. In the event such a quantity in excess of the allotment is acquired by handlers from such a producer, however, a volume equal to such excess quantity shall be deducted from the producer's allotment for the next marketing year or period within a marketing year if allotments are apportioned by the committee by period. Conversely, if handlers do not acquire from producers a producer's full allotment for the marketing year or period within a marketing year then a volume equal to such quantity may be acquired from such producer in excess of such producer's allotment for the next marketing year or period within a marketing year. The evidence of record establishes that producers can produce within 5 percent of any set quantity of turkeys. Accordingly, the quantities referred to above which may be carried into the next marketing year or period or deducted therefrom should be limited to 5 percent.

A handler may acquire for handling the 5 percent quantity in excess of the allotment upon certification by the producer that such excess consisted of turkeys from his own production. Turkeys which a producer may have acquired and marketed from sources outside his own production are not included so as to forestall the possibility of handlers acquiring the 5 percent excess from a substantial number of producers within a period which situation could have an adverse affect on the volume regulation purposes of the order. In order that the committee will be aware of the carry-overs the producer and handlers should be required to notify the committee of such carryovers.

Within the industry there are certain specialized functions being performed which are essential to the production of turkeys. One of these functions is that of the foundation or primary breeder. Such a breeder supplies the eggs from which come the poults which are purchased by producers of hatching eggs. Many such foundation breeders have breeding programs tending to establish and develop strains of turkeys which are particularly suitable to satisfy the different institutional uses or consumer preferences. Such programs have resulted in the development of different strains of the so-called bronze and broad white turkey which are heavy type turkeys and also in development of various strains of the smaller Beltsville type turkey. These programs are essential in order to allow the turkey industry to continue to improve the efficiency of production and to compete with other meats and meat products. Accordingly, such programs should not be unduly restricted by the operation of a marketing order and improvement of the strains or breeds of turkeys should be allowed to continue. The general method used in establishing or developing particular strains of turkeys is that of selecting turkeys which exhibit the best of those qualities which are sought to be developed are encouraged and fostered. The birds remaining in the flock after selection and the selected birds after they have performed their function are marketed in the same channels as are other turkeys. Therefore, a foundation breeder, under the terms of the order, would also be a producer and as such would have an allocation base and an allotment computed therefrom. However, in any breeding program the quantity of turkeys which are produced to effectuate such a program may vary from year to year with the particular type of development program conducted by the foundation breeder with the result that a particular quantity of the allotment of a foundation breeder may be such that it will restrict or affect adversely the development program. Accordingly, provision is made to allow the committee to set up procedures by which a producer who is a foundation breeder may market turkeys in excess of his normal allotment which may be acquired by handlers.

The turkey breeding program is such that often there is a fine line of distinction between a foundation breeder who is doing basic research and development on turkeys and a multiplier breeder whose prime function is to take such strains which are developed and produce them in volume to supply the quantity of poults necessary for the needs of the turkey producing industry. Accordingly, the committee is authorized to define by regulation a foundation breeder who will be eligible to take advantage of the provision allowing excess marketings of an allotment to be acquired by handlers.

Witnesses testified that the multiplier breeder may also encounter difficulty in his operations if handlers are restricted in the quantity of turkeys which may be acquired from such multiplier. Multipliers would be producers under the order since they market the breeder hens to handlers after such hens have completed their egg laying function. Multipliers would be allocated a base computed on such marketings. However, it is possible that disease or other calamity may strike a multiplier breeder flock which destroys their ability to lay quality eggs. In such instances the turkeys are suitable for meat purposes but not for egg laying and they are marketed to a handler under the producer's allotment. In order to continue the multiplying function, which is an essential function to the industry, the multiplier would be required to replace the flocks of turkeys disposed of. These birds, after performing their function, would also be marketed to handlers under the multiplier's allotment. In the event such a situation as described resulted in the multiplier having turkeys in excess of the amount handlers may acquire under the allotment, the multiplier may request relief from the committee under the emergency or hardship provision of the order. The committee may grant such relief if it determines such relief is warranted under the circumstances and is convinced that the situation of the multiplier was not brought about as a means of increasing the equitable quantity of turkeys apportioned to such producer which handlers may acquire. Under the order producers marketing replacement flocks to multipliers would have such quantities of turkeys included in base computations.

The transfers of allocation bases are not allowed except under special circumstances. Under the order program the quantity of turkeys which handlers may acquire is related to the quantity of turkeys represented in the allocation bases. New bases can be created only under the conditions set forth in the order. Since the supply of turkeys which handlers may acquire is thereby limited, allocation bases will have some value to producers who may wish to increase the quantity of their production which may be acquired by handlers. Because the capital outlay for turkey production may be relatively small, certainly as regards to the outlay required by most other agricultural commodities, if bases were allowed to be transferred without restriction, it is conceivable that these producers with sufficient resources could, over a period of time, gradually accumulate bases to the extent that such accumulations may have monopolistic tendencies. The order should not foster monopoly, accordingly, transfers of bases are restricted to the situations enumerated in the order.

One of the conditions which would allow the transfer of a base is in the event a producer desires to get out of the turkey producing business and sell his production facilities. The base may be transferred to the person acquiring the facilities. In such instance it is reasonable to allow the producer to dispose of his operation in the same fashion as other going businesses are sold. In this type of transfer the person who acquires the facilities would become the producer and the person disposing of the facilities would lose his status as a producer. Since the transfer of the base in these circumstances would be in conjunction with the transfer of the production facilities, the undesirable accumulation of bases discussed above would not be a serious factor here.

It is also reasonable to allow the allocation base to be transferred to a member of the producer's immediate family in the event of such producers death, retirement, or entry into the military service.

There are also situations where the operation of the facilities is under a partnership or point venture, not including the risk contracting relationship discussed earlier. It is also reasonable to allow one of the partners who desires to have the business to transfer his base interest to the remaining partner(s) or to be divided between them if they desire to establish separate production facilities.

In each of these situations where transfers of bases are allowed, the probability of concentration of bases is not significant.

Allotments resulting from bases are allowed to be transferred under procedures set up by the committee. The reasons discussed with regard to bases are not pertinent here because allotments may be transferred only for a marketing year or lesser period. Transfer of allotments could also take care of situations where a producer's facility may be put out of operation by fire, flood, weather, disease, or other calamity, natural or otherwise. This producer should be allowed to make disposition of his allotment until he is again able to produce. It is not to such producer's advantage, however, to transfer his allotment for too great a time since under the reallocation base system in effect in 1963 and thereafter such producer's base would decrease until, if transferred consistently for four years, he would have no base left.

A second means of accomplishing volume regulation which the board and committee may use is that of establishing a desirable free quantity of turkeys which all handlers may freely handle during any period or periods established by the Secretary upon recommendation by the Board. This regulation may be applied alone or in combination with Method No. I, the desirable quantity regulation.

Under the desirable free quantity regulation, designated as Method No. II in the order, all handlers may handle any quantity of turkeys which are acquired from producers subject, however to the set-aside requirement established by the Secretary.

The board and the Secretary will take into consideration the anticipated total volume of turkeys which will be available in the period. If such quantity is greater than the desirable free quantity, then surplus percentage factors may be applied which will have the effect of diverting into a set-aside the turkeys which are in excess of the desirable free quantity. The order provides that each handler will then apply a uniform percentage, established by the committee, to the quantity of turkeys he handles and this percentage of turkeys will be put into the set-aside to be disposed of by the committee.

During the course of any desirable free quantity period, the quantity of turkeys being marketed may be other than was anticipated when the desirable free quantity was established. The difference may be more or less than was anticipated and may be caused by any number of factors including weather and the incidence of mortality. When this happens, the Secretary may determine what change is necessary in the surplus percentage figure in order to effectuate the purpose of volume regulation.

However, the new percentages are applicable only to the remainder of the desirable free quantity period and may not be made retroactive. This restriction is necessary in order to prevent inequitable treatment to handlers, otherwise a handler who has finished his turkey handling for the period would be in the position of not having any turkeys to put in set-aside. Also, a handler of large volume might be required to divert several days' or weeks' production solely into set-aside. Such situations would be too harsh economically on such handlers. During the period when a set-aside is in effect, handlers may only dispose of those turkeys which are of the free percentage.

For the reason indicated in the discussion of Method No. I, the committee may find it necessary to prescribe regulation of the handling of free percentage turkeys by grade, size, type, etc., in order to maintain and promote orderly marketing. Provision is made in the order to allow them to accomplish this objective under Method No. II also.

Since the net proceeds from the set-aside turkeys are to be returned to said producers, or their successors in interest, it is necessary that the handler maintain records of each producer's contribution to the set-aside including the grade, size, type, weight, and other information required by the committee for this purpose.

All set-aside turkeys should be held by the handler for the account of the committee or be disposed of in accordance with the committee's instructions. The handler should be responsible for maintaining such turkeys in good condition, using the minimum of sound handling and storage methods until relieved of such responsibility by the committee. In short, the handler should handle and store such turkeys using sound acceptable commercial methods. The committee should be further authorized by the order to prescribe methods by which set-aside turkeys may be identifiable from other turkeys of the handler. This is necessary for administrative purposes and as a means of ascertaining that the handler is complying with the regulations.

It is anticipated that the committee will establish procedures for storing and disposing of the set-aside so that such turkeys will not have to be held by the handler for any unreasonable length of time. Therefore, upon reasonable notice the handler should commence delivery of the turkeys to the committee at such time, in such manner, and at such rate as may be requested by the committee.

Recognizing that the operations of handlers vary and that each may have varying problems in satisfying the set-aside requirements, the committee may authorize several methods which will allow the handler to apply the set-aside with the minimum disruption of his operations. Some such methods might include allowing the handler to acquire his set-aside turkeys from free percentage turkeys already processed and in storage. This would allow the handler to utilize his entire volume of turkeys handled and still accomplish the purpose of the regulation by withdrawing turkeys from the market which may be freely disposed of. The handler might, under another method, authorize the committee to acquire such turkeys for his account to the same effect.

Because the facilities for storing turkeys by handlers on their premises are very limited and frequently nonexistent, the committee may designate a point of points to which handlers may ship set-aside turkeys. Likewise occasions arise where storage facilities in one location are filled and product must move elsewhere for storage.

Another method which might be utilized to the advantage of the handler would be to allow the handler to process all his set-aside requirements over a period of time at one time, perhaps at the end of a week. This would minimize the disruption of his handling facilities.

The committee, with its handler representation, may develop other such methods for the handling of set-asides by the handler and the order provides the authority for them to do so.

In effecting disposition of the set-aside the committee may find that it is necessary to have the turkeys set-aside by grade, size, or type. This should not encumber handlers to any great extent since such separation is presently being done under their own merchandising program. Separate pools may also be established on such different grades, sizes or types in order to provide equity among producers whose turkeys make up the pools.

Pooling of turkeys may be accomplished by period. This would establish equity among producers of varying marketing periods. This method would tend to encourage producers to key their production to meet the prevailing seasonal demand for their product and prevent production which is out of line with such demand. However, such pooling periods should not be less than a month because this would be insufficient time to accomplish the above objectives. By the same token, the pooling period should not be more than one year in duration since this would result in a carryover into the next marketing year and would tend to affect the effectiveness of such years' volume regulation.

The order recognizes that the continued existence of a quantity of set-aside turkeys would tend to subvert the purposes of the Act. The order requires, therefore, that the committee dispose of set-aside turkeys as expeditiously as practical consistent with such purposes but in any event not later than August 1 of the following marketing year:

The obligation to set turkeys aside rests with the handler. However, the turkeys set aside are for the account of the producer or his successor in interest. The set aside turkeys, therefore, may be the property of either the producer or the handler. In setting aside the handler could incur costs on turkeys not belonging to him. It is fair and equitable in such circumstances to compensate the handler for such costs. Accordingly, the order provides that the producer whose turkeys are set aside shall bear the costs of the handling and processing. The committee is authorized to establish charges for such services which charges

may be deducted by the handler from any monies owed to the producer.

Distribution of the net proceeds resulting from the disposition of set aside turkeys shall be made by the committee. It had been proposed that such set aside proceeds by apportioned to the handlers according to their pro rata contributions and the handlers were to distribute such funds to the producers according to their contributions to the set aside. Testimony on the subject indicated possible administrative difficulties in such a procedure as, for example, the distribution of proceeds to producers where a handler has gone out of business. Since the committee would likely use electronic tabulating equipment to help maintain records on assessments, allocation basis, etc., it is ideally equipped to make effective distribution of such proceeds directly to producers. The order, however, requires the handler to keep such records, and file such reports with the committee, as are necessary for the committee to make a proper distribution of proceeds.

The committee is charged under the order with the responsibility of disposing of the set-aside. Under the order provisions the committee takes unencumbered title to such turkeys and may dispose of them in the outlets specified. Unencumbered title in the committee is necessary so that disposition of the turkeys by the committee will not be hampered. Any liens which were outstanding at the time the turkeys were set aside do not follow them when they come under the committee's jurisdiction. However, it is equitable that such liens do attach to the net proceeds returned on the set-aside on a pro rata basis.

The turkeys in set-aside may be disposed of by the committee only in a manner which is consistent with the provisions and objectives of the order and regulations issued thereunder. The outlets specified in the order are substantially outside the scope of the usual and normal marketing channels of the industry and disposition in these outlets should not unduly compete with handlers' disposition. In disposing of the set-aside turkeys the committee must always take into consideration the effect of their disposition on the operation of the order. They should take care that their disposition does not unduly compete with the marketing of handlers' free precentage turkeys otherwise the effectiveness of the program will be thwarted. These considerations must apply with regard to disposition in each of the outlets specified in the order but especially as concerns disposition in normal market outlets. Disposition through normal market outlets could be used effectively to even out and adjust supplies moving to market so as to promote orderly marketing. Such operations, however, would be carried out only to the extent feasible and consistent with the purposes of the order.

The order provides that whenever volume regulation Method I is in effect, the committee may allow any producer who voluntarily reduces his allotment a credit against a possible set-aside for all or a portion of the quantity so reduced. The evidence of record indicates some concern on the part of producers that just the possibility of a set-aside on turkeys would make the obtaining of credit more difficult and the credit terms themselves less favorable. The thought was expressed that this possibility could be overcome if producers who voluntarily reduced their production below their allotments could be relieved of having birds subject to set-aside if such a program were initiated. In order to be administratively feasible a producer who elected to reduce his production below his allotment would have to declare his intent prior to the issuance of allotments by the committee in order that the committee could evaluate the total impact of all such elections on the operation of the order. The committee should have the authority to accept such elections in whole or in part, depending on the circumstances. If credits against set-asides are made, handlers would not be required to set aside the quantity represented by the credit and producers would not participate in the distribution of net proceeds from the disposition of set-asides. The producer who made a voluntary reduction and received a credit thereby should not be penalized for so doing by a subsequent reduction, for this reason, in his allocation base. This provision in the order is desirable as it will tend to decrease the quantities of turkey required to be set aside to accomplish the purposes of the order. It will also treat equitably those producers who reduce their production below their allotment with those who do not.

Authorization is provided in the order to allow the committee to require certification of turkeys by grade by any agency or agencies which they may designate. Such authorization is necessary to effectuate any grade, size, or type regulation which may be issued under the order. For instance the board may require under volume regulation that only turkeys of a specified grade, size or type may be marketed in a specified manner. The provision in the order allows the board to accept grade or quality designations made by the Federal Inspection Service, a State inspection agency, a private inspection agency, or any other agency acceptable to the committee.

(i) *Application of provisions.* As indicated heretofore, persons not producer-handlers prior to February 1, 1963, or those who cease to be producer-handlers thereafter, must make application to the committee if they desire to acquire such status. Such producer-handlers and exempt-handlers are exempt from the assessment and volume regulation requirements but are subject to the other applicable provisions including the reporting provisions of the order.

The order recognizes that in some instances there are marketings of turkeys produced for purposes other than commercial marketing. Such instances might be where a Federal, State, or other governmental or private institution produces turkeys for their own consumption. An example of this would be turkeys produced on a State or Federal prison farm or on a farm of a charitable institution. Since such turkeys are usually consumed by the inmates of such institutions and are not usually commercially marketed they would have little or no affect on the purposes of the order. In view of the circumstances under which such turkeys are produced it is, therefore, desirable to exempt them from the volume regulation provisions of the order.

There are also instances where turkeys are produced by organizations and educational institutions primarily for research and educational purposes.

Research and education are beneficial to the industry and since volume regulation might have a tendency to restrict such operations they are exempted from such provisions of the order.

In each of the research, educational and institutional exemptions, however, application for such exemption should be made to the committee. This is necessary so that the committee may make a determination that the turkeys sought to be exempted are reasonable for the purpose stated and, further, that such exemption is not being utilized in an attempt to circumvent regulation of the order. The committee may also find it desirable to have reports filed for much the same reasons discussed under producer-handler and exempt-handler reporting.

Provision is made in the order to allow the committee to grant relief to producers and handlers from certain stated provisions of the order in the event of an emergency, hardship, or inequity to such producer or handler. Such a situation might be the difficulty of a producer who performs the multiplying function discussed heretofore. It is conceivable that a handler could also be the victim of circumstances warranting relief by the committee. It is impossible to anticipate all the situations in the order and the committee, composed of persons having an intimate knowledge of the industry, is in a position to apply the provisions of the order so that all receive the fairest treatment possible.

(j) *Reports and records.* The committee should have authority to require that handlers submit to it such reports and information as are needed to perform its functions. Such reports are necessary in order that the board and committee may have at all times the volume of production and marketing of turkeys. Reports from handlers are also needed so that it can establish the apportions of turkeys which handlers may acquire from producers. In the course of its operation the committee may find that other information is required to enable it to acomplish its functions. Accordingly, it is provided that the committee may require the handler to file other reports containing that information. Under the order designated handlers are exempt from the assessment and volume regulation requirements. However reports relating to the production and marketing of such handlers are necessary so that the board and committee may utilize such information in determining the desirable quantities and also in order to be aware of the effect of such exempt operations on the operation of the order. Such reports are also necessary to determine whether the

operations of such handlers are within the prescribed limitations.

Since it is possible that a question may arise with respect to compliance with the marketing order, each handler should maintain complete records of his handling and disposition of turkeys for a period of not less than 5 years subsequent to the termination of each marketing year. This 5-year requirement is necessary in order to allow effectuation and verification of the procedures by which allocation bases are computed. In the event, however, the committee gives written notice to the handler that the retention of his books and records is necessary in connection with a proceeding under section 608c(15)(A) of the act or a court action specified in the notice, the handler should be required to retain specified books and records for a longer period and until further written notification from the committee.

In order to acomplish verification of reports and to assure compliance, it is further necessary that the agents of the Secretary and the committee have access to the premises and records of the handlers and all handlers are required to make available their records and premises to any such agents during any normal business hours.

Any and all reports and records submitted to the committee, or information which was obtained therefrom, shall remain under appropriate protective classification and be disclosed to none other than persons authorized by the Secretary. The provision in the order relating to confidential information would restrict the members of the committee and board from access to such information since such members are part of the industry and it would be unfair to allow them access to information which could result in such members acquiring a competitive advantage over other handlers and producers. Accordingly, access to such information is restricted to authorized employees of the committee or to the Secretary.

(k) *Compliance with provisions.* Except as provided in the order no handler should be permitted to handle and market turkeys, the handling and marketing of which is prohibited by rules or regulations issued under the marketing order. If the program is to be effective, no handler should be permitted to evade its provisions since such action on the part of one handler, although possibly of small impact on the industry as measured by the proportion of turkeys handled by him would, in any appreciable aggregate, tend to impair operation of the program and otherwise render it ineffective.

(l) *Miscellaneous provisions—Supervisory authority.* The Secretary is charged by law with the responsibility for the general supervision of marketing order program. In order to meet such responsibilities it is necessary that the Secretary have knowledge of and approve all regulations of the committee implementing the order. The duty of the Secretary also requires him to exercise supervisory authority over the actions of the board and committee to insure that actions taken are in the public interest, tend to effectuate the act, and are within legal authority. It is conceivable that in assuring the public interest it may be necessary to remove or suspend a person having responsibility in connection with the administration of the order. These provisions are in line with the general principle that the right and responsibility of the Secretary to exercise the powers and duties conferred upon him by law are paramount. It is essential that he preserve such right and responsibility, and the indicated provisions make it clear that he has the right to prevent the board or committee from taking any actions which are not in the public interest, which would be inconsistent with the program, or have the effect of superseding or overriding applicable laws which have been enacted by Congress.

Personal liability. This provision would exempt from personal liability either individually or jointly with others any member or alternate member of the board or committee or any employee or agent of the committee for errors in judgment, mistakes or other acts either of commission or omission, in connection with performance of official duties except for acts of possible dishonesty.

It is essential in programs of this kind which generally involve substantial sums of money and property of considerable value that the members and alternate members of the committee and its employees and agents be protected from personal liability when they are performing their duties. If such provisions as these were not included in the regulation, it might be difficult to obtain competent personnel to operate the proposed program.

Separability. This provision is generally included as a matter of course in marketing agreements and orders, and also appears in most Acts of Congress, particularly those which have been enacted during the last few years. Its purpose is simply to make it clear that in case of any provisions of the marketing order and agreement should be held by a court to be invalid, or if it should hold that the applicability of any such program to any person, circumstance or thing should be invalid, the validity of the remainder of such provisions or applicability thereof to any person, circumstance or thing shall remain unaffected by the holding. These provisions show that in the intent of the proposed regulatory program, in case any of the above things develop, the program will still continue to operate insofar as practicable under the remaining provisions of the program. It is a provision to permit the program to continue to function even though some of it might be declared invalid, either in general or as regards its applicability to a particular person, circumstance, or thing.

Derogation. This provision merely makes it clear that none of the provisions of the proposed regulatory program are, or are intended to be, against or in modification of the rights of either the Secretary of Agriculture or of the United States to exercise any powers or to act in the premises in connection with the powers granted them under the Act or otherwise.

It is essential that the Secretary and the United States retain and preserve all of the rights and powers which are conferred upon them by law. Beyond any question the regulatory program should not, if adopted, be considered as a law which supersedes or overrides any laws which have been enacted by Congress.

These are precautionary provisions to specify the intent of the Secretary of Agriculture and of the United States to retain for themselves all of the rights and powers which are given them by law, not withstanding inauguration of this program.

Duration of immunities. The provision simply provides that the benefits, privileges, and immunities conferred by virtue of this regulatory program shall cease upon the termination thereof except with respect to acts done under it and during the existence thereof. There would, of course, be included any necessary and appropriate acts done during any liquidation period. A typical illustration of the benefits, privileges and immunities which are referred to is provided in Section 608(b) of the Act which specifically exempts appropriate acts taken under a regulatory program of this nature from coverage under the Anti-Trust Laws of the United States.

One of the basic purposes of a program of this nature is to regulate the commodity so as to increase the prices paid for it to the producers to as near the parity level as is reasonably practicable. This is done by the members of the industry acting in concert and through the United States Department of Agriculture pursuant to the authority of the Act. However, in the absence of such a regulatory program, the taking of the same action by members of the industry would presumably raise a serious question with respect to whether they are violating the Anti-Trust Laws in that connection.

Agents. This provision would authorize the Secretary of Agriculture to designate in writing any officer or employee of the United States, or to name any agency or division in the United States Department of Agriculture to act as his agent or representative in connection with any of the provisions of this program.

It is also conceivable that the Secretary may deem it desirable to make special delegations in writing to other officers, employees, agencies, or division of the Department of Agriculture in this regard. As indicated in connection with the definition of Secretary, it would be physically impossible for him to supervise or administer personally all of the programs and other functions assigned to him by this order if passed. The proposed delegatees in this instance are, however, subject to his control and direction, and he would be in particularly good position to correct promptly any abuses of the delegated powers which might arise.

Effective time. This provision merely specifies that the provisions of this regulatory program shall become effective at such time as the Secretary may declare above his signature, and shall continue in effect until terminated.

It is, of course, necessary that the effective date for this regulatory program, as well as for each amendment of such program, be fixed, and it is believed to be reasonable and proper that this action be taken by the Secretary of Agriculture.

Termination or suspension. The provisions of section 608c(16)(A) of the Act require the Secretary of Agriculture, whenever he finds that any regulatory program of this nature, or any provision thereof, obstructs or no longer tends to effectively effectuate the declared policy of the Act, to terminate or suspend this particular action.

Subparagraph (a), therefore, would adopt the same requirement as is set forth in section 608c(16)(A) of the Act. It is not contemplated that suspension or terminating action would be taken by the Secretary except pursuant to said paragraph, or pursuant to paragraph (b) which is discussed below.

Subparagraph (b) would require the Secretary of Agriculture to terminate the provisions of this regulatory program at the end of any marketing year, whenever he finds that such action is favored by a majority of the producers. The Secretary must hold a referendum of producers between October 1 and October 31, 1964, and on even numbered years thereafter if he receives a recommendation from the board requesting such a referendum. The board, being made up in good part by producers, is logically suited to reflect producer sentiment in this regard.

Subparagraph (c) would automatically terminate provisions of the order in the event the applicable provisions of the Agricultural Marketing Act of 1937, as amended, should cease to be in effect. It is obvious that such a program cannot exist after the authority therefor has ceased to be in effect.

Procedure upon termination. If the order should be terminated subsequent to its being put into effect, it is probable that future action will be necessary to collect money which is due, settle any unpaid indebtedness, and dispose of surplus funds or other property, such as office equipment or other production equipment, and in that connection there must be some persons who will have authority to take and complete these actions until there has been a complete liquidation and straightening out of all of the matters in connection with the program. This is a reasonable requirement and it is generally followed as good business practice. The designation of the members of the committee who are functioning as such at this time of termination for the performance of these duties is believed to be logical and a good way of handling this matter. It would be usual in programs of this nature.

Effect of termination or amendment. Unless otherwise expressly provided by the Secretary, any termination or amendment of the regulatory program or any regulation issued pursuant thereto shall not affect or waive any right, duty, obligation, or liability which shall have arisen or which might arise thereafter. Also, that any such action shall not release or extinguish any violation of such regulatory provisions or supplemental regulations, nor affect or impair any rights or remedies of the Secretary of Agriculture, or any other person, with respect to such violation. These provisions will tend to insure that vested rights, duties, obligations, and other liabilities which occurred under the previous regulatory provisions, which were in effect at the particular times, shall operate normally, and that violations which occurred under such previous regulatory provisions can thereafter be prosecuted, much the same as was done before. These provisions of the section are reasonable and necessary to assure that any such termination will not have the effect of precluding or taking the requisite action under the Act.

Amendments. This section provides that amendments to this regulatory program may be proposed from time to time by the committee or by the Secretary of Agriculture. Such a privilege is also bestowed by the provisions of section 900.3 of the rules of practice relating to marketing orders (7 CFR 900.3). However, the proposing of such amendments is not confined to these two but such action may be taken by any other person, such as a producer or handler.

Counterparts. This section would be incorporated in the marketing agreement only. It simply provides that such agreements may be executed in as many counterparts as necessary, and when one counterpart is signed by the Secretary, all parts shall constitute, when taken together, one and the same instrument as if all signatures are contained in the one original.

It is anticipated that each signatory handler will sign a separate counterpart and these provisions are intended to facilitate the signing of the agreement by several handlers. They will avoid the delay of having the same copy signed by all signatory handlers and eliminate the need for the Secretary to sign each copy. This section would also apply to amendments for the same reasons.

Additional parties. This section would also be incorporated in the agreement only and would permit any handler who did not become a party to the agreement originally to become a party by executing a counterpart and delivering it to the Secretary.

The provisions of this section should also permit persons who become handlers after this program is put into effect to join in the agreement, as well as make it possible for all handlers who fail to sign the agreement at the beginning to do so later in case they should so desire.

Even though a handler should fail or refuse to sign the agreement, he would still be subject to regulation under the order, if one is issued by the Secretary of Agriculture. Any person who so becomes a party to the marketing agreement should, of course, be afforded the benefits, privileges and immunities thereof. However, it is reasonable that the latter should be available to a handler before he becomes a party to the agreement by delivery of a signed copy to the Secretary.

Order with marketing agreements. This section which would likewise be applicable to the marketing agreement only is a formal request to the Secretary by handlers who sign the agreement that an order be issued regulating the handling of turkeys as is provided for in the marketing agreement. It is a routine provision which is incorporated in such agreements and expresses the desire of the handlers.

General findings. Upon the basis of the evidence introduced in the hearing and the record thereof, it is found that:

(1) The order, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The said order authorizes regulation of the handling of turkeys produced in the production area in the same manner as, and is applicable only to the persons in the respective classes of industrial or commercial activity specified in, a proposed marketing agreement and order upon which the hearing has been held;

(3) The said order is limited in its application to the smallest regional production area which is practicable and consistent with carrying out the declared policy of the act and the issuance of several marketing orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The said marketing order prescribes, so far as practicable, such different terms, applicable to different parts of the production area, as are necessary to give due recognition to the differences in the production and marketing of turkeys produced in the production area; and

(5) All marketings of turkeys produced in the production area and of the products thereof are in the current of interstate or foreign commerce, or directly burdens, obstructs, or affects such commerce.

Recommended order. The following order is recommended as the detailed means by which the foregoing conclusions may be carried out.

DEFINITIONS

Sec.
301.1 Secretary.
301.2 Act.
301.3 Person.
301.4 Production area.
301.5 Turkey.

PROVISIONS APPLICABLE ONLY TO PROPOSED MARKETING AGREEMENTS

301.100 Counterparts.
301.101 Additional parties.
301.102 Order with marketing agreement.

DEFINITIONS

§ 301.1 Secretary.

"Secretary" means the Secretary of Agriculture of the United States or any employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

§ 301.2 Act.

"Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U.S.C. 601 et seq.).

§ 301.3 Person.

"Person" means an individual, partnership, corporation, association, or any other business unit.

§ 301.4 Production area.

"Production area" means the 48 contiguous States of the continental United States and the District of Columbia.

§ 301.5 Turkey.

"Turkey" means that fowl belonging to the family Meleagridae, the genus Meleagris and the species Gallopavo.

§ 301.6 Type or Variety.

"Type" or "Variety" are synonymous and mean such classification of turkeys as the Committee may recommend and the Secretary shall approve.

§ 301.7 Quantity.

"Quantity" means the weight of live turkeys at the time of receipt by a handler or other person determined in accordance with regulations issued by the Committee.

§ 301.8 Processed turkey.

"Processed turkey" means the eviscerated turkey (ready to cook) or the equivalent thereof of New York Dressed or Kosher processed turkey as determined in accordance with regulations issued by the Committee.

§ 301.9 Handle.

"Handle" means the slaughtering or the receiving for slaughter of turkeys in the production area for the production of meat or the acquisition for slaughter or disposition of processed turkey by the slaughterer thereof.

§ 301.10 Handler.

"Handler" means a person who handles turkeys.

§ 301.11 Exempt Handler.

"Exempt handler" means a handler who handles less than a quantity of 7,000 pounds of turkey per marketing year.

§ 301.12 Production facilities.

"Production facilities" means the land, buildings and equipment utilized in the production of turkeys.

§ 301.13 Market.

"Market" means the disposition by a producer of a quantity of turkeys to handlers, producers or other persons.

§ 301.14 Producer.

"Producer" means a person, other than a producer-handler, who (a) operates in a proprietary capacity the production facilities on which a quantity of turkeys in excess of 3,600 pounds are produced in a year, which turkeys are handled by handlers other than exempt-handlers or producer-handlers (such producer may be hereinafter referred to as a producer-grower); or (b) is interested in the production of turkeys by having a proprietary interest in the turkeys produced by a producer-grower (such a producer may be hereinafter referred to as a contract-producer): *Provided*, That for the purposes of this part, if two or more persons are producers with respect to a quantity of turkeys, their respective shares in such quantity of turkeys shall be deemed to be a quantity of turkeys equal to the total quantity of such turkeys divided by the number of persons who are producers thereof.

§ 301.15 Exempt producer.

"Exempt Producer" means a person who operates the production facilities on which a quantity of not more than 3,600 pounds of turkey are produced in a year.

§ 301.16 Proprietary interest.

"Proprietary Interest" means sharing in the risk of loss in the production of turkeys.

§ 301.17 Producer-Handler.

"Producer-Handler" means a person who in his own handling facilities (1) handles a quantity of not more than 100,000 pounds of turkey per marketing year, of which not more than 5,000 pounds of such turkeys are other than his own production, and (2) except for a quantity not in excess of 5,000 pounds does not deliver any turkeys from his own production to others during the marketing year.

§ 301.18 Board.

"Board" means the Turkey Advisory Board established pursuant to this part.

§ 301.19 Committee.

"Committee" means the Turkey Administrative Committee established pursuant to this part.

§ 301.20 Year and marketing year.

"Year" and "Marketing Year" are synonymous and mean the 12-month period beginning February 1 of each year and ending January 31 of the following year, or such other period as may be recommended by the Committee and approved by the Secretary.

TURKEY ADVISORY BOARD

§ 301.25 Establishment and membership.

A Turkey Advisory Board is hereby established, consisting of 60 members, of whom 57 shall be nominated to represent various States and regions, as listed below:

California-Nevada	6
Minnesota	6
Iowa	4
Wisconsin	3
Virginia, West Virginia	3
Missouri	3
Texas	3
Indiana	2
Utah, Arizona	2
Ohio	2
Arkansas	2

North Carolina	2
Colorado, New Mexico	1
Georgia, Florida	1
Washington	1
Oregon	1
New England States	1
Pennsylvania	1
Oklahoma	1
Michigan	1
Nebraska	1
North Dakota	1
Illinois	1
Kansas	1
South Dakota	1
Kentucky, Tennessee	1
New York	1
Delaware, Maryland, New Jersey, District of Columbia	1
Montana, Idaho, Wyoming	1
Alabama, Mississippi, Louisiana	1
South Carolina	1

The remaining three members shall be representative-at-large and shall be selected at the discretion of the Secretary. Each member of the Board shall have an alternate member nominated in the same manner as members.

§ 301.26 Term of office.

Members and alternate members of the Board shall serve for terms of three years ending on the last day of January, and each such member and his alternate shall serve until his successor is selected and qualified; *Provided*, That the term of office of the initial Board shall be three years for one-third of the members and their alternates, two years for one-third of the members and their alternates, and for the remaining one-third of the members and their alternates shall be from the effective date of this part to the last day of January 1963, such staggered terms of office to be determined by the Secretary.

§ 301.27 Nominations.

Nominees for membership on the Board shall be made at one or more nomination meetings called and supervised by the Committee under rules and regulations promulgated by the Committee. Such meetings shall be held in and for each of the states or groups of states specified in § 301.25 and reasonable publicity shall be provided for such nomination meetings by the Committee. Only producers and handlers shall be eligible to vote and each such person shall have but one vote. Voting shall be by secret ballot and may be cast in person or by mail. Three nominations shall be made for each member position, which shall also be deemed nominations for such member's alternate. All nominations should be certified by the Committee to the Secretary as soon as practicable and, after the initial appointment of the Board, no later than January 4 immediately preceding the commencement of the term of office for the position for which a nomination is certified. Such certification shall include for each nominee a brief summary of his experience and association with the turkey industry. For the purpose of obtaining nominations for the initial Board, the Secretary shall perform the functions of the Committee.

§ 301.28 Duties.

The duties of the Board shall consist of selecting from among its members a chairman and other officers, establishing procedures for performing its functions, the making of nominations for membership on the Committee, the certifying of such nominations to the Secretary, the making of recommendations with respect to marketing policy, and the consideration of such other matters as it deems proper or as the Committee or the Secretary may request.

TURKEY ADMINISTRATIVE COMMITTEE

§ 301.30 Establishment and membership.

A Turkey Administrative Committee is hereby established to administer the terms and provisions of this part. Such Committee shall consist of 19 members which shall include the chairman of the Board who shall also be chairman of the Committee. For each member there shall be an alternate member. No person shall be selected or continue to serve as a member or alternate member of the Committee unless he is serving as a member or alternate member of the Board.

§ 301.31 Nomination.

The Board shall nominate from among its members and alternate members 38 nominees for appointment as members and alternate members of the Committee. All such nominations for the Committee shall be certified by the Board to the Secretary as soon as practicable following their nomination.

§ 301.32 Term of office.

Members and alternate members of the Committee shall serve for terms of one year ending on January 31, the initial term beginning with the effective date of this part and ending on January 31, 1963, but each such member and alternate member shall continue to serve until his successor is selected and has qualified.

§ 301.33 Powers.

The Committee shall have the following powers:

(a) To administer the terms and provisions of this part;

(b) To make rules and regulations to effectuate the terms and provisions of this part;

(c) To receive, investigate, and report to the Secretary, complaints of violations of this part; and

(d) To recommend to the Secretary amendments to this part.

§ 301.34 Duties.

The Committee shall have among others the following duties:

(a) To act as intermediary between the Secertary and any producer or handler;

(b) To keep minutes, books, and other records which shall clearly reflect all of its acts and transactions and these shall be subject to examination by the Secretary at any time;

(c) To investigate and assemble data on the production, handling, and marketing of turkeys and to make recommendations concerning the issuance of regulations pursuant to this part;

(d) To submit to the Secretary or the Board such available information with respect to turkey hatching eggs and turkeys as may be requested and such other information as the Committee may deem desirable and pertinent;

(e) To select from among its members officers other than the chairman and to adopt such rules and regulations for the conduct of its business as it may deem advisable;

(f) To appoint or employ such other persons as it may deem necessary and to determine the salaries and define the duties of each such person;

(g) To cause the books of the Committee to be audited by a certified public accountant at least once each marketing year and at such other times as the Committee may deem necessary or as the Secretary may request, to submit two copies of each such audit report to the Secretary and to make available a copy which does not contain confidential data for inspection at the offices of the Committee by producers and handlers;

(h) To prepare and submit to the Secretary monthly statements of the financial operations of the Committee and to make such statements, together with the minutes of the meetings of said Committee and the Board, available for inspection at the offices of the Committee by producers and handlers;

(i) To give the Secretary the same notice of meetings of the Committee and the Board as is given to members;

(j) To investigate compliance with and to use means available to the Committee to prevent violation of the provisions of this part; and

(k) To establish such rules and regulations as are necessary or incidental to administration of this subpart, as are consistent with its provisions, and as would tend to accomplish the purposes of this subpart and the act.

BOARD AND COMMITTEE

§ 301.36 Selection.

The Secretary shall select and appoint members and alternate members of the Board and the Committee in the numbers and with the qualifications specified in this subpart. Such selections shall, to the extent feasible in the light of the following considerations, be made from the nominations certified by the Committee and the Board: *Provided*, That in making such selections and appointments the Secretary shall give major recognition to turkey producers, including consideration of the size, nature, and location of their production operations, and reasonable handler representation with a view to the extent possible and practicable to have representation from all segments of the industry.

§ 301.37 Failure to nominate.

In the event a nominee for any member or alternate member position is not certified purusant to and within the time specified in this subpart, the Secretary may select an eligible person to fill such position without regard to nomination.

§ 301.38 Qualify by acceptance.

Each person selected as a member or as an alternate member shall, prior to serving, qualify by filing with the Secretary a written acceptance as soon as

practicable after being notified of such selection.

§ 301.39 Alternate members.

An alternate for a member shall act in the place and stead of such member (a) during his absence, or (b) in the event of his removal, resignation, disqualification, or death, until a successor for such member's unexpired term has been selected and has qualified.

§ 301.40 Vacancies.

Any vacancy occasioned by the removal, resignation, disqualification, or death of any member, or any need to select a successor through failure of any person selected as a member or alternate member to qualify, shall be recognized by the Committee certifying to the Secretary a new nominee within 40 calendar days.

§ 301.41 Procedure.

All decisions of the Board and the Committee reached at an assembled meeting shall be by majority vote of the members present. All votes in an assembled meeting shall be cast in person and a quorum must be present for a valid decision. A quorum for the Board shall consist of not less than thirty (30) members and for the Committee not less than ten (10) members. Such quorum requirements may be changed by the Secretary, upon recommendation of the Board or Committee. The Committee may vote by mail or telegram upon due notice to all members, but any proposition to be so voted upon first shall be explained accurately, fully, and identically by mail or telegram, to all such members. When any proposition is submitted to be voted on by such method, it must be favored by not less than fourteen (14) members of the Committee to constitute action by the Committee.

§ 301.42 Expenses and compensation.

The members of the Committee and the Board, and the alternate members, shall be allowed their necessary expenses, actual or per diem, as approved by the Committee, If the Secretary upon recommendation of the Board determines that it is necessary for the efficient and effective operation of the Board or Committee and that the members thereof receive reasonable compensation for their services, such members may receive such compensation at a rate recommended by the Committee and approved by the Secretary.

EXPENSES AND ASSESSMENTS

§ 301.45 Expenses and budget.

The Committee is authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred by it during each marketing year for the maintenance and functioning of the Board and Committee and for other such purposes, as the Secretary may, pursuant to the provisions of this subpart, determine to be appropriate. The Committee shall file a proposed budget of expenses and rate of assessment with the Secretary as soon as practicable after the beginning of the marketing year.

§ 301.46 Assessments.

Each handler shall pay to the Committee, upon demand, with respect to turkeys handled by him, his pro rata share of all expenses which the Secretary finds are reasonable and likely to be incurred by the Committee during each marketing year. Each handler's pro rata share shall be at a rate of assessment per hundred pounds of processed turkey, fixed by the Secretary, but in no event shall such assessment exceed $.20 per 100 pounds of processed turkey. At any time during the marketing year the Secretary may decrease the rate of assessment or may increase the rate of assessment to cover unanticipated expenses or a deficit in the anticipated quantity of turkeys handled: *Provided*, That no such change in assessment shall be retroactive. In order to provide funds to carry out the functions of Board and Committee, the Committee may accept advance payments from any handler and such shall be credited towards assessments levied pursuant to this section against such handler. The payment of expenses for the maintenance and functioning of the Board and Committee may be required throughout the period during which this part is in effect and irrespective of whether particular provisions thereof are suspended or become inoperative, or whether volume regulation is in effect.

§ 301.47 Accounting.

(a) If, at the end of a marketing year, the assessments collected are in excess of expenses incurred, such excess shall be accounted for in accordance with one of the following:

(1) If such excess is not retained in a reserve, as provided in subparagraph (2) of this paragraph, it shall be refunded proportionately and to the extent practicable to the persons from whom it was collected.

(2) The Committee, with the approval of the Secretary, may carry over such excess into subsequent marketing years as a reserve: *Provided*, That funds already in the reserve do not equal approximately one marketing year's expenses. Such reserve funds may be used (i) to defray expenses, during any marketing years, prior to the time assessment income is sufficient to cover such expenses, (ii) to cover deficits incurred during any marketing year when assessment income is less than expenses, (iii) to defray expenses incurred during any period when any or all provisions of this part are suspended or are inoperative, (iv) to cover necessary expenses of liquidation in the event of termination of this part. Upon such termination, any funds not required to defray the necessary expenses of liquidation shall be disposed of in such manner as the Secretary may determine to be appropriate.

(b) All funds received by the Committee pursuant to the provisions of this part shall be used solely for the purpose specified in this part and shall be accounted for in the manner provided for in this part. The Secretary may at any time require the Committee and its members to account for all receipts and disbursements.

(c) Upon the removal or expiration of the term of office of any member of the Committee, such member shall account for all receipts and disbursements and deliver all property and funds in his possession to the Committee, and shall execute such assignments and other instruments as may be necessary and appropriate to vest in the Committee full title to all of the property, funds, and claims vested in such member pursuant to this part.

(d) The Committee may make recommendations to the Secretary for one or more of the members, thereof, or any other person, to act as a trustee for holding records, funds, or any other Committee property during periods of suspension of this subpart, or during any period or periods when regulations are not in effect and if the Secretary determines such action appropriate, he may direct that such person or persons shall act as trustee or trustees for the Committee.

RESEARCH DEVELOPMENT

§ 301.50 Research and development.

The Committee, with the approval of the Secretary, may establish or provide for the establishment of marketing research and development projects designed to assist, improve, or promote the marketing, and distribution of turkeys. The expenses of such projects shall be paid from funds collected pursuant to § 301.46.

REGULATIONS

§ 301.55 Marketing policy.

At least once each marketing year the Board shall prepare and submit to the Secretary through the Committee a report setting forth its general marketing policy for such ensuing period or periods as it may deem appropriate. Notice of the Board's marketing policy shall be given promptly by reasonable publicity to producers and handlers. The report shall include any recommendation it may make for regulatory action in such period or periods including the need for any regulations and recommendations with respect thereto dealing in any manner with any of the foregoing or with the authorities for regulation provided by this subpart, as well as data and information used by the Board in formulating the marketing policy. In developing the marketing policy, the Board shall give consideration to the following factors:

(a) The estimated quantity of processed turkeys on hand in the production area at the beginning of such period or periods.

(b) The probable availability of additional turkeys during such period or periods.

(c) The estimated quantity of processed turkeys which should be carried over as a desirable inventory into any succeeding period or periods.

(d) The number of turkey hatching eggs set for hatching or the number of poults placed in such period or periods as will reflect probable availability of

turkeys in the period or periods for which regulation is proposed.

(e) The estimated market requirements for processed turkeys for the period or periods for which regulation may be proposed, including in such estimates as separate items probable trade demands for such turkeys in the various available outlets for such turkeys.

(f) Current prices being received for turkeys and the probable general level of prices to be received for turkeys by producers and handlers.

(g) The trend and level of consumer income and any other factors which may affect consumer demand for processed turkeys.

(h) Any other pertinent factors bearing on the marketing of such turkeys, including the estimated supply or demand for particular types or sizes of turkeys or special problems relating thereto.

Recommendations with respect to specific implementation of the general marketing policy recommended by the Board shall be made to the Secretary by the Committee from time to time, as circumstances warrant, and the Committee's recommendation shall contain the data and information upon which it is based, together with the specific regulatory action recommended.

§ 301.56 Issuance of regulations.

The Secretary shall regulate the handling of turkeys as authorized by this subpart whenever he finds from the recommendations and information submitted by the Board or Committee, or from other available information, that such regulation may tend to effectuate the declared policy of the act. Such regulation may:

(a) Limit the quantity of turkeys all handlers may receive for handling pursuant to § 301.61.

(b) Limit the handling of particular grades, sizes, or qualities of any or all types of turkeys during a specified period or periods.

(c) Fix, or provide methods for fixing, pursuant to sections 301.60, 301.62, and 301.65, free and surplus percentages applicable to the handling of all turkeys handled by handlers and for the pooling of set aside turkeys and the distribution of the proceeds of such pool.

(d) Limit the handling of turkeys differently for different period or periods, for different types, sizes, or any combination of the foregoing for any period.

VOLUME REGULATION

§ 301.60 Volume regulation.

The Secretary may establish, upon the recommendation of the Board or Committee or on other available information, regulation of turkeys for the marketing year or for such period or periods as he may prescribe, by any one or both of the methods hereinafter specified, if he determines that regulation by the method or methods employed may tend to effectuate the declared policy of the act. Such regulation may be based upon different desirable quantities or desirable free quantities for different types or sizes of turkeys; and when such quantities are established for such turkeys, the allocation bases, allotments, or percentages under such regulation shall be equitably apportioned among producers: *Provided*, That if the Board recommends volume regulation for the balance of the year 1962, remaining after this part becomes effective, such volume regulation shall be restricted to Method No. II provided in sections 301.62 and 301.65 and in such event the Board shall give due consideration to the regional differences in production of turkeys.

METHOD NO. I

§ 301.61 Desirable quantity.

Whenever a desirable quantity of turkeys which all handlers may acquire from producers in the marketing year has been established the Secretary shall equitably apportion such quantity among producers by establishing allocation bases and allotments for the marketing year as follows:

(a) *Allocation bases.* Producer-growers and contract-producers shall respectively be apportioned allocation bases for the periods and in the manner set forth below:

(1) Allocation bases of producer-growers applicable for the years 1963 and 1964:

(i) To be eligible for an allocation base each producer-grower must have been a producer-grower in 1961 or in any two of the three years 1959, 1960, or 1961.

(ii) Each producer-grower eligible for an allocation base shall have his base determined by dividing the total quantities of turkeys of his production marketed in 1959, 1960, and 1961 by three (3).

(iii) In the event a producer-grower marketed turkeys in only two of the years 1959, 1960, or 1961 his base shall be computed by dividing the quantities of his production marketed in such years by two (2): *Provided*, That if one of the two years is 1961 then 90 percent of his production marketed in 1961 shall be used in the base computation and

(iv) In the event 1961 was the only year in which a producer-grower marketed turkeys, such producer-grower's allocation base shall be 90 percent of the total quantity of turkeys of his production marketed in 1961.

(v) In the event a producer-grower produced turkeys in conjunction with any contract-producer(s) in two or more of the years 1959, 1960, or 1961 than in computing such producer-grower's base in subparagraphs (ii), (iii) his proportionate share (computed as provided in the proviso in 301.14) of the quantities marketed each year in conjunction with contract-producers shall be added to quantities of turkeys of his independent production marketed, if any, and the resulting sum shall be the producer-growers production and marketing for that year.

(2) Allocation bases of contract-producers applicable for the years 1963 and 1964.

(i) Each contract-producer in order to be eligible for an allocation base must have operated as a contract-producer in 1961 or in two or more of the years 1959, 1960, or 1961.

(ii) Each contract-producer eligible for an allocation base shall have his base determined by dividing one half of the total quantities of turkeys in which he had a proprietary interest which were marketed in 1959, 1960, and 1961 by three (3).

(iii) In the event that a contract-producer had proprietary interest in turkeys marketed in only two of the years 1959, 1960, or 1961 his base shall be computed by dividing one half of the total quantities of turkeys in the two years in which he did have a proprietary interest in such turkeys by two (2): *Provided*, That if one of the two years is 1961 then 90 percent of the quantity of turkeys in which he had a proprietary interest marketed in 1961 shall be used in the base computation.

(iv) In the event more than one contract-producers had a proprietary interest in the quantity of turkeys produced on a producer-grower's production facilities then, for the purpose of computing such contract-producers allocation bases for 1963 and 1964, the quantity of turkeys so produced and marketed shall be divided by the number of producers having a proprietary interest therein.

(3) Producer-grower's allocation bases for the marketing years 1965 and thereafter:

(i) Each producer-grower's allocation base shall be determined by dividing one third (3) the total of the highest quantities of turkeys produced by him which were marketed in any three of the four years immediately preceding the marketing year for which the allocation base is being determined: *Provided*, That in the event a producer-grower produced a quantity of turkeys in conjunction with a contract-grower(s) such quantity shall first be divided by the number of producers having a proprietary interest therein.

(4) Contract-producers allocation bases for the marketing years 1965 and thereafter:

(i) Each contract-producer's allocation base shall be determined by dividing one half of the total of the highest quantities of turkeys in which he had a proprietary interest in any three of the four years immediately preceding the marketing year for which the allocation base is being determined by three (3).

(ii) In the event more than one contract-producer has a proprietary interest in the quantity of turkeys produced on a producer-grower's production facilities then, for the purpose of computing allocation bases for 1965 and thereafter the quantity of turkeys so produced and marketed shall be divided by the number of producers having a proprietary interest therein.

(5) In computing the bases for producer-growers and contract-growers for the marketing years 1965 and thereafter the year 1962 shall not be used for any purposes and, if the years 1960 and 1961 are utilized, the producer's base computed pursuant to subparagraph (a)(1) or (a)(2) shall be deemed to be the producer's quantity of marketings for each of the years 1960 and 1961.

(6) The Committee may provide for adjustment of a producer's allocation base upon a showing that such producer's production and marketings in the

base periods provided in subparagraphs (1), (2), (3), and (4) was not representative.

(3) (i) Handlers may acquire turkeys delivered under a contract-producer's base only if such turkeys were produced on a producer-grower's production facilities other than those owned or controlled directly or indirectly by the contract-producer.

(ii) A producer-handler who desires to relinquish his status as a producer-handler, may be apportioned an allocation base by the Committee based upon his past production and marketing in accordance with regulations of the Committee.

(iii) If the sum of the desirable quantity in any marketing year exceeds the sum of the allotments of the proceeding year the Committee may determine a portion of the difference between such sums which may be apportioned to persons who are not producers of turkeys and who can establish that they have the ability to produce.

(c) *Application.* Each producer desiring an allocation base for the marketing year shall, not later than 6 weeks preceding such marketing year, or prior to such date as the Committee may otherwise prescribe, file with the Committee or other agency specified by the Committee an application therefore on forms prescribed by the Committee, which shall supply all pertinent information required by the Committee. The burden of supplying and supporting all such information shall rest upon the producer.

(d) *Committee verification.* The Committee or agency shall check and determine the accuracy of the information submitted pursuant to this section and shall be authorized to make a thorough investigation of any application. Whenever the Committee finds an error, omission, false statement or inaccuracy in any such application, it shall correct the same and shall give the person who submitted the application a reasonable opportunity to discuss with the Committee or agency the factors considered in making the corrections. In the event of correction of a base, the allotment apportioned to the producer pursuant to paragraph (d) of this section shall likewise be corrected.

(d) *Allotments.* Each producer who has an allocation base shall be apportioned an allotment of turkeys which handlers may purchase or otherwise acquire or receive directly or indirectly from the production of such producer for their account or the account of such producer during the marketing year which allotment shall be computed by dividing the desirable quantity of turkeys established pursuant to this section by the sum of the allocation bases of all producers, and multiplying such producer's allocation base by the resulting percentage figure. The result shall be the producer's allotment of the established desirable quantity of turkeys and no handler shall acquire directly or indirectly a quantity of turkeys from the production of any producer (including such handler in his capacity as a producer) which would result in handlers having acquired or received a greater quantity of turkeys from such producer's production than the total quantity so apportioned to such producer, plus such additional amounts as may be specifically provided in this part.

(e) *Certification of allotments.* The Committee may establish by regulation such means of certification or identification with respect to allotments apportioned to producers as may be required to effectuate the purposes of any regulation issued under this part.

(f) *Allotments by period.* Whenever the Board recommends and the Secretary finds that such recommendation may tend to effectuate the declared policy of the Act, he may establish within the marketing year a period or periods within which handlers may acquire a producer's allotment or specified portion thereof. In determining the quantities of turkeys which handlers may acquire in such period or periods, the Board shall take into consideration the seasonal patterns of production by region, such regions to be established by the Committee, and shall apportion such quantities to be acquired by handlers so as to provide equity among producers.

(g) *Allotment adjustment.* (1) In any marketing year or period or periods within such marketing year when allotments are in effect any handler may acquire from a producer's production a quantity of turkeys which will result in the total quantity of turkeys acquired from such producer's production by handlers exceeding such producer's allotment by not in excess of 5 percent thereof: *Provided,* That such producer furnishes the handler with a certification that his total marketings of turkeys during the period, including the excess quantity, consisted of turkeys of his own production only and upon such certification, the producer's allotment for the period shall be deemed adjusted accordingly: *Provided further,* That any handler receiving excess turkeys under these conditions shall make the producer's certification available to the Committee and file such reports relating thereto as the Committee may require and the Committee shall reduce the allotment to be acquired from the producer's production for the ensuing period by the quantity by which is current allotment was adjusted.

(2) If handlers do not acquire from a producer's production such producer's full allotment for the marketing year, or period within a marketing year, then such quantity which was not acquired may, pursuant to regulations issued by the Committee, be added to the quantity which may be acquired from such producer's production during the next marketing year, or period, but in no event shall such quantity exceed 5 percent of the quantity which may be acquired from a producer's production during the marketing year, or in a period within a marketing year.

(h) *Foundation Breeders.* The Committee may establish, by regulation, a definition of a foundation breeder and, notwithstanding the provisions of paragraphs (d) and (f) of this section, if the Committee finds, upon substantial information submitted by a producer who is a foundation breeder, that such producer's apportionment of the established desirable quantity of turkeys is having a substantial adverse affect upon the operation of a sound breeding program, the Committee may adjust such producer's allotment which may be acquired by handlers to the extent necessary to avoid or mitigate such adverse affect. A determination as to whether a producer is a foundation breeder shall be made by the Committee and shall be based upon an application for foundation breeder status, filed with the Committee by the producer, containing such information as the Committee may prescribe, and upon such other information as the Committee may find necessary in order to arrive at its determination.

(i) *Transfers of bases and allotments.* Allocation bases and allotments shall not be transferred except as authorized by regulations issued by the Committee and then only in the following circumstances:

(1) *Allocation bases.* (i) In the event of a transfer of the producer's entire production facilities, the base may be transferred to the person acquiring and continuing the use of such facilities.

(ii) In the event of the death, retirement, or entry into military service of a producer, the entire allocation base may be transferred to a member of such producer's immediate family who carries on the turkey production operation.

(iii) If an allocation base is held jointly and such joint holding is terminated, the entire base may be transferred to one of the joint holders or may be divided among them.

(2) *Allotment transfers.* An allotment applicable to a producer or any portion thereof may be transferable to another producer for a marketing year.

METHOD NO. II

§ 301.62 Desirable free quantity.

Whenever a desirable free quantity of turkeys has been established for any period or periods as may be prescribed, all handlers shall handle such turkeys in such period or periods in accordance with the following:

(a) *Free and surplus percentages.* Whenever the Committee concludes that the volume of turkeys which will be available for handling, in a period or periods for which there has been established a desirable free quantity of turkeys, will exceed such desirable free quantity it may recommend to the Secretary that the handling of turkeys in such period or periods be limited by establishing free and surplus percentages applicable to the handling of all turkeys, or the handling of turkeys of any grade, size or quality, or any combination thereof. If the Secretary finds that such recommendation may tend to effectuate the declared policy of the Act he may establish free and surplus percentages applicable to such total handling or of any grade, size, or quality thereof, within such period or periods, which shall total 100 percent of the turkeys to which the percentages apply. If the Secretary determines that such percentages should be modified within any such period or periods, appropriate new percentages may be established: *Provided,* That any

change in the applicable percentages may be applicable only to the remainder of the period and may not be retroctive.

(b) *Set aside.* Whenever free and surplus percentages have been established for a period or periods, each handler shall set aside at such times as the Committee may prescribe, a quantity of processed turkeys computed by multiplying the quantity of all turkeys handled by him in such period by the applicable surplus percentage.

(c) *Set aside by grade, size or type.* The Committee may prescribe by regulation the grade, size, quality, or type of turkeys which shall be set aside to meet the surplus percentage and may require that such surplus percentage be set aside from each lot handled and separate pools may be established for the disposition thereof and the distribution of proceeds: *Provided*, That for purposes of this provision each day's slaughter of each producer's turkeys or of the handler's own turkeys shall be deemed a separate lot. The turkeys handled by a handler which are free quantity turkeys may be disposed of by him in any marketing outlet, subject, however, to any grade, size or quality restrictions otherwise provided by this part.

(d) *Set aside turkeys.* (1) All turkeys set aside to meet the handler's set aside obligation shall be held by the handler for the account of the Committee in compliance with regulations of the Committee until the handler has been relieved of such responsibility by the Committee. Such set aside turkeys shall be free and clear of all liens: *Provided*, That any liens which were outstanding at the time turkeys were set aside shall be subject in every way to this order and the regulations thereunder, and any lienholder with respect to such lien shall, to the extent of such lien, be deemed an assignee of a pro rata interest in the net proceeds of the applicable pool of set aside turkeys.

(2) The handler shall hold such turkeys in storage, in such facilities and under such storage conditions as the Committee may prescribe.

(3) Set aside turkeys shall be labeled or otherwise marked in such manner as the Committee may prescribe so as to be identifiable at all times and shall be subject to inspection by the Committee or its representatives at all times.

(4) Upon reasonable notice by the Committee, a handler shall commence delivery to the Committee or its designee of any or all set aside turkeys held for the account of the Committee and at such rate as may be prescribed.

(5) Handlers shall use good commercial practices in caring for set aside turkeys and be liable to the Committee for losses of set aside resulting from lack of due care.

(6) The Committee may, by regulation, authorize methods, other than processing and storage by which a handler may comply with his set aside requirements. Some such other methods might include, but are not limited to the following:

(i) The Committee may allow the handler to purchase other handlers free percentage turkeys to fulfill his set aside requirement.

(ii) The Committee may, upon authorization and payment from the handler, purchase free percentage turkeys to fulfill the handlers set aside.

(iii) The Committee may designate in advance a point or points of delivery to which the handler may ship set aside turkeys whenever he has set aside commitments.

(iv) The Committee may allow the handler to satisfy his set aside requirements for a period or periods by setting aside at a time or times specified by the Committee, the aggregate of his set aside requirements rather than meeting such requirements out of each day's processing.

(e) *Title.* The Committee, with respect to turkeys set aside for the account of the Committee, shall be deemed to have title thereto as trustees and is authorized to negotiate loans on such set aside surplus turkeys for the purpose of paying the expenses relating thereto, or for making advance payments, or both.

(f) *Pooling period.* A pool of set aside turkeys shall consist of surplus percentage turkeys set aside by handlers during any period or periods as may be prescribed, but any such period shall be not less than one month nor more than one year in duration: *Provided*, That a pool may include surplus turkeys from one or more set aside periods within a marketing year.

(g) *Handler compensation.* Each handler shall be compensated for processing and other costs relating to the surplus percentage set aside of turkeys as the Committee may deem to be appropriate, in accordance with charges established at the beginning of the marketing year by the Committee with the approval of the Secretary. Such costs shall be borne by the producers, or their successors in interest, and may be deducted from any monies owed by handlers to such persons.

(h) *Committee disposition of set aside.* The Committee shall have the power and authority to sell and dispose of, or use any agency approved by the Secretary to dispose of any and all set aside turkeys upon the best terms and at the highest prices attainable consistent with the provisions and objectives of this part, but only in the outlets specified in subparagraph (1) of this paragraph.

(1) *Outlets.* The Committee may sell or dispose of set aside turkeys in the following outlets:

(i) By sales for disposition in export,

(ii) By direct sale to any agency of the United States Government,

(iii) In other outlets which the Committee may specify by regulation to be substantially noncompetitive with those for normal outlets for turkeys, or

(iv) To the extent feasible and consistent with the purposes of this part, the Committee with the approval of the Secretary may, through handlers or handlers' sales agency or otherwise, sell or dispose of set aside surplus turkeys in any other outlets, including any normal outlets for turkeys.

(2) The Committee shall make disposition of surplus turkeys in each pool as expeditiously as practicable consistent with the provisions and objectives of this part, and in any event not later than August 1 of the following marketing year.

(i) *Distribution of net proceeds.* The Committee shall distribute the net proceeds from the disposition of any pool of set aside surplus turkeys, after deduction of any expenses incurred by the Committee for the receiving, handling, holding, or disposition thereof, to the producers or their successors in interest, pro rata on the basis of the quantities of their respective contributions to the set aside contained in such pool.

(j) *Equity holders.* So that the Committee may determine each producer's or his successor's or assignee's interest or equity in the turkeys in the set aside, each handler who sets aside turkeys to meet his surplus percentage shall, as required by the Committee, determine, or cause to be determined, the size, grade, quality, type and quantity of turkeys so set aside which were received from each producer thereof, together with the name and address of such producer, or his successor in interest, and any other information which the Committee may require to identify all producers of the turkeys so set aside and transmit such information to the Committee.

(k) *Prohibition against disposition.* Except as provided herein, set aside turkeys shall not be used or disposed of by any handler.

(l) *Set aside, credit.* Whenever Method No. I is in effect the Committee may allow, by regulation, to any producer who voluntarily, prior to the beginning of a marketing year, agrees to market less than his allotment, a credit for all or a portion of the quantity of the reduction and the allotment apportioned to him shall be reduced in a like amount in such marketing year. In such event (a) the handler shall not be required to set aside such quantity of the producers' turkeys as is represented by the credit, (b) such producer shall participate in the distribution of set aside net proceeds only to the extent of his actual contribution to the set aside and (c) the Committee shall include such credit in computing such producer's future allocation base.

CERTIFICATION FOR GRADE OR QUALITY

§ 301.65 Certification for grade or quality.

Whenever, for any period or periods, regulations are in effect which require the determination of grade or quality of turkeys, the Committee may, by regulation, require each handler to provide certification of the grade or quality of such turkeys by such agency or agencies and on such forms or certificates as are prescribed by the Committee.

APPLICATION OF PROVISIONS

§ 301.68 Application of provisions.

(a) *New producer-handlers.* Starting February 1, 1963, any person not then a producer-handler or who ceases to be a producer-handler thereafter must make application to the Committee if he desires such status. In determining whether to approve such applications, the Committee may determine the effect of producer-handlers on the volume regulation provisions of the order and may refuse to approve applications for such status if they determine that additional producer-handlers may effectively affect the operation of such volume regulation.

(b) *Exemptions*—(1) *Producer-handlers.* Sections 301.46, 301.56, 301.60, 301.61, except 301.61(a)(7)(ii), and §§ 301.62 and 301.65 shall not apply to producer-handlers.

(2) *Exempt-handlers.* Sections 301.46, 301.56, and 301.60 through 301.65 shall not apply to exempt-handlers.

(3) *Research, educational and institutional exemptions.* The Committee may, by regulation, exempt from the applications of §§ 301.46, 301.56, 301.60 through 301.65 turkeys produced by Federal, State, or other governmental or private institutions for their own consumption, and also turkeys produced by persons, other than foundation breeders, for research and educational purposes, upon application to the Committee and a determination by the Committee that the quantity of turkeys sought to be exempted are reasonable for the purposes stated.

(c) *Emergency or hardship relief*—(1) *Producer relief.* Notwithstanding the provisions of paragraphs (d), (f), and (g) of § 301.61, the Committee may grant relief from such provisions by way of adjustment of allocation base or allotment to a producer applying for such relief if the Committee determines that an emergency condition exists or that unless such relief is granted the provisions will create extreme hardship or inequity to such producers. One of the factors the Committee shall consider in making its determination is whether the condition causing such emergency, hardship or inequity was caused by circumstances beyond the applicant's control or beyond his reasonable expectation.

(2) *Handler relief.* Notwithstanding the provisions of § 301.56, paragraphs (e), (f), and (g) of § 301.61 and paragraphs (a), (b), (c), (d), and (l) of § 301.62, and § 301.65, the Committee may grant relief from or adjustments under such provisions if the Committee determines that an emergency condition exists or that unless such relief is granted the provisions will create extreme hardship or inequity to such handler. One of the factors the Committee shall consider in making its determination is whether the condition causing such emergency, hardship or inequity was caused by circumstances beyond the handler's control or beyond his reasonable expectation.

REPORTS AND RECORDS

§ 301.70 Reports.

(a) *Regular monthly reports.* At a time and in a manner prescribed by the Committee, each handler shall file reports with the Committee on forms prescribed by the Committee and approved by the Secretary, relating to his handling of turkeys for the preceding month, and providing such information with respect thereto as the Committee may prescribe.

(b) *Other reports.* Upon the request of the Committee, each handler shall furnish to the Committee reports containing such other information as the Committee may determine to be necessary to enable it to exercise its powers and perform its duties under this part.

(c) *Exempt-handler and producer-handler reports.* Each handler exempted under § 301.68(b) shall make reports at such times and in such manner and containing such information as the Committee may request.

§ 301.71 Records and facilities.

Each handler shall maintain and make available to the Committee or to its representative during the usual hours of business such accounts and records of his operations together with such facilities as are necessary for the Committee to verify or establish the correct data which are required to be reported pursuant to this part and the payments required pursuant to this part.

§ 301.72 Retention of records.

All books and records required under this part to be made available to the Committee shall be retained by the handler for a period of five years to begin at the end of the year to which such books and records pertain: *Provided*, That if, within such five-year period, the Committee notifies the handler in writing that the retention of such books and records is necessary in connection with a proceeding under section 8c(15)(A) of the act or a court action specified in such notice the handler shall retain such books and records, or specified books and records, until further written notification from the Committee. In either case, the Committee shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

§ 301.73 Confidential information.

All reports and records furnished or submitted to the Committee, or obtained by the employees of the Committee, which contain data or information constituting a trade secret or disclosing the trade position, financial condition, or business operations of the particular handler from whom received, shall be treated as confidential and the reports and all information obtained from records shall at all times be kept in the custody and under the control of one or more employees of the Committee, who shall disclose such information to no person other than the Secretary.

COMPLIANCE

§ 301.75 Compliance.

Except as provided in this subpart, no handler shall handle turkeys, the handling of which has been prohibited by the Secretary in accordance with provisions of this subpart, or the rules and regulations thereunder, and no handler shall handle turkeys except in conformity to the provisions of this subpart or the rules and regulations thereunder.

MISCELLANEOUS PROVISIONS

§ 301.80 Supervisory authority.

Regulations implementing this order shall be approved by the Secretary prior to being made effective. Nothing in this order shall impair the Secretary's right to take such action as necessary to carry out his responsibility to insure that actions taken are in the public interest, tend to effectuate the purpose of the act, and are within legal authority. Any person having responsibilities in connection with the administration of this order may be removed or suspended by the Secretary at his discretion if he concludes such action to be in the public interest.

§ 301.81 Personal liability.

No member or alternate member of the Committee or Board, nor any employee, representative, or agent of the Committee shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any person, for errors in judgment, mistakes, or other acts, either of commission or omission, as such member, alternate member, employee, representative, or agent, except for acts of dishonesty.

§ 301.82 Separability.

If any provision of this subpart, is declared invalid, or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder of this subpart or the applicability thereof to any other person, circumstance, or thing shall not be affected thereby.

§ 301.83 Derogation.

Nothing contained in this subpart, is or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States to exercise any powers granted by the act or otherwise, or, in accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ 301.84 Duration of immunities.

The benefits, privileges, and immunities conferred upon any person by virtue of this subpart, shall because upon the termination of this subpart, except with respect to acts done under and during the existence of this subpart.

§ 301.85 Agents.

The Secretary may, by a designation in writing, name any person, including any officer or employee of the United States Government, or name any service, division or branch in the United States Department of Agriculture to act as his agent or representative in connection with any of the provisions of this subpart.

§ 301.86 Effective time.

The provisions of this subpart, or any amendments thereto, shall become effective at such time as the Secretary may declare, and shall continue in force until terminated or suspended in one of the ways specified in this subpart.

§ 301.87 Termination or suspension.

(a) *Failure to effectuate policy of act.* The Secretary shall terminate or suspend the operation of any or all of the provisions of this subpart, whenever he finds that such provisions do not tend to effectuate the declared policy of the act.

(b) *Referendum.* The Secretary shall terminate the provisions of this subpart.

on or before the 30th day of January of any marketing year whenever he is required to do so by the provisions of section 8c(16)(B) of the Act. The Secretary may, at any time he deems it desirable, hold a referendum of producers to determine whether they favor termination of this subpart. However, the Secretary shall hold a referendum of producers between October 1 and October 31, 1964, to determine whether they favor termination of this subpart and thereafter shall hold a referendum for the same purpose between October 1 and October 31 of each subsequent even numbered year if the Secretary receives recommendation from the Board requesting the holding of such a referendum. The results of such a referendum shall be announced by the Secretary by November 30 of any marketing year in which held.

(c) *Termination of act.* The provisions of this subpart shall, in any event, terminate whenever the provisions of the act authorizing them cease to be in effect.

§ 301.88 Procedure upon termination.

Upon termination of this subpart, the members of the Committee then functioning shall continue as joint trustees, for the purposes of liquidating the affairs of the Committee. Action by such trustees shall require the concurrence of a majority of said trustees. Such trustees shall continue in such capacity until discharged by the Secretary, and shall account for all receipts and disbursements and deliver all property on hand, together with all books and records of the Committee and the joint trustees, to such person as the Secretary may direct; and shall, upon the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all the funds, properties, and claims vested in the Committee or the joint trustees, pursuant to this subpart. Any person to whom funds, property, or claims have been transferred or delivered by the Committee or the joint trustees, pursuant to this section, shall be subject to the same obligations imposed upon the members of said Committee and upon said joint trustees.

§ 301.89 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary, the termination of this subpart or any regulation issued pursuant to this subpart, or the issuance of any amendment to either thereof, shall not (a) affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provisions of this subpart or any regulation issued under this subpart, or (b) release any set aside held for the account of the Committee nor permit its disposition contrary to the provisions of this subpart, or (c) release or extinguish any violation of this subpart or any regulation issued under this subpart, or (d) affect or impair any rights or remedies of the Secretary, or any other person, with respect to such violation.

§ 301.90 Amendments.

Amendments to this subpart may be proposed, from time to time, by any person or by the Committee.

PROVISIONS APPLICABLE ONLY TO PROPOSED MARKETING AGREEMENT

§ 301.100 Counterparts.

This agreement may be executed in multiple counterparts, and when one counterpart is signed by the Secretary all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original.

§ 301.101 Additional parties.

After the effective date of this agreement, any handler may become a party hereto if a counterpart is executed by him and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.

§ 301.102 Order with marketing agreement.

Each signatory handler favors and approves the issuance of an order, by the Secretary, regulating the handling of turkeys in the same manner as is provided for in this agreement; and each signatory handler hereby requests the Secretary to issue, pursuant to the Act, such order.

Dated: February 23, 1962.

JOHN P. DUNCAN, Jr.,
Assistant Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 121]

FOOD ADDITIVES

Notice of Filing of Petition

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786; 21 U.S.C. 348(b)(5)), notice is given that petitions (FAP 687 and 688) have been filed by Continental Can Company, Inc., 633 Third Avenue, New York, New York, proposing the issuance of amendments to § 121.2514(b)(3)(xv) and § 121.2526(b) of the food additive regulations to add the item "Vinyl chloride-acetate, hydroxyl-modified copolymer, reacted with trimellitic anhydride".

Dated: February 19, 1962.

J. K. KIRK,
Assistant Commissioner of Food and Drugs.

FEDERAL AVIATION AGENCY

[14 CFR Parts 600, 601]

[Airspace Docket No. 61-FW-35]

FEDERAL AIRWAYS AND CONTROLLED AIRSPACE

Proposed Designation of Federal Airway and Associated Control Area

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency (FAA) is considering amendments to Parts 600 and 601 of the regulations of the Administrator, the substance of which is stated below.

The FAA has under consideration the designation of low altitude VOR Federal airway No. 525 from the Fayetteville, N.C., VOR to the New Bern, N.C., VOR via the Fayetteville VOR 098° and the New Bern VOR 256° True radials. This intersection would coincide with the Kenansville Intersection (INT of the Kinston, N.C., VOR 215° and the Fayetteville VOR 098° True radials).

A direct off airway route had been approved between Fayetteville and New Bern and many suggestions for an airway to serve this route have been considered in the recent past. This proposed action would provide an airway between two cities which are certified as permanent air carrier stops. Designating the airway via the Kenansville Intersection would add but two miles of airway routing between the terminals, would provide a common intersection with low altitude VOR Federal airways Nos. 213 and 1 west, and would preclude conflict with Air Force operations at Seymour-Johnson AFB.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Area Adminstrator, Southern Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 52 Fairlie Street, Atlanta 3, Georgia. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons in the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on February 19, 1962.

CLIFFORD P. BURTON,
Acting Chief,
Airspace Utilization Division.

[F.R. Doc. 62-1890; Filed, Feb. 26, 1962; 8:45 a.m.]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 2]

[Dockets Nos. 14475, 14476, 14477]

ALLOCATION OF FREQUENCY BANDS FOR RADIO ASTRONOMY

Order Extending Time for Filing Comments and Reply Comments

In the matters of amendment of Part 2 of the rules and regulations to modify the existing frequency allocation provisions for the radio astronomy service; amendment of Part 2 of the Commission's rules and regulations to insert provisions for the notification of the International Telecommunication Union relative to radio astronomy observatories and frequencies involved.

The Commission has before it for consideration a petition filed by Mann-Russell Electronics, Inc., requesting an extension of time for filing comments in the above-entitled proceedings from February 16 until March 13, 1962; and a petition filed by Forest Industries Radio Communications requesting an extension of at least 30 (but preferably 60) days for filing comments in Docket 14475.

It appearing that Mann-Russell is accumulating information concerning the present and prospective use of 13.56 and 40.68 Mc/s by ISM equipment, and that additional time is required to accumulate and evaluate this information; and

It further appearing that Forest Industries requires additional time in which to coordinate the position of the forest industry with regard to the use of 13.56 and 40.68 Mc/s; and

It further appearing that information to be furnished by Mann-Russell and Forest Industries will be useful to the Commission in resolving the issues in these proceedings and that the public interest will be served by granting an extension of 25 days for the purpose of obtaining such information; and

It further appearing that comments filed under any further extension would be too late for consideration in formulating a national position on this subject;

It is ordered, This 20th day of February, 1962, pursuant to section 0.322(b) of the Commission's Statement of Organization, Delegations of Authority, and Other Information, That the time for filing comments in these proceedings concerning use of the frequencies 13.56 and 40.68 Mc/s is extended to March 13, 1962, and that the time for filing comments in reply thereto is extended to March 23, 1962.

Released: February 21, 1962.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Acting Secretary.

[F.R. Doc. 62-1945; Filed, Feb. 26, 1962; 8:51 a.m.]

[47 CFR Part 3]

[Docket No. 14495; RM-295]

TABLE OF ASSIGNMENTS, TELEVISION BROADCAST STATIONS (ELMIRA, NEW YORK)

Order Extending Time for Filing Comments

1. The Commission has before it a request from Gannett Co., Inc., filed February 15, 1962, for a 30-day extension of time for filing comments and reply comments in the above-entitled proceeding. The time for filing comments now expires on February 19, 1962, and for reply comments, on March 5, 1962.

2. Petitioner states that it is making a study of the Elmira area to determine the feasibility of establishing a UHF commercial station there at this time. As grounds for the extension of time requested, it asserts that its study is not yet complete and that it cannot file meaningful comments on the proposal we are considering herein—to shift Channel 30 from Elmira to Corning-Elmira for noncommercial educational use—until its conclusion.

3. In light of the considerations advanced by petitioner, the Commission believes that extending the closing date for the submission of comments will contribute to the filing of more complete and helpful comments on the proposal under consideration herein and is warranted in the public interest.

4. *Accordingly, it is ordered*, This 9th day of February 1962, That the request of Gannett Co., Inc., for extension of time is granted, and that the time for filing comments in this preceeding is extended from February 19, 1962, to March 22, 1962, and the time for filing reply comments is extended from March 5, 1962, to April 5, 1962.

5. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and § 0.241(d)(8) of the Commission's rules.

Adopted: February 19, 1962.

Released: February 20, 1962.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Acting Secretary.

[F.R. Doc. 62-1946; Filed, Feb. 26, 1962; 8:51 a.m.]

[47 CFR Part 3]

[Docket No. 13458; RM-92; FCC 62-197]

TABLE OF ASSIGNMENTS, TELEVISION BROADCAST STATIONS, (SYRACUSE, NEW YORK)

Report and Further Notice of Proposed Rule Making

1. The Commission has before it for consideration a proposal set forth in its Notice of Proposed Rule Making (FCC 60-358) adopted on April 8, 1960, and published in the FEDERAL REGISTER on April 14, 1960, (25 F.R. 3216). This proposal was made in a petition filed by the Springfield Television Broadcasting Corporation (RM-92) suggesting that Channel 37 be deleted from Clymer, New York, and assigned to Syracuse, New York, as follows:

City	Channel No.	
	Present	Proposed
Syracuse, N.Y.	3-, 8, *43+	3-, 8, 37-, *43+
Clymer, N.Y.	37	----------

PARTIES FILING COMMENTS AND REPLY COMMENTS

2. Comments filed herein fall into two categories: (1) those filed by organizations primarily interested in broadcasting, and (2) those filed by parties interested mainly in the science of radio astronomy.

3. Organizations in the broadcasting industry which filed comments were American Broadcasting Company (ABC); W. R. G. Baker Radio and Television Corporation, successor to "the Syracuse Group" mentioned in the Notice of Proposed Rule Making herein (Baker); Meredith Syracuse Television Corporation, licensee of Station WHEN-TV in Syracuse (Meredith); and the Springfield Television Broadcasting Corporation (Springfield). Reply comments were submitted by Springfield and by the Association of Maximum Service Telecasters, Inc. (AMST).

4. Comments were also filed by the following groups concerned primarily with the science of radio astronomy: the American Astronomical Society; Associated Universities, Inc.; the Department of Terrestrial Magnetism, Carnegie Institution of Washington; Cornell University; the University of Florida; the University of Illinois; the National Academy of Science; the Observatory of Rensselaer Polytechnic Institute; and Yale University.

PRESENT STATUS OF THE CHANNELS INVOLVED

5. In Syracuse, Channel 3 is presently used by Station WSYR-TV, and Channel 8 is used by Station WHEN-TV. A construction permit has been issued for educational Channel 43, but the station has never been on the air. Channel 37 was shifted from Auburn, New York, to

Clymer (1950 population, 1421) in 1956 upon the representation that it would be used as a satellite station, but no application for the channel has been made. In the Report and Order of the rule making proceeding in Docket No. 13858 adopted on July 27, 1961, Channel 5 was substituted for Channel 8, the licensee of Station WHEN–TV having consented to the change (although the station is not yet operating on Channel 5), and Channel 9 was "dropped into" Syracuse as a third VHF channel.

PRELIMINARY DECISION OF THE COMMISSION

6. The Commission has carefully considered the comments in this proceeding and is of the opinion that, inasmuch as a third VHF channel has now been assigned to Syracuse, the situation in which the previous comments were submitted has changed and that further comments pertaining to the desirability of adding a UHF channel to Syracuse should be invited. In addition, in the event that a decision should be made to assign a UHF channel to Syracuse, we wish to explore the possibility of effecting such an assignment by means of the following substitute proposal:

City	Channel No.	
	Present	Proposed
Syracuse, N.Y.	3–, 5–, 9–, 33–, *43+	3–, 5–, 9–, *43+
Batavia, N.Y.	33–	----------
Watertown, N.Y.	48	----------

These reassignments would meet the mileage separation requirements of the rules. Unless an active interest is manifested, we find it desirable in the public interest to defer action on making available substitute UHF channels for Batavia and Watertown, New York, until decisions are reached in Docket No. 14229 concerning the future methods of assigning stations on UHF channels.

7. It should be noted that Syracuse is located less than 250 miles from the Canada-USA border and assignments to that community fall within the purview of the Canada-USA television agreement. Appropriate steps thereunder will be undertaken by the Commission.

REASONS FOR THE DECISION: ASSIGNMENT OF A UHF CHANNEL TO SYRACUSE

8. The Comments set forth by broadcasting interests in paragraphs 9 through 12 below were submitted at a time when there were only two VHF channels assigned to Syracuse.

9. Springfield indicated an intention to apply for a construction permit and operate on Channel 37 if it were assigned to Syracuse. Comments from the broadcasting industry pointed out that experience has repeatedly shown that a UHF station cannot successfully compete with two VHF stations in the same market and that therefore the introduction of a UHF station to Syracuse would not satisfy the need for a third competitive service. Baker therefore urged that the Springfield proposal be denied, and urged consideration of the VHF proposal for Syracuse submitted by "the Syracuse Group" (RM–22). ABC urged that, regardless of the disposition of the Springfield proposal, the Commission press forward as promptly as possible to the allocation of a third VHF channel to Syracuse by means of the plans set forth in RM–16 (proposal of ABC), RM–22 (proposal of "the Syracuse Group"), or some other appropriate plan.

10. Springfield admitted the difficulties involved, but asserted its willingness to assume the risk of the competitive situation stating that its failure would injure only its stockholders. It further asserted that addition of Channel 37 to Syracuse offered the quickest solution to the problem of providing a third commercial service to Syracuse, and that adoption of the proposal would facilitate construction and operation of the educational television channel now assigned to Syracuse.

11. Meredith asserted that a UHF permittee would attempt to obtain a VHF authorization or would attempt to have Syracuse deintermixed.

12. "The Syracuse Group" stated that the nearest UHF stations were in Elmira and Binghamton, over 60 miles from Syracuse. Baker asserted that a diligent search by its officers had revealed no UHF receivers in Syracuse. Meredith further asserted that it would not be in the public interest to encourage purchase of UHF receivers and antennas for what at best would be a highly temporary operation.

13. Syracuse, generally ranked as about the 50th market in the country, has a population of 216,038, and Onandaga county in which it is located has a population of 423,028 (1960 U.S. Census). That there was a need for a third competitive VHF channel in that market we made clear in the aforementioned Report and Order in Docket No. 13858 which assigned such a channel to Syracuse. In the light of this assignment, the views expressed in the immediately aforementioned comments of the broadcasting interests, including Springfield, may have changed. If so, the Commission would like the benefit of any modification of thinking before arriving at a final decision in this proceeding. It is for this reason that further comments on the desirability of adding a UHF channel to Syracuse are invited.

REASONS FOR THE DECISION: THE INTEREST OF RADIO ASTRONOMY AND THE SUBSTITUTE PROPOSED AMENDMENT

THE INTEREST OF RADIO ASTRONOMY

14. The comments of organizations concerned with the science of radio astronomy, which are here treated together, state that:

(1) Radio astronomy is an important new science and is the source of data concerning the universe which cannot otherwise be obtained.

(2) It is important, for the purpose of radio astronomy, to study the varying characteristics of radiation throughout the radio spectrum, including that portion of the spectrum in the neighborhood of 600 Mc.

(3) Only a clear band of frequencies can provide the needed protection. Modern radio telescopes are designed to receive extremely weak signals from outer space. A powerful, continuous man-made signal, as provided by a single television broadcasting station, and augmented by the scatter effect of large communications satellites and other airborne objects, would seriously interfere with radio astronomy observations on the same frequency band anywhere in the United States.

(4) The clear band of frequencies in this portion of the spectrum is required on a world-wide basis. It is important for the purposes of radio astronomy to compare observations made on the same frequency in different parts of the world.

(5) The 606–614 Mc band is the only band of frequencies between 410 and 1400 Mc for which there is any hope of obtaining international cooperation in maintaining low interference levels for radio astronomy.

15. In addition to the above, Carnegie, Cornell, Illinois, Rensselaer, and Yale indicated to the Commission certain specific research projects, present or planned, which would suffer interference from operations on Channel 37 in Syracuse.

16. Groups concerned with radio astronomy urge that the Springfield petition be denied. Some of these urge that a UHF channel other than 37 be assigned to Syracuse. Several of the organizations request that, in the alternative, action upon it be held in abeyance until it can be considered in conjunction with the request for proposed rule making submitted by the University of Illinois on May 6, 1960, to delete from the Table of Assignments Television Channel 37 (608–614 Mc) and allocate this channel to Radio Astronomy (RM–180). The Association of Maximum Service Telecasters which opposes reservation of Channel 37 for Radio Astronomy maintains that the proposal of the University of Illinois is not in issue in the instant proceeding and requests that those portions of the Illinois comments which propose that Channel 37 be removed from television broadcasting and allocated to Radio Astronomy be rejected. Springfield sets forth reasons against deletion of Channel 37 from television broadcasting.

THE SUBSTITUTE PROPOSED AMENDMENT

17. In a Memorandum Opinion and Order released on March 13, 1961 (RM-180, FCC 61–327), we denied the aforementioned petition of the University of Illinois to allocate Channel 37 to Radio Astronomy. Subsequently, the University filed a Petition for Reconsideration which is being held in abeyance by the Commission until it is considered in conjunction with action on Docket No. 11997. In the light of this situation, we believe it best to inquire whether it is feasible to assign a UHF channel other than 37 to Syracuse. To this end, we propose to examine the possibility of assigning Channel 33 to Syracuse as indicated in the substitute proposed amendment set forth in paragraph 6 above. Decision on whether to assign Channel 37 to Syracuse in accordance with the proposal of Springfield, or to assign Channel 33 in accordance with the substitute proposed amendment, or to take other action such as, for example, assigning no UHF channel to Syracuse, will be deferred until further comments have been received.

18. Comments are invited on the desirability of assigning a UHF channel to Syracuse and on the substituted proposal amendment set forth in paragraph 6 above.

PROCEDURE FOR FILING COMMENTS

19. Authority for the adoption of the amendments proposed herein is contained in sections 4(i) and 303 of the Communications Act of 1934, as amended.

20. Pursuant to applicable procedures set out in § 1.213 of the Commission's rules, interested parties may file comments on or before March 20, 1962, and reply comments on or before April 2, 1962. In reaching its decision on the rules and standards of general applicability which are proposed herein, the Commission will not be limited to consideration of comments of record, but will take into account all relevant information obtained in any manner from informed sources.

21. In accordance with the provisions of section 1.54 of the rules, an original and 14 copies of all written comments and statements shall be furnished the Commission.

Adopted: February 14, 1962.

Released: February 16, 1962.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Acting Secretary.

HOUSING AND HOME FINANCE AGENCY

Office of the Administrator

REGIONAL ADMINISTRATORS

Delegation of Authority With Respect to Loans for Housing for the Elderly

Each Regional Administrator of the Housing and Home Finance Agency, in carrying out the program of loans for housing for the elderly on behalf of the Housing and Home Finance Administrator through the Community Facilities Administration, is hereby authorized under section 202 of the Housing Act of 1959, as amended (73 Stat. 667, as amended, 12 U.S.C. 1701q):

1. To execute loan agreements and regulatory agreements;

2. To execute amendments or modifications of any such loan agreements or regulatory agreements;

3. To redelegate to the Regional Director of Community Facilities Activities the authority delegated herein; and

4. In the case of the Regional Administrator, Region VI (San Francisco), to redelegate to the Director for Northwest Operations, Region VI, at Seattle, Washington, any of the authority delegated herein.

This delegation supersedes the delegation effective December 22, 1961 (26 F.R. 12787, 12/30/61).

(62 Stat. 1283 (1948), as amended by 64 Stat. 80 (1950), 12 U.S.C. 1701c)

Effective as of the 27th day of February 1962.

[SEAL] ROBERT C. WEAVER,
Housing and Home Finance Administrator.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Classification No. 59; Offer No. 18]

NEW MEXICO

Small Tract Classification

1. Pursuant to authority delegated to me by Bureau Order No. 684, dated August 28, 1961 (26 F.R. 8216), I hereby offer the small tracts described below for public sale under the Small Tract Act of June 1, 1938 (52 Stat. 609; 43 U.S.C. 682a), as amended.

2. The subject parcels are located approximately 11 miles east of Los Alamos, New Mexico, via State Highway 4 and 1½ miles of unimproved road. Also, the lands are located 24 miles northwest of Santa Fe, New Mexico, via U.S. Highway 285 and State Highway 4 and 1½ miles of unimproved dirt road. The climate is moderate with a mean annual temperature of 50 degrees; the annual precipitation is 10 inches; the average frost-free season is 152 days; and the elevation varies from 5,800 to 6,200 feet above sea level. These parcels afford excellent scenic views of the Sangre de Cristo and Jemez Mountain ranges and the Rio Grande Valley. The topography is rolling and gully erosion is moderate. Culinary water is untested in the area, however, there are two Artesian wells on the lands immediately west of the subject land. Electric power and natural gas are available from nearby installations.

3. The tracts vary in size as shown below. The land will be sold subject to existing rights-of-way for roads, electric transmission line and natural gas pipeline, and other rights-of-way for streets, roads, and public utilities will be reserved on the side, or sides as shown below. All minerals are reserved to the United States. Sites for schools have been reserved.

[1] The centerline of the existing road is located at the following points:
Point 1: S. 89°57.5' W., 9.15 chains from the N ¼ corner common to Sections 29 and 30. (2 chains east of the pipeline.)
Point 2: N. 0° 10.5' W., 1.22 chains from the C–E ¼ corner, Section 30. (1.48 chains south of the pipeline.)
Point 3: N. 0°11' W., 3.20 chains from ¼ corner common to Sections 30 and 31.
Point 4: N. 89°59.5' W., 8.69 chains from C–N ¼ corner, Section 31. (1.307 chains east of C–E–NW ¼ or 0.40 chains west of the pipeline.)
Point 5: S. 89°59.5' W., 18.215 chains from C–¼ corner, Section 31. (1.78 chains east of C–W ¼ or 0.93 chains east of the pipeline.)
Point 6: N. 0°03.0' W., 7.698 chains from C–N–SW ¼ corner, Section 31. (2.30 chains south of C–W ¼ corner.)
Point 7: S. 89°55.5' W., 29.98 chains from C–S ¼ corner, Section 31. (.005 chains east of C–W–SW ¼ corner or 0.90 chains east of the pipeline.)
Point 8: N. 0°04.5' W., 11.76 chains from section corner common to Sections 36, 31, 1, and 6. (0.759 chains north of S–S ¼ corner.)
[2] Along south side of tract for a distance of 165 feet from the southwest corner of Lot 149, 33 feet in width.
[3] Along the north side of Lot 172 for a distance of 165 feet from the northwest corner of said lot, 33 feet in width, thence in a southeasterly direction with a centerline to the southeast corner of said lot with a width of 33 feet on each side of centerline for a total width of 66 feet.

4. The above-described tracts will be sold at public auction at a public sale to be held at St. Francis Auditorium, Museum of New Mexico, 107 West Palace Avenue, Santa Fe, New Mexico, beginning at 10:00 a.m. on March 27, 1962, Units 1 to 146, inclusive; at 10:00 a.m. on March 28, 1962, Units 147 to 335, inclusive; and at 10:00 a.m. on March 29, 1962, Units 336 to 509, inclusive. Bids may be made personally by the bidder or his agent at the sale or may be mailed. Bids sent by mail will be considered only if received at the New Mexico Bureau of Land Management Office prior to 10:00 a.m. on March 26, 1962. See mailing address below. Sealed bids will be opened in the presence of the sale. No sealed bid will be accepted if it is less than the appraised value of the tract. Oral bidding will be in increments to be announced at the sale. See Paragraph 3 above for appraised values.

5. Persons who have previously acquired a tract under the Small Tract Act are not qualified to purchase a tract at the sale unless they can make a showing satisfactory to the Bureau of Land Management that the acquisition of another tract is warranted in the circumstances.

6. Each bid sent by mail must clearly show (a) the name and post office address of the bidder, (b) Offer No. 18, and (c) the land description of the tract for which the bid is made, described in accordance with Paragraph 3 of this order. Each bid must be accompanied by the full amount bid in the form of a certified or cashier's check, post office money order, or bank draft made payable to the Bureau of Land Management. Each bid must be enclosed in a separate envelope but payment need accompany only the highest bid, providing all other bids designate the envelope containing the payment. Each envelope must carry on its reverse the following information and nothing else: (a) Offer No. 18, March 27, 1962, (b) the description of the tract for which the bid is made, described in accordance with Paragraph 3 of this order.

7. Each tract will be awarded to the highest qualified bidder. If the highest bid is oral, the bidder will be required to make payment for the tract at the close of bidding and a personal check will be acceptable for that purpose. Any person who is declared high bidder for any tract will automatically be disqualified from consideration for other tracts at the sale.

8. All lots not sold on March 27, 28, and 29, 1962, will be reoffered for public sale at 10:30 a.m., on March 30, 1962, at the Bureau of Land Management, Greer Building, 113 Washington Avenue, Santa Fe, New Mexico; then, the sale will be adjourned at 3:00 p.m., until 10:30 a.m. on the following Wednesday for a one-hour period; and thereafter, on succeeding Wednesdays for additional one-hour periods (10:30 a.m. to 11:30 a.m.) until all lots are sold or until the termination date of the sale, August 29, 1962. Bids may be made personally by an individual or his agent at the sale or by mail. Bids sent by mail will be considered at a sale session only if received at the Santa Fe Land Office prior to 10:00 a.m. of the day on which the session is held. At each sale session, those lots will be offered for which timely filed sealed bids have been received or for which nominations are made by oral bidders present at the sale, to the extent that time permits their offer. Late filed sealed bids and sealed bids not reached for consideration at one session will be held for consideration at succeeding scheduled sessions.

9. Inquiries concerning these lands should be addressed to the Manager, Land Office, Bureau of Land Management, Post Office Box 1251, Santa Fe, New Mexico.

CHESLEY P. SEELY,
State Director.

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Dept. Circular Public Debt Series—No. 4–62]

4 PERCENT TREASURY BONDS OF 1971

Offering of Bonds

FEBRUARY 19, 1962.

I. *Offering of bonds.* 1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions from the people of the United States for bonds of the United States, designated 4 percent Treasury Bonds of 1971:

(1) At par in exchange for 3 percent Treasury Bonds of 1964, dated February 14, 1958, due February 15, 1964; or

(2) At 102 percent of their face value in exchange for 2⅝ percent Treasury Bonds of 1965, dated June 15, 1958, due February 15, 1965. The cash payment due from the subscriber on account of the issue price of the new bonds ($20.00 per $1,000) will be payable by the subscriber as set forth in section IV hereof.

Interest will be adjusted as of March 1, 1962, as set forth in section IV hereof. Delivery of the new bonds will be made on March 9, 1962. The amount of the offering under this circular will be limited to the amount of the eligible securities tendered in exchange and accepted. The books will be open for the receipt of subscriptions for this issue from all classes of subscribers from February 19 through February 21, 1962, and, in addition, subscriptions may be submitted by individuals through February 23, 1962. For this purpose individuals are defined as natural persons in their own right.

2. In addition to the offering under this circular, holders of the 2⅝ percent Treasury Bonds of 1965 are offered the privilege of exchanging all or any part of such bonds for 4 percent Treasury Bonds of 1980, which offering is set forth in Department Circular, Public Debt Series—No. 5–62, issued simultaneously with this circular.

3. Nonrecognition of gain or loss for Federal income tax purposes: Pursuant to the provisions of section 1037(a) of the Internal Revenue Code of 1954 as added by Public Law 86–346 (approved September 22, 1959), the Secretary of the Treasury hereby declares that no gain or loss shall be recognized for Federal income tax purposes upon the exchange with the United States of the eligible bonds enumerated in paragraph one of this section solely for the 4 percent Treasury Bonds of 1971. Gain or loss, if any, upon the obligations surrendered in exchange will be taken into account upon the disposition or redemption of the new obligations.

II. *Description of bonds.* 1. The bonds will be dated March 1, 1962, and will bear interest from that date at the rate of 4 percent per annum, payable on a semiannual basis on August 15, 1962, and thereafter on February 15 and August 15 in each year until the principal amount becomes payable. They will mature August 15, 1971, and will not be subject to call for redemption prior to maturity.

2. The income derived from the bonds is subject to all taxes imposed under the Internal Revenue Code of 1954. The bonds are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The bonds will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

4. Bearer bonds with interest coupons attached, and bonds registered as to principal and interest, will be issued in denominations of $500, $1,000, $5,000, $10,000, $100,000, and $1,000,000. Provision will be made for the interchange of bonds of different denominations and of coupon and registered bonds, and for the transfer of registered bonds, under rules and regulations prescribed by the Secretary of the Treasury.

5. The bonds will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States bonds.

III. *Subscription and allotment.* 1. Subscriptions will be received at the Federal Reserve Banks and Branches and at the Office of the Treasurer of the United States, Washington 25, D.C. Banking institutions generally may submit subscriptions for account of customers, provided the names of the customers are set forth in such subscriptions, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject or reduce any subscription, and to allot less than the amount of bonds applied for; and any action he may take in these respects shall be final. Subject to these reservations, all subscriptions will be allotted in full: Allotment notices will be sent out promptly upon allotment.

IV. *Payment.* 1. Payment for the face amount of bonds allotted hereunder must be made on or before March 9, 1962, or on later allotment, and may be made only in a like face amount of the two series of bonds enumerated in paragraph one of Section I hereof, which should accompany the subscription.

2. Three percent bonds of 1964: Coupons dated August 15, 1962, and all subsequent coupons, must be attached to the 3 percent Treasury Bonds of 1964, in bearer form, when surrendered. Accrued interest from February 15 to March 1, 1962 ($1.16022 per $1,000) will be paid to subscribers, in the case of bearer bonds following their acceptance and in the case of registered bonds following discharge of registration. In the case of registered bonds, the payment will be made by check drawn in accordance with the assignments on the bonds surrendered, or by credit in any account maintained by a banking institution with the Federal Reserve Bank of its District.

3. 2⅝ percent bonds of 1965: Coupons dated August 15, 1962, and all subsequent coupons, must be attached to the 2⅝ percent Treasury Bonds of 1965, in bearer form, when surrendered. Accrued interest from February 15 to March 1, 1962 ($1.01519 per $1,000) on the 2⅝ percent bonds will be credited, the payment ($20.00 per $1,000) due the United States on account of the issue price of the new bonds will be charged, and the difference ($18.98481 per $1,000) must be paid by subscribers and should accompany the subscription.

V. *Assignment of registered bonds.* 1. Treasury Bonds of the two eligible series in registered form tendered in payment for bonds offered hereunder should be assigned by the registered payees or assignees thereof, in accordance with the general regulations of the Treasury Department governing assignments for transfer or exchange, in one of the forms hereafter set forth, and thereafter should be surrendered to a Federal Reserve Bank or Branch or to the Office of the Treasurer of the United States, Washington 25, D.C. If the new bonds are desired registered in the same name as the bonds surrendered in exchange, the assignment should be to "The Secretary of the Treasury for exchange for 4 percent Treasury Bonds of 1971"; if the new bonds are desired registered in another name, the assignment should be to "The Secretary of the Treasury for exchange for 4 percent Treasury Bonds of 1971 in the name of _____"; if new bonds in coupon form are desired, the assignment should be to "The Secretary of the Treasury for exchange for 4 percent Treasury Bonds of 1971 in coupon form to be delivered to _____".

VI. *General provisions.* 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective Districts, to issue allotment notices, to receive payment for bonds alloted, to make delivery of bonds on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive bonds.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

[SEAL] DOUGLAS DILLON,
Secretary of the Treasury.

[F.R. Doc. 62–1924; Filed, Feb. 26, 1962; 8:49 a.m.]

[Dept. Circular, Public Debt Series—No. 5–62]

4 PERCENT TREASURY BONDS OF 1980

Offering of Bonds

FEBRUARY 19, 1962.

I. *Offering of bonds.* 1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, at 100.25 percent of their face value and accrued interest, from the people of the United

States for bonds of the United States, designated 4 percent Treasury Bonds of 1980, in exchange for 2⅝ percent Treasury Bonds of 1965, dated June 15, 1958, due February 15, 1965. Interest adjustments as of March 1, 1962, and the cash payment ($2.50 per $1,000) due from the subscriber on account of the issue price of the new bonds will be made as set forth in section IV hereof. Delivery of the new bonds will be made on March 9, 1962. The amount of the offering under this circular will be limited to the amount of the 2⅝ percent Treasury Bonds of 1965 tendered in exchange and accepted. The books will be open for the receipt of subscriptions for this issue from all classes of subscribers from February 19 through February 21, 1962, and, in addition, subscriptions may be submitted by individuals through February 28, 1962. For this purpose individuals are defined as natural persons in their own right.

2. In addition to the offering under this circular, holders of the 2⅝ percent Treasury Bonds of 1965 are offered the privilege of exchanging all or any part of such bonds for 4 percent Treasury Bonds of 1971, which offering is set forth in Department Circular, Public Debt Series—No. 4–62, issued simultaneously with this circular.

3. Nonrecognition of gain or loss for Federal income tax purposes: Pursuant to the provisions of section 1037(a) of the Internal Revenue Code of 1954 as added by Public Law 86–346 (approved September 22, 1959), the Secretary of the Treasury hereby declares that no gain or loss shall be recognized for Federal income tax purposes upon the exchange with the United States of the 2⅝ percent Treasury Bonds of 1965 solely for the 4 percent Treasury Bonds of 1980. Gain or loss, if any, upon the obligations surrendered in exchange will be taken into account upon the disposition or redemption of the new obligations.

II. *Description of bonds.* 1. The bonds now offered will be an addition to and will form a part of the series of 4 percent Treasury Bonds of 1980 issued pursuant to Department Circular No. 1020, dated January 12, 1959, will be freely interchangeable therewith, and are identical in all respects therewith except that interest on the bonds to be issued under this circular will accrue from March 1, 1962. Subject to the provision for the accrual of interest from March 1, 1962, on the bonds now offered, the bonds are described in the following quotation from Department Circular No. 1020:

1. The bonds will be dated January 23, 1959, and will bear interest from that date at the rate of 4-percent per annum, payable on a semiannual basis on August 15, 1959, and thereafter on February 15 and August 15 in each year until the principal amount becomes payable. They will mature February 15, 1980, and will not be subject to call for redemption prior to maturity.

2. The income derived from the bonds is subject to all taxes imposed under the Internal Revenue Code of 1954. The bonds are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The bonds will be acceptable to secure deposits of public moneys.

4. Bearer bonds with interest coupons attached, and bonds registered as to principal and interest, will be issued in denominations of $500, $1,000, $5,000, $10,000, $100,000, and $1,000,000. Provision will be made for the interchange of bonds of different denominations and of coupon and registered bonds, and for the transfer of registered bonds, under rules and regulations prescribed by the Secretary of the Treasury.

5. Any bonds issued hereunder which upon the death of the owner constitute part of his estate, will be redeemed at the option of the duly constituted representatives of the deceased owner's estate, at par and accrued interest to date of payment: [1] *Provided:*

(a) That the bonds were actually owned by the decedent at the time of his death; and

(b) That the Secretary of the Treasury be authorized to apply the entire proceeds of redemption to the payment of Federal estate taxes.

Registered bonds submitted for redemption hereunder must be duly assigned to "The Secretary of the Treasury for redemption, the proceeds to be paid to the District Director of Internal Revenue at ---------- for credit on Federal estate taxes due from estate of ----------". Owing to the periodic closing of the transfer books and the impossibility of stopping payment of interest to the registered owner during the closed period, registered bonds received after the closing of the books for payment during such closed period will be paid only at par with a deduction of interest from the date of payment to the next interest payment date; [2] bonds received during the closed period for payment at a date after the books reopen will be paid at par plus accrued interest from the reopening of the books to the date of payment. In either case checks for the full six months' interest due on the last day of the closed period will be forwarded to the owner in due course. All bonds submitted must be accompanied by Form PD 1782,[3] properly completed, signed and certified, and by proof of the representatives' authority in the form of a court certificate or a certified copy of the representatives' letters of appointment issued by the court. The certificate, or the certification to the letters, must be under the seal of the court, and except in the case of a corporate representative, must contain a statement that the appointment is in full force and be dated within six months prior to the submission of the bonds, unless the certificate or letters show that the appointment was made within one year immediately prior to such submission. Upon payment of the bonds appropriate memorandum receipt will be forwarded to the representatives, which will be followed in due course by formal receipt from the District Director of Internal Revenue.

6. The bonds will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States bonds.

[1] An exact half-year's interest is computed for each full half-year period irrespective of the actual number of days in the half year. For a fractional part of any half year, computation is on the basis of the actual number of days in such half year.

[2] The transfer books are closed from January 16 to February 15, and from July 16 to August 15 (both dates inclusive) in each year.

[3] Copies of Form PD 1782 may be obtained from any Federal Reserve Bank or from the Treasury Department, Washington 25, D.C.

III. *Subscription and allotment.* 1. Subscriptions will be received at the Federal Reserve Banks and Branches and at the Office of the Treasurer of the United States, Washington 25, D.C. Banking institutions generally may submit subscriptions for account of customers, provided the names of the customers are set forth in such subscriptions, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject or reduce any subscription, and to allot less than the amount of bonds applied for; and any action he may take in these respects shall be final. Subject to these reservations, all subscriptions will be allotted in full. Allotment notices will be sent out promptly upon allotment.

IV. *Payment.* 1. Payment for the face amount of bonds allotted hereunder must be made on or before March 9, 1962, or on later allotment, and may be made only in a like face amount of 2⅝ percent Treasury Bonds of 1965, which should accompany the subscription. Coupons dated August 15, 1962, and all subsequent coupons, must be attached to the 2⅝ percent bonds of 1965 in bearer form when surrendered. Accrued interest from February 15 to March 1, 1962 ($1.01519 per $1,000) on the 2⅝ percent bonds will be credited, accrued interest from February 15 to March 1, 1962 ($1.54696 per $1,000) plus the payment ($2.50 per $1,000) due the United States on account of the issue price of the new bonds will be charged, and the difference ($3.03177 per $1,000) must be paid by subscribers and should accompany the subscription.

V. *Assignment of registered bonds.* 1. Treasury Bonds of 1965 in registered form tendered in payment for bonds offered hereunder should be assigned by the registered payees or assignees thereof, in accordance with the general regulations of the Treasury Department governing assignments for transfer or exchange, in one of the forms hereafter set forth, and thereafter should be surrendered to a Federal Reserve Bank or Branch or to the Office of the Treasurer of the United States, Washington 25, D.C. If the new bonds are desired registered in the same name as the bonds surrendered in exchange, the assignment should be to "The Secretary of the Treasury for exchange for 4 percent Treasury Bonds of 1980"; if the new bonds are desired registered in another name, the assignment should be to "The Secretary of the Treasury for exchange for 4 percent Treasury Bonds of 1980 in the name of ----------"; if new bonds in coupon form are desired, the assignment should be to "The Secretary of the Treasury for exchange for 4 percent Treasury Bonds of 1980 in coupon form to be delivered to ----------".

VI. *General provisions.* 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective Districts, to issue allotment notices, to receive payment for bonds allotted, to make delivery of bonds on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive bonds.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

[SEAL] DOUGLAS DILLON,
Secretary of the Treasury.

[Dept. Circular, Public Debt Series—No. 6–62]

3½ PERCENT TREASURY BONDS OF 1990

Offering of Bonds

FEBRUARY 19, 1962.

I. *Offering of bonds.* 1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions from the people of the United States for bonds of the United States, designated 3½ percent Treasury Bonds of 1990:

(1) At 101.50 percent of their face value in exchange for 2½ percent Treasury Bonds of 1967–72, dated October 20, 1941, due September 15, 1972, in amounts of $500 or multiples thereof;

(2) At 101.25 percent of their face value in exchange for 2½ percent Treasury Bonds of 1967–72, dated June 1, 1945, due June 15, 1972; or

(3) At 101.75 percent of their face value in exchange for 2½ percent Treasury Bonds of 1967–72, dated November 15, 1945, due December 15, 1972.

The cash payments due from the subscriber on account of the issue prices of the new bonds issued in exchange for the 2½ percent Treasury Bonds, (a) dated October 20, 1941, due September 15, 1972 ($15.00 per $1,000), (b) dated June 1, 1945, due June 15, 1972 ($12.50 per $1,000), and (c) dated November 15, 1945, due December 15, 1972 ($17.50 per $1,000) will be payable by the subscriber as set forth in Section IV hereof. Interest will be adjusted as of March 1, 1962, as set forth in Section IV hereof. Delivery of the new bonds will be made on March 16, 1962. The amount of the offering under this circular will be limited to the amount of the eligible bonds tendered in exchange and accepted. The books will be open for the receipt of subscriptions for this issue from all classes of subscribers from February 19 through February 21, 1962, and, in addition, subscriptions may be submitted by individuals through February 28, 1962. For this purpose individuals are defined as natural persons in their own right.

2. In addition to the offering under this circular, holders of the eligible bonds are offered the privilege of exchanging all or any part of such bonds for 3½ percent Treasury Bonds of 1998, which offering is set forth in Department Circular, Public Debt Series—No. 7–62, issued simultaneously with this circular.

3. Nonrecognition of gain or loss for Federal income tax purposes: Pursuant to the provisions of section 1037 (a) of the Internal Revenue Code of 1954 as added by Public Law 86–346 (approved September 22, 1959), the Secretary of the Treasury hereby declares that no gain or loss shall be recognized for Federal income tax purposes upon the exchange with the United States of the eligible bonds enumerated in paragraph one of this section solely for the 3½ percent Treasury Bonds of 1990. Gain or loss, if any, upon the obligations surrendered in exchange will be taken into account upon the disposition or redemption of the new obligations.

II. *Description of bonds.* 1. The bonds now offered will be an addition to and will form a part of the series of 3½ percent Treasury Bonds of 1990 issued pursuant to Department Circulars Nos. 1005, 1051, and 1066, dated February 3, 1958, September 12, 1960, and September 11, 1961, respectively, will be freely interchangeable therewith, and are identical in all respects therewith except that interest on the bonds to be issued under this circular will accrue from March 1, 1962. Subject to the provision for the accrual of interest from March 1, 1962, on the bonds now offered, the bonds are described in the following quotation from Department Circular No. 1005:

1. The bonds will be dated February 14, 1958, and will bear interest from that date at the rate of 3½ percent per annum, payable on a semiannual basis on August 15, 1958, and thereafter on February 15 and August 15 in each year until the principal amount becomes payable. They will mature February 15, 1990, and will not be subject to call for redemption prior to maturity.

2. The income derived from the bonds is subject to all taxes imposed under the Internal Revenue Code of 1954. The bonds are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The bonds will be acceptable to secure deposits of public moneys.

4. Bearer bonds with interest coupons attached, and bonds registered as to principal and interest, will be issued in denominations of $500, $1,000, $5,000, $10,000, $100,000, and $1,000,000. Provisions will be made for the interchange of bonds of different denominations and of coupon and registered bonds, and for the transfer of registered bonds, under rules and regulations prescribed by the Secretary of the Treasury.

5. Any bonds issued hereunder which upon the death of the owner constitute part of his estate, will be redeemed at the option of the duly constituted representatives of the deceased owner's estate, at par and accrued interest to date of payment: [1] *Provided:*

(a) That the bonds were actually owned by the decedent at the time of his death; and

(b) That the Secretary of the Treasury be authorized to apply the entire proceeds of redemption to the payment of Federal estate taxes.

Registered bonds submitted for redemption hereunder must be duly assigned to "The Secretary of the Treasury for redemption, the proceeds to be paid to the District Director of Internal Revenue at ---------- for credit on Federal estate taxes due from estate of ----------." Owing to the periodic closing of the transfer books and the impossibility of stopping payment of interest to the registered owner during the closed period, registered bonds received after the closing of the books for payment during such closed period will be paid only at par with a deduction of interest from the date of payment to the next interest payment date; [2] bonds received during the closed period for payment at a date after the books reopen will be paid at par plus accrued interest from the reopening of the books to the date of payment. In either case checks for the full six months' interest due on the last day of the closed period will be forwarded to the owner in due course. All bonds submitted must be accompanied by Form PD 1782,[3] properly completed, signed and certified, and by proof of the representatives' authority in the form of a court certificate or a certified copy of the representatives' letters of appointment issued by the court. The certificate, or the certification to the letters, must be under the seal of the court, and except in the case of a corporate representative, must contain a statement that the appointment is in full force and be dated within six months prior to the submission of the bonds, unless the certificate or letters show that the appointment was made within one year immediately prior to such submission. Upon payment of the bonds appropriate memorandum receipt will be forwarded to the representatives, which will be followed in due course by formal receipt from the District Director of Internal Revenue.

6. The bonds will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States bonds.

III. *Subscription and allotment.* 1. Subscriptions will be received at the Federal Reserve Banks and Branches and at the Office of the Treasurer of the United States, Washington 25, D.C. Banking institutions generally may submit subscriptions for account of customers, provided the names of the customers are set forth in such subscriptions, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject or reduce any subscription, and to allot less than the amount of bonds applied for; and any action he may take in these respects shall be final. Subject to these reservations, all subscriptions will be allotted in full. Allotment notices will be sent out promptly upon allotment.

IV. *Payment.* 1. Payment for the face amount of bonds allotted hereunder must be made on or before March 16, 1962, or on later allotment, and may be made only in a like face amount of the three series of bonds enumerated in paragraph one of Section I hereof, which should accompany the subscription.

2. 2½ percent bonds of September 15, 1972: Coupons dated March 15, 1962, and all subsequent coupons, must be attached to the 2½ percent bonds due September

[1] An exact half-year's interest is computed for each full half-year period irrespective of the actual number of days in the half year. For a fractional part of any half year, computation is on the basis of the actual number of days in such half year.

[2] The transfer books are closed from January 16 to February 15, and from July 16 to August 15 (both dates inclusive), in each year.

[3] Copies of Form PD 1782 may be obtained from any Federal Reserve Bank or from the Treasury Department, Washington 25, D.C.

15, 1972, in bearer form, when surrendered. Accrued interest from September 15, 1961, to March 1, 1962 ($11.53315 per $1,000) on the 2½ percent bonds will be credited, accrued interest from February 15 to March 1, 1962 ($1.35359 per $1,000) plus the payment ($15.00 per $1,000) due the United States on account of the issue price of the new bonds will be charged, and the difference ($4.82044 per $1,000) must be paid by subscribers and should accompany the subscription.

3. 2½ percent bonds of June 15, 1972: Coupons dated June 15, 1962, and all subsequent coupons, must be attached to the 2½ percent bonds due June 15, 1972, in bearer form, when surrendered. Accrued interest from December 15, 1961, to March 1, 1962 ($5.21978 per $1,000) on the 2½ percent bonds will be credited, accrued interest from February 15 to March 1, 1962 ($1.35359 per $1,000) plus the payment ($12.50 per $1,000) due the United States on account of the issue price of the new bonds will be charged, and the difference ($8.63381 per $1,000) must be paid by subscribers and should accompany the subscription.

4. 2½ percent bonds of December 15, 1972: Coupons dated June 15, 1962, and all subsequent coupons, must be attached to the 2½ percent bonds due December 15, 1972, in bearer form, when surrendered. Accrued interest from December 15, 1961, to March 1, 1962 ($5.21978 per $1,000) on the 2½ percent bonds will be credited, accrued interest from February 15 to March 1, 1962 ($1.35359 per $1,000) plus the payment ($17.50 per $1,000) due the United States on account of the issue price of the new bonds will be charged, and the difference ($13.63381 per $1,000) must be paid by subscribers and should accompany the subscription.

V. *Assignment of registered bonds.* 1. Treasury Bonds of the three eligible series in registered form tendered in payment for bonds offered hereunder should be assigned by the registered payees or assignees thereof, in accordance with the general regulations of the Treasury Department governing assignments for transfer or exchange, in one of the forms hereafter set forth, and thereafter should be surrendered to a Federal Reserve Bank or Branch or to the Office of the Treasurer of the United States, Washington 25, D.C. If the new bonds are desired registered in the same name as the bonds surrendered in exchange, the assignment should be to "The Secretary of the Treasury for exchange for 3½ percent Treasury Bonds of 1990"; if the new bonds are desired registered in another name, the assignment should be to "The Secretary of the Treasury for exchange for 3½ percent Treasury Bonds of 1990 in the name of _____"; if new bonds in coupon form are desired, the assignment should be to "The Secretary of the Treasury for exchange for 3½ percent Treasury Bonds of 1990 in coupon form to be delivered to _____".

VI. *General provisons.* 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective Districts, to issue allotment notices, to receive payment for bonds allotted, to make delivery of bonds on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive bonds.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

[SEAL] DOUGLAS DILLON,
Secretary of the Treasury.

[Dept. Circular Public Debt Series—No. 7-62]

3½ PERCENT TREASURY BONDS OF 1998

Offering of Bonds

FEBRUARY 19, 1962.

I. *Offering of bonds.* 1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions from the people of the United States for bonds of the United States, designated 3½ percent Treasury Bonds of 1998:

(1) At 100.25 percent of their face value in exchange for 2½ percent Treasury Bonds of 1967–72, dated October 20, 1941, due September 15, 1972, in amounts of $500 or multiples thereof;

(2) At par in exchange for 2½ percent Treasury Bonds of 1967–72, dated June 1, 1945, due June 15, 1972; or

(3) At 100.50 percent of their face value in exchange for 2½ percent Treasury Bonds of 1967–72, dated November 15, 1945, due December 15, 1972.

The cash payments due from the subscriber on account of the issue prices of the new bonds issued in exchange for the 2½ percent Treasury Bonds, (a) dated October 20, 1941, due September 15, 1972 ($2.50 per $1,000) and (b) dated November 15, 1945, due December 15, 1972 ($5.00 per $1,000) will be payable by the subscriber as set forth in Section IV hereof. Interest will be adjusted as of March 1, 1962, as set forth in Section IV hereof. Delivery of the new bonds will be made on March 16, 1962. The amount of the offering under this circular will be limited to the amount of the eligible bonds tendered in exchange and accepted. The books will be open for the receipt of subscriptions for this issue from all classes of subscribers from February 19 through February 21, 1962, and, in addition subscriptions may be submitted by individuals through February 28, 1962. For this purpose individuals are defined as natural persons in their own right.

2. In addition to the offering under this circular, holders of the eligible bonds are offered the privilege of exchanging all or any part of such bonds for 3½ percent Treasury Bonds of 1990, which offering is set forth in Department Circular, Public Debt Series—No. 6-62, issued simultaneously with this circular.

3. Nonrecognition of gain or loss for Federal income tax purposes: Pursuant to the provisions of section 1037(a) of the Internal Revenue Code of 1954 as added by Public Law 86-346 (approved September 22, 1959), the Secretary of the Treasury hereby declares that no gain or loss shall be recognized for Federal income tax purposes upon the exchange with the United States of the eligible bonds enumerated in paragraph one of this section solely for the 3½ percent Treasury Bonds of 1998. Gain or loss, if any, upon the obligations surrendered in exchange will be taken into account upon the disposition or redemption of the new obligations.

II. *Description of bonds.* 1. The bonds now offered will be an addition to and will form a part of the series of 3½ percent Treasury Bonds of 1998 issued pursuant to Department Circulars Nos. 1052 and 1067, dated September 12, 1960, and September 11, 1961, respectively, will be freely interchangeable therewith, and are identical in all respects therewith except that interest on the bonds to be issued under this circular will accrue from March 1, 1962. Subject to the provision for the accrual of interest from March 1, 1962, on the bonds now offered, the bonds are described in the following quotation from Department Circular No. 1052:

1. The bonds will be dated October 3, 1960, and will bear interest from that date at the rate of 3½ percent per annum, payable on a semiannual basis on May 15 and November 15, 1961, and thereafter on May 15 and November 15 in each year until the principal amount becomes payable. They will mature November 15, 1998, and will not be subject to call for redemption prior to maturity.

2. The income derived from the bonds is subject to all taxes imposed under the Internal Revenue Code of 1954. The bonds are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The bonds will be acceptable to secure deposits of public moneys.

4. Bearer bonds with interest coupons attached, and bonds registered as to principal and interest, will be issued in denominations of $500, $1,000, $5,000, $10,000, $100,000, and $1,000,000. Provision will be made for the interchange of bonds of different denominations and of coupon and registered bonds, and for the transfer of registered bonds, under rules and regulations prescribed by the Secretary of the Treasury.

5. Any bonds issued hereunder which upon the death of the owner constitute part of his estate, will be redeemed at the option of the duly constituted representatives of the deceased owner's estate, at par and accrued interest to date of payment:[1] *Provided:*

(a) That the bonds were actually owned by the decedent at the time of his death; and

(b) That the Secretary of the Treasury be authorized to apply the entire proceeds of redemption to the payment of Federal estate taxes.

Registered bonds submitted for redemption hereunder must be duly assigned to "The Secretary of the Treasury for redemption, the proceeds to be paid to the District Director of Internal Revenue at _____ for credit on Federal estate taxes due from estate of _____." Owing to the periodic closing of the transfer books and the impossibility of stopping payment of interest to the registered owner during the closed period, registered bonds received after the closing of the books for payment during such closed period will be paid only at par with a deduction of interest from the date of payment to the next interest payment date;[2] bonds received during the closed period for payment at a date after the books reopen will be paid at par plus accrued interest from the reopening of the books to the date of payment. In either case checks for the full six months' interest due on the last day of the closed period will be forwarded to the owner in due course. All bonds submitted must be accompanied by Form PD 1782,[3] properly completed, signed and certified, and by proof of the representatives' authority in the form of a court certificate or a certified copy of the representatives' letters of appointment issued by the court. The certificate, or the certification to the letters, must be under the seal of the court, and except in the case of a corporate representative, must contain a statement that the appointment is in full force and be dated within six months prior to the submission of the bonds, unless the certificate or letters show that the appointment was made within one year immediately prior to such submission. Upon payment of the bonds appropriate memorandum receipt will be forwarded to the representatives, which will be followed in due course by formal receipt from the District Director of Internal Revenue.

6. The bonds will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States bonds.

III. *Subscription and allotment.* 1. Subscriptions will be received at the Federal Reserve Banks and Branches and at the Office of the Treasurer of the United States, Washington 25, D.C. Banking institutions generally may submit subscriptions for account of customers, provided the names of the customers are set forth in such subscriptions, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject or reduce any subscription, and to allot less than the amount of bonds applied for; and any action he may take in these respects shall be final. Subject to these reservations, all subscriptions will be allotted in full. Allotment notices will be sent out promptly upon allotment.

IV. *Payment.* 1. Payment for the face amount of bonds allotted hereunder must be made on or before March 16, 1962, or on later allotment, and may be made only in a like face amount of the three series of bonds enumerated in paragraph one of Section I hereof, which should accompany the subscription.

2. 2½ percent bonds of September 15, 1972: Coupons dated March 15, 1962, and all subsequent coupons, must be attached to the 2½ percent bonds due September 15, 1972, in bearer form, when surrendered. Accrued interest from September 15, 1961, to March 1, 1962 ($11.53315 per $1,000) on the 2½ percent bonds will be credited, accrued interest from November 15, 1961, to March 1, 1962 ($10.24862 per $1,000) plus the payment ($2.50 per $1,000) due the United States on account of the issue price of the new bonds will be charged, and the difference ($1.21547 per $1,000) must be paid by subscribers and should accompany the subscription.

3. 2½ percent bonds of June 15, 1972: Coupons dated June 15, 1962, and all subsequent coupons must be attached to the 2½ percent bonds due June 15, 1972, in bearer form, when surrendered. Accrued interest from December 15, 1961, to March 1, 1962 ($5.21978 per $1,000) on the 2½ percent bonds will be credited, accrued interest from November 15, 1961, to March 1, 1962 ($10.24862 per $1,000) plus the payment ($2.50 per $1,000) due the United States on the new bonds will be charged, and the difference ($5.02884 per $1,000) must be paid by subscribers and should accompany the subscription.

4. 2½ percent bonds of December 15, 1972: Coupons dated June 15, 1962, and all subsequent coupons, must be attached to the 2½ percent bonds due December 15, 1972, in bearer form, when surrendered. Accrued interest from December 15, 1961, to March 1, 1962 ($5.21978 per $1,000) on the 2½ percent bonds will be credited, accrued interest from November 15, 1961, to March 1, 1962 ($10.24862 per $1,000) plus the payment ($5.00 per $1,000) due the United States on account of the issue price of the new bonds will be charged, and the difference ($10.02884 per $1,000) must be paid by subscribers and should accompany the subscription.

V. *Assignment of registered bonds.* 1. Treasury Bonds of the three eligible series in registered form tendered in payment for bonds offered hereunder should be assigned by the registered payees or assignees thereof, in accordance with the general regulations of the Treasury Department governing assignments for transfer or exchange, in one of the forms hereafter set forth, and thereafter should be surrendered to a Federal Reserve Bank or Branch or to the Office of Treasurer of the United States, Washington 25, D.C. If the new bonds are desired registered in the same name as the bonds surrendered in exchange, the assignment should be to "The Secretary of the Treasury for exchange for 3½ percent Treasury Bonds of 1998"; if the new bonds are desired registered in another name, the assignment should be to "The Secretary of the Treasury for exchange for 3½ percent Treasury Bonds of 1998 in the name of _____"; if new bonds in coupon form are desired, the assignment should be to "The Secretary of the Treasury for exchange for 3½ percent Treasury Bonds of 1998 in coupon form to be delivered to _____".

VI. *General provisons.* 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective Districts, to issue allotment notices, to receive payment for bonds allotted, to make delivery of bonds on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive bonds.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

[SEAL] DOUGLAS DILLON,
Secretary of the Treasury.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 14529; FCC 62-201]

PALMS BROADCASTING CORP.

Order To Show Cause

In the matter of revocation of license of Palms Broadcasting Corporation for AM Station WGRC, Green Cove Springs, Florida; Docket No. 14529.

The Commission having under consideration (1) the outstanding license issued to Palms Broadcasting Corporation to operate AM Broadcast Station WGRC, Green Cove Springs, Florida, and (2) information that Station WGRC was operated by an unauthorized person for a period from on or about February 1, 1961, to December 18, 1961, in contravention of section 310(b) of the Communications Act of 1934, as amended; and

It appearing, that on June 15, 1960, the Commission approved the assignment of license of Station WGRC, Green Cove Springs, Florida (File No. BAL-3886) from Frank Van Hobbs to Palms Broadcasting Corporation; and

It further appearing, that the Commission was notified by the parties to said assignment that same became effective on July 17, 1960; and

It further appearing, that the application for assignment of license (File No. BAL-3886), section II, page 3 shows Robert A. Oliver to be president and a 50 percent stockholder and David R. Millan to be secretary-treasurer and a 50 percent stockholder of the assignee corporation; and

It further appearing, that Robert A. Oliver and David R. Millan abandoned Station WGRC, Green Cove Springs, Florida, on or about February 1, 1961, with no intention of returning, leaving the operation and control to Frank Van Hobbs, a preferred creditor of the licensee corporation; and

It further appearing, that on February 6, 1961, the licensee, Palms Broadcasting Corporation and Frank Van Hobbs filed an application for assignment of

license (File No. BAL-4150) requesting the assignment of license for Station WGRC to Frank Van Hobbs, which application was dismissed on June 21, 1961, under authority of § 1.312(b) of the Commission's rules for lack of prosecution; and

It further appearing, that Frank Van Hobbs, without any authority from the Commission so to do, has operated and controlled the operation of Station WGRC for the period from on or about February 1, 1961, to December 18, 1961, as of which date, the Commission has been advised, the station ceased operation for financial reasons; and

It further appearing, that an unauthorized assignment of license for Station WGRC to Frank Van Hobbs has been made in violation of section 310(b) of the Communications Act of 1934, as amended, and that such violation was willful;

It is ordered, This 14th day of February 1962, that pursuant to the provisions of Section 312(a)(2), 312(a)(4), and 312(c) of the Communications Act of 1934, as amended, Palms Broadcasting Corporation is directed to show cause why an order revoking its license for AM Station WGRC, Green Cove Springs, Florida, should not be issued, and to appear and give evidence with respect thereto at a hearing [1] to be held in the Commission's offices at Washington, D.C., at a time to be designated by subsequent order, said time in no event to be less than thirty days after receipt of this order; and

It is further ordered, That the Acting Secretary of the Commission send copies of this order by certified mail—return receipt requested, to Palms Broadcasting Corporation, Robert A. Oliver, David R. Millan, and Frank Van Hobbs, at their last known addresses.

Released: February 20, 1962.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Acting Secretary.

[F.R. Doc. 62-1948; Filed, Feb. 26, 1962; 8:51 a.m.]

[1] Section 1.77(c) of the Commission's rules provides that a licensee in order to avail itself of the opportunity to be heard shall, in person or by its attorney, file with the Commission within thirty days of the receipt of the order to show cause, a written statement stating that it will appear at the hearing and present evidence on the matter specified in the order. In the event it would not be possible for respondent to appear for hearing in the proceeding scheduled to be held in Washington, D.C., he should advise the Commission of the reasons for such inability within five days of the receipt of this order. If the licensee fails to file an appearance within the time specified, the right to a hearing shall be deemed to have been waived. See § 1.78(a) of the Commission's rules as amended December 12, 1960. Where a hearing is waived, a written statement in mitigation or justification may be submitted within thirty days of the receipt of the order to show cause. See § 1.78(b) of the Commission's rules as amended December 12, 1960. In the event the right to a hearing is waived, the Chief Hearing Examiner will terminate the hearing proceeding and certify the case to the Commission. Thereupon the matter will be determined by the Commission in the regular course of business and an appropriate order will be entered. See § 1.78 (c), (d), and (e) of the Commission's rules as amended December 12, 1960.

[Docket No. 14530; FCC 62-202]

FRANK VAN HOBBS

Order To Show Cause

In the matter of a cease and desist order to be directed against Frank Van Hobbs, St. Augustine, Florida; Docket No. 14530.

The Commission having under consideration the information as to the unauthorized and illegal operation and control of Station WGRC, Green Cove Springs, Florida by Frank Van Hobbs; and

It appearing, that on June 15, 1960, the Commission granted an assignment of license of Station WGRC, Green Cove Springs, Florida (File No. BAL-3886) from Frank Van Hobbs to the Palms Broadcasting Corporation; and

It further appearing, that the Commission was notified by the parties to said assignment that same became effective on July 17, 1960; and

It further appearing, that on or about February 1, 1961, the two stockholders of the Palms Broadcasting Corporation (Robert A. Oliver and David R. Millan) each owning 50 percent of the issued and outstanding stock, abandoned Station WGRC, Green Cove Springs, Florida, with no intention of returning, leaving the management, operation and control to Frank Van Hobbs, a preferred creditor of the licensee corporation; and

It further appearing, that without any authority from the Commission so to do, Frank Van Hobbs assumed complete operation and control of said station on or about February 1, 1961; and

It further appearing, that even though Frank Van Hobbs was notified, in person, by a staff member of the Commission on October 16, October 27, and November 28, 1961, of such unauthorized operation, he still persisted in same until December 18, 1961, as of which date, the Commission has been advised, the station ceased operation for financial reasons; and

It further appearing, that said unauthorized operation and control of Station WGRC by Frank Van Hobbs was a willful and repeated violation of section 310(b) of the Communications Act of 1934, as amended;

It is ordered, This 14th day of February 1962, that pursuant to sections 312(b) and 312(c) of the Communications Act of 1934, as amended, Frank Van Hobbs is directed to show cause why an order to cease and desist from further violating the provisions of section 310(b) of the Communications Act of 1934, as amended, should not be issued, and to appear and give evidence with respect thereto at a hearing [2] to be held in the Commission's offices at Washington, D.C., at a time to be specified by a subsequent order, said time in no event to be less than 30 days after receipt of this order; and

It is further ordered, That the hearing ordered herein shall be consolidated for hearing with the hearing ordered in the Matter of Revocation of License of Palms Broadcasting Corporation for AM Station WGRC, Docket No. 14529; and

It is further ordered, That the Acting Secretary of the Commission send a copy of this order by certified mail—return receipt requested, to Mr. Frank Van Hobbs at his last known address.

Released: February 20, 1962.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Acting Secretary.

[F.R. Doc. 62-1949; Filed, Feb. 26, 1962; 8:51 a.m.]

[2] Section 312(c) of the Communications Act of 1934, as amended, and § 1.77(c) of the Commission's rules provide that a licensee, permittee or person in order to avail itself of the opportunity to be heard shall, in person or by its attorney, file with the Commission within thirty days of the receipt of the order to show cause, a written statement stating that it will appear at the hearing and present evidence on the matter specified in the order. In the event it would not be possible for respondent to appear for hearing in the proceeding scheduled to be held in Washington, D.C., he should advise the Commission of the reasons for such inability within five days of the receipt of this order. If the licensee, permittee or person fails to file an appearance within the time specified, the right to a hearing shall be deemed to have been waived. See § 1.78(a) of the Commission's rules as amended December 12, 1960. Where a hearing is waived, a written statement in mitigation or justification may be submitted within thirty days of the receipt of the order to show cause. See § 1.78(b) of the Commission's rules as amended December 12, 1960. In the event the right to a hearing is waived, the Chief Hearing Examiner will terminate the hearing proceeding and certify the case to the Commission. Thereupon the matter will be determined by the Commission in the regular course of business and an appropriate order will be entered. See § 1.78 (c), (d), and (e) of the Commission's rules as amended December 12, 1960.

[Docket No. 14533]

EUGENE R. PLUMMER

Order To Show Cause

In the matter of Eugene R. Plummer, Neptune New Jersey, Docket No. 14533; order to show cause why there should not be revoked the license for Radio Station 2W4888 in the Citizens Radio Service.

The Commission, by the Chief, Safety and Special Radio Services Bureau, under delegated authority, having under consideration the matter of certain alleged violations of Title 18, United States Code, section 1464, and the Commission's rules, in the operation of the captioned radio station;

It appearing, that, at various times during April 1961, the licensee participated in a scheme to conceal from detection by the Commission the identity of certain persons engaged in the operation of Citizens radio stations in the general vicinity of Asbury Park, New Jersey, by the use of call signs not assigned by the Commission to the stations being operated by such persons; and

It further appearing, that by the licensee's participation in the above-mentioned scheme, and in the operation of his radio station, he has evidenced a predisposition to disregard the rules and regulations of the Commission and to cooperate with others in violation thereof; and

It further appearing, that, had the Commission, at the time of the grant of the license for Citizens Radio Station 2W4888, been aware of the licensee's above-mentioned predisposition, it would have been warranted in refusing the grant of a license to such licensee and would have refused to grant a license to such licensee; and

It further appearing, that, at various times during April 1961, the licensee used a call sign or signal which had not been assigned by proper authority to the station being operated, in violation of § 19.83 of the Commission's rules; and

It further appearing, that, on or about April 21, 1961, the above-mentioned Citizens radio station was used for the utterance of indecent language in violation of Title 18, United States Code, section 1464; and

It further appearing, that, at various times between April 15, 1961, and July 15, 1961, and particularly on April 21, 1961, and July 14, 1961, the licensee failed to restrict communications between Citizens Radio Station 2W4888 and units of other Citizens radio stations to five consecutive minutes, in violation of § 19.61(f) of the Commission's rules; and

It further appearing, that, at various times between April 15, 1961, and July 15, 1961, and particularly on April 21, 1961 and May 13, 1961, the transmissions of Citizens Radio Station 2W4888 were not addressed to specific persons or stations within the direct groundwave coverage range of such station and were designed to elicit responses from random or unknown stations, in violation of § 19.61(g) of the Commission's rules; and

It further appearing, that, at various times between April 15, 1961, and July 15, 1961, and particularly on April 21, 1961, May 13, 1961, and July 14, 1961, the call sign of Citizens Radio Station 2W4888 was not transmitted at the beginning and termination of communications, in violation of § 19.62 of the Commission's rules; and

It further appearing, that, at various times between April 15, 1961, and July 15, 1961, and particularly on May 13, 1961, the above-named licensee transferred, assigned or disposed of the operating authority under his station license, in violation of section 310(b) of the Communications Act of 1934, as amended, and § 19.92 of the Commission's rules; and

It further appearing, that the licensee has sought to conceal such transfer, assignment or disposition from the Commission and has denied that it took place; and

It further appearing, that, in view of the foregoing, the licensee has repeatedly violated §§ 19.83, 19.61(f), 19.61(g), and 19.62 of the Commission's rules; and

It further appearing, that in view of the foregoing, the licensee has wilfully violated § 19.92 of the Commission's rules and Title 18, United States Code, section 1464;

It is ordered, This 19th day of February 1962, pursuant to section 312(a)(2), (4), and (6), and (c) of the Communications Act of 1934, as amended, and section 0.291(b)(8) of the Commission's Statement of Delegations of Authority that the said licensee show cause why the license for the captioned radio station should not be revoked and appear and give evidence in respect thereto at a hearing to be held at a time and place to be specified by subsequent order; and

It is further ordered, That the Acting Secretary send a copy of this order by certified mail—return receipt requested to the said licensee at 325 Highland Avenue, Neptune, New Jersey.

Released: February 21, 1962.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Acting Secretary.

[F.R. Doc. 62-1950; Filed, Feb. 26, 1962; 8:51 a.m.]

FEDERAL MARITIME COMMISSION

COMMONWEALTH STEAMSHIP, INC., ET AL.

Notice of Agreement Filed for Approval

Notice is hereby given that the agreement described below has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916 (39 Stat. 733, 75 Stat. 763; 46 U.S.C. 814):

Agreement numbered 8745 is an arrangement between Commonwealth Steamship, Inc., A. H. Bull Steamship Co., Bull Lines, Inc., A. H. Bull & Co., Waterman Steamship Corporation of Puerto Rico, and Sea-Land Equipment, Inc. covering the purchase by Waterman Steamship Corporation of Puerto Rico from Commonwealth Steamship Inc., a subsidiary of A. H. Bull Steamship Co., of the "Alicia" and the "Dorothy" both partially containerized C4-3-B2 type vessel, and the assumption by Waterman Steamship Corporation of Puerto Rico of a lease agreement covering containers to be used on said vessels.

Agreement numbered 8745 also stipulates that A. H. Bull Steamship Co., Inc., will:

(1) Take all steps and acts necessary or advisable for dismissal with prejudice of all and any suits pending in which McLean Industries, Inc., Sea-Land Service, Inc., or Waterman Steamship Corporation of Puerto Rico is a defendant;

(2) Not prevent or delay consummation of a plan of rearrangement heretofore filed by Waterman Steamship Corporation with the Maritime Subsidy Board or any other plan for the separation of Waterman Steamship Corporation from McLean Industries, Inc., and Sea-Land Service, Inc.;

(3) Not prevent or delay the entering into by Waterman Steamship Corporation of the operating differential subsidy contract or the payment to Waterman Steamship Corporation by the United States of an operation differential subsidy;

(4) Not recover damages from McLean Industries, Inc., or any of its subsidiaries, associates or affiliates by reason of any alleged violation of the Anti-trust Laws; or

(5) Not prevent the payment, transfer or delivery to, or restrict the use of, any money or property of whatsoever kind or character received by McLean Industries, Inc., or any of its subsidiaries under any such plan for the separation of Waterman Steamship Corporation from McLean Industries, Inc., and Sea-Land Service, Inc.

The Commission will consider whether this agreement or any part thereof is subject to section 15, Shipping Act, 1916, as amended, and if so whether it should be approved under the Standards of that section.

Interested parties may inspect this agreement and obtain copies thereof at the Bureau of Domestic Regulation, Federal Maritime Commission, Washington, D.C., and may submit within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to this agreement and their position as to approval, disapproval, or modification, together with request for hearing should a hearing be desired.

Dated: February 23, 1962.

By order of the Federal Maritime Commission.

THOMAS LISI,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. CP62-43]

ATLANTIC SEABOARD CORP.

Notice of Date of Hearing

FEBRUARY 19, 1962.

Take notice that pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on March 12, 1962, at 9:30 a.m., e.s.t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D.C., concerning the matters involved in and the issues presented by the application in Docket No. CP62-43: *Provided, however*, That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of § 1.30(c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Notice of filing of the subject application was published in the FEDERAL REGISTER on January 5, 1962 (27 F.R. 132).

JOSEPH H. GUTRIDE,
Secretary.

[F.R. Doc. 62-1891; Filed, Feb. 26, 1962; 8:45 a.m.]

[Docket No. CP61-263 etc.]

CITIES SERVICE GAS CO. ET AL.

Notice of Application, Consolidation, and Date of Hearing

FEBRUARY 20, 1962.

Cities Service Gas Company et al., Docket No. CP61-263 etc.; and Sondau Oil & Gas Company, Inc., et al., Docket No. CI62-938.

Take notice that on February 13, 1962, Sondau Oil and Gas Company, Inc., et al. (Applicant), 303 South Main, Wichita, Kansas, filed in Docket No. CI62-938 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of natural gas produced in the Ringwood Field, Major County, Oklahoma, to Oklahoma Natural Gas Gathering Corporation (Oklahoma Natural) and Warren Petroleum Corporation (Warren) pursuant to a gas purchase contract dated May 29, 1961, between Applicant as seller and Oklahoma Natural and Warren as joint buyers, which contract was filed concurrently with the subject application. The proposed price under this contract is 11.0 cents at 14.65 psia. The application is on file with the Commission and open to public inspection.

This related matter should be heard on a consolidated record with the proceeding designated as Docket Nos. CP61-263, et al. now set for hearing on March 22, 1962, and disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on March 22, 1962, at 9:30 a.m. e.s.t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D.C., concerning the matters involved in and the issues presented by the application in Docket No. CI62-938 together with the matters involved in and the issues presented by the applications in Docket Nos. CP61-263, et al. already set for hearing at the time and place aforesaid: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of § 1.30(c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D.C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before March 12, 1962. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

JOSEPH H. GUTRIDE,
Secretary.

[F.R. Doc. 62-1892; Filed, Feb. 26, 1962; 8:45 a.m.]

[Docket No. CP62-154]

EL PASO NATURAL GAS CO.

Notice of Application and Date of Hearing

FEBRUARY 19, 1962.

Take notice that on December 29, 1961, El Paso Natural Gas Company (El Paso), a Delaware corporation with mailing address at P.O. Box 1492, El Paso, Texas, filed an application for a certificate of public convenience and necessity in the above-captioned proceeding, pursuant to section 7(c) of the Natural Gas Act, authorizing El Paso to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

El Paso seeks authority, during the limited term extending from January 1, 1962, and continuing through December 31, 1962, to sell and deliver up to an additional 25,700,000 Mcf of natural gas at 14.9 psia to Southern California Gas Company and Southern Counties Gas Company of California (Southern) on an interruptible, best efforts basis, at the existing points of delivery to that customer located near Blythe, California, and Topock, Arizona. The proposal contemplates interim deliveries of gas to Southern during the foregoing period so long as the proceedings at Docket Nos. G-16235, et al. are not terminated by reason other than issuance of certificates in form and substance satisfactory to Southern and to the applicants therein. If such proceedings are terminated for any reason other than issuance of satisfactory certificates, the performance contemplated by the application during the limited term would terminate upon notice given by either El Paso or Southern to the other. Said quantities of gas to be provided are in addition to the volumes of gas which El Paso is certificated to deliver to Southern and are to be provided from El Paso's existing sources of gas supply by use of its certificated pipeline facilities only after meeting the priority requirements of its customers served throughout its pipeline system. No additional pipeline facilities are proposed or required to be constructed by El Paso to enable it to render the proposed natural gas service. The sale and delivery of such gas is to be performed by El Paso in accordance with a Service Agreement dated December 12, 1961, between El Paso and Southern and at rates contained in El Paso's proposed Rate Schedule G-X-2 of its FPC Gas Tariff, Original Volume No. 1.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on April 3, 1962, at 10:00 a.m., e.s.t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D.C. concerning the matters involved in and the issues presented by such application.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D.C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before March 15, 1962.

JOSEPH H. GUTRIDE,
Secretary.

[F.R. Doc. 62-1893; Filed, Feb. 26, 1962; 8:45 a.m.]

[Docket No. CP61-30]

NATURAL GAS PIPELINE COMPANY OF AMERICA

Notice of Motion for Amendment of Certificate Authorization

FEBRUARY 19, 1962.

Take notice that on November 20, 1961, Natural Gas Pipeline Company of America (Natural) filed a motion to amend the Commission's order of July 11, 1961, in Docket No. CP61-30, issuing a certificate of public convenience and necessity authorizing Movant to construct and operate facilities to increase the daily design sales capacity of its pipeline by 105,000 Mcf (on a billing basis of 1,000 Btu per cubic foot of gas).

The requested amendment would authorize the sale and delivery by Natural of an additional daily contract quantity of 5,400 Mcf of natural gas to Iowa Electric Light and Power Company (Iowa Electric) and an additional daily contract quantity of 19,000 Mcf of natural gas to Northern Indiana Public Service Company (Northern Indiana). These volumes would be in lieu of those authorized, i.e., zero volumes to Iowa Electric and 15,000 Mcf to Northern Indiana. The additional volumes of gas are to be made available, in part, from the expanded system capacity authorized in the above-entitled docket; and, in minor part (270 Mcf), from facilities authorized in Docket No. CP61-128. Both Iowa Electric and Northern Indiana are existing customers of Natural.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D.C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before March 14, 1962.

JOSEPH H. GUTRIDE,
Secretary.

[F.R. Doc. 62-1894; Filed, Feb. 26, 1962; 8:45 a.m.]

[Docket No. CP62-135]

NATURAL GAS PIPELINE COMPANY OF AMERICA

Notice of Application and Date of Hearing

FEBRUARY 19, 1962.

Take notice that on November 29, 1961, as supplemented on January 15, 1962, Natural Gas Pipeline Company of America (Natural), 122 South Michigan Avenue, Chicago, Illinois, filed in Docket No. CP62-135 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas facilities in Will County, Illinois, to deliver and sell natural gas to Northern Illinois Gas Company (Northern Illinois) for resale and distribution in the Village of Minooka, Illinois, all as more fully set forth in the application, as supplemented, which is on file with the Commission and open to public inspection.

Natural seeks authorization to construct and operate a side tap connection on its authorized and existing main transmission pipeline, approximately 150 feet of 3-inch lateral pipeline extending from said tap to the facilities of Northern Illinois, and a meter station located at the terminus of the proposed lateral line, all within Will County, Illinois. Northern Illinois estimates the cost of the proposed facilities to be $11,710, which would be financed from funds on hand.

The application states that Northern Illinois has received a 50-year franchise from the Village of Minooka and a certificate of public convenience and necessity from the Illinois Commerce Commission to render the proposed distribution service. The proposed service by Natural to Northern Illinois would be rendered from presently authorized volumes available to Northern Illinois.

The estimated market requirements for the Village of Minooka for the first and third years of service are as follows:

[In thousand cubic feet]

	First year	Third year
Annual	20,200	27,800
Peak day	198	287

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on March 27, 1962, at 9:30 a.m., e.s.t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D.C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of § 1.30(c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D.C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before March 16, 1962. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefore is made.

JOSEPH H. GUTRIDE,
Secretary.

[F.R. Doc. 62-1895; Filed, Feb. 26, 1962; 8:45 a.m.]

INTERSTATE COMMERCE COMMISSION

[Notice 600]

MOTOR CARRIER TRANSFER PROCEEDINGS

FEBRUARY 21, 1962.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 179), appear below:

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC 64598. By order of February 16, 1962, the Transfer Board approved the transfer to Lyall E. Gage, Villisca, Iowa, of Certificate No. MC 71777, issued July 11, 1951, to Claude Spring, doing business as Claude Spring Trucking, Corning, Iowa, authorizing the transportation, over regular routes, between Corning, Iowa, and Omaha, Nebr., and St. Joseph, Mo., of livestock and feed, building materials, and farm products, from and to specified points, varying with the commodities transported.

No. MC-FC 64681. By order of February 19, 1962, the Transfer Board approved the transfer to Citizens Transportation Co., of Riverside, a corporation, Riverside, Calif., of Certificates Nos. MC 8758 and MC 8758 Sub-1, issued April 12, 1949, and February 11, 1954, respectively, to John E. Cote, doing business as Citizen's Transportation Company, Riverside, Calif., of citrus fruits, from Riverside, Calif., to Anaheim, Calif., and points and places within 15 miles of Anaheim, from Riverside, Calif., and points within 20 miles of Riverside, and Anaheim, Calif., and points within 15 miles of Anaheim, to Los Angeles, Calif., from Riverside, Calif., and points within 10 miles of Riverside, to Long Beach, Calif., fertilizer, from Los Angeles Harbor and Long Beach, Calif., to specified points in California, coke, cast iron pipe, and newsprint, from Los Angeles Harbor and Long Beach, Calif., to Riverside, Calif., citrus fruits, nails and car stripe, between Riverside, Calif., and points within 50 miles of Riverside, and cement, over irregular routes, from Crestmore and Colton, Calif., to points in the Los Angeles Harbor, Calif., Commercial Zone as defined by the Commission, restricted to traffic moving to the territories or possessions of the United States. Theodore W. Russell, 1010 Wilshire Boulevard, Los Angeles 17, Calif., attorney for applicants.

No. MC-FC 64729. By order of February 16, 1962, the Transfer Board approved the transfer to Edward C. Eichler, doing business as Eichler Transfer, Sturgis, Mich., of Certificates in Nos. MC 60082 and MC 60082 Sub-4, issued June 13, 1955, and July 18, 1955, respectively, to Edward C. Eichler and Pearl E. Eichler, a partnership, doing business as Eichler Transfer, Sturgis, Mich., authorizing the transportation of: Fresh meats, eggs, poultry, products of food-processing and meatpacking houses, packinghouse products, and byproducts, advertising matter incidental to the sale and distribution of such commodities, refused or unclaimed shipments of such commodities, household goods, and general commodities, with the usual exceptions including household goods and commodities in bulk, from, to, or between specified points in Michigan, Ohio, Illinois, Indiana, Missouri, New Jersey, New York, West Virginia and Pennsylvania. J. C. Schriner, 5275 Ridge Road, Cleveland 29, Ohio, representative for applicants.

No. MC-FC 64738. By order of February 16, 1962, the Transfer Board approved the transfer to Sam Lowenstein and Stanley Lowenstein, a partnership, doing business as Super M Foods Delivery, New York, N.Y., of Permit No. MC 7832, issued August 18, 1958, to Super M Foods Delivery, Inc., New York, N.Y., authorizing the transportation of: Such merchandise as is dealt in by wholesale, retail, and chain grocery and food business houses, and, in connection therewith equipment, materials, and supplies used in the conduct of such business, between points within a specified territory in New York, Connecticut, and New Jersey. Charles H. Trayford, 220 East 42d Street, New York, N.Y., representative for applicants.

No. MC-FC 64755. By order of February 16, 1962, the Transfer Board approved the transfer to Robert M. Sullivan, Springfield, Mass., of Certificate No. MC 2066, issued September 13, 1949, to Clark's Express Company, a corporation, Spencer, Mass., authorizing the transportation of: general commodities, with the usual exceptions including household goods and commodities in bulk, between specified points in Massachusetts, and between specified points in Massachusetts, on the one hand, and, on the other, points in New Hampshire, Rhode Island, and Connecticut. Arthur M. Marshall, 145 State

Street, Springfield 3, Mass., attorney for applicants.

No. MC-FC 64758. By order of February 16, 1962, the Transfer Board approved the transfer to James O. Schueman, Gerald L. Schueman, and John H. Schueman, a partnership, doing business as Schueman Brothers, Avoca, Iowa, of Certificate No. MC 47085, issued November 21, 1955, to James O. Schueman, Gerald L. Schueman, and Grace Schueman, a partnership, doing business as Schueman Brothers, Avoca, Iowa, authorizing the transportation of: Livestock, from Avoca, Iowa, and points within 10 miles thereof, to South Omaha, Nebr.; from Walnut, Iowa, and points within 15 miles thereof, to Omaha, Nebr.; feeder stock and livestock feed, from Omaha and South Omaha, Nebr., to Avoca, Iowa, and points within 10 miles thereof; coal, feed, livestock, furniture, and building materials, from Omaha, Nebr., to Walnut, Iowa, and points within 15 miles thereof; petroleum products, in containers, between Avoca, Iowa, and points within 10 miles thereof, on the one hand, and, on the other, Omaha, Nebr.; livestock, feed, grain, seeds, agricultural implements and parts, and lumber, between Avoca, Iowa, and points within 15 miles thereof, on the one hand, and, on the other, Omaha, Nebr.; household goods and emigrant movables, between Avoca, Iowa, and points in Iowa within 15 miles of Avoca, on the one hand, and, on the other, points in Nebraska.

No. MC-FC 64778. By order of February 16, 1962, the Transfer Board approved the transfer to Thomas Avino, Frank Avino, Joseph Avino, and Patrick Avino, a partnership, doing business as Avino Bros., New York, N.Y., of a portion of Certificate No. MC 11685, issued December 6, 1951, to Crest Haulage, Inc., New York, N.Y., authorizing the transportation of: Printed matter (not including newspapers and periodicals), printers' materials and supplies, and stationery, over irregular routes, between New York, N.Y., on the one hand, and, on the other, points in Bergen, Essex, Hudson, Middlesex, Morris, Passaic, Somerset, and Union Counties, N.J. William D. Traub, 350 Fifth Avenue, New York 1, N.Y., registered practitioner for applicants.

No. MC-FC 64794. By order of February 15, 1962, the Transfer Board approved the transfer to Charles Ihrig & Son, Inc., Buffalo, N.Y., of Certificate No. MC 21416, issued October 26, 1954, to Norman Ihrig and Melvin Ihrig, a partnership, doing business as Chas. Ihrig & Son, authorizing the transportation of household goods over irregular routes, between Buffalo, N.Y., and points within 10 miles of Buffalo, on the one hand, and, on the other, points in Connecticut, Illinois, Indiana, Maryland, Massachusetts, Michigan, New Jersey, New York, Ohio, Pennsylvania, and the District of Columbia. Floyd B. Piper, 604 Crosby Building, Buffalo 2, N.Y., representative for applicants.

No. MC-FC 64796. By order of February 15, 1962, the Transfer Board approved the transfer to Sherry and Medeiros Corporation, Fall River, Mass., of Certificate No. MC 100381, issued July 14, 1950, to Manuel Angelo and Peter Angelo, a partnership, doing business as M. Angelo & Son, Fall River, Mass., authorizing the transportation over irregular routes of granite, for building purposes, from Providence, R.I., to points in Connecticut on and east of Connecticut Highway 10 and those in Massachusetts on and east of Massachusetts Highway 10, with no transportation for compensation on return, except as otherwise authorized herein; and sand, gravel, stone, roadbuilding machinery, between points in Rhode Island and those in Massachusetts within 20 miles of the Rhode Island-Massachusetts State line. William F. Long, Jr., 225 Academy Building, Fall River, Mass., attorney for applicants.

No. MC-FC 64803. By order of February 16, 1962, the Transfer Board approved the transfer to Paul E. Wilhelmy, Omaha, Nebr., of Certificate No. MC 11592, issued April 13, 1944, to E. E. Haugarth, Omaha, Nebr., authorizing the transportation of: Fresh meat, packinghouse products, dairy products, canned goods, and supplies incidental to, or used in, the operation and maintenance of meat packing plants between Chicago, Ill., and Omaha, Nebr.; and farm machinery and parts, and binder twine, from Chicago, Ill., to Omaha and Lincoln, Nebr. Donald L. Stern, 924 City National Bank Building, Omaha 2, Nebr., attorney for applicants.

SECURITIES AND EXCHANGE COMMISSION

[File No. 24D-2534]

ALLIED METALS CO.

Notice and Order for Hearing

FEBRUARY 20, 1962.

I. Allied Metals Company (issuer), 3520 Broadway SE., Albuquerque, New Mexico, a New Mexico corporation, filed with this Commission on September 11, 1961, a notification on Form 1-A and an offering circular relating to an offering of 100,000 shares of its $1 par value nonassessable Class A common stock at an offering price of $1 per share, which was amended down to 50,000 shares for an aggregate of $50,000, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3(b) thereof, and Regulation A promulgated thereunder; and

II. The Commission on February 1, 1962, issued an order pursuant to Rule 261 of the general rules and regulations under the Securities Act of 1933, as amended, which temporarily suspended the issuer's exemption under Regulation A and afforded to any person having any interest therein an opportunity to request a hearing. A written request for a hearing has been received by the Commission.

The Commission deems it necessary and appropriate that a hearing be held for the purpose of determining whether it should vacate the temporary suspension order or enter an order of permanent suspension in this matter.

It is hereby ordered, Pursuant to Rule 261 of the general rules and regulations under the Securities Act of 1933, as amended, that a hearing be held at 10:00 a.m., m.s.t., on March 12, 1962, at the Denver Regional Office of the Commission, 802 Midland Savings Building, 444 17th Street, Denver 2, Colorado, with respect to the following matters and questions, without prejudice, however, to the specification of additional issues which may be presented in these proceedings:

A. Whether the issuer has complied with the terms and conditions of Regulation A in that:

1. The notification fails to disclose the affiliates and predecessors of the issuer as required by Item 2 of Form 1-A.

2. The issuer falsely states in its notification, in responding to Item 6 of Form 1-A, that none of its directors, officers or others were subject to any order, judgment, or decree specified in subparagraph 2, paragraph (d) of Rule 252;

B. Whether the Regulation A exemption is available to the issuer in that Clifford G. Taylor, an officer and director of the issuer, is subject to a decree of permanent injunction of the character specified in subparagraph (2) of paragraph (d) of Rule 252.

C. Whether the offering circular contains untrue statements of material facts and omits to state material facts necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, particularly with respect to:

1. The failure to disclose accurately and adequately the speculative and adverse features of the offering and risks attendant to the proposed business enterprise.

2. The failure to disclose whether there has been adequately controlled laboratory testing of the product Ber-Al and the process by which it is formed to determine the practicalities of the product's uses, the failure to disclose accurately and adequately the stage of research and development, and the failure to define the principal market for the product.

3. The failure to disclose whether the process of metallurgy proposed to be exploited has been subject to patent search.

4. The failure to disclose accurately and adequately the proposed use of proceeds, particularly in connection with the remuneration of officers and directors.

5. The failure to disclose that the shareholders' right to transfer stock of the corporation is subject to the corporation's option to purchase at par value such stock from the record owners within 30 days after written notice of transfer is filed with the company.

6. The failure to disclose accurately and adequately the background of officers and directors.

7. The failure to disclose the percentage of outstanding securities of the issuer to be held by directors, officers and promoters as a group and the percentage of such securities which will be held by the public if all securities to be offered are sold and the respective amounts of cash paid therefor by such group and by the public.

8. The failure to file appropriate financial statements.

D. Whether the offering if made would be in violation of Section 17(a) of the Securities Act of 1933, as amended.

III. *It is further ordered*, That Sidney L. Feiler, or any officer or officers of the Commission designated by it for that purpose, shall preside at the hearing; that any officer or officers so designated to preside at any such hearing are hereby authorized to exercise all the powers granted to the Commission under sections 19(b), 21, and 22(c) of the Securities Act of 1933, as amended, and to hearing officers under the Commission's rules of practice.

It is further ordered, That the Secretary of the Commission shall serve a copy of this order by registered mail to Allied Metals Company, that notice of the entering of this order shall be given to all other persons by a general release of the Commission and by publication in the FEDERAL REGISTER. Any person who desires to be heard, or otherwise wishes to participate in the hearing, shall file with the Secretary of the Commission on or before March 9, 1962, a written request relative thereto as provided in Rule 9(c) of the Commission's rules of practice.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F.R. Doc. 62-1899; Filed, Feb. 26, 1962; 8:46 a.m.]

[File No. 24FW-1271]

HE.LEUM CO., INC.

Order Temporarily Suspending Exemption, Statement of Reasons Therefor, and Notice of Opportunity for Hearing

FEBRUARY 20, 1962.

I. He.Leum Co., Inc. (issuer), 8900 North Central Avenue, Phoenix, Arizona, organized in Arizona on October 11, 1961, filed with the Commission on November 9, 1961, a notification on Form 1-A and an offering circular relating to a proposed public offering of 2,400,000 shares of its $0.10 par value common voting stock in units of 100 shares at $12.50 per unit for an aggregate of $300,000, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3(b) and Regulation A promulgated thereunder.

II. The Commission has reasonable cause to believe that:

A. The terms and conditions of Regulation A have not been complied with in that:

1. The notification filed does not name certain affiliates as required by Item 2(b) of Form 1-A.

2. In response to Item 9(a) of the notification, issuer has set forth an arbitrary valuation of $240,000 which is based upon an appraised valuation, assigned to certain properties and services received by it in exchange for shares of its stock.

3. The issuer has failed to furnish appropriate responses and attach pertinent exhibits to the notification as required by Item 11 of Form 1-A and the subsections thereof.

4. Issuer has failed to include in its offering circular a statement of financial condition meeting the requirements prescribed by Item 11(a) of Schedule I relating to the form and content of financial statements.

B. Regulation A is unavailable to the issuer in that the aggregate amount of the securities proposed to be offered to the public, computed in accordance with Rules 253 and 254, exceeds $300,000.

C. The offering circular contains untrue statements of material facts and omits to state facts necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading, particularly with respect to:

1. The failure to describe clearly and adequately the plan of distribution and the manner in which the shares will be offered and sold.

2. The failure to disclose clearly and adequately the expenses of the offering.

3. The failure to include a map drawn to scale showing location of issuer's acreage and nearby acreage, together with the location and present status of all holes drilled for oil and gas within the area and the respective dates they were drilled and the respective depths thereof.

4. The failure to include the past production history of all wells which ever produced oil on the acreage owned by issuer.

5. The failure to include a reliable estimation of profitably recoverable reserves from the properties involved.

6. The failure to include any discussion of the hazards involved in the issuer's proposed operation.

7. The failure to include any discussion of the effect on the prospective new investors if materially less than the total amount of stock offered is sold.

8. The representation with respect to core analyses showing gross oil in place as "estimated future reserves net to the company's interest in the properties."

9. The representation that the core analyses were for three rather than two wells.

10. The extension of dollar amounts in the financial statements, for other than cash transactions, on the basis of an estimated or appraised valuation for assets in excess of identifiable cash cost of such assets to promoters.

D. The offering would be made in violation of section 17(a) of the Securities Act of 1933, as amended.

III. *It is ordered*, Pursuant to Rule 261 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for hearing within thirty days after the entry of this order; that within twenty days after receipt of such request the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining

whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; that if no hearing is requested and none is ordered by the Commission, this order shall become permanent on the thirtieth day after its entry and shall remain in effect unless or until it is modified or vacated by the Commission; and that notice of the time and place for any hearing will be promptly given by the Commission.

By the Commission.

[File Nos. 59-105, 54-228]

PENNSYLVANIA GAS CO. AND NATIONAL FUEL GAS CO.

Order Directing Elimination of Publicly Held Minority Stock Interest and Order Approving Plan

FEBRUARY 19, 1962.

In the Matter of Pennsylvania Gas Company and National Fuel Gas Company, File No 59-105; and National Fuel Gas Company, File No. 54-228.

The Commission having by notice and order dated July 22, 1960, instituted proceedings under section 11(b)(2) of the Public Utility Holding Company Act of 1935 ("Act") with respect to National Fuel Gas Company ("National"), a registered holding company, and its subsidiary company, Pennsylvania Gas Company ("Penn"), and having consolidated with such proceedings a proceeding with respect to a plan, as amended, ("plan") filed by National pursuant to section 11(e) of the Act for the purpose of eliminating the publicly held common stock interest in Penn;

National having requested that, if the Commission approves the section 11(e) plan, the Commission's order contain the findings and recitals necessary to meet the requirements of sections 1081 and 4382 of the Internal Revenue Code of 1954, as amended, and any other sections thereof providing exemptions or benefits with respect to transactions proposed in the plan.

National having requested the Commission, pursuant to section 11(e) of the Act, to apply to an appropriate United States District Court to enforce and carry out the terms and provisions of the plan;

A public hearing having been held, after appropriate notice, at which all interested persons were afforded an opportunity to be heard; and

The Commission having considered the entire record and having this day filed its findings and opinion, on the basis of such findings and opinion

It is ordered, That, pursuant to section 11(b)(2) of the Act, National and Penn be, and each hereby is, directed to take appropriate action to effect the elimination of the publicly held stock interest in Penn.

It is further ordered, Pursuant to section 11(e) of the Act, that the plan filed by National be, and it hereby is, approved, subject to the terms and conditions contained in Rule 24 promulgated under the Act and to the following additional terms and conditions:

(1) This order shall not be operative to authorize any transaction proposed in the plan until an appropriate United States District Court shall, upon application thereto, enter an order approving and enforcing the plan;

(2) Only such fees and expenses in connection with the plan, and the proceedings incidental thereto, as the Commission may approve on appropriate application made to it, shall be paid by National and Penn; jurisdiction being reserved to determine the reasonableness of all such fees and expenses and all other remunerations incurred or to be incurred by National and Penn in connection with the Plan, the transactions incident thereto and all proceedings on or related thereto; and

(3) Jurisdiction is reserved with respect to the entering of such further orders and the taking of such further action as the Commission may deem necessary or appropriate to effectuate the requirements of section 11(b) of the Act.

It is further ordered, That all steps and transactions involved in the consummation of the plan, including particularly the issuances, transfers, exchanges, distributions, and expenditures hereinafter described and hereinafter set forth are necessary or appropriate to effect a simplification of the National holding company system and are necessary or appropriate to effectuate the provisions of section 11(b) of the Act and are hereby authorized, approved and directed; the shares of stock which are ordered to be issued, exchanged, acquired, transferred and received are specified and itemized as follows:

National will issue and deliver 53,651 common shares of National to Penn stockholders at the rate of 1.45 common shares of National for 1 common share of Penn and in exchange therefor such Penn stockholders will transfer and deliver to National their certificates for Penn common stock aggregating 37,001 shares.

By the Commission.

ORVAL L. DUBOIS, *Secretary.*

[File No. 812-1478]

TOWNSEND CORPORATION OF AMERICA

Notice of Filing of Application

FEBRUARY 15, 1962.

Notice is hereby given that Townsend Corporation of America ("TCA"), 38 Chatham Road, Short Hills, New Jersey, a registered closed end, nondiversified investment company, has filed an application for an order under section 17(b) and section 23(c)(3) of the Investment Company Act of 1940 ("Act") with respect to a proposed transaction whereby it will, pursuant to an agreement, exchange all of its interests in Princeville Research Park Corporation ("Park") and Princeton Pike Corporation ("Pike") for 68,316 shares of TCA common stock held by two individuals ("sellers") who had previously sold TCA its interests in Park and Pike. All interested persons are referred to the application on file with the Commission and summarized below for a complete statement thereof.

TCA owns 80 percent of Park and 100 percent of Pike. The assets of both corporations consist almost solely of unimproved real estate. The stock of Park and Pike was acquired pursuant to an agreement dated May 9, 1960 ("Purchase Agreement"), which provided that the purchase price for the Park and Pike stock would be paid in TCA stock and would be based on the net value of the assets of Park and Pike, the real property being valued at $3,500 per acre and the number of acres being determined by a survey. The TCA stock was valued for this purpose at $12 per share, although the market value was substantially lower. The net value of Park and Pike determined as provided in the Purchase Agreement was tentatively computed at $900,869.08 and, on the basis of the $12 per share valuation set by the Purchase Agreement, the number of shares of common stock of TCA issuable aggregated 75,072 shares. 68,316 shares were delivered by TCA in 1960 and the balance of 6,756 shares was to be delivered in 1961.

The Purchase Agreement further provided that if the highest of—

(i) The net asset value per share of common stock of TCA on the date of the Purchase Agreement (May 9, 1960);

(ii) The net asset value per share of common stock of TCA on the date one year from the date of the closing (June 6, 1961); or

(iii) The market value per share of common stock of TCA on the date of the closing (June 6, 1961)—were less than $12, the number of shares of common stock of TCA deliverable under the Purchase Agreement would be recomputed using the highest of such three values in place of the $12 value assigned to such stock by the Purchase Agreement. The net asset values on May 9, 1960 and June 6, 1961, are not presently ascertainable, but based on the market quotation of $3.00 per share for common stock of TCA on June 30, 1961, the number of additional shares which might have been deliverable pursuant to this term of the Purchase Agreement would be 226,431 shares. TCA's financial statements as of June 30, 1961, reflect a net asset value per TCA share as of June 30, 1961, of $1.19 after giving effect to certain contingent liabilities among them the possible issuance of said 226,431 shares, and TCA's financial statements as of June 30, 1960, included in its semiannual report to stockholders reflect a net asset value per TCA share of $1.75, after contingencies.

A letter agreement entered into subsequent to the execution of the Purchase Agreement provided that under no circumstances should the Purchase Agreement be construed to require TCA to issue shares at less than their net asset value.

TCA registered as an investment company pursuant to the Act on June 19, 1960. On April 24, 1961, this Commission commenced an action against TCA in the United States District Court for the District of New Jersey ("Court") seeking injunctive relief with respect to alleged violations of, and seeking to enforce compliance with, certain sections of the Act. TCA consented to the entry of a final decree enjoining certain violations of the Act, specifying the procedure required for compliance with the Act, and appointing an interim board of directors ("Interim Board").

The application states that at the request of the Interim Board of Directors an appraisal was made in August 1961 of the real property held by Park and Pike which indicated an average per acre value substantially less than the $3,500 per acre value employed in the Purchase Agreement in the determination of the purchase price.

The application further states that after extensive negotiations, the representative of the sellers of the Park and Pike stock agreed to rescind the transaction. The Interim Board, after careful consideration, decided that the interests of TCA and its stockholders would best be served by rescinding the contract and recovering for TCA the stock it had issued for the Park and Pike stock and its subsequent investment in Park of approximately $91,000. TCA and such sellers entered into an agreement dated December 18, 1961 ("the Rescission Agreement"), rescinding the purchase of Park and Pike stock and returning the parties to their original positions. The Rescission Agreement also provides for the eventual repayment to TCA of $91,000 advanced to Park, such repayment to be secured by a pledge of the stock of Park and Pike and a mortgage on the real property held by Park and Pike.

Pursuant to the definition contained in section 2(a)(3) of the Act the sellers are affiliated persons of either or both Park or TCA, and Park and Pike are affiliated persons of TCA. Generally speaking, section 17(a) of the Act prohibits an affiliated person of a registered investment company, or an affiliated person of such a person from purchasing from such registered investment company any security of which the seller is not the issuer unless the Commission by order upon application pursuant to section 17(b) of the Act grants an exemption from section 17(a) of the Act, upon a finding that the terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned; and that the proposed transaction is consistent with the policy of the investment company concerned, and consistent with the general purposes of the Act.

Section 23(c)(3) of the Act prohibits a registered investment company from purchasing its own securities other than on a securities exchange or pursuant to tenders, except under such circumstances as the Commission may permit by order to insure that such purchases are made in a manner or on a basis which does not unfairly discriminate against any holders of the class of securities to be purchased. Since the proposed acquisition by TCA from sellers of the TCA Common Stock does not involve purchase on a securities exchange or pursuant to tenders, such acquisition would be prohibited unless the Commission issues its order permitting it.

The application states that the performance of the Rescission Agreement will benefit all of the holders of shares of common stock of TCA by preventing the possible substantial dilution of their interest in TCA and will eliminate the probability of costly litigation concerning the claim under the Purchase Agreement for additional TCA shares.

Notice is further given that any interested person may, not later than March 5, 1962, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities, and Exchange Commission, Washington 25, D.C. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon TCA. Proof of such service (by affidavit or in case of any attorney-at-law by certificate) should be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the showing contained in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F.R. Doc. 62-1902; Filed, Feb. 26, 1962; 8:46 a.m.]

[File No. 812-1471]

TOWNSEND MANAGEMENT CO.

Notice of Filing of Application

FEBRUARY 15, 1962.

Notice is hereby given that Townsend Management Company ("TMC"), 38 Chatham Road, Short Hills, New Jersey, a registered closed end, nondiversified investment company, has filed an application for an order under section 17(b) and section 23(c)(3) of the Investment Company Act of 1940 ("Act") with respect to a proposed transaction whereby it will exchange all its interest in Fiduciary Counsel, Inc. ("Fiduciary"), a wholly owned subsidiary, for cash of $79,750 and 31,000 shares of its own stock held by a group of individuals ("Buyers"), some of whom are affiliated persons of TMC. All interested persons are referred to the application on file with the Commission and summarized below for a complete statement thereof.

Fiduciary is engaged in the business of acting as an investment adviser for a number of individual clients and is registered as an investment adviser with the Commission. Fiduciary has outstanding 296 shares of capital stock, without par value, all of which 296 shares are owned by TMC. TMC acquired the 296 shares from May 1958 through February 1959, from various individuals, most of whom were officers or executives of Fiduciary.

TMC registered as an investment company pursuant to the Act on June 19, 1960. On April 24, 1961, this Commission commenced an action against TMC in the United States District Court for the District of New Jersey ("Court") seeking injunctive relief with respect to alleged violations of, and seeking to enforce compliance with, certain sections of the Act. TMC consented to the entry of a final decree enjoining certain violations of the Act, specifying the procedure required for compliance with the Act, and appointing an interim board of directors ("Interim Board").

The application states that the Interim Board concluded, after investigation, that it would be in the best interests of TMC and its stockholders for TMC to sell Fiduciary if a fair price could be obtained therefor. The Interim Board was informed by Fiduciary's management that some of Fiduciary's important clients had been disturbed by unfavorable publicity that had attended the Commission's action against Fiduciary's parent, TMC, referred to above, and that the further association of Fiduciary with TMC, notwithstanding the appointment of the Interim Board, might result in the loss of some of Fiduciary's important clients.

Pursuant to the definition contained in section 2(a)(3) of the Act, certain of the Buyers are affiliated persons of either or both Fiduciary or TMC, and Fiduciary is an affiliated person of TMC. Generally speaking, section 17(a) of the Act prohibits an affiliated person (Fiduciary, and some of Buyers) of a registered investment company (TMC), or an affiliated person of such a person (Buyers), from purchasing from such registered company any security (Fiduciary stock) of which the seller (TMC) is not the issuer, unless the Commission by order upon application pursuant to section 17(b) of the Act grants an exemption from section 17(a) of the Act, upon a finding that the terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned; and that the proposed transaction is consistent with the policy of the investment company concerned, and consistent with the general purposes of the Act.

Section 23(c)(3) of the Act prohibits a registered investment company from purchasing its own securities other than on a securities exchange or pursuant to tenders, except under such circumstances as the Commission may permit by order to insure that such purchases are made

in a manner or on a basis which does not unfairly discriminate against any holders of the class of securities to be purchased. Since the proposed purchase by TMC from Buyers of the 31,000 shares of TMC Common Stock does not involve purchase on a securities exchange or pursuant to tenders, such purchase is prohibited unless the Commission issues its order permitting it.

The application states that the terms of the proposed transaction resulted from arms' length negotiations, and that, for the reasons previously cited, it would not have been possible to sell Fiduciary to other interests on terms as favorable as those reached with Buyers. The application also states that the proposed transaction will realize for TMC's stockholders property that might otherwise not be realized, and will assist and expedite the reorganization of TMC and its affiliated companies in compliance with the consent decree entered by the Court.

Substantially all of the TMC stock to be included in the purchase price of Fiduciary was issued by TMC to acquire Fiduciary, at an assigned value in excess of the value used in computing the number of shares of TMC stock required to effect the present purchase. A value of $7.75 per share was used in computing the 31,000 shares of TMC stock to be included in the purchase price for Fiduciary. This per-share figure was thought to be substantially identical with TMC's net asset value as of June 30, 1961, on the basis of unaudited figures, so that the total purchase price to be paid by Buyers, including the cash portion, was deemed to be $320,000. Subsequent adjustments in the valuation of certain investments resulted in a decrease in TMC's net asset value per share to $7.39. The application states that the difference in the purchase price, or $11,160, is not material to TMC's stockholders in view of the demonstrated difficulty of selling the Fiduciary stock on terms considered favorable by the Interim Board.

Notice is further given that any interested person may, not later than March 5, 1962, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D.C. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon TMC. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) should be filed contemporaneously with the request. At any time after said date, as provided by Rule O–5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the showing contained in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F.R. Doc. 62–1903; Filed, Feb. 26, 1962; 8:46 a.m.]

DEPARTMENT OF JUSTICE

Office of Alien Property

DOROTHEA JAHN

Notice of Intention To Return Vested Property

Pursuant to section 32(f) of the Trading With the Enemy Act, as amended, notice is hereby given of intention to return, on or after 30 days from the date of publication hereof, the following property, subject to any increase or decrease resulting from the administration thereof prior to return, and after adequate provision for taxes and conservatory expenses:

Claimant, Claim No., Property, and Location

Dorothea Jahn, Spiegelslustweg 6, Marburg (Lahn), Germany; Claim No. 43031, Vesting Order No. 8704; $330.83 in the Treasury of the United States. One-fifth of all right, title and interest of the issue of Lily Schluechterer Jahn, deceased, in and to the trust created under the will of Sigfried Schluechterer, deceased; The Chase National Bank of New York and Harry H. Neuberger, Co-Trustees, acting under the judicial supervision of the Surrogate's Court, New York County, New York.

Executed at Washington, D.C., on February 19, 1962.

For the Attorney General.

[SEAL] PAUL V. MYRON, *Deputy Director, Office of Alien Property.*

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Area 362]

WYOMING

Declaration of Disaster Area

Whereas, it has been reported that during the month of February, 1962, because of the effects of certain disasters, damage resulted to residences and business property located in Fremont, Big Horn, and Washakie Counties in the State of Wyoming;

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected;

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act.

Now, therefore, as Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 7(b)(1) of the Small Business Act may be received and considered by the Office below indicated from persons or firms whose property, situated in the aforesaid Counties and areas adjacent thereto, suffered damage or destruction resulting from flood and accompanying conditions occurring on or about February 9, 1962.

Office: Small Business Administration Regional Office, Ohrbach Building, Room 1101, 312 East Fifth Street, Los Angeles 13, Calif.

2. Applications for disaster loans under the authority of this Declaration will not be accepted subsequent to August 31, 1962.

Dated: February 14, 1962.

JOHN E. HORNE, *Administrator.*

[F.R. Doc. 62–1905; Filed, Feb. 26, 1962; 8:47 a.m.]

Now, therefore, as Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 7(b)(1) of the Small Business Act may be received and considered by the Office below indicated from persons or firms whose property, situated in the aforesaid Counties and areas adjacent thereto, suffered damage or destruction resulting from flood and accompanying conditions occurring on or about February 11, 1962.

Office: Small Business Administration Regional Office, Railway Exchange Building, 909 17th Street, Denver 2, Colo.

2. Applications for disaster loans under the authority of this Declaration will not be accepted subsequent to August 31, 1962.

Dated: February 14, 1962.

JOHN E. HORNE, *Administrator.*

[F.R. Doc. 62–1904; Filed, Feb. 26, 1962; 8:47 a.m.]

[Declaration of Disaster Area 363]

CALIFORNIA

Declaration of Disaster Area

Whereas, it has been reported that during the month of February, 1962, because of the effects of certain disasters, damage resulted to residences and business property located in Los Angeles and Ventura Counties in the State of California;

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected;

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act.

Now, therefore, as Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 7(b)(1) of the Small Business Act may be received and considered by the Office below indicated from persons or firms whose property, situated in the aforesaid Counties and areas adjacent thereto, suffered damage or destruction resulting from flood and accompanying conditions occurring on or about February 9, 1962.

Office: Small Business Administration Regional Office, Railway Exchange Building, 909 17th Street, Denver 2, Colo.

2. Applications for disaster loans under the authority of this Declaration will not be accepted subsequent to August 31, 1962.

Dated: February 14, 1962.

JOHN E. HORNE, *Administrator.*

FEDERAL REGISTER

WOrth 3-3261

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Office of the Federal Register, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D.C.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D.C.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements vary.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER, or the CODE OF FEDERAL REGULATIONS.

VOLUME 27 NUMBER 40

Washington, Wednesday, February 28, 1962

MAR 1 1962

MAIN READING ROOM

Contents

THE PRESIDENT

Executive Order

Advisory committees; prescribing regulations for formation and use 1875

EXECUTIVE AGENCIES

Agricultural Research Service

RULES AND REGULATIONS:
Liquid, powdered and pressurized household insecticides acceptable for depositing insecticidal chemical residues; interpretation 1878

Agricultural Stabilization and Conservation Service

PROPOSED RULE MAKING:
Milk in certain marketing areas:
Greater Boston, Southeastern New England, Springfield and Worcester 1906
North Texas 1908
Peanuts; proposed determinations re supply of Valencia type peanuts for 1962–63 marketing year 1906

RULES AND REGULATIONS:
Allotment of sugar quota for domestic sugar beet area for six-month period ending June 30, 1962; correction 1880
Milk in certain marketing areas; orders suspending certain provisions:
Michigan Upper Peninsula 1882
Northeastern Wisconsin 1882
Sugarcane; Virgin Islands; wage rates, calendar year 1962 1880

Agriculture Department

See Agricultural Research Service; Agricultural Stabilization and Conservation Service.

Air Force Department

RULES AND REGULATIONS:
Air Force Board for Correction of Military Records 1896
USAF Officer Training School (OTS); miscellaneous amendments 1895

Civil Aeronautics Board

NOTICES:
West Coast Airlines, Inc.; "use it or lose it" investigation and route realignment 1926

Civil Service Commission

RULES AND REGULATIONS:
Labor Department; exceptions from competitive service 1878

Customs Bureau

RULES AND REGULATIONS:
Greece; recognition of admeasurement of foreign vessels 1886
Redocumentation of vessels sold or transferred abroad 1886

Defense Department

See Air Force Department.

Federal Aviation Agency

PROPOSED RULE MAKING:
Designation and alteration of Federal airways and associated control areas; revocation of reporting point 1917
Federal airways, associated control areas and reporting point; revocation of segment 1918

RULES AND REGULATIONS:
Brantly Model B–2 helicopters; airworthiness directive 1885
Control zone alteration; modification of amendment 1885

Federal Communications Commission

NOTICES:
Local television programming in Chicago, Ill.; notice of inquiry 1929
Hearings, etc.:
Clay Service Corp 1929
Dakota Microwave Co 1928
De Seno, Ralph 1928
Hobbs, Frank Van 1929
Worthington, Francis J 1929

Federal Power Commission

NOTICES:
American Louisiana Pipe Line Co. et al; notice of amendment to applications 1930

PROPOSED RULE MAKING:
Pipeline companies; changes in rate schedules and tariffs 1918

Federal Trade Commission

RULES AND REGULATIONS:
E. Gottschalk & Co., Inc., and Levy, Joseph W.; prohibited trade practices 1885

Fish and Wildlife Service

RULES AND REGULATIONS:
Kentucky Woodlands National Wildlife Refuge, Ky.; sport fishing 1900

Food and Drug Administration

RULES AND REGULATIONS:
Certain pesticide chemicals in or on raw agricultural commodities; tolerances for residues 1887
Food additives resulting from contact with containers or equipment and food additives otherwise affecting food; styrene copolymer coatings 1887

Health, Education, and Welfare Department

See Food and Drug Administration.

Indian Affairs Bureau

RULES AND REGULATIONS:
Administration of program of vocational training for adult Indians; financial assistance for trainees 1888

Interior Department

See Fish and Wildlife Service; Indian Affairs Bureau; Land Management Bureau; National Park Service.

Internal Revenue Service

PROPOSED RULE MAKING:
Income tax; taxable years beginning after December 31, 1953 1901

RULES AND REGULATIONS:
Income tax; taxable years beginning after December 31, 1953; miscellaneous amendments 1888

Title 3—THE PRESIDENT

Executive Order 11007

PRESCRIBING REGULATIONS FOR THE FORMATION AND USE OF ADVISORY COMMITTEES

WHEREAS the departments and agencies of the Government frequently make use of advisory committees; and

WHEREAS the information, advice and recommendations obtained through advisory committees are beneficial to the operations of the Government; and

WHEREAS it is desirable to impose uniform standards for the departments and agencies of the Government to follow in forming and using advisory committees in order that such committees shall function at all times in consonance with the antitrust and conflict of interest laws:

NOW, THEREFORE, by virtue of the authority vested in me by the Constitution and statutes, and as President of the United States, it is hereby ordered as follows:

SECTION 1. The regulations prescribed in this order for the formation and use of advisory committees shall govern the departments and agencies of the Government to the extent not inconsistent with specific law.

SEC. 2. As used herein,

(a) The term "advisory committee" means any committee, board, commission, council, conference, panel, task force, or other similar group, or any subcommittee or other subgroup thereof, that is formed by a department or agency of the Government in the interest of obtaining advice or recommendations, or for any other purpose, and that is not composed wholly of officers or employees of the Government. The term also includes any committee, board, commission, council, conference, panel, task force, or other similar group, or any subcommittee of other subgroup thereof, that is not formed by a department or agency, but only during any period when it is being utilized by a department or agency in the same manner as a Government-formed advisory committee.

(b) The term "industry advisory committee" means an advisory committee composed predominantly of members or representatives of a single industry or group of related industries, or of any subdivision of a single industry made on a geographic, service or product basis.

SEC. 3. No advisory committee shall be formed or utilized by any department or agency unless

(a) specifically authorized by law or

(b) specifically determined as a matter of formal record by the head of the department or agency to be in the public interest in connection with the performance of duties imposed on that department or agency by law.

SEC. 4. Unless specifically authorized by law to the contrary, no committee shall be utilized for functions not solely advisory, and determinations of action to be taken with respect to matters upon which an advisory committee advises or recommends shall be made solely by officers or employees of the Government.

SEC. 5. Each industry committee shall be reasonably representative of the group of industries, the single industry, or the geographical, service, or product segment thereof to which it relates, taking into account the size and function of business enterprises in the industry or industries, and their location, affiliation, and competitive status, among other factors. Selection of industry members shall, unless otherwise provided by statute, be limited to individuals actively engaged in operations in the particular industry, industries, or segments concerned, except where the department or agency head deems such limitations would interfere with effective committee operation.

SEC. 6. The meetings of an advisory committee formed or used by a department or agency shall be subject to the following rules:

(a) No meeting shall be held except at the call of, or with the advance approval of, a full-time salaried officer or employee of the department or agency, and with an agenda formulated or approved by such officer or employee.

(b) All meetings shall be under the chairmanship, or conducted in the presence of, a full-time salaried officer or employee of the Government who shall have the authority and be required to adjourn any meeting whenever he considers adjournment to be in the public interest.

(c) For advisory committees other than industry advisory committees, minutes of each meeting shall be kept which shall, as a minimum, contain a record of persons present, a description of matters discussed and conclusions reached, and copies of all reports received, issued, or approved by the committee. The accuracy of all minutes shall be certified to by a full-time salaried officer or employee of the Government present during the proceedings recorded.

(d) A verbatim transcript shall be kept of all proceedings at each meeting of an industry advisory committee, including the names of all persons present, their affiliation, and the capacity in which they attend: *Provided*, that where the head of a department or agency formally determines that a verbatim transcript would interfere with the proper functioning of such a committee or would be impracticable, and that waiver of the requirement of a verbatim transcript is in the public interest, he may authorize in lieu thereof the keeping of minutes which shall, as a minimum, contain a record of persons present, a description of matters discussed and conclusions reached, and copies of all reports received, issued, or approved by the committee. The accuracy of all minutes shall be certified to by a full-time salaried officer or employee of the Government present during the proceedings recorded.

(e) Industry advisory committees shall not be permitted to receive, compile, or discuss data or reports showing the current or projected commercial operations of identified business enterprises.

(f) In the case of advisory committees other than industry advisory committees, the department or agency head may waive compliance with any requirement contained in subsection (a), (b) or (c) of this section when he formally determines that compliance therewith would interfere with the proper functioning of such a committee or would be impracticable, that adequate provisions are otherwise made to insure that committee operation is subject to Government control and purpose, and that waiver of the requirement is in the public interest.

SEC. 7. The head of each department or agency sponsoring an advisory committee may prescribe additional regulations, consistent with the provisions and purposes of this order, to govern the formation or use of such committees, or the appointment of members thereof.

SEC. 8. An advisory committee whose duration is not otherwise fixed by law shall terminate not later than two years from the date of its formation unless the head of the department or agency by which it is utilized determines in writing not more than sixty days prior to the expiration of such two-year period that its continued existence is in the public interest. A like determination by the department or agency head shall be required not more than sixty days prior to the end of each subsequent two-year period to continue the existence of such committee thereafter. For the purpose of this section, the date of formation of an advisory committee in existence on the date of publication of this order shall be deemed to be July 1, 1960, or the actual date of its formation, whichever is later.

SEC. 9. The requirements of this order shall not apply:

(a) to any advisory committee for which Congress by statute has specified the purpose, composition and conduct unless and to the extent such statute authorizes the President to prescribe regulations for the formation or use of such committee;

(b) to any advisory committee composed wholly of representatives of State or local agencies or charitable, religious, educational, civic, social welfare, or other similar nonprofit organizations;

(c) to any local, regional, or national committee whose sole function is the dissemination of information for public agencies, or to any local civic committee whose primary function is that of rendering a public service other than giving advice or making recommendations to the Government.

SEC. 10. (a) Each department and agency utilizing advisory committees shall publish in its annual report, or otherwise publish annually, a list of such committees, including the names and affiliations of their members, a description of the function of each committee and a statement of the dates of its meetings: *Provided*, that the head of the department or agency concerned may waive this requirement where he determines that such annual publication would be unduly costly or impracticable, but shall make such information available, upon request, to the Congress, the President, or the Attorney General.

(b) A copy of each such report shall be furnished to the Attorney General, and all records and files of advisory committees, including agenda, transcripts or notes of meetings, studies, analyses, reports or other data compilations or working papers, made available to or prepared by or for any such advisory committee, shall be made available, upon request by the Attorney General, to his duly authorized representatives, subject to such security restrictions as may be properly imposed on the materials involved.

SEC. 11. This order supersedes the directive of February 2, 1959, entitled "Standards and Procedures for the Utilization of Public Advisory Committees by Government Departments and Agencies," and all provisions of prior Executive orders to the extent they are inconsistent herewith.

JOHN F. KENNEDY

THE WHITE HOUSE,
February 26, 1962.

Chapter I—Civil Service Commission

PART 6—EXCEPTIONS FROM THE COMPETITIVE SERVICE

Department of Labor

Effective upon publication in the FEDERAL REGISTER subparagraph (15) is added to paragraph (a) of § 6.313 as set out below.

§ 6.313 Department of Labor.

(a) *Office of the Secretary.* * * *

(15) One Assistant to the Special Assistant to the Secretary, Office of Legislative Liaison.

(R.S. 1753, sec. 2, 22 Stat. 403, as amended; 5 U.S.C 631, 633)

UNITED STATES CIVIL SERVICE COMMISSION,

[SEAL] MARY V. WENZEL,
Executive Assistant to the Commissioners.

[F.R. Doc. 62-1954; Filed, Feb. 27, 1962; 8:45 a.m.]

Title 7—AGRICULTURE

Chapter III—Agricultural Research Service, Department of Agriculture

[Interpretation 23]

PART 362—REGULATIONS FOR ENFORCEMENT OF FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT

Interpretation With Respect to Liquid, Powdered and Pressurized Household Insecticides Acceptable for Depositing Insecticidal Chemical Residues

Residual insecticides of many different types have been extensively used in homes where children, as well as adults, may be exposed by direct contact with treated surfaces and by breathing the fumes, or where food and food handling surfaces could be contaminated. It is essential that the labeling of these products be as complete and carefully prepared as possible so as to obtain the desired pest control without harmful results to persons or property. The variety of the new pesticides which have been introduced for household use and the extent and variety of the requirements as to their use have raised a number of complex labeling problems. Recognizing the scope of these problems the Department of Agriculture published a proposed interpretation on this subject in the FEDERAL REGISTER for May 18, 1961. No objections to the issuance of such an interpretation were submitted. Therefore pursuant to the authority vested in me by § 362.3 of the regulations (7 CFR 362.3) under the Federal Insecticide, Fungicide and Rodenticide Act (61 Stat. 163; 7 U.S.C. 135–135k), Interpretation 23 with respect to liquid, powdered and pressurized household insecticides acceptable for depositing insecticidal chemical residues is hereby issued as § 362.121 of Part 362, Title 7, Code of Federal Regulations, to read as follows:

§ 362.121 Interpretation with respect to liquid, powdered and pressurized household insecticides acceptable for depositing insecticidal and chemical residues.

(a) *Composition.* These products are ordinarily marketed as oil solutions, emulsions, suspensions, powers or pressurized products, some of which are designed for use in undiluted form by the consumer. In some cases concentrated products requiring various degrees of dilution are marketed. These products usually have a petroleum distillate base, together with such auxiliary solvents as may be necessary to keep the formulation as a solution under conditions of relatively low temperature. Water is sometimes used in the liquid formulations. Auxiliary solvents, such as methylated naphthalenes, methylated aromatic petroleum solvents, methylene chloride and methyl chloroform are frequently used, although the last two named are more common in pressurized products than in liquid formulations. The propellants commonly encountered are known as propellant 11 (trichloromonofluoromethane), propellant 12 (dichlorodifluoromethane), nitrogen, carbon dioxide, nitrous oxide, and certain hydrocarbons, such as propane. Propellant 12 is used alone or in various proportions with propellant 11, methylene chloride or methyl chloroform, together with small amounts of propane. Pressurized products of this class usually contain lower levels of propellants than are commonly encountered in the products discussed in Interpretation 15, as revised (§ 362.113). The present interpretation is not intended to cover products designed primarily as space sprays which are used in such a manner as not to deposit substantial chemical residues on treated surfaces. Moreover, mothproofing treatments of woolens and fabrics for the purpose of impregnating them with a protective chemical residue are excluded from this Interpretation.

(b) *Acceptable ingredients.* The following is a list of chemicals frequently encountered in household type insecticides of this class. The percentage figure given in each case is the maximum that can be accepted for this purpose. An asterisk in connection with the percentage figure indicated that the usage is currently restricted to professional applications by a pest control operator or a public health official. All percentage figures are expressed in terms of weight alone.

Pesticidal chemical and scope of treatment	Maximum allowable concentration (percent)	
	Liquid and pressurized	Powder
"Butonate" O,O-dimethyl 2,2,2, trichloro-1-n-butyryloxyethyl phosphonate—%	2.0	
Dichlore diphenyl trichloroethane—% (DDT) (general treatment)	5.0	*10.0
Dichloro diphenyl dichloroethane—% (TDE) (general treatment)	5.0	10.0
Malathion—%[1] (general treatment)	2.0	5.0
Malathion—%[1] (spot application)	5.0	5.0
"Diazinon" O,O-diethyl O-(2-isopropyl-4-methyl-6-pyrimidinyl) phosphorothioate—% (spot application)	0.5	1.0
(Pest control operators only) (spot application)	*1.0	*1.0
"Perthane" diethyl diphenyl dichloroethane [or 1,2-dichloro-2,2-bis(4-ethylphenyl) ethane]—% (95% of the total amount of technical ingredient present). Related compounds—% (5% of the total amount of technical ingredient present) (spot application)	5.0	10.0
Ronnel—%[2] (general treatment)	2.0	
(spot application)	5.0	
Technical chlordane—%[3] (spot application)	2.0	4.0
Dicapthon—%[4] (spot application)	*1.0	
Dieldrin—%[5] (spot application)	0.5	1.0
"Dilan"[6] (A mixture of 2-nitro-1,1-bis ((4 chlorophenyl)) butane and 2-nitro-1,1-bis ((4 chlorophenyl)) propane)—% (general application)	2.0	
Heptachlor—% (spot application)	0.5	
(Lindane) (gamma isomer of benzene hexachloride from lindane—%) spot application	0.5	1.0
Pyrethrum powder (pyrethrins—%)		1.0
Methoxychlor—%[7] (general application)	5.0	10.0
Sodium fluoride—%		95.0
Toxaphene—% (technical chlorinated camphene) (67–69% chlorine) (spot application)	5.0	10.0
Ryania—% (spot application)		10.0
Silica aerogels (spot application)		
Silica gel—%		99.0
Repellent additives		
"MGK R-11" 2,3,4,5 bis (2butylene) tetrahydrofurfural—% (spot application) (repellent)	5.0	
"MGK R-326" Di-n-propyl isocinchomeronate—% (spot application)	2.0	
"Tabatrex" Dibutyl succinate—% (spot application) (repellent)	5.0	

** An additional specialized usage includes a concentration of 50% of DDT which is restricted to the control of roaches and ants by pest control operators or public health officials only. The dust should be placed only in areas inaccessible to children and pets. Any portion visible after application is completed should be carefully brushed into cracks and crevices or else removed. Such dusts may be applied on surfaces behind shields, panels, operators, stoves and cabinets that are not accessible to animal pets and children. No generalized use in the household would be acceptable. Powders of this type may also be used as a rodenticide against mice.

[1] Malathion (*O,O*-dimethyl dithlophosphate of diethyl mercaptosuccinate).

[2] Ronnel (*O,O*-dimethfyl O-2,4,5 trichlorophenyl phosphorothioate).

[3] Technical chlordane —% with explanatory statement: Equivalent to —% (60% of first percentage) octochloro-4,7-methanotetrahydro indane and —% (40% of first percentage) related compounds.

[4] Dicapthon (*O-O*-dimethyl *O*-(2-chloro-4-nitrophenyl) phosphorothioate).

[5] An explanatory statement is required, reading —% hexachloroepoxyoctahydro-endo, exo-dimethanonaphthalene —% related compounds.

[6] 2-nitro-1,1-bis (p-chlorophenyl)propane —%; 2-nitro-1,1-bis (p-chlorophelyl)butane —% (both active ingredients always present).

[7] Technical methoxychlor —% an explanatory statement is required: Equivalent to —% (90% of the first (percentage) 2,2-bis (p-methoxyphenyl) 1,1,1-trichloroethane and —% (12)% of the first percentage) other isomers and reaction products.

Products covered by this interpretation frequently contain a combination of pesticidal ingredients together with synergized pyrethrins and thiocyanates. These ingredients may be used in the necessary combinations, except that when combinations of phosphates and/or chlorinated hydrocarbons are produced, concentrations of these ingredients should be proportionately reduced. The information set forth in paragraph (c) of Interpretation 15, as revised (§ 362.113(b)) is also applicable to the products covered by this interpretation.

(c) *Ingredient statement.* The information set forth in paragraph (c) of Interpretation 15, as revised (§ 362.113(c)) is equally applicable to the products covered by this interpretation.

(d) *Manner of application.* When general application is specified the residual treatment may be applied to as many areas of the infested premises and to as large a proportion of the available surface as may be considered necessary for effective pest control. When the usage is limited to "spot application" much greater attention should be given to limiting the treatment to those surfaces where the pests have been seen or where they are suspected of hiding. Such treatments would normally be limited to a maximum of 20 percent of the floor and lower wall surfaces including shelving and cabinets.

(e) *Basic insecticidal value.* These products are required to contain enough of the residual insecticidal ingredient so that when they are applied substantial residues of the insecticidal chemical will be deposited on all treated surfaces. The biological evaluation of the effectiveness of these treatments will be considered separately in all cases on the basis of the existing experimental information on the insecticidal value of the chemical or upon such data and practical evidence as can be furnished by the applicant. If new or unusual formulations or claims and directions for use are submitted, it will be necessary to request the submission of sufficient experimental evidence to justify the proposed claims. In any case, it will be necessary for the applicant to submit data to establish the safety of any new or unusual chemical or pesticidal treatment that is proposed. It is the usual practice to consult with the Public Health Service of the Department of Health, Education, and Welfare on such matters.

(f) *Directions for use*—(1) *General.* In all cases the labeling should bear adequate directions for use against all of the pests named in the labeling. These products are commonly recommended for the control of such pests as roaches (water bugs), house flies, mosquitoes, silverfish, spiders, bed bugs, ants, carpet beetles, scorpions, fleas, and brown dog ticks. Many of these formulations are not acceptable for mist spray application in the air and care should be taken to apply the products as relatively coarse wet sprays which will adhere to treated surfaces. This is especially important in the case of pressurized products. Since the habits and life cycles of different pests vary considerably, the directions must, in each case, be adapted to the particular kind of insect or other pest which is causing annoyance and to the type of structure or building in which the product is used. Claims that residual insecticidal value will last for any particular period of time are usually undesirable, due to the variable conditions under which the products are used. It may be stated that the product is a residual insecticide but the labeling should emphasize the need for repeated applications as often as necessary since it is not possible to anticipate all of the conditions of use, types of surfaces to be treated and cleaning operations of treated surfaces.

(2) *Particular insects*—(i) *Flies and mosquitoes.* Directions for use against these pests should provide for thorough treatment of all surfaces where these insects are known to alight or congregate. Emphasis should be placed on spraying or applying powders around doors, windows and porches. In all cases, repeated applications should be specified as often as necessary.

Acceptable chemicals: DDT, dichlorodiphenyl dichloroethane, "Butonate," heptachlor, malathion, "Diazinon," ronnel, chlordane, dicapthon, dieldrin, "Perthane," "Dilan," a mixture of 2-nitro-1,1-bis (4 chlorophenyl) butane and 2-nitro-1,1-bis (4 chlorophenyl) propane, lindane, methoxychlor, "MGK R–326" (repellent), "tabatrex" (repellent), and "MGK R–11" (repellent).

(ii) *Household ants, roaches and silverfish.* The directions for use against these pests should provide for thorough spraying or distribution of the powder into all parts of the room suspected of harboring them. Special attention should be paid to cracks and hidden surfaces around sinks or food storage areas where these insects may be hiding. Thorough treatment around doors and windows is desirable in connection with directions for use against ants. Spraying around baseboards, windows, door frames, bookcases and storage areas is usually desirable in connection with directions for use against silverfish. Repeated applications should be specified in all cases. Silica gels are usually applied at the rate of 2 ounces of the powder per 100 sq. ft. of treated floor area. Liberal applications are needed. Special care should be taken to use all of these products in such a manner that food and food utensils will not be contaminated. If any spray or powder should contaminate cooking utensils, silverware or dishes, they should be thoroughly cleaned.

Acceptable chemicals: DDT, dichlorodiphenyl dichloroethane, "Butonate" (roaches and silverfish only), malathion, sodium fluoride, pyrethrum powder, "Diazinon," ronnel, chlordane, dicapthon, dieldrin, heptachlor, methoxychlor, toxaphene, ryania, Silica gels, "Tabatrex" (repellent), and "MGK R–11" (repellent).

(iii) *Bed bugs.* The directions for use against this pest should provide for thorough spraying of the bed, the springs and the mattress, as well as the baseboards and wall cracks about the bedroom. Repeated applications are usually necessary for good results against this pest. In the case of malathion, the maximum acceptable concentration for this use is a 1 percent spray which in any case is to be applied lightly to the mattress. Chlordane, dicapthon and "Diazinon" are not acceptable for use against this pest. Lindane is not acceptable as a residual insecticide for treatment of beds and mattresses, even though a concentration of 0.1 percent has been accepted as a non-residual insecticide for use against this pest.

Acceptable chemicals: DDT, pyrethrum powder, dichlorodiphenyl dichloroethane, malathion and ronnel 1 percent.

(iv) *Carpet beetles.* The directions for use against these pests should provide for thorough spraying of suitable formulations along baseboards, edges of carpeting, under furniture, under carpeting and rugs and in closets and shelving wherever these insects are seen or suspected. Pressurized products and powders may also be used for this purpose. In all cases, the treatment should be repeated as often as necessary.

Acceptable chemicals: DDT, dichlorodiphenyl dichloroethane, malathion, "Diazinon," chlordane, dieldrin, heptachlor, ronnel, lindane, methoxychlor and "Perthane."

(v) *Fleas and brown dog ticks in buildings.* Directions for use against these pests should provide for liberal applications to floor areas, cracks and crevices, sleeping quarters of animals, behind pictures and wherever presence of these insects may be suspected. Liberal and repeated applications to the infested areas are desirable in all cases. Spot applications are not suitable for the control of fleas. Consequently, such insecticides as lindane and chlordane are not acceptable for use against this pest.

Acceptable chemicals: DDT, dichlorodiphenyl dichloroethane, "Diazinon," ronnel, methoxychlor, malathion 2 percent and Silica gel (fleas only), and chlordane (for brown dog ticks).

(vi) *Spiders and scorpions.* Directions for the control of these pests should provide for thorough wet spraying or dusting around windows, doors and other areas over which these pests may crawl. Pressurized sprays may be used on the same general terms as liquid and powdered products. In all cases, the applications should be repeated as often as necessary.

Acceptable chemicals: DDT, dichlorodiphenyl dichloroethane, malathion, "Diazinon," ronnel (spiders only), chlordane, dieldrin, lindane, methoxychlor, heptachlor (spiders only), and "Butonate" (spiders only).

(vii) *Pantry pests.* Saw-toothed grain beetle, flour beetle, rice weevil, cigarette beetle, drug-store beetle and Indian-meal moth are pests included in this category. While cleanliness and good housekeeping are basic to the prevention of losses by reason of these pests, insecticides may sometimes be carefully used to advantage. Directions to aid in the control of these pests should pro-

vide for the removal of all packages of food and for the treatment of the interior surfaces of the shelves and cupboards with a residual spray. The spray must be allowed to dry before the packages are put back on the shelf. Shelf paper or foil should be used to prevent contact of food or utensils with sprayed surfaces. It should be emphasized that treatment of this kind is of only supplemental value since it does not affect the insects breeding inside the packages. Infested food packages should be destroyed or fumigated.

Acceptable chemicals: DDT, chlordane, lindane, methoxychlor, malathion, ronnel, "Perthane," and "Diazinon."

(g) *Caution and warning statements*—(1) *General.* All economic poisons are required to bear warning or caution statements which are necessary to protect the public from injury and acceptable directions for use must be consistent with these requirements. These cautions and directions are quite variable, depending on the composition of the product and the manner of use which is intended. The detailed precautions especially for operator protection, during use of most of the pesticidal ingredients, are given in Interpretation 18 (§ 362.116). Cautions to protect food and food handling utensils from contamination are often specified and are appropriate in any case. These products should be kept out of the reach of children and pets. Many of these products will stain or discolor wallpaper, textiles, and other finished surfaces or articles. Appropriate label cautions or warnings should be included in all such cases.

(2) *Liquid and powdered insecticides.* In all cases where petroleum distillate or other combustible formulations are involved, warnings against use in the presence of open flame and sparks are required.

(3) *Pressurized products.* Since many of these products contain significant amounts of petroleum distillate, or other combustible substances in the presence of open flames or heated surfaces and since bursting or leakage of contents may occur at high temperatures, all pressurized products (except as specified hereafter) should bear the following warning or its practical equivalent:

WARNING: Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130° F. may cause bursting. Never throw container into fire or incinerator.

Pressurized products which have extreme flammability or explosive hazards will be considered separately and additional precautionary labeling prescribed. Methods for determining the need for such additional precautionary labeling may be obtained from the Director, Pesticides Regulation Division, Agricultural Research Service, U.S. Department of Agriculture, Washington 25, D.C. It is the responsibility of the registrant to provide precautionary labeling which will be adequate to prevent injury to persons using or handling his product.

(h) *Deterioration.* Some of these formulations deteriorate quite rapidly in storage. Also, certain types of packaging tend to accelerate this deterioration. It is the responsibility of the registrant and marketer of the particular pesticide to so formulate, package and market his products that they will always contain the amounts of active ingredients which were represented in the information furnished at the time of registration. If products are known to deteriorate, a date may be placed on the label advising against use after a stipulated period of time. Products which have deteriorated are adulterated and should be withdrawn from the market.

(i) *Unwarranted claims.* These products are not effective against all household insects and claims for effectiveness against insects generally or all insects are unwarranted and should not be made. While these products may have considerable residual insecticidal value when properly applied, it is usually desirable to avoid any specific claim that residual protection will last for any particular length of time. The conditions of use and types of surfaces that may be treated are so diversified that directions for repeated applications as necessary are desirable in all cases. Claims for exterminations are not warranted and should not be made. Products of this type are frequently injurious under some conditions to both man and animal and may contaminate food when improperly used. Therefore, their labels must ordinarily not include any unqualified claim such as "Non-toxic," "Non-poisonous," "Non-injurious" or "Harmless to man and animals." Such products are of no value in disinfecting and will not prevent disease and claims to that effect should not be made.

(j) *Registration.* All applications for registration should include duplicate copies of all labels, circulars or other literature which may be associated with or accompany the product at any time. Complete information concerning the composition of the product should also be furnished with the application. If the product does not conform to a conventional pattern of pesticidal usage against household pests, data should be furnished to demonstrate the practical value of the product for the various pests named in the labeling. Consultation with applicants is solicited at all times in order to eliminate possible misunderstanding.

(k) *Other interpretations.* This interpretation supplements interpretations 7, 15, and 18 as revised (7 CFR 362.105, 362.106, and 362.116).

Effective date. The foregoing interpretation shall be effective upon publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 23d day of February 1962.

JUSTUS C. WARD,
Director,
Pesticides Regulation Division.

Chapter VIII—Agricultural Stabilization and Conservation Service (Sugar), Department of Agriculture

SUBCHAPTER B—SUGAR REQUIREMENTS AND QUOTAS

[Sugar Reg. 813.2]

PART 813—ALLOTMENT OF SUGAR QUOTA

Domestic Sugar Beet Area; for the Six-Month Period Ending June 30, 1962

Correction

In F.R. Doc. 61-12369, appearing at page 12678 of the issue for Friday, December 29, 1961, the words "and the sugar or liquid sugar processor" in § 813.2(b) should be deleted, so that paragraph (b) begins as follows:

(b) *Marketing of sugar beets and molasses.* If sugar beets or molasses derived from sugar beets are sold by a processor but retained and processed by such processor * * *.

SUBCHAPTER H—DETERMINATION OF WAGE RATES

[Sugar Determination 868.14]

PART 868—SUGARCANE; VIRGIN ISLANDS

Wage Rates; Calendar Year 1962

Pursuant to the provisions of section 301(c)(1) of the Sugar Act of 1948, as amended (herein referred to as "act"), after investigation, and consideration of the evidence obtained at the public hearing held in Christiansted, St. Croix, Virgin Islands, on November 17, 1961, the following determination is hereby issued.

§ 868.14 Fair and reasonable wage rates for persons employed in the production, cultivation, or harvesting of sugarcane in the Virgin Islands during the calendar year 1962.

(a) *Requirements.* A producer of sugarcane in the Virgin Islands shall be deemed to have complied with the wage provisions of the act during the calendar year 1962 if all persons employed on the farm in the production, cultivation, or harvesting of sugarcane shall have been paid in accordance with the following:

(1) *Wage rates.* All such persons shall have been paid in full for all such work and shall have been paid wages in cash therefor at rates as agreed upon between the producer and the worker, but after the date of publication of this section in the FEDERAL REGISTER not less than the following:

(i) *Basic time rates.* The basic rate per hour for the first 8 hours of work performed in any 24-hour period shall be as follows:

Class of worker	Basic rate per hour
A—Operators of mechanical loaders	$0.[illegible]
B—Operators of tractors and trucks	.[illegible]
C—Chemical sprayers	.[illegible]
D—All others	.[illegible]

(ii) *Apprentice operators of mechanical loaders and tractors.* For a learner or apprentice the hourly wage rate for Class A work in subdivision (i) of this subparagraph may be reduced by not more than 15 cents per hour, and the hourly rate for tractor operators in Class B of subdivision (i) of this subparagraph may be reduced by not more than 10 cents per hour: *Provided,* That the training period for such workers shall not exceed six work-weeks and: *Provided further,* That the producer shall file with the Caribbean Area Agricultural Stabilization and Conservation Service Office, Santurce, Puerto Rico (herein referred to as Area Office), a certified statement containing the names of all such workers, the hourly wage rate paid to each, and the period each was employed as a learner or as an apprentice.

(iii) *Handicapped workers.* For an individual whose productive capacity is impaired by age or physical or mental deficiency, the hourly wage rates provided under subdivision (i) of this subparagraph may be decreased by not more than one-third: *Provided,* That the producer shall file with the Area Office, a certified statement containing the names of all such workers, the hourly wage rates paid to each, and the nature of the handicap of each such worker.

(iv) *Overtime.* Persons employed in excess of 8 hours in any 24-hour period or in excess of 40 hours in any one week shall be paid for the overtime work at a rate not less than one and one-half times the applicable hourly rate provided in subdivisions (i), (ii), and (iii) of this subparagraph: *Provided,* That this provision shall be inapplicable to workers who are employed under extraordinary emergencies as defined in applicable Municipal or Territorial laws or regulations.

(v) *Piecework rates.* If work is performed on a piecework basis, the rate shall be as agreed upon between the producer and the worker: *Provided,* That the hourly rate of earnings for each worker employed on piecework during each pay period (such pay period not to be in excess of two weeks) shall average for the time involved not less than the applicable hourly rate provided under subdivisions (i), (ii), (iii), and (iv) of this subparagraph.

(2) *Compensable working time.* For work performed under subparagraph (1) of this paragraph, compensable working time includes all time which the worker spends in the performance of his duties except time taken out for meals during the work day. Compensable working time commences at the time the worker is required to start work in the field and ends upon completion of work in the field. However, if the producer requires the operator of mechanical equipment, driver of animals, or any other class of worker to report to a place other than the field, such as an assembly point, stable, tractor shed, etc., located on the farm, the time spent in transit from such place to the field and from the field to such place is compensable working time. Any time spent in performing work directly related to the principal work performed by the worker such as servicing equipment, is compensable working time. Time of the worker while being transported from a central recruiting point or labor camp to the farm is not compensable working time.

(b) *Proof of compliance.* The producer shall, upon request, furnish the Area Office acceptable and adequate proof which satisfies such office that all workers have been paid in accordance with the requirements of this section.

(c) *Subterfuge.* The producer shall not reduce the wage rates to workers below those determined in accordance with the requirements of this section through any subterfuge or device whatsoever.

(d) *Claim for unpaid wages.* Any person who believes he has not been paid in accordance with this section may file a wage claim with the Area Office against the producer on whose farm the work was performed. Detailed instructions and wage claim forms may be obtained by writing to the Caribbean Area Agricultural Stabilization and Conservation Service Office, Santurce, Puerto Rico. Such claim must be filed within two years from the date the work with respect to which the claim is made was performed. Upon receipt of a wage claim the Area Office shall thereupon notify the producer against whom the claim is made concerning the representation made by the worker. The Area Office shall make such investigation as it deems necessary and shall notify the producer and worker in writing of its recommendations for settlement of the claim. If the recommendation of the Area Office is not acceptable, either party may file an appeal with the Director of the Sugar Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington 25, D.C. All such appeals shall be filed within 15 days after receipt of the recommended settlement from the Area Office, otherwise such recommended settlement will be applied in making payments under the act. If a claim is appealed to the Director of the Sugar Division, his decision shall be binding on all parties insofar as payment under the act is concerned.

Statement of bases and considerations—(a) *General.* The foregoing determination establishes the minimum wage rates to be paid for work performed by persons employed on the farm in the production, cultivation, or harvesting of sugarcane during the calendar year 1962, as one of the conditions with which producers must comply to be eligible for payments under the act.

(b) *Requirements of the act and standards employed.* Section 301(c)(1) of the act requires that all persons employed on the farm in the production, cultivation, or harvesting of sugarcane with respect to which an application for payment is made shall have been paid in full for all such work, and shall have been paid wages therefor at rates not less than those that may be determined by the Secretary to be fair and reasonable after investigation and due notice and opportunity for public hearing; and in making such determinations the Secretary shall take into consideration the standards therefor formerly established by him under the Agricultural Adjustment Act, as amended (i.e., cost of living, prices of sugar and by-products, income from sugarcane, and cost of production), and the differences in conditions among the various producing areas.

(c) *1962 Wage determination.* This determination continues the provisions of the 1961 determination.

A public hearing was held in Christiansted, St. Croix, Virgin Islands, on November 17, 1961, at which interested persons were afforded the opportunity to testify with respect to fair and reasonable wage rates for the calendar year 1962. A representative of the Virgin Islands Corporation, which is owned by the Federal Government and is the largest producer of sugarcane in the Virgin Islands, recommended that the provisions of the 1961 determination be continued unchanged in 1962. The witness stated that 1961 crop sugarcane production was the highest on record as a result of extremely favorable growing conditions throughout the calendar year 1960; that in spite of heavy yields of sugarcane it was impossible to keep the mill adequately supplied with sugarcane for grinding because field harvesting operations were put on a 40-hour week basis; that labor from the British West Indies again was used for harvesting and cultivation work; and that the shortage of local agricultural labor is becoming an ever increasing problem. The witness further testified that the Corporation paid minimum wages of 50 cents an hour in accordance with the requirements of minimum wage legislation enacted by the Virgin Islands Legislature and had paid overtime for hours worked in excess of 40 per week; and that a very high percentage of workers earned considerably more than the minimum rate inasmuch as most production operations, particularly harvesting of sugarcane, were performed on a piecework basis. No other testimony was offered at the hearing.

Consideration has been given to the testimony presented at the hearing, to the economic position of sugarcane producers, and to other pertinent factors. The returns, costs and profits for the sugarcane producing operations of the Corporation and independent producers, obtained by field study in recent years, have been recast on terms of prospective price and production conditions for the 1962 crop. Analysis of these data indicate that when weather and growing conditions are favorable the production of sugarcane is profitable. Present prospects for the crop to be harvested in 1962 indicate yields will be substantially below the favorable yields of the 1961 crop because of inadequate rainfall during the recent growing season.

This determination continues the requirements of the 1961 determination which adopted the minimum wage and hour provisions of Act No. 627 of the Third Legislature of the Virgin Islands. The wage rates for semi-skilled and skilled workers are the same as the rates reported generally paid for these classes of workers in the Virgin Islands.

The wage provisions of the Sugar Act require, as a condition for payment, that producers shall have paid workers in full for all work performed at rates not less than those established by the Secretary. This requirement of the Sugar Act for payment in full is interpreted to mean that where local laws require the producer to pay wages at rates higher than the minimums established by the Secretary, the producer must pay such higher rates to comply with the wage provisions of the act.

After consideration of the pertinent factors involved, the rates established in this determination are deemed to be fair and reasonable.

Accordingly, I hereby find and conclude that the foregoing wage determination will effectuate the wage provisions of the Sugar Act of 1948, as amended.

(Sec. 403, 61 Stat. 932; 7 U.S.C. Sup. 1153. Interprets or applies sec. 301, 61 Stat. 929, as amended; 7 U.S.C. sup. 1131)

Signed at Washington, D.C., on February 23, 1962.

ORVILLE L. FREEMAN,
Secretary.

Chapter X—Agricultural Stabilization and Conservation Service (Marketing Agreements and Orders), Department of Agriculture

[Milk Order No. 44]

PART 1044—MILK IN THE MICHIGAN UPPER PENINSULA MARKETING AREA

Order Suspending Certain Provision

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Michigan Upper Peninsula marketing area (7 CFR Part 1044), it is hereby found and determined that:

(a) The following provision of the order, no longer tends to effectuate the declared policy of the Act: In § 1044.51, the phrase "Through November 1961".

(b) Notice of proposed rule making, public procedure thereon, and 30 days notice of effective date hereof are impractical, unnecessary and contrary to the public interest in that:

(1) This suspension order does not require of persons affected substantial or extensive preparation prior to the effective date.

(2) This suspension order is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area.

(3) This suspension action is based on evidence presented at a public hearing held in Marinette, Wisconsin on November 7–9, 1961. A request for suspension was made at the hearing by producer associations representing the majority of producers supplying the market and was not opposed by any interested party.

(4) The suspension will maintain the Class I pricing provisions which otherwise would expire February 28, 1962. A recommended decision containing proposed amendments to the present Class I price provisions was issued by the Assistant Secretary on February 7, 1962 (27 F.R. 1280). There is not sufficient time prior to the expiration date of the Class I pricing provisions to permit consideration of exceptions to the recommended decision, preparation and issuance of a final decision and an amending order.

Therefore, good cause exists for making this order effective upon publication in the FEDERAL REGISTER.

It is therefore ordered, That the aforesaid provision of the order is hereby suspended through April 30, 1962.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: Upon publication in the FEDERAL REGISTER.

Signed at Washington, D.C. on February 23, 1962.

JOHN P. DUNCAN, JR.,
Assistant Secretary.

[F.R. Doc. 62-1995; Filed, Feb. 27, 1962; 8:49 a.m.]

[Milk Order No. 45]

PART 1045—MILK IN NORTHEASTERN WISCONSIN MARKETING AREA

Order Suspending Certain Provision

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Northeastern Wisconsin marketing area (7 CFR Part 1045), it is hereby found and determined that:

(a) The following provision of the order, no longer tends to effectuate the declared policy of the Act: In § 1045.51 the phrase "during the period through November 1961."

(b) Notice of proposed rule making, public procedure thereon, and 30 days notice of effective date hereof are impractical, unnecessary and contrary to the public interest in that:

(1) This suspension order does not require of persons affected substantial or extensive preparation prior to the effective date.

(2) This suspension order is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area.

(3) This suspension action is based on evidence presented at a public hearing held in Marinette, Wisconsin on November 7–9, 1961. A request for suspension was made at the hearing by producer associations representing the majority of producers supplying the market and was not opposed by any interested party.

(4) The suspension will maintain the Class I pricing provisions which otherwise would expire February 28, 1962. A recommended decision containing proposed amendments to the present Class I price provisions was issued by the Assistant Secretary on February 7, 1962 (27 F.R. 1280). There is not sufficient time prior to the expiration date of the Class I pricing provisions to permit consideration of exceptions to the recommended decision, preparation and issuance of a final decision and an amending order.

Therefore, good cause exists for making this order effective upon publication in the FEDERAL REGISTER.

It is therfore ordered, That the aforesaid provision of the order is hereby suspended through April 30, 1962.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: Upon publication in the FEDERAL REGISTER.

Signed at Washington, D.C. on February 23, 1962.

JOHN P. DUNCAN, JR.,
Assistant Secretary.

[F.R. Doc. 62-1996; Filed, Feb. 27, 1962; 8:49 a.m.]

Title 13—BUSINESS CREDIT AND ASSISTANCE

Chapter I—Small Business Administration

[Revision 1]

PART 123—DISASTER LOANS

The Small Business Administration Disaster Loan Regulation (23 F.R. 1000) is hereby revised by deleting Part 123 in its entirety and substituting the following in lieu thereof:

Sec.
123.7 Statutory provisions.
123.7–1 General.
123.7–2 Eligibility.
123.7–3 Types of disaster loans.
123.7–4 Disaster Participation Agreement Program.
123.7–5 Purposes of loans.
123.7–6 How to apply.
123.7–7 Where to apply.
123.7–8 Amount of loan.
123.7–9 Collateral.
123.7–10 Interest rate.
123.7–11 Repayment.
123.7–12 Step-by-step procedure for disaster loan applicant.
123.7–13 Cooperation with American Red Cross.
123.7–14 Obtaining loan funds.
123.7–15 Administration of loans.
123.7–16 Extension of RFC loans.

AUTHORITY: §§ 123.7 to 123.7–16 issued under sec. 5, Public Law 85–536.

§ 123.7 Statutory provisions.

SEC. 7. (a) • • •

(b) The Administration also is empowered—

(1) To make such loans (either directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred basis) as the Administration may determine to be necessary or appropriate because of floods or other catastrophes; and

(2) To make such loans (either directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred basis) as the Administration may determine to be necessary or appropriate to any small-business concern located in an area affected by a drought or excessive rainfall, if the Administration determines that the small-business concern has suffered a substantial economic injury as a result of such drought or excessive rainfall and the President has determined under the Act entitled "An Act to authorize Federal assistance to States and local governments in major disasters, and for other purposes," approved September 30, 1950, as amended (42 U.S.C., secs. 1855–1855g), that such drought or excessive rainfall is a major disaster, or the Secretary of Agriculture has found under the Act entitled "An Act to abolish the Regional Agricultural Credit Corporation of Washington, District of Columbia, and transfer its functions to the Secretary of Agriculture, to authorize the Secretary of Agriculture to make disaster loans, and for other purposes", approved April 6, 1949, as amended (12 U.S.C., Secs. 1148a–1—1148a–3), that such drought or excessive rainfall constitutes a production or economic disaster in such area; and

(3) To make such loans (either directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred basis) as the Administration may determine to be necessary or appropriate to assist any small-business concern in reestablishing its business, if the Administration determines that such concern has suffered substantial economic injury as a result of its displacement by a federally aided urban renewal or highway construction program or by any other construction conducted by or with funds provided by the Federal Government.

No loan under this subsection, including renewals and extensions thereof, may be made for a period or periods exceeding twenty years. The interest rate on the Administration's share of any loan made under this subsection shall not exceed 3 per centum per annum. In agreements to participate in loans on a deferred basis under this subsection, such participation by the Administration shall not be in excess of 90 per centum of the balance of the loan outstanding at the time of disbursement, except that in the case of a loan made pursuant to paragraph (3), the rate of interest on the Administration's share of such loan shall not be more than the higher of (A) 2¾ per centum per annum; or (B) the average annual interest rate on all interest-bearing obligations of the United States then forming a part of the public debt as computed at the end of the fiscal year next preceding the date of the loan and adjusted to the nearest one-eighth of 1 per centum, plus one-quarter of 1 per centum per annum.

(c) The Administration may further extend the maturity of or renew any loan made pursuant to this section, or any loan transferred to the Administration pursuant to Reorganization Plan Numbered 2 of 1954, or Reorganization Plan Numbered 1 of 1957, for additional periods not to exceed ten years beyond the period stated therein, if such extension or renewal will aid in the orderly liquidation of such loan.

§ 123.7–1 General.

(a) SBA is authorized to make loans to assist victims of floods and other catastrophes in rehabilitating or replacing damaged or lost physical property.

(b) SBA is authorized also to make loans to alleviate substantial economic injury suffered by small-businesses located in drought or execessive rainfall areas and those displaced as a result of federally-aided construction programs.

§ 123.7–2 Eligibility.

(a) Under the physical damage disaster loan, individuals, business concerns (including corporations, partnerships, cooperatives or other business enterprises), churches, charitable institutions, and other non-profit organizations are eligible to be considered for SBA disaster loans: *Provided*, (1) They have suffered tangible property loss as a result of flood or other catastrophe, (2) SBA has declared the affected area a disaster area for purpose of financial assistance, and (3) a formal Declaration of Disaster has been published in the FEDERAL REGISTER.

(b) Loans will not be made to repair or replace damaged or destroyed summer or winter cottages, camps, lodges or other residential property occupied by the owner principally for recreation or relaxation. Where property is rental property constituting an important source of income for the owner, a rehabilitation loan will be considered.

(c) Under the economic injury disaster loan program, any small-business (see § 121.3–5 of this chapter for size determination of small-business) concern is eligible for consideration: *Provided*, (1) It is located in an area which the President or Secretary of Agriculture has declared a major disaster area because of drought or excessive rainfall, or has been displaced by a construction program conducted by or with funds provided by the Federal Government, and (2) It can show substantial economic injury resulting from the drought, excessive rainfall or physical displacement.

(d) Farmers, stockmen and others engaged primarily in an agricultural activity are not eligible for disaster loans.

§ 123.7–3 Types of disaster loans.

(a) Disaster loans may be jointly made by SBA and banks or other private lending institutions on a participation basis, or may be direct loans made by SBA alone.

(b) The participating institution may participate on either a deferred or immediate basis.

(1) In a deferred participation, the bank or private lending institution makes the entire loan and SBA agrees to purchase a fixed percentage, not exceeding 90 percent, of the outstanding balance of the loan at any time within a stated period.

(2) In an immediate participation loan either SBA or the lending institution makes the loan and the other party purchases an agreed percentage of the loan at the time of disbursement.

(c) Where SBA's participation in a loan is on a deferred basis, SBA charges the bank a fee of ¼ of 1 percent per annum on the outstanding balance of SBA's share of the loan. However, where the bank's share of the loan is at an interest rate not in excess of 3 percent per annum, SBA will charge no fee for its participation.

§ 123.7–4 Disaster Participation Agreement Program.

(a) When a disaster (physical damage) of a widespread nature occurs and where considerable destruction is involved, all banks in the affected area are given the opportunity to enter into the Small Business Disaster Participation Agreement Program.

(b) Under this program, the banks, using SBA form applications (filed in triplicate) process and disburse the loans without clearance through SBA except as to clearance for SBA statutory and policy requirements. These loans are all on a deferred participation basis.

(c) In the case of loans of $20,000 and under, the share of the loan which SBA may be required to purchase shall not exceed 90 percent of the balance outstanding at the time of purchase. In the case of loans in excess of $20,000 but not more than $100,000, the share of the loan which SBA may be required to purchase shall not exceed 75 percent. Loans in excess of $100,000 are not subject to this Disaster Participation Agreement Program.

(d) The general requirements with regard to these loans are the same as if they were made by SBA as direct disaster loans.

§ 123.7–5 Purposes of loans.

(a) The purpose of the physical damage disaster loan is to restore a victim's home or business property as nearly as possible to predisaster condition. If it is necessary or desirable to construct a new home or new business facilities on a different site—for example, on higher ground because of possible future flood damage—the loan may be used for that purpose. However, the loan is limited to the estimated cost of restoring or replacing the damaged or destroyed property. Funds may also be used to replace destroyed inventory.

(b) A loan to an individual may be used to repair or replace damaged furniture and other household belongings or personal effects.

(c) The purpose of the economic injury disaster loan to small businesses is solely to provide relief from substantial economic injury sustained as a result of drought, excessive rainfall, or displacement by a federally-aided project.

(1) Loans occasioned by economic injury due to drought or excessive rainful may be used for working capital, to replenish inventories, and to pay financial obligations (except bank loans) which the borrower would have been able to pay had it not been for a loss of revenue resulting from the drought or excessive rainfall in the area.

(2) Displaced business disaster loans may be used to provide: (i) Working capital necessary to carry the concern until resumption of normal operations or if relocation is in the same general area, sufficient working capital to carry the business during a reasonable period of the adjustment; (ii) replacement costs to owners of realty or improvements thereon less amounts received for indemnification of property previously located in the project area; (iii) purchase of machinery and equipment to upgrade the business in a new location where such upgrading is necessary; (iv) increases in the costs of fixed charges, such as rents, insurance, utility bills, for a reasonable period of time, and (v) for such other purposes deemed necessary and appropriate by SBA.

(3) Funds may not be provided to purchase realty or improvements thereon by displaced businesses which were lessees prior to their displacement, unless as lessees they substantially had obligations and rights of ownership.

(4) There is no dollar limitation to the amount of loan which may be authorized, but the loan shall not exceed

SBA's estimate of the cost necessary to reestablish the displaced business in its new area.

§ 123.7–6 How to apply.

(a) Applications for physical-damage disaster loans are made on SBA Form 5B for loans up to $2,000. SBA Form 5C is used for loans over $2,000 for homes. SBA Form 5 is used for loans between $2,000 and $100,000 for businesses. SBA Form 4 with instruction sheet SBA Form 4A is used for loans over $100,000 for businesses.

(b) Applications for economic injury disaster loans are made on SBA Form 6B for loans up to $12,000, and on SBA Form 4 with instruction sheet SBA Form 4A for loans over $12,000.

§ 123.7–7 Where to apply.

Applications (in duplicate) may be filed with the Regional, Branch, or Disaster Field Office if one has been established, in the area serving the disaster area. If a bank is participating, three copies of the application should be filed with the bank, the bank to send two copies to the SBA office. If a Disaster Field Office has been established, applications generally will be filed and processed there.

§ 123.7–8 Amount of loan.

(a) There is no statutory limitation on the amount of a disaster loan. However, no loan may be authorized for more than the actual physical or economic loss suffered as a result of the disaster.

(b) In physical damage disaster loans, all direct and indirect costs attributable to restoring, rehabilitating, or replacing damaged or destroyed property will be considered by SBA in determining the amount of loan. The amount of money recovered from insurance or obtained from other relief sources, such as the American Red Cross, shall be deducted from the amount of the loss for which an SBA loan may be made. Sums paid to a disaster victim subsequent to his filing an application by insurance companies representing the indemnification of loss in whole or in part for which the disaster victim is requesting SBA financial assistance shall be paid by the borrower to the SBA for the reduction of his loan.

§ 123.7–9 Collateral.

(a) The Small Business Act, as amended, contains no specific requirements with respect to collateral as security for a disaster loan, nor has SBA established any firm rule in regard to collateral. However, SBA may require applicants to pledge whatever collateral they can furnish. SBA will give consideration to the moral risk involved and to evidence showing a reasonable prospect that the loan will be repaid.

(b) Evaluation of collateral. In disaster loan cases, the same procedure will be used in evaluation of collateral for such loans as used for business loans, keeping in mind the urgency and emergency incident to a disaster loan.

§ 123.7–10 Interest rate.

(a) The rate of interest on the Administration's share of disaster loans (except loans made to displaced small businesses) shall be at the rate of 3 per centum per annum. A participating institution's interest rate on its share of a disaster loan shall be at the rate of 3 per centum per annum where the loan is for the principal purpose of repairing or constructing residential property. Where the loan proceeds will be used principally for other purposes, the interest rate on the participating institution's share of a loan shall be at a rate determined by the SBA and the participating institution to be reasonable.

(b) The rate of interest on the Administration's share of loans made to displaced small businesses shall not be more than the higher of (1) 2¾ per centum per annum; or (2) the average annual interest rate on all interest-bearing obligations of the United States then forming a part of the public debt as computed at the end of the fiscal year next preceding the date of the loan and adjusted to the nearest one-eighth of 1 per centum, plus one-quarter of 1 per centum per annum.

§ 123.7–11 Repayment.

(a) Generally, disaster loans shall be repaid in monthly installments beginning not later than five months from the date of the note. The final maturity of the loan will be geared to the borrower's ability to pay but may not exceed the statutory limitation of twenty years.

(b) Except in connection with loans to borrowers whose income is received on an annual or seasonal basis, all loans shall be payable in equal monthly installments which will include principal and interest.

(c) Displaced business disaster loans may have more liberal repayment terms if circumstances indicate the need, including (1) a moratorium on principal payments (not interest) not exceeding the twelve months which immediately follow disbursement; (2) smaller amortization payments during the first few years, increasing in later years; or (3) any other reasonable terms to fit the applicant's individual circumstances.

§ 123.7–12 Step-by-step procedure for disaster loan applicant.

(a) A prospective applicant for an SBA physical type disaster loan shall:

(1) Make a list of his damaged, destroyed or lost property showing in as much detail as possible the extent of damage or loss, and, if possible, original cost of the property.

(2) Obtain from a reliable contractor, supplier or repairman, as appropriate, a signed estimate (in duplicate) of the cost of repairing damaged property or of replacing property which has been lost or damaged beyond repair.

(3) Make an overall estimate of his losses.

(4) Prepare a list of both his debts and assets and a financial statement.

(5) If the proposed loan is to rehabilitate his business, prepare a record of his business earnings and expenditures for the three years preceding and make a profit and loss statement.

(6) Obtain a disaster loan application form from a local bank or the nearest SBA office.

(b) A prospective applicant for a drought or excessive rainfall disaster loan shall:

(1) Furnish a statement of the extent to which his business has been injured by the drought or excessive rainfall conditions.

(2) For purposes of comparison, furnish financial and operating statements covering the current period and a 12-month period of normal operations prior to the drought or excessive rainfall.

(3) List any accounts and notes receivable which are delinquent due to drought or excessive rainfall conditions.

(4) Explain fully the reasons for any abnormally large and burdensome inventories.

(5) List all trade and other payables which are delinquent due to the drought or excessive rainfall, as well as current accruals.

(6) Point out any adopted or planned economies in operation designed to reduce costs of doing a lessened volume of business during the period of drought or excessive rainfall.

(7) Discuss with his bank, after he has completed his loan application and prepared the supporting material, the possibility of obtaining a bank loan or a bank-SBA participation loan. If the bank will join with SBA in a participation loan, the bank will accept and process the loan application and forward it to SBA with a request for a participation agreement. If the bank will not join in a loan, and the applicant then wishes to apply to SBA for a direct loan, the bank usually will accept the loan application on behalf of SBA. Or, if he wishes, the applicant may file his application for a direct loan with the nearest SBA office.

(c) A prospective applicant for a displaced business disaster loan shall:

(1) Furnish financial and operating statements for the current year to date and for the past two previous fiscal or calendar years.

(2) Furnish figures on actual or contemplated reduction or loss of income and profits and estimate of period of time income and profits will be reduced.

(3) List all trade and other payables which are delinquent.

(4) List any additional or replacement equipment that will be required to reasonably upgrade operations in new location, with allowances or any other recoveries from disposal or trade-in of existing equipment.

(5) Advise if additional inventories will be required or if different grades of items must be carried to meet demands of new location and effect on working capital position.

(6) Furnish projection of sales, normal percentage of profits, and fixed expenses, for period of approximately 2 years following relocation in order to establish reasonable ability to repay loan.

(7) Make a list of collateral to be offered as security for repayment of the loan, showing in detail any existing obligations or liens against same.

(8) Discuss with his bank, after he has prepared the application and supporting material, the possibility of obtaining a bank loan satisfactory for

...or a bank-SBA participation ... If the bank will not participate, ... application should be filed for a ... loan with the nearest SBA field ...

§ 123.7–13 Cooperation with American Red Cross.

In its physical damage program of ...sistance to disaster victims, SBA ...intains close coordination with the ...erican Red Cross. In many cases, ...abilitation assistance is given jointly ...y the Red Cross and SBA with part of ...e applicant's losses being covered by ...grant from the Red Cross and part by ...loan from SBA.

§ 123.7–14 Obtaining loan funds.

(a) Once a disaster loan has been approved by SBA, the borrower may obtain the loan funds upon compliance with the conditions of SBA's loan authorization.

(b) If the approved loan is of the bank-SBA participation type, the participating bank will notify the borrower of the loan approval, terms and conditions, and arrange with him for actual closing of the loan.

(c) If the loan is a direct loan involving no bank participation, the borrower will be notified by SBA of the loan approval, terms and conditions.

§ 123.7–15 Administration of loans.

Participation loans which are closed by the bank will be administered by the bank, and participation loans or direct loans closed by SBA will be administered by SBA.

§ 123.7–16 Extension of RFC loans.

Actions taken by SBA pursuant to the authority of section 7(c) of the Small Business Act, as amended, are limited to such periods of time as appear necessary to avoid the forced liquidation of loans. Generally, a sequence of short extensions will be granted rather than one lengthy one. Extensions are only granted under this section when it appears that no other course of liquidation will result in a greater and earlier recovery of the indebtedness.

Dated: February 7, 1962.

JOHN E. HORNE,
Administrator.

Title 14—AERONAUTICS AND SPACE

Chapter III—Federal Aviation Agency

SUBCHAPTER C—AIRCRAFT REGULATIONS

[Reg. Docket No. 1062; Amdt. 402]

PART 507—AIRWORTHINESS DIRECTIVES

Brantly Model B–2 Helicopters

Investigation of reported fuel leakage around the engine driven fuel pumps of Brantly B–2 helicopters revealed failure of the seals due to excessively high temperatures in the engine compartment. Therefore, an airworthiness directive is considered necessary to require replacement of the present seals with high temperature seals.

As a situation exists which demands immediate action in the interest of safety, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective upon publication in the FEDERAL REGISTER.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (25 F.R. 6489), § 507.10(a) of Part 507 (14 CFR Part 507), is hereby amended by adding the following new airworthiness directive:

BRANTLY. Applies to all Model B–2 helicopters with serial numbers prior to 180.

Compliance required within the next 25 hours' time in service after the effective date of this directive.

To preclude failure of the seals in the engine driven fuel pump due to excessively high temperature conditions in the engine compartment, modify the engine driven fuel pump, Lear-Romec Model RD7790D3, to incorporate high temperature seals in accordance with Brantly Service Bulletin No. 16 and Lear-Romec Service Bulletin No. 3.

Reidentify modified units by revising the pump nameplate as follows:

(a) Add suffix "–3" to the pump serial number.

(b) Change pump model number to "RG7790G".

(Brantly Service Bulletin No. 16 and Lear-Romec Service Bulletin No. 3 both cover this same subject.)

This directive shall become effective February 28, 1962.

(Sec. 313(a), 601, 603; 72 Stat. 752, 775, 776; 49 U.S.C. 1354(a), 1421, 1423)

Issued in Washington, D.C., on February 21, 1962.

G. S. MOORE,
Acting Director,
Flight Standards Service.

[F.R. Doc. 62–1957; Filed, Feb. 27, 1962; 8:45 a.m.]

SUBCHAPTER E—AIR NAVIGATION REGULATIONS

[Airspace Docket No. 61–WA–207]

PART 601—DESIGNATION OF CONTROLLED AIRSPACE, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS, AND POSITIVE CONTROL AREAS

Alteration of Control Zone; Modification of Amendment

On January 23, 1962, there was published in the FEDERAL REGISTER (27 F.R. 653) an amendment to Part 601 of the regulations of the Administrator which altered the Fort Myers, Fla., control zone.

Subsequent to publication of the amendment, it has been brought to the attention of the Administrator that the geographical coordinates for Page Field were incorrectly stated in the description of the Fort Myers control zone. Therefore, action is taken herein to reflect the correct geographical location of Page Field.

Since this amendment imposes no additional burden on any person, the effective date of the rule as initially adopted may be retained.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 12562), effective immediately, Airspace Docket No. 61–WA–207 (27 F.R. 653) is hereby modified as follows:

In the description of the Fort Myers, Fla., control zone "Page Field (latitude 26°35'19" N., longitude 81°52'01" W.)," is deleted and "Page Field (latitude 26°35'10" N., longitude 81°51'50" W.)," is substituted therefor:

(Sec. 307(a), 72 Stat. 749; 49 U.S.C. 1348)

Issued in Washington, D.C., on February 20, 1962.

D. D. THOMAS,
Director, Air Traffic Service.

[F.R. Doc. 62–1958; Filed, Feb. 27, 1962; 8:45 a.m.]

Title 16—COMMERCIAL PRACTICES

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 8, 65 Stat. 179; 15 U.S.C. 45, 69f) [Cease and desist order, E. Gottschalk & Co., Inc., et al., Fresno, Calif., Docket 8301, Oct. 24, 1961]

In the Matter of E. Gottschalk & Co., Inc., a Corporation, and Joseph W. Levy, Individually and as an Officer of Said Corporation

Consent order requiring a Fresno, Calif., furrier to cease violating the Fur Products Labeling Act by using the word "blended" improperly on labels on fur products; by representing falsely on invoices that certain mink was from the Aleutian Islands; by advertising in newspapers which failed to disclose the names of animals producing the fur in fur products, falsely represented the volume of merchandise offered for sale to be $200,000 worth of precious furs when it was substantially less, and represented falsely that savings could be effected in its "January Fur Sale"; by failing to

keep adequate records as a basis for price and value claims; and by failing in other respects to comply with labeling and invoicing requirements.

The order to cease and desist is as follows:

It is ordered, That E. Gottschalk & Co., Inc., a corporation and its officers, and Joseph W. Levy, individually and as an officer of said corporation, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction into commerce, or the sale, advertising, or offering for sale in commerce, or the transportation or distribution in commerce of fur products, or in connection with the sale, advertising, offering for sale, transportation, or distribution of fur products which are made in whole or in part of fur which has been shipped and received in commerce, as "commerce," "fur," and "fur products," are defined in the Fur Products Labeling Act, do forthwith cease and desist from:

A. Misbranding fur products by:

1. Setting forth on labels affixed to fur products:

(a) The term "blended" as part of the information required under section 4(2) of the Fur Products Labeling Act and the rules and regulations promulgated thereunder to describe the pointing, bleaching, dyeing, or tip-dyeing of furs.

(b) Information required under section 4(2) of the Fur Products Labeling Act and the rules and regulations promulgated thereunder mingled with nonrequired information.

2. Failing to set forth the information required under section 4(2) of the Fur Products Labeling Act and the rules and regulations promulgated thereunder in the required sequence.

B. Falsely or deceptively invoicing fur products by:

1. Failing to furnish invoices to purchasers of fur products showing in words and figures plainly legible all the information required to be disclosed by each of the subsections of section 5(b)(1) of the Fur Products Labeling Act.

2. Setting forth on invoices a false geographic origin of the animal that produced the fur.

3. Setting forth information required under section 5(b)(1) of the Fur Products Labeling Act and the rules and regulations promulgated thereunder in abbreviated form.

C. Falsely or deceptively advertising fur products through the use of any advertisement, representation, public announcement or notice which is intended to aid, promote or assist, directly or indirectly, in the sale, or offering for sale of fur products and which:

1. Fails to disclose the name or names of the animal or animals producing the fur or furs contained in the fur product, as set forth in the Fur Products Name Guide, and as prescribed under the rules and regulations.

2. Represents directly or by implication that the volume of merchandise to be offered for sale is higher than is the fact.

3. Offers fur products at a purported reduction in price when such purported reduction is in fact fictitious.

4. Misrepresents in any manner the savings available to purchasers of respondents' fur products.

D. Making claims and representations respecting prices and values of fur products unless there are maintained by respondents full and adequate records disclosing the facts upon which such claims and representations are based.

By "Decision of the Commission", etc., report of compliance was required as follows:

It is ordered, That respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: October 24, 1961.

By the Commission.

[SEAL] JOSEPH W. SHEA, *Secretary.*

[F.R. Doc. 62-1961; Filed, Feb. 27, 1962; 8:46 a.m.]

Title 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T.D. 55576]

PART 2—ADMEASUREMENT OF VESSELS

Recognition of Admeasurement Rules of Greece

The Bureau of Customs has been advised through the Department of State of the United States of an exchange of notes between the Government of Greece and the Government of the United States which establishes that the system of vessel tonnage measurements followed by the Government of Greece is substantially similar to that of the United States and that United States standards of measurements of vessels are accepted in Greece. Therefore, in accordance with Article XXI of the Treaty of Friendship, Commerce, and Navigation between the United States of America and the Kingdom of Greece (5 UST 1829) and pursuant to the authority contained in section 4154 of the Revised Statutes, as amended (46 U.S.C. 81), vessels flying the flag of the Kingdom of Greece shall hereafter be taken in ports of the United States to be of the tonnages denoted in their certificates of registry or other national papers.

Accordingly, the first sentence of section 2.63 of the Customs Regulations is amended by the insertion of "Greece" immediately after "Great Britain."

(R.S. 161, 4154, as amended, sec. 3, 23 Stat. 119, as amended; 5 U.S.C. 22, 46 U.S.C. 3, 81)

[SEAL] PHILIP NICHOLS, Jr., *Commissioner of Customs.*

Approved: February 20, 1962.

JAMES POMEROY HENDRICK, *Acting Assistant Secretary of the Treasury.*

[F.R. Doc. 62-1986; Filed, Feb. 27, 1962; 8:48 a.m.]

[T.D. 55575]

PART 3—DOCUMENTATION OF VESSELS

Redocumentation of Vessel Sold or Transferred in Whole or in Part to Citizen of U.S. While Outside a Customs Collection District

The Act of August 17, 1961 (Public Law 87-157; 75 Stat. 392, T.D. 55407), amended section 4166 of the Revised Statutes (46 U.S.C. 35). The section as amended provides that when a vessel of the United States is sold or transferred in whole or in part to a citizen of the United States while outside the limits of a customs collection district of the United States and not in any port designated as a port of documentation, it may be documented anew as a vessel of the United States, or it may retain the privileges and benefits of a vessel of the United States until it arrives at a port in the United States. In order to give effect to the enactment, the following changes are made in the Customs Regulations:

§ 3.30 [Amendment]

Section 3.3(g) is amended to read as follows:

(g) No provisional certificate shall be issued to any vessel abroad which at the time of its transfer to a citizen of the United States was documented as a vessel of the United States. Such a vessel may be redocumented at a port in the United States upon compliance with the requirements outlined in § 3.35 or if not so redocumented while abroad, it shall nevertheless be entitled to all the privileges and benefits of a vessel of the United States up to and for the purpose of its first arrival thereafter within a customs collection district or in a port of documentation outside any such customs collection district. (Section 1, 38 Stat. 1193, as amended, R.S. 4166, as amended; 46 U.S.C. 12, 35.)

Section 3.35 is amended to read as follows:

§ 3.35 Sale abroad.

(a) A documented vessel which, while outside the limits of a customs collection district of the United States and not in any port designated as a port of documentation outside any such district, is sold or transferred in whole or in part to a citizen of the United States may be documented anew as a vessel of the United States at the port designated as the vessel's home port by the new owner or owners in accordance with the requirements of § 3.17 of this part. Such a document shall be issued upon compliance with all the applicable requirements contained in this part, and upon surrender of the previous document at the new home port except that (1) any document so issued shall be a permanent document and (2) the document may be issued without first requiring surrender of the outstanding document to the collector in a case in which the vessel is at sea at the time. In such latter case, the new document shall be forwarded to the United States foreign service officer at the vessel's foreign port of call or the

collector of customs at a domestic port of call upon request of the owner or his agent. The foreign service officer or the collector of customs to whom the new document is forwarded shall deliver that document to the vessel upon the vessel's arrival in port and upon surrender of the previous document, which shall be forwarded by that officer to the collector at the vessel's home port.

(b) A documented vessel which has been sold or transferred in whole or in part to a citizen while abroad and which is not redocumented under paragraph (a) of this section shall nevertheless be entitled on her first arrival thereafter to all the privileges of a vessel of the United States. (R.S. 4166, as amended; 46 U.S.C. 35.)

(R.S. 161, section 2, 23 Stat. 118, as amended; 5 U.S.C. 22, 46 U.S.C. 2)

Notice of the proposed issuance of the foregoing amendments was published in the FEDERAL REGISTER on November 16, 1961 (26 F.R. 10731). Careful consideration was accorded to all data, views, and arguments received pertaining to the proposed amendment. As a result thereof, certain changes have been incorporated in this final draft. In this respect, particular attention is invited to § 3.35 (a) of the regulations.

This order, which is deemed to be one granting or recognizing exemption or relieving restriction within the meaning of section 4 of the Act of June 11, 1946 (5 U.S.C. 1003), shall be effective upon publication in the FEDERAL REGISTER.

[SEAL] PHILIP NICHOLS, Jr., *Commissioner of Customs.*

Approved: February 20, 1962.

JAMES POMEROY HENDRICK, *Acting Assistant Secretary of the Treasury.*

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 120—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Tolerances for Residues of 2,4-Dichloro-6-o-Chloroanilino-s-Triazine

A petition was filed with the Food and Drug Administration by Chemagro Corporation, P.O. Box 4913, Kansas City 20, Missouri, requesting the establishment of tolerances for residues of 2,4-dichloro-6-o-chloroanilino-s-triazine in or on blackberries, cantaloups, cucumbers, dewberries, honeydew melons, loganberries, muskmelons, pumpkins, raspberries, squash, and watermelons.

The Secretary of Agriculture has certified that this pesticide chemical is useful for the purposes for which tolerances are being established.

After consideration of the data submitted in the petition and other relevant material which show that the tolerances established in this order will protect the public health, and by virtue of the authority vested in the Secretary of Health, Education, and Welfare by the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2)) and delegated to the Commissioner of Food and Drugs by the Secretary (25 F.R. 8625), the regulations for tolerances for pesticide chemicals in or on raw agricultural commodities are amended by adding to § 120.158 (21 CFR 120.158) tolerances for the subject pesticide chemical in or on blackberries, cucumbers, dewberries, loganberries, melons, pumpkins, raspberries, and squash. Paragraph designations are deleted to facilitate insertion of new tolerances. As amended, § 120.158 reads as follows:

§ 120.158 Tolerances for residues of 2,4-dichloro-6-o-chloroanilino-s-triazine.

Tolerances for residues of 2,4-dichloro-6-o-chloroanilino-s-triazine in or on raw agricultural commodities are established as follows:

10 parts per million in or on blackberries, celery, cucumbers, dewberries, green onions, loganberries, melons, pumpkins, raspberries, shallots, summer squash, strawberries, tomatoes, winter squash.

1 part per million in or on garlic, onions (dry bulb), potatoes.

Any person who will be adversely affected by the foregoing order may at any time prior to the thirtieth day from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington 25, D.C., written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof. All documents shall be filed in quintuplicate.

Effective date. This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2))

Dated: February 20, 1962.

WINTON B. RANKIN, *Assistant Commissioner of Food and Drugs.*

[F.R. Doc. 62-1973; Filed, Feb. 27, 1962; 8:47 a.m.]

PART 121—FOOD ADDITIVES

Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

STYRENE COPOLYMER COATINGS

The Commissioner of Food and Drugs having evaluated the data submitted in petitions (FAP 261, 292) filed by Monsanto Chemical Company, 812 Monsanto Avenue, Springfield 2, Massachusetts, and other relevant material, has concluded that the food additive regulations should be amended to permit the safe use of styrene-methyl acrylate and styrene-maleic anhydride polymers as food-contact surfaces. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)), and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (25 F.R. 8625), Part 121, Subpart F, is amended by adding thereto the following new section:

§ 121.2532 Styrene copolymer coatings.

The styrene copolymer coatings identified in this section may be safely used as food-contact surfaces of paper and paperboard articles intended for use in producing, manufacturing, packing, processing, preparing, treating, packaging, transporting, or holding food, subject to the requirements of this section.

(a) For the purpose of this section, styrene copolymers are those formed by the copolymerization of styrene with maleic acid anhydride, or methacrylic acid, or methyl acrylate, or combinations of these, which are reacted with optional adjuvant substances required to effect and control polymerization or which may be added to impart desired physical and technical properties.

(b) Styrene copolymer coatings are prepared as emulsions of polymarized styrene copolymers that are applied with optional adjuvant substances and heated to form a resin coating.

(c) Optional adjuvant substances employed as prescribed in paragraphs (a) and (b) of this section include the following, subject to any limitation provided in the tabulation and further subject to the provision that any substance that is the subject of a regulation in Subpart F which prescribes specifications for that substance as a component of polymeric resins used as food-contact surfaces meets those specifications, and that any substance not subject to such a regulation meets the specifications, if any, provided by an order extending the effective date of the statute for such substance.

List of substances	*Limitations*
Ammonium hydroxide	
sec-Butyl alcohol (Butanol-sec).	
Diatomaceous earth	
Di-*tert*-butyl peroxide	
Methyl alcohol	
Monoglycerides of fat-forming fatty acids.	

List of substances—Con.	*Limitations*
β-Nitro styrene	----------
Potassium persulfate	----------
Sodium, potassium, calcium and magnesium soaps of fat-forming acids.	----------
Surface-active agents	As provided in § 121.2514 (b) (3).

(d) The coating in the finished form in which it is to contact food, when extracted with a solvent or solvents characterizing the type of food and the conditions of time and temperature characterizing the conditions of its intended use as determined from Tables 1 and 2 of § 121.2526(c), shall yield net chloroform-soluble extractives not to exceed 0.5 milligram per square inch.

Any person who will be adversely affected by the foregoing order may at any time prior to the thirtieth day from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW, Washington 25, D.C., written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof. All documents shall be filed in quintuplicate.

Effective date. This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1))

Dated: February 21, 1962.

WINTON B. RANKIN,
Assistant Commissioner of Food and Drugs.

Title 25—INDIANS

Chapter I—Bureau of Indian Affairs, Department of the Interior

SUBCHAPTER E—EDUCATION

PART 34—ADMINISTRATION OF A PROGRAM OF VOCATIONAL TRAINING FOR ADULT INDIANS

Financial Assistance for Trainees

On page 10640 of the FEDERAL REGISTER of November 14, 1961, there was published a notice and text of a proposed amendment of § 34.8 of Title 25, Code of Federal Regulations. The purpose of this amendment is to further clarify the regulations and bring it specifically in line with present interpretations and practices.

Interested persons were given thirty days in which to submit written comments, suggestions or objections with respect to the proposed amendment. No comments, suggestions or objections have been received, and the proposed amendment is hereby adopted without change and is set forth below. This amendment shall become effective at the beginning of the 30th calendar day following the date of this publication in the FEDERAL REGISTER.

STEWART L. UDALL,
Secretary of the Interior.

FEBRUARY 21, 1962.

Section 34.8 is amended to read as follows:

§ 34.8 Financial assistance for trainees.

Individuals or family units where the head of the family is entering training under this part may be granted financial assistance to provide for transportation to the place of training, and subsistence during the course of training. For purposes of this part, subsistence may be construed to provide for all or any part of the following items: Medical examinations; subsistence en route; subsistence during the course of training until the first full pay check from employment has been received; personal appearance; housewares; furniture; health care; payment for required books; supplies and tools for training; and payment of tuition and related cost and other required expenses, in accordance with the schedule and amounts as established by the Secretary or his authorized representative.

[F.R. Doc. 62-1963; Filed, Feb. 27, 1962; 8:46 a.m.]

Title 26—INTERNAL REVENUE

Chapter I—Internal Revenue Service, Department of the Treasury

SUBCHAPTER A—INCOME TAX

[T.D. 6592]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Miscellaneous Amendments

In order to conform the Income Tax Regulations (26 CFR Part 1) under section 1441 of the Internal Revenue Code of 1954 to section 110(d) of the Mutual Educational and Cultural Exchange Act of 1961 (Public Law 87-256, 75 Stat. 536), such regulations are amended as follows:

PARAGRAPH 1. Section 1.1441 is amended by inserting a phrase before the period at the end of section 1441(a), by adding a sentence at the end of section 1441(b), by revising section 1441(c)(4), and by revising the historical note. These amended and added provisions read as follows:

§ 1.1441 Statutory provisions; withholding of tax on nonresident aliens.

SEC. 1441. *Withholding of tax on nonresident aliens*—(a) *General rule.* Except as otherwise provided in subsection (c), all persons, in whatever capacity acting (including lessees or mortgagors of real or personal property, fiduciaries, employers, and all officers and employees of the United States) having the control, receipt, custody, [illegible] or payment of any of the items of [illegible] specified in subsection (b) (to the [illegible] any of such items constitutes gross [illegible] from sources within the United [illegible] any nonresident alien individual, or [illegible] partnership not engaged in trade or [illegible] within the United States and [illegible] whole or in part of nonresident aliens, [illegible] (except in the cases provided for in [illegible] 1451 and except as otherwise provided [illegible] regulations prescribed by the Secretary [illegible] his delegate under section 874) deduct [illegible] withhold from such items a tax equal to [illegible] percent thereof, except that in the case [illegible] any item of income specified in the [illegible] sentence of subsection (b), the tax shall [illegible] equal to 18 percent of such item.

(b) *Income items.* The items of [illegible] referred to in subsection (a) are [illegible] (except interest on deposits with [illegible] carrying on the banking business [illegible] persons not engaged in business in the United States), dividends, rent, [illegible] wages, premiums, annuities, compensations, remunerations, emoluments, or other fixed or determinable annual or periodical gains, profits, and income, and amounts described in section 402(a)(2), section [illegible] (2), section 631 (b) and (c), and section 1235, which are considered to be gains from the sale or exchange of capital assets. The items of income referred to in subsection (a) from which tax shall be deducted and withheld at the rate of 18 percent are—

(1) That portion of any scholarship or fellowship grant which is received by a nonresident alien individual who is temporarily present in the United States as a nonimmigrant grant under subparagraph (F) or (J) of section 101(a)(15) of the Immigration and Nationality Act, as amended, and which is not excluded from gross income under section 117(a)(1) solely by reason of section 117(b)(2)(B); and

(2) Amounts described in subparagraphs (A), (B), (C), and (D) of section 117(a)(2) which are received by any such nonresident alien individual and which are incident to a scholarship or fellowship grant to which section 117(a)(1) applies, but only to the extent such amounts are includible in gross income.

(c) *Exceptions.* • • •

(4) *Compensation of certain aliens.* Under regulations prescribed by the Secretary or his delegate, there may be exempted from deduction and withholding under subsection (a) the compensation for personal services of—

(A) Nonresident alien individuals who enter and leave the United States at frequent intervals, and

(B) A nonresident alien individual for the period he is temporarily present in the United States as a nonimmigrant under subparagraph (F) or (J) of section 101(a)(15) of the Immigration and Nationality Act, as amended.

• • • • •

[Sec. 1441 as amended by sec. 544(f), Mutual Security Act 1954 (added by sec. 11(a), Mutual Security Act 1956 (70 Stat. 555); sec. 40(b), Technical Amendments Act 1958 (72 Stat. 1638); sec. 110(d), Mutual Educational and Cultural Exchange Act 1961 (Pub. Law 87-256, 75 Stat. 536). (Sec. 544(f), Mutual Security Act 1954, was repealed by sec. 11(b)(1), Mutual Security Act 1956 (71 Stat. 365), with the proviso that sec. 1441 was not affected by the repeal.)]

PAR. 2. Section 1.1441-1 is amended to read as follows:

§ 1.1441-1 Requirement for withholding of tax on nonresident aliens and foreign corporations.

Except as otherwise provided in §§ 1.1441-3 and 1.1441-4, to the extent

...items specified in § 1.1441–2 con... income from sources within ... States, withholding of a tax ... percent is required in the case of ... of income specified in paragraphs ... and (b) of § 1.1441–2 when such in... is paid to a nonresident alien indi..., a nonresident partnership com... in whole or in part of nonresident ... individuals, or a nonresident for... corporation, except that with re... to payments made after December ..., withholding of a tax of 18 per... is required in the case of items of ... specified in paragraph (c) of § 1.1441–2. The rate of 30 percent or 18 ... shall be reduced as may be pro... by treaty with any country. See ... 894, relating to income exempt ... treaty. For purposes of this sec..., the term "nonresident alien indi..." includes an alien resident of Puerto Rico.

PAR. 3. Section 1.1441–2 is amended by adding a paragraph (c) at the end thereof. The added provision reads as follows:

§ 1.1441–2 Income subject to withholding.

* * * * *

(c) *Amounts received by participants in certain exchange or training programs.* (1) Withholding of tax shall be at the rate of 18 percent (rather than 30 percent) on that portion of a scholarship or fellowship grant received by a nonresident alien individual who is temporarily present in the United States as a nonimmigrant under subparagraph (F) or (J) of section 101(a)(15) of the Immigration and Nationality Act, as amended, which is not excludable from such nonresident alien's gross income under section 117(a)(1) and paragraph (a) of § 1.117–1 because it exceeds the limitations set forth by section 117 (b)(2)(B) and paragraph (b)(2) of § 1.117–2. Thus, if a nonresident alien scientist who was admitted to the United States under subparagraph (J) of section 101(a)(15) of the Immigration and Nationality Act, as amended, to engage in post-doctoral scientific studies received a fellowship grant from a grantor specified in section 117(b)(2)(A) which exceeded the $300-per-month-for-36-months limitation determined under paragraph (b)(2) and (3) of § 1.117–2, a tax at the rate of 18 percent rather than 30 percent should be withheld from the amount of the grant includible in the scientist's income.

(2) Withholding shall also be at the rate of 18 percent on amounts received by nonresident alien individuals described in subparagraph (1) of this paragraph to cover expenses for travel, research, clerical help, or equipment which are incident to a scholarship or fellowship grant to which section 117(a)(1) applies, but only to the extent that such amounts are not excludable from gross income under paragraph (b)(1) of § 1.117–1 because they pertain to a portion of a scholarship or fellowship grant which is not excludable, or because the amount received is not specifically designated to cover such expenses under paragraph (b)(2)(i) of § 1.117–1.

(3) A nonresident alien individual who is temporarily present in the United States as a nonimmigrant under subparagraph (J) of section 101(a)(15) of the Immigration and Nationality Act, as amended, includes a nonresident alien individual admitted to the United States as an "exchange visitor" under section 201 of the United States Information and Educational Exchange Act of 1948, as amended (22 U.S.C. 1446), which section was repealed by section 111 of the Mutual Educational and Cultural Exchange Act of 1961 (Pub. Law 87–256, 75 Stat. 538).

PAR. 4. Section 1.1441–3 is amended by revising subparagraph (2) of paragraph (e). This amended provision reads as follows:

§ 1.1441–3 Exceptions and rules of special application.

* * * * *

(e) *Personal exemption.* * * *

(2) In the determination of the tax to be withheld at the source under § 1.1441–1 from remuneration paid for labor or personal services performed within the United States by a nonresident alien, the benefit of the deduction for one personal exemption provided in section 151 shall be allowed, prorated upon a daily basis for the period of employment during any portion of which labor or personal services are performed within the United States by the alien. The benefit of the deduction for one personal exemption provided in section 151 shall also be allowed in the determination of the tax of 18 percent to be withheld at the source under § 1.1441–1 and paragraph (c) of § 1.1441–2 from amounts paid after December 31, 1961, to nonresident alien individuals who are temporarily present in the United States as nonimmigrants under subparagraph (F) or (J) of section 101(a)(15) of the Immigration and Nationality Act, as amended, and such personal exemption shall be prorated upon a daily basis for the period during which the described nonresident alien student or scholar receives the payments. The proration is on the basis of $1.70 per day. Thus, if A, a nonresident alien seaman employed by X Shipping Corporation, is paid in 1955 upon the termination of a voyage covering 100 days and A performs personal services within the United States during, or incident to, the voyage, the amount of $170 will be allocated as the portion of the deduction to be allowed against the remuneration for personal services performed within the United States during that voyage; and withholding at 30 percent shall be applied against the balance, if any, of the remuneration. If, for example, the total remuneration paid to A for that voyage is $2,000, of which the amount of $800 is allocable to sources within the United States, a tax in the amount of $189 is required to be withheld under § 1.1441–1. As to what constitutes remuneration for labor or personal services performed within the United States, see section 861 (a)(3) and the regulations thereunder.

PAR. 5. Paragraph (b) of § 1.1441–4 is amended to read as follows:

§ 1.1441–4 Exemptions from withholding.

* * * * *

(b) *Compensation for personal services*—(1) *Residents of contiguous countries.* The salary or other compensation for personal services of a nonresident alien individual who enters and leaves the United States at frequent intervals shall not be subject to withholding of tax under § 1.1441–1 if—

(i) The nonresident alien is a resident of Canada or Mexico, or

(ii) The nonresident alien is engaged in agricultural labor as defined in section 3121(g) and the regulations thereunder.

(2) *Participants in certain exchange or training programs.* (i) The salary or other compensation for personal services performed by a nonresident alien individual as an employee within the meaning of section 3401 for the period he is temporarily present in the United States as a nonimmigrant under subparagraph (F) or (J) of section 101(a)(15) of the Immigration and Nationality Act, as amended, shall not be subject to withholding of tax under § 1.1441–1. This subparagraph shall be effective with respect to compensation paid after December 31, 1961.

(ii) If United States tax at a rate greater than 18 percent has been withheld under § 1.1441–1 after December 31, 1961, from compensation for personal services entitled to the exemption provided for by subdivision (i) of this subparagraph, the withholding agent is authorized to release and pay over to the nonresident alien individual from whom the tax was withheld an amount which is equal to the difference between the tax so withheld and the tax required to be withheld from such compensation pursuant to section 3402 and the regulations thereunder. The provisions of this subdivision do not apply to excess tax withheld from compensation for personal services which has been paid by the withholding agent to the Director of International Operations, Internal Revenue Service.

(iii) See paragraph (c)(3) of § 1.1441–2 for the treatment of nonresident alien individuals admitted to the United States as "exchange visitors."

(3) *Withholding of tax under section 3402.* For collection of the income tax at source under section 3402 upon remuneration paid for services performed by a nonresident alien individual who is a resident of Canada or Mexico and who enters and leaves the United States at frequent intervals, see section 3401(a)(7) and the regulations thereunder. For collection of the income tax at source under section 3402 upon remuneration paid for services performed by a nonresident alien individual who is a nonimmigrant under subparagrah (F) or (J) of section 101(a)(15) of the Immigration and Nationality Act, as amended, see sections 3401(a)(6) and 3402(f)(6) and the regulations under such sections.

(4) *Proration of personal exemption.* For provisions allowing the benefit of the deduction for the personal exemption on a prorated basis, see paragraph (e) of § 1.1441–3.

Because it is necessary to bring into effect at the earliest practicable date the rules of this Treasury decision respecting exemption from withholding of tax and release of excess tax withheld, it is hereby found that it is impracticable to issue this Treasury decision with notice and public procedure thereon under section 4(a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4(c) of said Act.

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

[SEAL] MORTIMER M. CAPLIN,
Commissioner of Internal Revenue.

Approved: February 23, 1962.

STANLEY S. SURREY,
Assistant Secretary of the Treasury.

[F.R. Doc. 62-1968; Filed, Feb. 27, 1962; 8:48 a.m.]

Title 29—LABOR

Chapter IV—Bureau of Labor-Management Reports, Department of Labor

SUBCHAPTER A—REGULATIONS

PART 406—REPORTING BY LABOR RELATIONS CONSULTANTS AND OTHER PERSONS, CERTAIN AGREEMENTS WITH EMPLOYERS

Revision

On August 9, 1961, notice was published in the FEDERAL REGISTER (26 F.R. 7141) that the Secretary of Labor proposed to revise 29 CFR Part 406 in order to provide for specific forms for reporting pursuant to section 203(b) of the Labor-Management Reporting and Disclosure Act of 1959 (29 U.S.C. 433(b)) and to otherwise implement this provision of the statute.

The notice provided an opportunity for interested persons to submit data, views, or arguments pertaining to the proposed revision.

After consideration of all the relevant matter presented, I conclude that with the following amendments, the revision as proposed may be adopted: (1) Editorial and clarifying modifications of text in Form LM-20 and in the instructions accompanying such form; (2) the deletion of the proposed § 406.4 and the renumbering of the subsequent sections in order that there be no requirement to file a "status report", and the necessary changes in the Instructions in Forms LM-20 and 21 relating thereto. Consideration of the administrative problems involved in the enforcement of the reporting requirements of section 203(b) of the Act now convince me that filing of a status report should not be required. Accordingly, the references to the status report have also been deleted from other sections of the proposed amendements to Part 406; (3) the deletion of references to Form LM-21A and necessary changes in Form LM-21 and the instructions relating thereto, to reflect the fact that the reporting of disbursements with regard to general labor relations services and advice has been simplified to the extent that a separate schedule of Receipts and Disbursements is not necessary; and (4) the inclusion in the Form LM-21 of a Statement of Disbursements in which general categories of expenses with regard to those disbursements of a "consultant" or other person which involve any labor relations services and advice are reported, and a schedule of specific expenses with regard to a "consultant's" or other person's activities of the type referred to in section 203(b).

Therefore, pursuant to section 208 of the Labor-Management Reporting and Disclosure Act of 1959 (73 Stat. 529, 29 U.S.C. 438) and for the purpose of implementing section 203(b) of the aforesaid Act, the proposed revision and forms are hereby adopted subject to the changes indicated above and shall become effective 30 days from publication in the FEDERAL REGISTER.

Part 406 is hereby revised to read as follows:

Sec.
406.1 Definitions.
406.2 Agreements and activities report.
406.3 Receipts and disbursements report.
406.4 Terminal report.
406.5 Persons excepted from filing reports.
406.6 Relation of section 8(c) of the National Labor Relations Act to this part.
406.7 Personal responsibility of signatories of reports.
406.8 Maintenance and retention of records.
406.9 Publication of reports required by this part.

AUTHORITY: §§ 406.1 through 406.9 issued under sec. 208, 73 Stat. 529 U.S.C. 438; Interpret or apply sec. 203(b), 73 Stat. 527; 29 U.S.C. 433, and sec. 207(b), 73 Stat. 529; 29 U.S.C. 437.

§ 406.1 Definitions.

As used in this part, the term:

(a) "Corresponding principal officers" means any person or persons performing or authorized to perform, principal executive functions corresponding to those of president and treasurer of any entity engaged in whole or in part in the performance of the activities described in section 203(b) of the Labor-Management Reporting and Disclosure Act of 1959.

(b)(1) "Fiscal year" means the calendar year or other period of 12 consecutive calendar months, on the basis of which financial accounts are kept by a person. Where a person designated a new fiscal year prior to the expiration of a previously established fiscal year period, the resultant period of less than 12 consecutive calendar months, and thereafter the newly established fiscal year, shall in that order constitute the fiscal years.

(2) A person who is subject to section 203(b) of the Act for only a portion of his fiscal year because the date of enactment of the Act (September 14, 1959) occurred during such fiscal year or because such person otherwise first becomes subject to the Act during such fiscal year, may consider such portion as the entire fiscal year in making his report under this part.

(c) "Undertake" means not only performing of activities, but also agreeing to perform them or to have them performed.

(d) "A direct or indirect party to any agreement or arrangement" includes persons who have secured the making of another or of others in connection with an agreement or arrangement of the type referred to in § 406.2 and persons who have undertaken such activities at the behest of another or of others with knowledge or reason to believe that they are undertaken as a result of such agreement or arrangement between the employer and any other person, such as bona fide regular officers, supervisors, or employees of their employer to the extent to which they undertook to perform services as such bona fide regular officers, supervisors or employees of their employer.

§ 406.2 Agreements and activities report.

(a) Every person who as a direct or indirect party to any agreement or arrangement with an employer undertakes pursuant to such agreement or arrangement, any activities where an object thereof is, directly or indirectly, (1) to persuade employees to exercise or not to exercise, or persuade employees as to the manner of exercising, the right to organize and bargain collectively through representatives of their own choosing; or, (2) to supply an employer with information concerning the activities of employees of a labor organization in connection with a labor dispute involving such employer, except information for use solely in conjunction with an administrative or arbitral proceeding or a criminal or civil judicial proceeding; shall, as prescribed by the instructions in this part, file a report with the Commissioner, Bureau of Labor-Management Reports, United States Department of Labor, Washington 25, D.C., one copy thereof, on Form LM-21, titled "Agreements and Activities Report (required of persons, including labor relations consultants and other individuals and organizations)" in the detail required by such form and the instructions accompanying such form and constituting a part thereof. The report shall be filed within 30 days after entering into an agreement or arrangement of the type described herein. If there is any change in the information reported (other than that required by Item C, 10, (c) of the Form), it must be filed in a report clearly marked "Amended Report" within 30 days of the change.

(b) The report shall be signed by the president and treasurer or corresponding principal officers of the reporting person. If the report is filed by an individual in his own behalf, it need only bear his signature.

§ 406.3 Receipts and disbursements report.

(a) Every person who, as a direct or indirect party to any agreement or arrangement, undertakes any activities of the type described in § 406.2 pursuant to such agreement or arrangement and who, as a result of such agreement or

[1] Filed as part of the original document.

arrangement made or received any payment during his fiscal year, shall, as prescribed by the regulations in this part, file a report and one copy thereof, with the said Commissioner, Bureau of Labor-Management Reports, on Form LM-21 entitled "Receipts and Disbursements Report (required of persons, including labor relations consultants, other individuals and organizations)", in the detail required by such form and the instructions accompanying such form and constituting a part thereof. The report shall be filed within 90 days after the end of each person's fiscal year during which payments were made or received as a result of such an agreement or arrangement.

(b) The report shall be signed by the president and treasurer or corresponding principal officers of the reporting person. If the report is filed by an individual in his own behalf, it need only bear his signature.

§ 406.4 Terminal report.

(a) Every person required to file a report pursuant to the provisions of this part who during his fiscal year loses his identity as a reporting entity through merger, consolidation, dissolution, or otherwise shall within 30 days of the effective date thereof or of the effective date of this section, whichever is later, file a terminal report, and one copy thereof, with the said Commissioner, Bureau of Labor-Management Reports, on Form LM-21 signed by the President and Treasurer or corresponding principal officers immediately prior to the time of the person's loss of reporting identity (or by the person himself if he is an individual), together with a statement of the effective date of termination or loss of reporting identity, and if the latter, the name and mailing address of the entity into which the person reporting has been merged, consolidated or otherwise absorbed.

(b) For purposes of the report referred to in paragraph (a) of this section, the period covered thereby shall be the portion of the reporting person's final year ending on the effective date of the termination or loss of identity.

§ 406.5 Persons excepted from filing reports.

Nothing contained in this part shall be construed to require:

(a) Any person to file a report under this part unless he was a direct or indirect party to an agreement or arrangement of the kind described in § 406.2;

(b) Any person to file a report covering the services of such person by reason of his (1) giving or agreeing to give advice to an employer; or (2) representing or agreeing to represent an employer before any court, administrative agency, or tribunal of arbitration; or (3) engaging or agreeing to engage in collective bargaining on behalf of an employer with respect to wages, hours, or other terms or conditions of employment or the negotiation of an agreement or any question arising thereunder;

(c) Any regular officer, or employee of an employer to file a report in connection with services rendered as such regular officer, supervisor or employee to such employer;

(d) An attorney who is a member in good standing of the bar of any State, to include in any report required to be filed pursuant to the provisions of this part any information which was lawfully communicated to such attorney by any of his clients in the course of a legitimate attorney-client relationship.

§ 406.6 Relation of section 8(c) of the National Labor Relations Act to this part.

While nothing contained in section 203 of the Act shall be construed as an amendment to, or modification of the rights protected by, section 8(c) of the National Labor Relations Act, as amended (61 Stat. 142; 29 U.S.C. 158 (c)), activities protected by such section of the said Act are not for that reason exempted from the reporting requirements of this Part and, if otherwise subject to such reporting requirements, are required to be reported. Consequently, information required to be included in Forms LM-20 and 21 must be reported regardless of whether that information relates to activities which are protected by section 8(c) of the National Labor Relations Act, as amended.

§ 406.7 Personal responsibility of signatories of reports.

Each individual required to file a report under this part shall be personally responsible for the filing of such report and for any statement contained therein which he knows to be false.

§ 406.8 Maintenance and retention of records.

Every person required to file any report under this part shall maintain records on the matters required to be reported which will provide in sufficient detail the necessary basic information and data from which the documents filed with the Bureau may be verified, explained or clarified, and checked for accuracy and completeness, and shall include vouchers, worksheets, receipts and applicable resolutions, and shall keep such records available for examination for a period of not less than five years after the filing of the documents based on the information which they contain.

§ 406.9 Publication of reports required by this part.

Inspection and examination of any report or other document filed as required by this part, and the furnishing by the Bureau of copies thereof to any person requesting them shall be governed by § 2.4 of this title.

Signed at Washington, D.C., this 19th day of January 1961.

ARTHUR J. GOLDBERG,
Secretary of Labor.

Chapter V—Wage and Hour Division, Department of Labor

SUBCHAPTER B—STATEMENTS OF GENERAL POLICY OR INTERPRETATION NOT DIRECTLY RELATED TO REGULATIONS

PART 781—THE FAIR LABOR STANDARDS ACT AS APPLIED TO ESTABLISHMENTS ENGAGED IN LAUNDERING, CLEANING OR REPAIRING CLOTHING OR FABRICS UNDER SECTION 13(a)(3) OF THE ACT

Pursuant to the Fair Labor Standards Act of 1938 (29 U.S.C. 201-219), Reorganization Plan No. 6 of 1950 (3 CFR 1949-53 Comp., p. 1004), and General Order No. 45-A (15 F.R. 3290) of the Secretary of Labor, Title 29 of the Code of Federal Regulations is hereby amended by the addition thereto of a new Part 781, which is set forth below.

The amendment shall become effective immediately upon publication in the FEDERAL REGISTER since it is interpretative and neither public procedure nor delay in effective date are required under section 4 of the Administrative Procedure Act.

The new Part 781 reads as follows:

INTRODUCTORY

Sec.
781.0 Purpose of this part.
781.1 General scope of the Act.
781.2 Matters discussed in this part and other parts.
781.3 Reliance upon interpretations.

THE 13(a)(3) EXEMPTION

781.4 The statutory provision.
781.5 Legislative history of exemption.

TYPES OF ESTABLISHMENTS INTENDED TO BE EXEMPT

781.6 Exemption applied to certain types of establishments.

REQUIREMENTS FOR EXEMPTION OF AN ESTABLISHMENT ENGAGED IN LAUNDERING, CLEANING OR REPAIRING CLOTHING OR FABRICS

781.7 Requirements summarized.
781.8 More than 50 percent intrastate sales required.
781.9 Out-of-State customers.
781.10 Sales "made within the State" and "interstate" sales distinguished.
781.11 Determining percentage of out-of-State sales.

LIMITATIONS ON SALES TO CERTAIN CUSTOMERS

781.12 Sales to certain customers limited to 25 percent.
781.13 Sale made to a named business.
781.14 Sales not made to a named business.

COMPUTING THE ANNUAL VOLUME

781.15 The annual period.
781.16 Calculation on a calendar year basis.
781.17 Computation on a fiscal year basis.
781.18 Computation for new business.

EMPLOYMENT "BY" AN EXEMPT ESTABLISHMENT

781.19 Employment "by" establishment required for exemption.
781.20 Employed within scope of exempt business.
781.21 Employed "in" but not "by".
781.22 Central offices and warehouses.

WORKWEEK APPLICATION OF EXEMPTION

781.23 Workweek is used in applying the exemption.
781.24 Exempt and noncovered work during the same workweek.

Sec.
781.25 Exempt and nonexempt work during the same workweek.
781.26 Work exempt under another section of the Act.

AUTHORITY: §§ 781.0 to 781.26 issued under secs. 1–19, 52 Stat. 1060, as amended; 29 U.S.C. 201–219.

INTRODUCTORY

§ 781.0 Purpose of this part.

This Part 781 constitutes the official interpretative bulletin of the Department of Labor with respect to the meaning and scope of section 13(a)(3) of the Fair Labor Standards Act of 1938, as amended. Section 13(a)(3) provides an exemption from the minimum wage and overtime pay requirements of the Act for employees employed by an establishment engaged in laundering, cleaning or repairing clothing or fabrics which meets certain specified conditions. It is the purpose of this part to make available in one place the interpretations of the provisions in section 13(a)(3) which will guide the Secretary of Labor and the Administrator in the performance of their duties under the Act unless and until they are otherwise directed by authoritative decisions of the courts or conclude, upon reexamination of an interpretation, that it is incorrect.

§ 781.1 General scope of the Act.

The Fair Labor Standards Act is a Federal statute of general application which establishes minimum wage, overtime pay, and child labor requirements that apply as provided in the Act. These requirements are applicable, except where exemptions are provided, to employees in those workweeks when they are engaged in interstate or foreign commerce or in the production of goods for such commerce or are employed in enterprises so engaged within the meaning of definitions set forth in the Act. Employers having such employees are required to comply with the Act's provisions in this regard unless relieved therefrom by some exemption in the Act, and with specified recordkeeping requirements contained in Part 516 of this chapter. The law authorizes the Department of Labor to investigate for compliance and, in the event of violations, to supervise the payment of unpaid minimum wages or unpaid overtime compensation owing to any employee. The law also provides for enforcement in the courts.

§ 781.2 Matters discussed in this part and other parts.

This Part 781 discusses only the scope of the exemption provided by section 13(a)(3) for "any employee employed by any establishment engaged in laundering, cleaning or repairing clothing or fabrics • • •" Interpretations having general application to other subjects of the law, as well as to laundry and dry cleaning establishments and their employees, will be found in other parts of this chapter. Reference should be made to them for guidance on matters which they discuss in detail and which this part does not undertake to do. They include Part 776 of this chapter, discussing the coverage provisions of the Act; Part 777 of this chapter discussing methods of payment of wages; Part 778 of this chapter discussing computation and payment of overtime compensation; Part 785 of this chapter discussing the calculation of hours worked; the recordkeeping requirements which are set forth Part 516 of this chapter, and the child labor provisions of the Act which are discussed in Part 4 of this title.

§ 781.3 Reliance upon interpretations.

The interpretations of the law contained in this part are official interpretations which may be relied upon as provided in section 10 of the Portal-to-Portal Act of 1947. All prior opinions, rulings and interpretations which are inconsistent with the interpretations in this part are rescinded and withdrawn.

THE 13(a)(3) EXEMPTION

§ 781.4 The statutory provision.

Section 13(a)(3) provides an exemption from both the minimum wage and overtime requirements of the Act and applies to:

> Any employee employed by any establishment engaged in laundering, cleaning, or repairing clothing or fabrics, more than 50 per centum of which establishment's annual dollar volume of sales of such services is made within the State in which the establishment is located: *Provided*, That 75 per centum of such establishment's annual dollar volume of sales of such services is made to customers who are not engaged in a mining, manufacturing, transportation, or communications business.

§ 781.5 Legislative history of exemption.

Before the 1949 Amendments the exemption for retail or service establishments, under section 13(a)(2) of the Act, included laundry and dry cleaning establishments. The 1949 Amendments separated these exemptions. Section 13(a)(2) was made applicable only to retail or service establishments whose sales or services "are recognized as retail • • • in the particular industry." It was the Congressional view at that time there is not a clear concept of "retail services" in the laundry and dry cleaning industry and, for that reason, a separate exemption as contained in section 13(a)(3) was provided (95 Cong. Rec., p. 12503). No change in the 13(a)(3) exemption provisions was made by the 1961 Amendments. Section 13(a)(3) is complete, setting forth the terms and limitations of the exemption. The exemption is exclusive; employees employed by an establishment engaged in laundering, cleaning or repairing clothing or fabrics, if intended to be exempt, are exempt under section 13(a)(3). A laundry or dry cleaning establishment which fails to qualify for the section 13(a)(3) exemption may not claim exemption under section 13(a)(2).

TYPES OF ESTABLISHMENTS INTENDED TO BE EXEMPT

§ 781.6 Exemption applied to certain types of establishments.

(a) *General.* The exemption in section 13(a)(3) depends on the character of the establishment by which the employee is employed. This exemption, by its terms, applies only to any employee employed by any "establishment engaged in laundering, cleaning or repairing clothing or fabrics" which meets the tests. Therefore, if the establishment is of the type described in section 13(a)(3), all employees "employed by" that establishment are exempt from sections 6 and 7 of the Act. The meaning and application of this exemption, in this respect, instance, depends on what is meant by "an establishment engaged in laundering, cleaning or repairing clothing or fabrics." Although the Act does not define these terms their meaning has been established by statements of Congressional intent, decisions of the courts, and interpretations of the Administrator. The meaning of these terms is discussed in the following paragraphs of this section.

(b) *Meaning of establishment.* As used in the Act, the term "establishment", which is not specifically defined therein, refers to a "distinct physical place of business" rather than to an entire business or enterprise which may include several separate establishments, some of which may qualify for an exemption and some of which may not. This is consistent with the meaning of the term as it is normally used in business and government and is judicially recognized. It has been recognized in the Congress in the course of enactment of remedial legislation (Phillips v. Walling, 324 U.S. 490; Mitchell v. Bekins Van & Storage Co., 352 U.S. 1027; 95 Cong. Rec. 12579, 14877; H. Rept. 1453, 81st Cong., 1st Sess., p. 25). For example, a bakery or manufacturing company which operates several places of business for the sale of its manufactured products may also operate a number of separate dry cleaning establishments within the meaning of the exemption. The hat manufacturing establishment would not qualify for exemption under section 13(a)(3), whereas, the establishments engaged in cleaning hats may qualify for the exemption provided that they meet the other tests specified in section 13(a)(3).

(c) *Laundries and dry cleaning establishments within the exemption.* As pointed out in § 781.5, the section 13(a)(3) exemption was proposed and enacted into law in order to deal specifically with laundry and dry cleaning establishments as a class in contrast with other types of establishments intended to be exempt as retail or service establishments under section 13(a)(2) of the Act. The legislative history of the exemption, enacted in 1949, indicates that the establishments "engaged in laundering, cleaning or repairing clothing or fabrics" to which section 13(a)(3) refers are laundry and dry cleaning establishments exclusively—those establishments in the laundry and dry cleaning industries which are devoted to the performance for customers of the services described. Thus, the establishments which will qualify for exemption if they meet the two statutory tests include not only (1) those laundry and dry cleaning establishments which perform on the same premises all the operations of receiving clothing or fabrics from customers; laundering, cleaning and repairing the articles, and redelivering the articles to their customers, but

(2) central laundry or dry cleaning establishments, and (3) those laundry or dry cleaning establishments (generally known in the trade as "press shops", "finish-mill" or "pick-up and delivery" plants) which receive from their customers clothing or fabrics for laundering, cleaning, or repairing at a central laundry or dry cleaning establishment, and then return them to these customers.

(d) *Repair services.* The "repairing" service which is included in the statutory purposes of the exemption refers only to such "repairing" services as are incidental to the performance of laundry or dry cleaning work. It has no reference to "repairing" establishments as such. "Repairing" establishments are not within the section 13(a)(3) exemption. To be exempt such establishments must qualify under the section 13(a)(2) retail or service exemption. The legislative history of the section 13(a)(3) exemption shows quite clearly that the exemption was intended to deal with the laundry and dry cleaning establishment problem only. Throughout the debates in Congress the amendment was always referred to as the laundry and dry cleaning establishment exemption. This same approach was also followed in the analysis of the exemption in the Statement of the Managers on the Part of the House (H. Rept. 1453, 81st Cong., 1st Sess., pp. 26–27). The references in the analysis were consistently made to the "laundry" or "dry cleaning" establishment. Nowhere in the legislative history is any reference made to a "repairing establishment." However, a laundry or dry cleaning establishment is exempt if it meets the two requirements of the exemption even if it performs repair services on items laundered or cleaned whether such items are shirts, towels, bed sheets, aprons, uniforms, suits, or the fabrics on upholstered furniture, or rugs, or slip covers or draperies or any other clothing or fabrics.

(e) *Dyeing operations.* An establishment engaged in dyeing operations is not exempt under section 13(a)(3) since such services do not constitute "laundering, cleaning or repairing clothing or fabrics."

(f) *Linen supply services.* An establishment which provides linen supply service will be regarded as an establishment engaged in the business of laundering, cleaning or repairing of clothing or fabrics which will qualify for the section 13(a)(3) exemption, if it otherwise meets the statutory tests, even if the clothing or fabrics which it supplies to its customers are not owned by them, and even though it may not, itself, perform the laundering, cleaning or repairing operations.

(g) *Rug and carpet cleaning establishments.* An establishment engaged in the business of laundering, cleaning or repairing of rugs and carpets will be regarded as an establishment engaged in "laundering, cleaning or repairing clothing or fabrics" within the meaning of section 13(a)(3). Such an establishment will be exempt, if it otherwise meets the requirements of section 13(a)(3), even if it repairs, binds, weaves, sews, stores and lays the carpets and rugs it cleans, as an incident to the cleaning work.

(h) *Laundering and sale of industrial wiping cloths.* The laundering and cleaning of industrial wiping cloths constitutes the laundering and cleaning of fabrics within the meaning of section 13(a)(3). The sale of such a service to a mining, manufacturing, transportation or communications business would, of course, be subject to the 25% limitation imposed by the exemption. The sale of industrial wiping cloths, however, is not within the scope of the section 13(a)(3) exemption. Further, employees who cut, trim, or otherwise manufacture industrial wiping cloths are not exempt under section 13(a)(3). Such activity would also not be exempt under section 13(a)(2), or section 13(a)(4) because the sale of these goods for use by industrial enterprises in their production operations are not retail sales nor is an establishment engaged in the manufacture and sale of this type of goods recognized as a retail establishment (see Part 779 of this chapter, §§ 779.321 et seq., and 779.346 et seq.). However, if the establishment is otherwise engaged in the laundering, cleaning or repairing of clothing or fabrics under section 13(a)(3), the manufacturing activities may be disregarded in determining whether the establishment meets the tests of the 13(a)(3) exemption. If the establishment does meet the tests of section 13(a)(3) on the basis of its receipts from its laundry and linen supply services, only those employees exclusively engaged in these activities would qualify for exemption under this section of the Act.

REQUIREMENTS FOR EXEMPTION OF AN ESTABLISHMENT ENGAGED IN LAUNDERING, CLEANING OR REPAIRING CLOTHING OR FABRICS

§ 781.7 Requirements summarized.

To qualify for exemption, an establishment "engaged in laundering, cleaning, or repairing clothing or fabrics" as described in § 781.6, must meet the following two tests:

(a) More than 50 percent of the establishment's annual dollar volume of sales of such services must be made within the State in which the establishment is located, and

(b) At least 75 percent of the establishment's annual dollar volume of sales of such services must be to customers who are not engaged in a mining, manufacturing, transportation, or communications business.

§ 781.8 More than 50 percent intrastate sales required.

The first test for exemption specified in section 13(a)(3) is that more than 50 percent of the establishment's sales (measured by annual dollar volume) of "such services", that is laundry or dry cleaning services, must be made "within the State in which the establishment is located." This means that the establishment must be primarily engaged (more than 50 percent) in selling its services to customers within the State in which it is located. If the establishment is engaged to the extent of 50 percent or more in selling its laundry or dry cleaning services to customers outside the State of its location, the requirement is not met and the establishment cannot qualify for exemption.

§ 781.9 Out-of-State customers.

Whether the sale of laundry or dry cleaning service is made to an out-of-State customer is a question of fact. In order for a customer to be considered an out-of-State customer, some specific relationship between him and the seller has to exist to indicate his out-of-State character. On the one hand, sales made to customers in States other than the one in which the establishment is located, clearly, are not sales made within the State. This would be the case where the establishment's drivers pick up or deliver the laundry or dry cleaning to the customers in the other States, or where the establishment operates outlets in the other States, at which the customers deliver and pick up their own laundry or dry cleaning, or in other situations where the relationship with the customer is such as to indicate his out-of-State character. This would be the case, for example, where an out-of-State linen supply company in the regular course of dealing brings its linen into the State to be laundered by a laundry. The fact that in such a case the linen supply company delivers and picks up the linen in the State in which the laundry is located, would not alter the conclusion that the laundry service is sold to an out-of-State customer. On the other hand, sales made to the casual cash-and-carry customer of a laundry or dry cleaning establishment, who, for all practical purposes, is indistinguishable among the mass of customers who visit the establishment, are sales made within the State even if the seller knows or has reason to believe, because of his proximity to the State line or because he is frequented by tourists, that some of the customers who visit his establishment may reside outside the State. If the customer is of that type, sales made to him are sales made within the State even if the seller knows in the particular instance that the customer resides outside the State.

§ 781.10 Sales "made within the State" and "interstate" sales distinguished.

Sales to customers located in the same State as the establishment are sales made "within the State" even though such sales may constitute engagement in interstate commerce. For example, a sale to a customer in the same State as the establishment will be considered a sale made within the State even if the customer is engaged in interstate commerce or in the production of goods for interstate commerce.

§ 781.11 Determining percentage of out-of-State sales.

As explained in § 781.15, below, for the purposes of computing the "annual dollar volume" in section 13(a)(3) only sales of laundering and cleaning services are counted.

LIMITATIONS ON SALES TO CERTAIN CUSTOMERS

§ 781.12 Sales to certain customers limited to 25 percent.

The second test specified in section 13(a)(3) is that at least 75 percent of the sales of laundry or dry cleaning services (measured by annual dollar volume) must be made to customers who are not engaged in a "mining, manufacturing, transportation or communications business." No laundry or cleaning establishment will be exempt if more than 25 percent of its laundry or cleaning business is with such customers as those specified in the exemption. This is true whether the services performed are made directly to such businesses or through an intermediary. For example, the laundering of linens by a laundry establishment for a linen supply company which supplies these linens to customers engaged in a mining, manufacturing, transportation, or communications business, will be considered as services performed by the laundry establishment to customers engaged in such businesses. Whether a sale is made to a customer who is engaged in a mining, manufacturing, transportation or communications business is a question which must be determined on the basis of all the facts. It should be noted, however, that it is the "customer", and not his establishment or facility, to whom sales are limited under this provision. Thus, if the sale is made to a customer "engaged in a mining, manufacturing, transportation or communications business", it must be included in the 25 percent limitation regardless of whether it is made to him at his factory, his executive offices, or at any other of his establishments. The following paragraphs of this section contain some examples of sales which are regarded as made to customers in the named businesses and which must be included in the 25 percent limitation imposed by section 13(a)(3):

(a) *Mining.* The following are regarded as customers engaged in a mining business: Customers engaged in the extractive industries. This includes all customers engaged in the business of extraction of minerals, including solids, such as coal and ores; liquids, such as crude pretroleum; and gases, such as natural gas. The "mining" industry also includes quarrying, well operation, exploration and development of mineral properties, and other preparations required to render the materials marketable.

(b) *Manufacturing.* The exclusion of sales made to a "manufacturing" business is not limited to factories or other manufacturing plants. This exclusion applies to laundry services performed for a sales office of a manufacturing plant, whether the office is located at the plant or in a different city and regardless of whether the sales office has a direct connection with the management of the plant, since it is a part of the "manufacturing business" whose products it sells. Laundry services sold to a power distributor which produces the power which it distributes must be included in the 25 percent tolerance because the distributor is engaged in a "manufacturing" business. However, if the power distributor purchases the power from a producer or from other power distributors, it is engaged only in distribution and not in a "manufacturing" business.

(c) *Communications.* The limitation of sales to a "communications" business includes sales to customers such as newspapers, broadcasting companies, telephone and telegraph companies.

(d) *Transportation.* Customers engaged in a transportation business do not include those engaged only in that transportation which is incidental to the sale of goods or services. The customers referred to are those in the transportation industry itself, who engaged in transportation as a business, such as railroads, airlines, bus companies, steamship lines, trucking lines, or other motor carriers. Thus, the laundering of uniforms for a bus company would be included in the 25 percent limitation, whereas laundering of uniforms for drivers of a retail store would not be a sale to a customer in the "transportation business."

§ 781.13 Sale made to a named business.

Where clothing or fabrics are collected at or delivered to the employer's premises, and where the use of the particular types of clothing or fabrics is primarily for the benefit or convenience of the employer, the laundering, cleaning, or repairing is a service to the business. This is true whether or not the laundry or dry cleaner receives the clothing or fabrics for laundering, cleaning, or repairing from the employer directly or indirectly, and whether or not the clothing or fabrics are owned by the employees, and whether or not the laundering, cleaning, or repairing service is paid for by the employer or by the employees either directly or through deductions from their pay. Where the clothing is not of the type which is used primarily for the benefit or convenience of the employer "engaged in a mining, manufacturing, transportation, or communications business," but the employer nevertheless arranges and pays for the laundering, cleaning, or repairing of the clothing, the sales of these services are made directly to the employer and they are regarded as performed for the employer.

§ 781.14 Sales not made to a named business.

The section 13(a)(3) exemption applies to a laundry or dry cleaning establishment which meets the two requirements contained in the exemption, whether it launders towels or other linen for barber or beauty shops, doctors' or dentists' offices, or schools, hospitals, restaurants, or hotels, or for the housewife. Generally, also the laundering, cleaning or repairing of personal clothing, including work clothing, picked up from the employee's home, in the ordinary course of dealing, is not a sale of the service to one of the named businesses even if the employee is employed in a mining, manufacturing, communications or transportation business. Thus, if work clothes are picked up from an employee's home as a part of his home laundry in the ordinary course of dealing with the employee, the laundry service would not be included in the 25 percent limitation whether or not the clothing is used primarily for the benefit and convenience of his employer engaged in one of the businesses listed in section 13(a)(3).

COMPUTING THE ANNUAL VOLUME

§ 781.15 The annual period.

Both of the tests for exemption of a laundry or dry cleaning establishment under section 13(a)(3), are specified in terms of percentages of the "annual dollar volume of sales" of "such services." The term "such services" has reference to laundering, cleaning, or repairing clothing or fabrics. Therefore, in computing the annual dollar volume of sales only the sales of laundry and cleaning services are counted. The annual dollar volume of sales of a laundry or dry cleaning establishment thus consists of the gross receipts from all laundry and dry cleaning services during a 12-month period. Where there may be doubt as to whether the establishment qualifies under the percentage tests for the exemption, analysis of its gross receipts for such annual period must be made before the employer can know whether or not he is required, when he pays his employees, to observe the minimum wage and overtime pay standards of the Act with respect to employees covered by the Act.

§ 781.16 Calculation on a calendar year basis.

For purposes of determining the applicability of the exemption to an establishment during any calendar quarter (Jan. 1–Mar. 31; Apr. 1–Jun. 30; July 1–Sept. 30; Oct. 1–Dec. 31), analysis of the gross receipts from the various types of sales of laundry and dry cleaning services will be made on the basis of the annual (12 calendar months') period which immediately precedes the current calendar quarter. In this manner, the employer by analyzing the sales of the establishment for the twelve months immediately preceding any current quarter will know whether or not to comply with the requirements of the Act in the workweeks ending in such quarter-year period. Of course, in applying this rule, the gross receipts of an establishment for such 12-month period will constitute its annual dollar volume for that period even though the establishment did not operate throughout the entire year.

§ 781.17 Computation on a fiscal year basis.

Some establishments operate on a fiscal year, consisting of an annual period different from the calendar year, for income tax or sales or other accounting purposes. Such establishments, in applying the method of computation in § 781.16 may use the four quarters of the fiscal year period, instead of the four quarters of the calendar year, to determine whether the requirements of the exemption have been met in the workweeks ending in the current fiscal year quarter. Once adopted, the same basis must be used in subsequent computations.

§ 781.18 Computation for new business.

When a new business is commenced in an establishment, the employer will necessarily be unable for a time to determine its annual dollar volume on the basis of the preceding annual period described in § 781.16 or 781.17, because the establishment will have no gross receipts during such period. In such cases, for purposes of determining the applicability of the exemption in workweeks falling within the calendar quarter in which the establishment commenced operations, the gross receipts of such new business during the period in which it has been in operation will be taken as representative of the establishment's annual dollar volume in applying the statutory percentage tests. Similarly, for purposes of determining whether or not it has met the requirements for exemption under section 13(a)(3) in workweeks falling within the ensuing quarter year periods, the sales of laundry and dry cleaning services for the completed quarter year periods will be taken as representative of its annual dollar volume. After the establishment has been in operation a full year, the analysis can be made as described in § 781.16 or 781.17.

EMPLOYMENT "BY" AN EXEMPT ESTABLISHMENT

§ 781.19 Employment "by" establishment required for exemption.

Section 13(a)(3) exempts any employee "employed by" any establishment described in this exemption. Thus, where it is found that the laundry or dry cleaning establishment meets the tests for exemption, all employees "employed by" that establishment will be exempt from the minimum wage and overtime provisions of the Act, whether such employees perform their activities inside or outside the establishment. Thus, such employees as repair and service men and delivery men actually employed by an exempt laundry or dry cleaning establishment are exempt from the minimum wage and overtime provisions of the Act even if they perform the work of the establishment away from the premises.

§ 781.20 Employed within scope of exempt business.

In order to meet the requirement of actual employment "by" the establishment, an employee, whether performing his duties inside or outside the establishment, must be employed in the work of the exempt establishment itself in activities within the scope of its business (see Davis v. Goodman Lumber Co., 133 F. 2d 52; Northwest Airlines v. Jackson, 185 F. 2d 74; Walling v. Connecticut Co., 154 F. 2d 522, certiorari denied, 329 U.S. 667; and Wabash Radio Corp. v. Walling, 162 F. 2d 391).

§ 781.21 Employed "in" but not "by".

Since the exemption by its terms applies to employees "employed by" the exempt establishment, it follows that the exemption will not extend to other employees who although actually working in the establishment are not "employed by" the exempt establishment. Thus, traveling auditors, repairmen and others who are not "employed by" the exempt establishment in which they work will not be exempt merely because they happen to be working in such an exempt establishment (Mitchell v. Kroger Co., 248 F. 2d 945).

§ 781.22 Central offices and warehouses.

Employees in offices, warehouses, garages, etc., which service a single exempt laundry or dry cleaning establishment are regarded as "employed by" such exempt establishment and are within the section 13(a)(3) exemption. They will be exempt whether the office, warehouse or garage in which they work is part of the premises of such exempt establishment or is a separate establishment, and whether the exempt laundry or dry cleaning establishment by which they are employed performs on its premises all the operations (of receiving clothing or fabrics from customers, laundering, cleaning and repairing the articles, and redelivering the articles to the customers), or is served through separate establishments which receive and return the clothing or fabrics laundered, cleaned, or repaired to the customers. On the other hand, where a business organization operates a chain of laundry or dry cleaning establishments in which laundering, cleaning or repairing operations are performed on clothing or fabrics for the customers of such establishments, the employees working for the central offices and warehouses of such a chain of laundries or dry cleaning establishments will not qualify for the section 13(a)(3) exemption. Such central offices and warehouses, as separate and distinct establishments within the meaning of the exemption, perform no laundering, cleaning or repairing services and have no customers. Under such circumstances, the two tests of the section 13(a)(2) exemption cannot be applied to them. Moreover, employees of such central offices and warehouses are not "employed by" any laundry or dry cleaning establishment but rather "by" the chain itself.

WORKWEEK APPLICATION OF EXEMPTION

§ 781.23 Workweek is used in applying the exemption.

The unit of time to be used in determining the application of the exemption to an employee is the workweek (see Overnight Motor Transportation Co. v. Missel, 316 U.S. 572; McComb v. Puerto Rico Tobacco Marketing Co-op. Ass'n, 80 F. Supp. 953, affirmed 181 F. 2d 697). A workweek is a fixed and regularly recurring period of 168 hours—7 consecutive 24-hour periods. It may begin at any hour of any day and need not coincide with the calendar week. Once the workweek has been set it commences each succeeding week on the same day and at the same hour. Changing the workweek for the purpose of escaping the requirements of the Act is not permitted. If in any workweek an employee engages exclusively in work which is exempt under section 13(a)(3), he is exempt from the wage and hour provisions of the Act during that workweek, irrespective of the nature of his work in any other workweek or workweeks. Employees may thus be exempt in one workweek and not in the next.

§ 781.24 Exempt and noncovered work during the same workweek.

The wage and hour requirements of the Act do not apply to an employee during any workweek in which a portion of his activities fall within the exemption in section 13(a)(3) if all the remainder of his activities during that week are not covered by the Act.

§ 781.25 Exempt and nonexempt work during the same workweek.

Where an employee in the same workweek performs work which is exempt under section 13(a)(3) and also engages in work to which the Act applies, and which is not exempt under this or any other section of the Act, he is not exempt during that workweek, and the wage and hour requirements of the Act are applicable (see Mitchell v. Hunt, 263 F. 2d 913; Mitchell v. Maxfield, 12 WH Cases 792 (S.D. Ohio), 29 Labor Cases 69,781; Jordan v. Stark Bros. Nurseries, 45 F. Supp. 769; McComb v. Puerto Rico Tobacco Marketing Co-op. Ass'n, 80 F. Supp. 953, affirmed 181 F. 2d 697; Walling v Peacock Corp., 58 F. Supp.880–883).

§ 781.26 Work exempt under another section of the Act.

The combination ("tacking") of exempt work under section 13(a)(3) with exempt work under another section of the Act is permitted. The wage and hour requirements are not considered applicable to an employee who does work within section 13(a)(3) for only part of a workweek if all of the covered work done by him during the remainder of the workweek is within one or more equivalent exemptions under other provisions of the Act. If the scope of such exemptions is not the same, however, the exemption applicable to the employee is equivalent to that provided by whichever exemption provision is more limited in scope. In such a case, each activity is tested separately under the applicable exemption as if it were the sole activity of the employee for the whole workweek in question. The availability of a combination exemption depends on whether the employee meets all the requirements of each exemption which is sought to be combined.

Signed at Washington, D.C., this 20th day of February 1962.

CLARENCE T. LUNDQUIST,
Administrator.

Title 32—NATIONAL DEFENSE

Chapter VII—Department of the Air Force

SUBCHAPTER F—RESERVE FORCES

PART 861—OFFICERS' RESERVE USAF Officer Training School (OTS)

The following amendments are issued to this part:

1. Section 861.6 is revised to read as follows:

§ 861.6 Eligibility requirements.

This section outlines the basic eligibility requirements and requisite qualifications which must be met when applying. Waivers of the provisions of this section normally will not be granted. However, major air command headquarters may send requests that merit special consideration of Hq USAF (AFPTR), Washington 25, D.C.

(a) *Age and citizenship.* (1) Applicants for nonrated duty must be:

(i) United States male or female citizens who are at least 20½ years of age when applying.

(ii) Commissioned before reaching their 30th birthday.

(2) Applicants who desire flying training must be:

(i) United States male citizens between the ages of 20½ and 26½ when applying.

(ii) Enrolled into flying training before reaching their 27th birthday.

(b) *Marital restrictions*—(1) *Males.* No restrictions.

(2) *Females.* Must be unmarried and have no dependents when applying and must agree in writing to remain unmarried during the training program.

(c) *Air Force base or place of residence.* When applying, civilian applicants must be residing in the United States, Puerto Rico, or the Panama Canal Zone.

(d) *Educational qualifications.* (1) Applicants must be college graduates with a baccalaureate or higher degree from an accredited college or university. The school from which the degree is granted must be listed in the latest issue of part 3, "Higher Education," Education Directory, published by the Office of Health, Education, and Welfare, and must bear a level-of-training classification of II, III, or IV and a type-of-program classification of b, c, d, e, f, h, i, j, or k. In addition, the school must be accredited by a regional association for accrediting professional curricula. Graduates of schools bearing a type-of-program classification of g may be accepted, dependent upon the needs of the Air Force for the professional skill of the individual applicant.

(2) Applications from students enrolled in their senior year of college may be submitted 210 days before the applicant's scheduled graduation date. These persons will be processed as college graduates. Applicants will not be enlisted until documentary evidence has been submitted showing they have been awarded their degree. This document will be returned to the individual and will not be part of his enlistment file.

(3) If otherwise qualified, an applicant who is a graduate of a non-accredited American college or university, or who is a graduate of a foreign college or university, may meet the educational requirements by submitting a statement signed by the appropriate official of an accredited college or university offering graduate degrees certifying that the applicant meets the educational requirements for entrance into the graduate school or graduate division of that college or university.

(e) *Moral character.* Applicants must be of the highest moral character.

(f) *Medical standards.* (1) Male applicants applying for:

(i) Training in the administrative or technical career areas will be given a commissioning-type physical examination only.

(ii) Flying training will be examined for flying Class I or IA, whichever is applicable.

(2) Female applicants will be given a commissioning-type physical examination. When facilities are available, the medical examination may be accomplished at any Air Force installation, or it may be accomplished by a duly licensed doctor of medicine without expense to the Government.

(3) Applicants must meet the medical standards for the training they desire and for which they are selected.

2. In § 861.11(a), a new subdivision (v) is added to subparagraph (1), as follows:

§ 861.11 Preliminary processing.

(a) • • •

(1) • • •

(v) Recruiting Service detachment commanders or their authorized test control officers may administer booklet I of the AFOQT on the college campuses or in the field. Booklet I will be scored by AFAAEC's, and if successful, applicants will receive balance of testing at AFAAEC.

3. Section 861.12 is revised to read as follows:

§ 861.12 Air Force Academy and Aircrew Examining Centers (AFAAEC).

Each tentatively qualified applicant referred to an AFAAEC for final processing will be given the applicable booklets of the AFOQT, a complete medical examination as prescribed in § 861.6(f), and such other examinations as may be directed by Headquarters USAF. Waivers for failure to meet commissioning standards will not be granted. Applicants who have previously qualified on AFOQT will not be retested provided official record scores are available. The written examination will be given and scored before scheduling the medical examination. An applicant who fails to attain the minimum qualifying score on the officer quality portion of the AFOQT will not be processed further. A person will not be retested under any circumstances on the AFOQT before 1 year from the date he was last tested.

(Sec. 8012, 70A Stat. 488; 10 U.S.C. 8012. Interpret or apply 10 U.S.C. 9411) [AFR 53-27A, January 26, 1962]

By order of the Secretary of the Air Force.

CARROLL W. KELLEY,
Lieutenant Colonel, U.S. Air Force, Chief, Special Activities Group, Office of The Judge Advocate General.

SUBCHAPTER G—PERSONNEL

PART 881—PERSONNEL BOARDS

Air Force Board for Correction of Military Records

Sections 881.1 to 881.11 are rescinded and the following substituted therefor:

Sec.
881.1 Purpose.
881.2 Establishment, function, and jurisdiction of the Board.
881.3 Application for correction.
881.4 Time limit for filing application.
881.5 Exhaustion of other remedies.
881.6 Other proceedings not stayed.
881.7 Review of application.
881.8 Entitlement to hearing, notice, counsel, witnesses, and access to records.
881.9 Convening the Board.
881.10 Conduct of hearing.
881.11 Continuance.
881.12 Action by the Board.
881.13 Action by the Secretary of the Air Force.
881.14 Staff action.
881.15 Further hearing before the Board.
881.16 Settlement of claims.
881.17 Staff assistance.
881.18 Expenses.
881.19 Changes in procedures.

AUTHORITY: §§ 881.1 to 881.19 issued under sec. 8012, 70A Stat. 488; 10 U.S.C. 8012. Interpret or apply sec. 1552, 70A Stat. 116; 10 U.S.C. 1552.

SOURCE: AFR 31-3, January 2, 1962.

§ 881.1 Purpose.

Sections 881.1 to 881.19 establish procedures for making application, and the consideration of applications, for the correction of military records by the Secretary of the Air Force acting through the Air Force Board for the Correction of Military Records (hereinafter referred to as the "Board").

§ 881.2 Establishment, function, and jurisdiction of the Board.

(a) *Establishment and composition.* Pursuant to 10 U.S.C. 1552, the Air Force Board for the Correction of Military Records has been established in the Office of the Secretary of the Air Force. The Board consists of civilians of the executive part of the Department of the Air Force in such number, not less than three, as may be appointed by the Secretary of the Air Force. Three members present shall constitute a quorum of the Board. The Secretary designates one member as chairman. In the absence or incapacity of the chairman an acting chairman chosen by the Board shall act as chairman for all purposes.

(b) *Function.* The function of the Board is to consider all applications properly before it for the purpose of determining the existence of an error or an injustice and to make appropriate recommendations to the Secretary of the Air Force.

(c) *Jurisdiction.* The Board shall have jurisdiction to review and determine all matters properly brought before it, consistent with existing law.

§ 881.3 Application for correction.

(a) *General requirements*—(1) *Submission.* The application for correction should be submitted on DD Form 149, "Application for Correction of Military or Naval Record," or exact facsimile thereof, and should be addressed to: Hq USAF (AFCAS-64-C), Washington 25, D.C. Forms and explanatory matter may be obtained from Hq USAF (AFCAS-64-C), Washington 25, D.C.

(2) *By whom signed.* Except as provided in subparagraph (3) of this paragraph, the application shall be signed by the person requesting corrective action with respect to his record and will either be sworn to or will contain a provision to the effect that the statements submitted in the application are made with full knowledge of the penalty provided by law for making a false statement or claim (18 U.S.C. 287, 1001).

(3) *When person is unable to submit application himself.* When the record in question is that of a person who is incapable of making application himself, or whose whereabouts are unknown, or when such person is deceased, for the purpose of bringing the matter before the Board, the application may be made (except where compliance with the provisions of the law with respect to time limitations for filing an application may require otherwise) by such person as the Board shall determine to be competent and suitable and to have a proper interest therein, including but not limited to, a spouse, a parent, or relative. Such proof of suitability and proper interest shall be submitted as may be required by the Board.

§ 881.4 Time limit for filing application.

A claimant, his heir, or legal representative, must file the application for correction of a record with the Secretary of the Air Force within three years after discovery of the alleged error or injustice. Failure to file within the time prescribed may be excused by the Board if it finds it would be in the interest of justice to do so. If the claimant, his heir, or legal representative files an application more than three years after he discovers the error or injustice, he must include in his application his reasons why the Board should find it is in the interest of justice to excuse his failure to file the application within the time prescribed in this section.

§ 881.5 Exhaustion of other remedies.

No application will be considered until the applicant has exhausted all effective administrative remedies afforded him by existing law or regulations, and such legal remedies as the Board shall determine are practical and appropriately available to the applicant.

§ 881.6 Other proceedings not stayed.

The application to the Board for correction of a record shall not operate as a stay of any proceedings being taken with respect to the person involved.

§ 881.7 Review of application.

Each application and the available military or naval records pertinent to the corrective action requested will be reviewed to determine whether to authorize a hearing or to deny the application without a hearing. The Board will make this determination in all cases except those in which the application has been denied administratively for the reason that the applicant has not exhausted all other effective administrative remedies available to him, or for the reason that the applicant did not file his application within three years after he discovered the alleged error or injustice and did not submit any reason why the Board should find it to be in the interest of justice to excuse his failure to file within the prescribed three years. In connection with any application which it considers, the Board may recommend to the Secretary that the records be corrected, as requested by the applicant, without a hearing. The Board may deny an application if it determines that insufficient evidence has been presented to indicate probable material error or injustice, that the applicant has not exhausted other effective administrative or legal remedies available to him, that effective relief cannot be granted, or that the applicant did not file his application within three years after he discovered the alleged error or injustice and insufficient evidence has been presented to warrant a finding that it would be in the interest of justice to excuse the failure to file within the prescribed three years. The Board will not deny an application on the sole ground that the record or records involved were made by or by direction of the President or the Secretary in connection with proceedings other than proceedings of a Board for correction of military or naval records. If the application is denied, the applicant will be advised of the denial and that he is privileged to submit new and material evidence for consideration.

§ 881.8 Entitlement to hearing, notice, counsel, witnesses, and access to records.

(a) *General.* In each case in which a hearing is authorized, the applicant will be entitled to appear before the Board either in person or by counsel of his own selection or in person with counsel.

(b) *Notice*—(1) *To applicant and counsel.* In each case in which a hearing is authorized, the Board will transmit to the applicant and counsel, if any, a written notice stating the time and place of hearing. The notice will be mailed to the applicant and counsel, if any, at least 30 days prior to the date of hearing, except that an earlier date may be set where the applicant waives his right to such notice in writing.

(2) *Notifying Board.* Upon receipt of notice of hearing, the applicant will notify the Board in writing at least 15 days prior to the date set for hearing as to whether he will be present at the hearing and will indicate to the Board the name of counsel, if represented by counsel, and the names of such witnesses as he may intend to call in his behalf. Cases in which the applicant notifies the Board that he does not desire to be present at the hearing will be considered in accordance with § 881.10(b).

(c) *Definition of counsel.* The term "counsel" will be construed to include members in good standing of the Federal bar or the bar of any State, accredited representatives of veterans' organizations recognized by the Administrator of Veterans' Affairs under Title 38, United States Code, section 3402, and such other persons who, in the opinion of the Board, are considered to be competent to present equitably and comprehensively the request of the applicant for correction, unless barred by law.

(d) *Witnesses.* The applicant will be permitted to present witnesses in his behalf at hearings before the Board. It will be the responsibility of the applicant to notify his witnesses and to arrange for their appearance at the time and place set for hearing.

(e) *Access to records*—(1) *Official records.* The applicant shall have access to such official records as are deemed necessary to an adequate presentation of his case. It will be the responsibility of the applicant to procure such evidence not contained in the official records of the Department of the Air Force as he desires to present in support of his case.

(2) *Classified or privileged matter.* Classified or privileged matter shall not be disclosed or made available without express finding of the chairman that such disclosure is required in the case and is not detrimental to the public interest. Such disclosure shall not be contrary to existing law and departmental regulations concerning the security of classified material. When appropriate, the applicant may be supplied only with a summary or extract of classified matter.

§ 881.9 Convening the Board.

The Board will be convened at the call of the chairman and will recess or adjourn at his order.

§ 881.10 Conduct of hearing.

(a) *By chairman.* The hearing shall be conducted by the chairman, and shall be subject to his rulings so as to insure a full and fair hearing. The Board shall not be limited by legal rules of evidence but shall maintain reasonable bounds of competency, relevancy, and materiality.

(b) *When applicant is not present or represented at hearing.* If the applicant, after being duly notified, has indicated to the Board that he does not desire to be present or to be represented by counsel at the hearing, the Board will consider the case on the basis of all the material before it, including, but not limited to, the application for correction filed by the applicant, any documentary evidence filed in support of such application, any brief submitted by or in behalf of the applicant, and all available pertinent records.

(c) *When applicant fails to appear at time and place set for hearing.* If the applicant, after being duly notified, has indicated to the Board that he will be present or be represented by counsel at the hearing, and without good cause and timely notice to the Board, he or his representative fails to appear at the time and place set for the hearing, the Board may consider the case in accordance with the provisions of paragraph (b) of this section, or will make such other disposition of the case as is indicated under the circumstances.

(d) *Testimony.* All testimony before the Board shall be given under oath or affirmation. The proceedings of the Board and the testimony given before it will be recorded verbatim.

§ 881.11 Continuance.

The Board may continue a hearing on its own motion. A request for continuance by or in behalf of the applicant may be granted by the Board if a continuance appears necessary to insure a full and fair hearing.

§ 881.12 Action by the Board.

(a) *Deliberations, findings, decisions, and recommendations*—(1) *Deliberations.* Only members of the Board and its staff shall be present during the deliberations of the Board.

(2) *Further information.* During the course of review of the case, when it appears to the Board's satisfaction that the facts have not been fully and fairly disclosed by the records or by the testimony and other evidence before the Board, the Board may require the applicant to obtain, or the Board may obtain, such further information as it may consider essential to a complete and impartial determination of the facts and issues.

(3) *Findings, decisions, and recommendations.* Following a hearing, the Board will make written findings, decisions, and recommendations. A majority vote of the members present on any matter before the Board will constitute the action of the Board and shall be so recorded.

(4) *Separate communication.* Where the Board considers it necessary to submit comments or recommendations to the Secretary of the Air Force as to matters arising from but not directly related to the issues of any case, such comments and recommendations shall be the subject of separate communication.

(b) *Minority report.* In case of a disagreement between members of the Board, a minority report may be submitted, either as to the findings, decision, or the recommendations or to all, including the reasons therefor.

(c) *Record of proceedings.* When the Board has completed its proceedings, a record thereof shall be prepared. Such record shall indicate whether or not a quorum was present at the hearing and at the Board's deliberations. The record shall include the application for relief, a transcript of any testimony, affidavits, papers, and documents considered by the Board, briefs and written arguments filed in the case, the findings, decision and recommendations of the Board and all other papers, documents, and reports necessary to reflect a true and complete history of the proceedings. The record so prepared will be certified by the chairman or his designee as being true and complete.

(d) *Withdrawal.* The Board may permit an applicant to withdraw his application without prejudice at any time before its proceedings are forwarded to the Secretary of the Air Force.

§ 881.13 Action by the Secretary of the Air Force.

The record of proceedings of the Board will be forwarded to the Secretary of the Air Force who will direct such action in each case as he determines to be appropriate, which may include the return of the record to the Board for further consideration when deemed necessary.

§ 881.14 Staff action.

(a) *Returning case to Board.* Upon final action by the Secretary of the Air Force, the complete record in each case will be returned to the Board. The Board will transmit the decision of the Secretary of the Air Force to the Chief of Staff, USAF, for appropriate action.

(b) *Communicating decision to applicant and counsel.* Upon receipt of the record of proceedings after final action by the Secretary of the Air Force, the Board will communicate the decision to the applicant and counsel, if any.

(c) *Informing applicant when administrative action has been completed.* When all necessary administrative action has been completed by the Air Staff, the applicant will be informed of such action by the Air Staff office designated by the Chief of Staff, USAF.

(d) *Written notice to chairman of Board.* Written notice specifying the action taken and the date thereof will be transmitted to the chairman of the Board.

(e) *Filing record of decision of the Secretary of the Air Force.* The record of the decision of the Secretary of the Air Force will not be filed in the military records of the subject of the application where the effect of such action would be to nullify the relief granted or in those cases wherein the application is denied.

(f) *Inspection of record of proceedings.* After the Secretary of the Air Force has taken action on the record, the applicant or his counsel is entitled upon request to inspect the Record of Proceedings and to receive a copy of the Board's findings, decisions, and recommendations, unless the Chairman considers that granting the request would be detrimental to the public interest.

§ 881.15 Further hearing before the Board.

After final adjudication, further hearing before the Board will be granted only upon presentation by the applicant of newly discovered relevant evidence not previously considered by the Board and then only upon recommendation of the Board and approval by the Secretary of the Air Force.

§ 881.16 Settlement of claims.

(a) *Authority*—(1) *Claims authorized to be settled and paid.* The Department of the Air Force is authorized to pay claims in accordance with Title 10, United States Code, section 1552.

(2) *Claims not authorized to be paid.* The Department of the Air Force is not authorized to pay any claim heretofore compensated by Congress through enactment of a private law, or to pay any amount as compensation for any benefit to which the claimant might subsequently become entitled under the laws and regulations administered by the Administrator of Veterans' Affairs.

(b) *Application for settlement*—(1) *Filing claims.* Settlement and payment of claims shall be made only upon a claim of the person whose [illegible] been corrected or of his legal [illegible] tive, his heirs at law, or his [illegible] Such claim for settlement and [illegible] may be filed as a separate part [illegible] application for correction of the [illegible]

(2) *To whom payments will be [illegible] if person is deceased.* In case [illegible] whose record has been corrected [illegible] ceased, and where no demand [illegible] sented by a duly appointed legal [illegible] sentative of the estate, [illegible] otherwise due shall be made to [illegible] cedent's spouse, heir or beneficiary [illegible] order of precedence as prescribed [illegible] Title 10, United States Code, section [illegible]

(3) *Determining status as [illegible] parties to claim.* Upon request, [illegible] plicant or applicants shall be required [illegible] to furnish requisite information to [illegible] termine their status as proper parties [illegible] the claim for purposes of payment under [illegible] applicable provisions of law.

(c) *Settlement*—(1) *Basis for settlement.* Settlement of claims shall be based on the decision of the Secretary of the Air Force. Computation of the amounts due shall be made by the Comptroller of the Air Force, Headquarters USAF, or his representative. In no case will the amount found due exceed the amount which would otherwise have been paid or have become due under applicable laws had no error or injustice occurred. To the extent authorized by law and regulations, amounts found due may be reduced by the amount of any existing indebtedness to the Government arising from military service.

(2) *Advising as to nature and amount of various benefits.* Prior to or at the time of payment, the person to whom payments are to be made shall be advised by the Comptroller of the Air Force, Headquarters USAF, or his representative, as to the nature and amount of the various benefits represented by the [illegible] settlement, and shall be advised further that acceptance of such settlement will constitute a complete release by the claimants involved of any claim against the United States on account of the correction of records.

(d) *Report of settlement.* In any case where payment is made, the amount of such payment and the name of the payee or payees, shall be reported to the chairman of the Board.

§ 881.17 Staff assistance.

(a) *Assembling and transmitting available military records.* At the request of the Board, the appropriate staff office will assemble the original or certified copies of all available military records pertinent to the corrective action requested. Such records together with the application and all supporting papers will be transmitted to the Board with certification from the staff office designated by the Chief of Staff, USAF, that the corrective action requested cannot be granted through administrative action by any staff office.

(b) *Facilities of staff offices.* The facilities of all staff offices will be made available as required to assist the Board in accomplishing its function. Upon request of the Board, personnel of the Air Staff will be made available for presentation before the Board of matters [illegible]

...functional areas and which relate ... issues under consideration.

...38 Expenses.

... expense of any nature whatsoever, ...arily incurred by the applicant, ... counsel, his witnesses, or by any ... person in his behalf, will be paid by ... Government.

...39 Changes in procedures.

... Board may initiate recommendations for such changes in procedures as ...ished herein as may be considered ...ary for the proper functioning of ...ard. Such changes will be subject ... approval of the Secretary of the ... Force and the Secretary of Defense.

... order of the Secretary of the Air ...

CARROLL W. KELLEY,
Lieutenant Colonel, U.S. Air Force, Chief, Special Activities Group, Office of The Judge Advocate General.

Title 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans Administration

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

MISCELLANEOUS AMENDMENTS

1. In § 3.207, the headnote, introductory paragraph, and paragraph (c) are amended so that § 3.207 reads as follows:

§ 3.207 Void remarriages of widows.

Where a remarriage was void without recourse to court action, a determination may be made by the Veterans Administration without a court decree of annulment. Where the remarriage of a widow who seeks benefits as an unremarried person has been annulled by court decree, there should be furnished certified copies of:

(a) The petition to the court for annulment;

(b) The answer, if any;

(c) A transcript of the testimony, or the court's findings of fact and conclusions of law, if available; and

(d) The court decree of annulment.

2. In § 3.209, the introductory paragraph and paragraphs (d) and (f) are amended to read as follows:

§ 3.209 Birth.

Age or relationship should be established by one of the following types of evidence: *Provided*, That, if the name of the person appearing on the copy of a record is not the same as that appearing in the records of the Veterans Administration, an affidavit or a certified statement will be required identifying the person having the changed name as the person whose name appears in the record:

* * * * *

(d) Affidavit or a certified statement of the physician or midwife in attendance at birth.

* * * * *

(f) Affidavits or certified statements of two or more persons, preferably disinterested, who will state their ages, showing the name, date, and place of birth of the person whose age or relationship is being established, and that to their own knowledge such person is the child of such parents (naming the parents) and stating the source of their knowledge.

* * * * *

3. In § 3.210, paragraph (c) is amended to read as follows:

§ 3.210 Child's relationship.

* * * * *

(c) *Adopted child.* Except as provided in subparagraph (1) of this paragraph evidence of relationship will include a certified copy of the final decree of adoption and such other evidence as may be necessary.

(1) In jurisdictions where petition must be made to the court for release of adoption documents or information, or where release of such documents or information is prohibited, the following may be accepted to establish the fact of adoption:

(i) As to a child adopted into the veteran's family, a certified copy of the child's revised birth certificate.

(ii) As to a child adopted out of the veteran's family, a statement over the signature of the judge or the clerk of the court setting forth the child's former name and the date of adoption, or a certified statement by the veteran, his widow, apportionee, or their fiduciaries setting forth the child's former name, date of birth, and the date and fact of adoption together with evidence indicating that the child's original public record of birth has been removed from such records. Where application is made for an apportionment under § 3.458(d) on behalf of a child adopted out of the veteran's family, the evidence must be sufficient to establish the veteran as the natural parent of the child.

(2) As to a child adopted by the veteran's spouse after his death, the statement of the adoptive mother or custodian of the child will be accepted in the absence of information to the contrary, to show that the child was a member of the veteran's household at the date of his death and that recurring contributions were not being received for the child's maintenance sufficient to provide for the major portion of the child's support, from any person other than the veteran or his spouse or from any public or private welfare organization which furnished services or assistance to children. (38 U.S.C. 101)

* * * * *

4. In § 3.211, paragraph (g) is added to read as follows:

§ 3.211 Death.

* * * * *

(g) In the absence of evidence to the contrary, a finding of fact of death made by another Federal agency will be accepted for the purposes of paragraph (f) of this section.

5. In § 3.212, paragraph (c) is added to read as follows:

§ 3.212 Unexplained absence for 7 years.

* * * * *

(c) In the absence of evidence to the contrary, a finding of death made by another Federal agency will be accepted if the finding meets the requirements of paragraph (a) of this section.

6. In § 3.213, the introductory portion of paragraph (a) which precedes subparagraph (1) is amended and subparagraph (4) is added and in addition paragraph (c) is amended to read as follows:

§ 3.213 Change of status affecting entitlement.

(a) *General.* The best proof available will be required to establish a change of status which would result in payment of a higher rate of pension, compensation or dependency and indemnity compensation. For the purpose of reducing or discontinuing such benefits, a statement by a claimant or payee of a specific date of change of status which would result in a reduction or discontinuance of benefits to that person will be accepted, in the absence of contradictory information. This includes:

* * * * *

(4) *Parent.* A statement by a parent setting forth: (i) The fact and date of marriage or remarriage;

(ii) The date two parents or a parent and spouse ceased living together;

(iii) The date two parents or a parent and spouse resumed living together following a period of separation;

(iv) Divorce or death of a spouse.

* * * * *

(c) *Contradictory information.* Where there is reason to believe that the event reported may have occurred at an earlier date, formal proof will be required.

7. The cross reference immediately following § 3.213, is changed to read as follows:

CROSS REFERENCE: Material change in income, net worth or change in status. See § 3.660.

(72 Stat. 1114; 38 U.S.C. 210)

These regulations are effective February 28, 1962.

[SEAL] W. J. DRIVER,
Deputy Administrator.

Title 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Docket No. 33687]

PART 122—MONTHLY AND QUARTERLY OPERATING REPORTS

Subpart A—Railroads

REVENUE AND EXPENSES; SELECT INCOME AND BALANCE-SHEET ITEMS

At a session of the Interstate Commerce Commission, Division 2, held at its office in Washington, D.C., on the 12th day of July A.D., 1961.

On February 27, 1961, the Commission, Division 2, issued its notice of rule making, advising that it had under consideration the revision of 49 CFR 122.1, *Revenues and expenses*, and 49 CFR 122.2, *Selected income and balance-sheet items*, so as to require that all Class I railroads, except switching and terminal companies, subject to the provisions of Part I of the Interstate Commerce Act, be required to file quarterly reports in lieu of monthly reports in accordance with quarterly report forms to be designated Form R&E—Quarterly Report of Revenues and Expenses and Form IBS—Quarterly Report of Selected Income and Balance Sheet Items.[1] The notice stated that any party desiring to make representations in favor of or against the proposed changes might submit written data, views or arguments to the Commission within 30 days of the publication thereof in the FEDERAL REGISTER; the notice was served on all Class I railroads, except switching and terminal companies, subject to Part I of the Interstate Commerce Act; and it was published in the FEDERAL REGISTER on March 11, 1961, 26 F.R. 2132. Representations have been filed in favor of and in opposition to the proposed revisions.

Upon further consideration of the matters and things involved in the Commission's notice of rule making, as described above, and in consideration of representations for and against the proposed revisions, as submitted in response to such notice:

It is ordered, That, with respect to reports for the three months beginning January 1, 1962, and thereafter until further order, the ordering paragraph of the order of October 16, 1952, in the matter of Steam Railways—Monthly Reports, be, and it is hereby, modified and amended to read as shown in § 122.1 below, and that the ordering paragraph of the order of November 27, 1957, in the matter of Form IBS—Income and Balance Sheet Items, be, and it is hereby, modified and amended to read as shown in § 122.2 below.

It is further ordered, That 49 CFR 122.1 and 49 CFR 122.2 be, and they are hereby, modified and amended to read as follows:

§ 122.1 Revenues and expenses.

Commencing with reports for the three months beginning January 1, 1962, and thereafter until further order, all Class I railroads, except switching and terminal companies, subject to the provisions of Part I of the Interstate Commerce Act, be, and they are hereby, required to file quarterly reports of revenues and expenses in accordance with quarterly report Form R&E, and notes of instruction thereon, which is attached to and made a part of this section. Such quarterly reports shall be filed in duplicate in the Bureau of Transport Economics and Statistics, Interstate Commerce Commission, Washington 25, D.C., within 26 days after the end of the quarter to which they relate.

§ 122.2 Selected income and balance-sheet items.

Commencing with reports for the three months beginning January 1, 1962, and thereafter until further order, all Class I railroads, except switching and terminal companies, subject to the provisions of Part I of the Interstate Commerce Act, be, and they are hereby, required to file quarterly reports of selected income and balance sheet items in accordance with quarterly report Form IBS, and notes of instruction thereon, which is attached to and made a part of this section. Such quarterly reports shall be filed in duplicate in the Bureau of Transport Economics and Statistics, Interstate Commerce Commission, Washington 25, D.C., within 45 days after the end of the quarter to which they relate.

(Secs. 122.1 and 122.2 issued under sec. 12, 24 Stat. 383, as amended; 49 U.S.C. 12. Interpret or apply sec. 20, 24 Stat. 386, as amended; 49 U.S.C. 20)

And it is further ordered, That copies of this order, and of quarterly report Forms R&E and IBS, shall be served upon all Class I railroads, except switching and terminal companies, subject to the provisions of Part I of the Interstate Commerce Act, and upon every receiver, trustee, executor, administrator, or assignee of any such railroad, and that notice of this order shall be given to the general public by depositing a copy thereof in the office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Division 2.

[SEAL] HAROLD D. MCCOY, *Secretary*.

Title 50—WILDLIFE AND FISHERIES

Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

PART 33—SPORT FISHING

Kentucky Woodlands National Wildlife Refuge, Kentucky

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

§ 33.5 Special regulations; sport fishing for individual wildlife refuge areas.

KENTUCKY

KENTUCKY WOODLANDS NATIONAL WILDLIFE REFUGE

Sport fishing on the Kentucky Woodlands National Wildlife Refuge, Kentucky, is permitted only on the areas designated by signs as open to fishing. This open area, comprising 7,100 acres or 11 percent of the total area of the refuge, is delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, Peachtree-Seventh Building, Atlanta 23, Georgia. Sport fishing is subject to the following conditions:

(a) Species permitted to be taken: Black bass, rock bass, saugar, rockfish, crappie, and bream; and other minor species permitted by State regulations.

(b) Open season: Duncan Bay and interior lakes Hematite, Honker, Empire, and Esselstyne—April 1, 1962, to October 31, 1962. Daylight hours only in interior lakes.

(c) Daily creel limits: Black bass, 10; rock bass, 15; sauger, 10; rockfish, 4; white bass, 60; crappie, 60; bream, no limit. Other minor species as permitted by State regulations.

(d) Methods of fishing:

(1) Pole and line, rod and reel, artificial and live baits permitted.

(2) Row boats, canoes and other floating devices with motors permitted in Duncan Bay. Gasoline powered boats prohibited on interior lakes. Electric motors permitted.

(3) Bow and arrows may be used for taking non-game fish as prescribed by Kentucky Regulation KFWR-F-36.

(e) Other provisions:

(1) The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33.

(2) A Federal permit is not required to enter the public fishing area.

(3) The provisions of this special regulation are effective to November 1, 1962.

SOUTH CAROLINA

SANTEE NATIONAL WILDLIFE REFUGE

The special regulation permitting sport fishing on the Santee National Wildlife Refuge, South Carolina, 33.5, published January 31, 1962 in the FEDERAL REGISTER, Volume 27, Number 21, Page 987, is amended as follows:

(a) Species permitted to be taken: Largemouth black bass, striped bass, rockfish, white bass, crappie, bream, jackfish, and other minor species as permitted by State regulations. No size or weight limitations.

The provisions of this amended special regulation are effective to December 31, 1962.

W. L. TOWNS,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

Proposed Rule Making

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR Part 1]

INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Notice of Proposed Rule Making

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing, in duplicate, to the Commissioner of Internal Revenue, Attention: T:P, Washington 25, D.C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. Any person submitting written comments or suggestions who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his request, in writing, to the Commissioner within the 30-day period. In such a case, a public hearing will be held, and notice of the time, place, and date will be published in a subsequent issue of the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

[SEAL] MORTIMER M. CAPLIN,
Commissioner of Internal Revenue.

In order to conform the Income Tax Regulations (26 CFR Part 1) relating to section 170 of the Internal Revenue Code of 1954 to the Act of August 7, 1956 (Public Law 1022, 84th Cong., 70 Stat. 1117), and to sections 10, 11, and 12 of the Technical Amendments Act of 1958 (Public Law 85–866, 72 Stat. 1609–1610), and in order to make certain clarifying changes, such regulations are amended as follows:

PARAGRAPH 1. Section 1.170 is amended by revising section 170(b) and the historical note. As amended, § 1.170 reads as follows:

§ 1.170 Statutory provisions; charitable, etc., contributions and gifts.

SEC. 170. *Charitable, etc., contributions and gifts*—• • •

(b) *Limitations*—(1) Individuals. In the case of an individual the deduction provided in subsection (a) shall be limited as provided in subparagraphs (A), (B), (C), and (D).

(A) *Special rule.* Any charitable contribution to—

(i) A church or a convention or association of churches,

(ii) An educational organization referred to in section 503(b)(2), or

(iii) A hospital referred to in section 503(b)(5), or to a medical research organization (referred to in section 503(b)(5)) directly engaged in the continuous active conduct of medical research in conjunction with a hospital, if during the calendar year in which the contribution is made such organization is committed to spend such contributions for such research before January 1 of the fifth calendar year which begins after the date such contribution is made,

shall be allowed to the extent that the aggregate of such contributions does not exceed 10 percent of the taxpayer's adjusted gross income computed without regard to any net operating loss carryback to the taxable year under section 172.

(B) *General limitation.* The total deductions under subsection (a) for any taxable year shall not exceed 20 percent of the taxpayer's adjusted gross income computed without regard to any net operating loss carryback to the taxable year under section 172. For purposes of this subparagraph, the deduction under subsection (a) shall be computed without regard to any deduction allowed under subparagraph (A) but shall take into account any charitable contributions to the organizations described in clauses (i), (ii), and (iii) which are in excess of the amount allowable as a deduction under subparagraph (A).

(C) *Unlimited deduction for certain individuals.* The limitation in subparagraph (B) shall not apply in the case of an individual if, in the taxable year and in 8 of the 10 preceding taxable years, the amount of the charitable contributions, plus the amount of income tax (determined without regard to chapter 2, relating to tax on self-employment income) paid during such year in respect of such year or preceding taxable years, exceeds 90 percent of the taxpayer's taxable income for such year, computed without regard to—

(i) This section,

(ii) Section 151 (allowance of deductions for personal exemptions), and

(iii) Any net operating loss carryback to the taxable year under section 172.

In lieu of the amount of income tax paid during any such year, there may be substituted for that year the amount of income tax paid in respect of such year, provided that any amount so included in the year in respect of which payment was made shall not be included in any other year.

(D) *Denial of deduction in case of certain transfers in trust.* No deduction shall be allowed under this section for the value of any interest in property transferred after March 9, 1954, to a trust if—

(i) The grantor has a reversionary interest in the corpus or income of that portion of the trust with respect to which a deduction would (but for this subparagraph) be allowable under this section; and

(ii) At the time of the transfer the value of such reversionary interest exceeds 5 percent of the value of the property constituting such portion of the trust.

For purposes of this subparagraph, a power exercisable by the grantor or a nonadverse party (within the meaning of section 672(b)), or both, to revest in the grantor property or income therefrom shall be treated as a reversionary interest.

(2) *Corporations.* In the case of a corporation, the total deductions under subsection (a) for any taxable year shall not exceed 5 percent of the taxpayer's taxable income computed without regard to—

(A) This section,

(B) Part VIII (except section 248),

(C) Any net operating loss carryback to the taxable year under section 172, and

(D) Section 922 (special deduction for Western Hemisphere trade corporations).

Any contribution made by a corporation in a taxable year to which this section applies in excess of the amount deductible in such year under the foregoing limitation shall be deductible in each of the two succeeding taxable years in order of time, but only to the extent of the lesser of the two following amounts: (i) the excess of the maximum amount deductible for such succeeding taxable year under the foregoing limitation over the contributions made in such year; and (ii) in the case of the first succeeding taxable year the amount of such excess contribution, and in the case of the second succeeding taxable year the portion of such excess contribution not deductible in the first succeeding taxable year.

(3) *Special rule for corporations having net operating loss carryovers.* In applying the second sentence of paragraph (2) of this subsection, the excess of—

(A) The contributions made by a corporation in a taxable year to which this section applies, over

(B) The amount deductible in such year under the limitation in the first sentence of such paragraph (2), shall be reduced to the extent that such excess reduces taxable income (as computed for purposes of the second sentence of section 172(b)(2)) and increases a net operating loss carryover under section 172 to a succeeding taxable year.

(4) *Reduction for certain interest.* If, in connection with any charitable contribution, a liability is assumed by the recipient or by any other person, or if a charitable contribution is of property which is subject to a liability, then, to the extent necessary to avoid the duplication of amounts, the amount taken into account for purposes of this section as the amount of the charitable contribution—

(A) Shall be reduced for interest (i) which has been paid (or is to be paid) by the taxpayer, (ii) which is attributable to the liability, and (iii) which is attributable to any period after the making of the contribution, and

(B) In the case of a bond, shall be further reduced for interest (i) which has been paid (or is to be paid) by the taxpayer on indebtedness incurred or continued to purchase or carry such bond, and (ii) which is attributable to any period before the making of the contribution.

The reduction pursuant to subparagraph (B) shall not exceed the interest (including interest equivalent) on the bond which is attributable to any period before the making of the contribution and which is not (under the taxpayer's method of accounting) includible in the gross income of the taxpayer for any taxable year. For purposes of this paragraph, the term "bond" means any bond, debenture, note, or certificate or other evidence of indebtedness.

• • • • •

[Sec. 170 as amended by sec. 1, Act of Aug. 7, 1956 (Public Law 1022, 84th Cong., 70 Stat. 1117) and sec. 10, 11, and 12, Technical

Amendments Act 1958 (Public Law 85-866, 72 Stat. 1606-1610)]

PAR. 2. Section 1.170-1 is amended by revising paragraphs (b) and (c) thereof to read as follows:

§ 1.170-1 Charitable, etc., contributions and gifts; allowance of deduction.

* * * * *

(b) *Time of making contribution.* Ordinarily a contribution is made at the time delivery is effected. In the case of a check, the unconditional delivery (or mailing) of a check which subsequently clears in due course will constitute an effective contribution on the date of delivery (or mailing). If a taxpayer unconditionally delivers (or mails) a properly endorsed stock certificate to a charitable donee or the donee's agent, the gift is completed on the date of delivery (or mailing, provided that such certificate is received in the ordinary course of the mails). If the donor delivers the certificate to his bank or broker as the donor's agent, or to the issuing corporation or its agent, for transfer into the name of the donee, the gift is completed on the date the stock is transferred on the books of the corporation.

(c) *Contribution in property*—(1) *General rules.* If a contribution is made in property other than money, the amount of the deduction is determined by the fair market value of the property at the time of the contribution. The fair market value is the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts. If the contribution is made in property of a type which the taxpayer sells in the course of his business, the fair market value is the price which the taxpayer would have received if he had sold the contributed property in the lowest usual market in which he customarily sells, at the time and place of the contribution (and in the case of a contribution of goods in quantity, in the quantity contributed). The usual market of a manufacturer or other producer consists of the wholesalers or other distributors to or through whom he customarily sells, unless he sells only at retail in which event it is his retail customers. If a donor makes a charitable contribution of, for example, stock in trade at a time when he could not reasonably have been expected to realize its usual selling price, the value of the gift is not the usual selling price but is the amount for which the quantity of merchandise contributed would have been sold by the donor at the time of the contribution. Costs and expenses incurred in the year of contribution in producing or acquiring the contributed property are not deductible and are not a part of the cost of goods sold. Similarly, to the extent that costs and expenses incurred in a prior taxable year in producing or acquiring the contributed property are reflected in the cost of goods sold in the year of contribution, cost of goods sold must be reduced by such costs and expenses. Transfers of property to an organization described in section 170(c) which bear a direct relationship to the taxpayer's business and which are made with a reasonable expectation of financial return commensurate with the amount of the transfer may constitute allowable deductions as trade or business expenses rather than as charitable contributions. See section 162 and the regulations thereunder.

(2) *Reduction for certain interest.* (i) With respect to charitable contributions made after December 31, 1957, section 170(b)(4) requires that the amount of the charitable deduction be reduced for certain interest to the extent necessary to avoid the deduction of the same amount both as an interest deduction under section 163 and as a deduction for charitable contributions under section 170. The reduction is to be determined in accordance with subdivisions (ii) and (iii) of this subparagraph.

(ii) With respect to charitable contributions made after December 31, 1957, in determining the amount to be taken into account as a charitable contribution for purposes of section 170, the amount determined without regard to section 170(b)(4) or this subparagraph shall be reduced by the amount of interest which has been paid (or is to be paid) by the taxpayer, which is attributable to any liability connected with the contribution, and which is attributable to any period of time after the making of the contribution. The deduction otherwise allowable for charitable contributions under section 170 is required to be reduced pursuant to section 170(b)(4) only if, in connection with a charitable contribution, a liability is assumed by the recipient of the contribution or by any other person, or if the charitable contribution is of property which is subject to a liability. Thus, if the contribution is made in property and the transfer is conditioned upon the assumption of a liability by the donee or by some other person, any interest paid (or to be paid) by the taxpayer, attributable to the liability, and with respect to a period after the making of the contribution, will serve to reduce the amount that may be taken into account as a charitable contribution for purposes of section 170. The adjustment referred to in this subdivision must also be made where the contributed property is subject to a liability and the value of the property reflects the payment by the donor of interest with respect to a period of time after the making of the contribution.

(iii) If, in connection with the charitable contribution, after December 31, 1957, of a bond, a liability is assumed by the recipient or by any other person, or if the bond is subject to a liability, then, in determining the amount to be taken into account as a charitable contribution under section 170, the amount determined without regard to section 170(b)(4) or this subparagraph shall, without regard to whether any reduction may be required by subdivision (ii) of this subparagraph, also be reduced for interest which has been paid (or is to be paid) by the taxpayer on indebtedness incurred or continued to purchase or carry such bond, and which is attributable to any period before the making of the contribution. However, the reduction referred to in this subdivision shall be made only to the extent that such reduction does not exceed the interest (including bond discount and other interest equivalent) receivable on the bond, which is attributable to any period before the making of the contribution which is, by reason of the taxpayer's method of accounting, includible in the taxpayer's gross income for any taxable year. For purposes of section 170(b)(4) and this subdivision the term "bond" means any bond, debenture, note, or certificate or other evidence of indebtedness.

(iv) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. A, an individual using the cash receipts and disbursements method of accounting, on January 1, 1960, contributed to a charitable organization real estate having a fair market value of $10,000. In connection with the contribution the charitable organization assumed an indebtedness of $8,000 which A had incurred. A has paid two years' interest on that indebtedness (in 1960 and 1961) amounting to $960, and has taken an interest deduction of $960 for such amount. The amount of the gift, determined without regard to this subparagraph, is $2,960 ($10,000 less $8,000, the outstanding indebtedness, plus $960, the amount of prepaid interest). In determining the amount of the deduction for charitable contributions, the value of the gift ($2,960) must be reduced by $960 to eliminate from the computation of such deduction that portion thereof for which A has been allowed an interest deduction.

Example (2). On January 1, 1960, B, an individual using the cash receipts and disbursements method of accounting, purchased for $9,600 a 5½ percent $10,000, 20-year M Corporation bond, the interest on which was payable semiannually on June 30 and December 31. The M Corporation had issued the bond on January 1, 1960, at a discount of $720 from the principal amount. On December 1, 1960, B donated the bond to a charitable organization, and, in connection with the contribution, the charitable organization assumed an indebtedness of $7,000 which B had incurred to purchase and carry the bond. During the calendar year 1960 B paid accrued interest of $330 on the indebtedness for the period from January 1 to December 1, 1960, and has taken an interest deduction of $330 for such amount. No portion of the bond discount of $36 a year ($720 divided by 20 years) has been included in B's income, and of the $550 of annual interest receivable on the bond, he included in income only the June 30 payment of $275. The market value of the bond on the date of the contribution was $9,902. Such value reflects a proportionate part of the original bond discount ($9,280 plus $393, or $9,673) and of interest receivable of $229 which had accrued from July 1 to December 1, 1960. The amount of the charitable contribution determined without regard to this subparagraph is $2,902 ($9,902, the value of the property on the date of gift, less $7,000, the amount of the liability assumed by the charitable organization). In determining the amount of the allowable deduction for charitable contributions, the value of the gift ($2,902) must be reduced to eliminate from the deduction that portion thereof for which B has been allowed an interest deduction. Although the amount of such interest deduction was $330, the reduction required by this subparagraph is limited to $302, since the reduction is not in excess of the amount of interest income on the bond ($550) or accrued interest plus $33, the amount of bond discount attributable to the eleven-month period B held the bond).

... Section 1.170–2 is amended by ... subparagraph (1) of paragraph ... by revising subparagraphs (1) and ... of paragraph (b), and by revising ...graph (1) and subdivisions (i) ... (ii) of subparagraph (2) of para... (b). As amended, § 1.170–2 reads ... follows:

§ 1.170–2 Charitable deductions by individuals; limitations.

(a) *In general.* (1) A deduction is allowable to an individual under section ... only for charitable contributions actually paid during the taxable year, regardless of when pledged and regardless of the method of accounting employed by the taxpayer in keeping his books and ... A contribution to an organization described in section 170(c) is deductible even though some portion of the ... of the organization may be used ... foreign countries for charitable or ...tional purposes. The deduction by ...individual for charitable contributions under section 170 is limited generally to 20 percent of the taxpayer's ...ted gross income (computed without ...rd to any net operating loss carryback to the taxable year under section ... If a husband and wife make a ... return, the deduction for contributions is the aggregate of the contributions made by the spouses, and the limitation in section 170(b) is based on the ...regate adjusted gross income of the ...uses. The 20-percent limitation applies to amounts contributed during the ...able year "to or for the use of" ... recipients described in section 170 (c). The limitation is computed without ...rd to contributions qualifying for the ...tional 10-percent deduction. For ...mples of the application of the 10 ... 20-percent limitation, see paragraph (b)(5) of this section. For special rules ...ising amount of certain charitable ...butions, see paragraph (c)(2) of § 1.170–1.

• • • • •

(b) *Additional 10 percent deduction—*(1) *In general.* In addition to the deduction which may be allowed for contributions subject to the general 20-percent limitation, an individual may deduct charitable contributions made during the taxable year to the organizations specified in section 170(b)(1)(A) to the extent that such contributions in the aggregate do not exceed 10 percent of his ...sted gross income (computed without regard to any net operating loss carryback to the taxable year under section 172). The additional 10-percent deduction may be allowed with respect to contributions to—

(i) A church or a convention or association of churches,

(ii) An educational organization referred to in section 503(b)(2) and defined in subparagraph (3) of this paragraph,

(iii) A hospital defined in subparagraph (4)(i) of this paragraph, and

(iv) Subject to certain conditions and limitations set forth in subparagraph (4)(ii) of this paragraph, and for taxable years beginning after December 31, 1955, a medical research organization referred to in section 503(b)(5).

To qualify for the additional 10-percent deduction the contribution must be made "to", and not merely "for the use of", one of the specified organizations. A contribution made to a trust, community chest, or other organization referred to in section 170(c), which in turn makes the contribution available to a church, school, hospital, or medical research organization, will not qualify under the 10-percent limitation unless such trust, community chest, or other organization acts merely as an agent of the taxpayer in delivering the contribution. The computation of this additional deduction is not necessary unless the total contributions paid during the taxable year are in excess of the general 20-percent limitation. Where the total contributions exceed the 20-percent limitation, the taxpayer should first ascertain the amount of charitable contributions subject to the 10-percent limitation, and any excess over the 10-percent limitation should then be added to all other contributions and limited by the 20-percent limitation.

• • • • •

(4) *Hospital and medical research organization*—(i) *Hospital.* The term "hospital", as used in section 170(b)(1)(A), means an organization the principal purposes or functions of which are the providing of hospital or medical care. The term includes Federal and State hospitals otherwise coming within the definition but does not include medical education organizations, or medical research organizations. See, however, subdivision (ii) of this subparagraph, relating to contributions to certain medical research organizations for taxable years beginning after December 31, 1955. A rehabilitation institution or an outpatient clinic may qualify as a hospital if its principal purposes or functions are the providing of hospital or medical care. The term "hospital" does not include convalescent homes or homes for children or the aged, nor does the term include institutions whose principal purposes or functions are to train handicapped individuals to pursue some vocation.

(ii) *Certain medical research organizations.* (a) For taxable years beginning after December 31, 1955, certain charitable contributions made to certain medical research organizations may be taken into account in computing the additional 10-percent limitation. To be so taken into account the charitable contribution must be made to a medical research organization that is directly engaged in the continuous active conduct of medical research in conjunction with a hospital (as defined in subdivision (i) of this subparagraph), and, during the calendar year in which the contribution is made, the organization must be committed to spend the contribution for such active conduct of medical research before January 1 of the fifth calendar year beginning after the date the contribution is made.

(*b*) As used in section 170(b)(1)(A) and this subparagraph, the term "medical research organization" means an organization the principal purpose or function of which is to engage in medical research. Medical research may be defined as the conduct of investigations, experiments, and studies to discover, develop, or verify knowledge relating to the causes, diagnosis, treatment, prevention, or control of physical or mental diseases and impairments of man. To qualify as a medical research organization, the organization must have the appropriate equipment and professional personnel necessary to carry out its principal function.

(c) The organization must, at the time of the contribution, be directly engaged in the continuous active conduct of medical research in conjunction with a hospital described in subdivision (i) of this subparagraph. The organization need not be formally affiliated with a hospital to be considered engaged in the active conduct of medical research in conjunction with a hospital, but it must be physically connected, or closely associated, with a hospital. In any case, there must be a joint effort on the part of the research organization and the hospital pursuant to an understanding that the two organizations shall maintain continuing close cooperation in the active conduct of medical research. For example, the necessary joint effort will normally be found to exist if the activities of the medical research organization are carried on in space located within or adjacent to a hospital provided that the organization is permitted to utilize the facilities (including equipment, case studies, etc.) of the hospital on a continuing basis in the active conduct of medical research. A medical research organization which is closely associated, in the manner described above, with a particular hospital or particular hospitals, may be considered to be pursuing research in conjunction with a hospital if the necessary joint effort is supported by substantial evidence of the close cooperation of the members of the research organization and the staff of the particular hospital or hospitals. The active participation in medical research by the staff of the particular hospital or hospitals will be considered as evidence of the requisite joint effort. If the organization's primary purpose is to disburse funds to other organizations for the conduct of research by them, or, if the organization's primary purpose is to extend research grants or scholarships to others, it is not directly engaged in the active conduct of medical research, and contributions to such an organization may not be taken into account for purposes of the additional 10-percent limitation.

(*d*) A charitable contribution to a medical research organization may be taken into account in computing the additional 10-percent limitation only if the organization is committed to spend such contribution for medical research in conjunction with a hospital on or before the first day of the fifth calendar year which begins after the date the contribution is made. The organization's commitment that the contribution will be spent within the prescribed time only for the prescribed purposes must be legally enforceable. A promise in writing to the donor in consideration of his making a contribution that such contribution will be so

spent within the prescribed time will constitute a commitment. The expenditure of contributions received for plant, facilities, or equipment, used solely for medical research purposes shall ordinarily be considered to be an expenditure for medical research for purposes of section 170(b) and this section. If a contribution is made in other than money, it shall be considered spent for medical research if the funds from the proceeds of a disposition thereof are spent by the organization within the five-year period for medical research; or, if such property is of such a kind that it is used on a continuing basis directly in connection with such research, it shall be considered spent for medical research in the year in which it is first so used.

• • • • •

(c) *Unlimited deduction for individuals.*—(1) *In general.* (i) The deduction for charitable contributions made by an individual is not subject to the 10- and 20-percent limitations of section 170(b) if in the taxable year and each of 8 of the 10 preceding taxable years the sum of his charitable contributions paid during the year, plus his payments during the year on account of Federal income taxes, is more than 90 percent of his taxable income for the year (or net income, in years governed by the Internal Revenue Code of 1939). In determining the applicability of the 10- and 20-percent limitations of section 170(b) for taxable years beginning after December 31, 1957, there may be substituted, in lieu of the amount of income tax paid during any year, the amount of income tax paid in respect of such year, provided that any amount so included for the year in respect of which payment was made shall not be included for any other year. For the purpose of the first sentence of this paragraph, taxable income under the 1954 Code is determined without regard to the deductions for charitable contributions under section 170, for personal exemptions under section 151, or for a net operating loss carryback under section 172. On the other hand, for this purpose net income under the 1939 Code is computed without the benefit only of the deduction for charitable contributions. See section 120 of the Internal Revenue Code of 1939. The term "income tax" as used in section 170(b)(1)(C) means only Federal income taxes, and does not include the taxes imposed on self-employment income, on employees under the Federal Insurance Contributions Act (chapter 21 of the Code) or on railroad employees and their representatives under the Railroad Retirement Tax Act (chapter 22 of the Code) by chapters 2, 21, and 22, respectively, or corresponding provisions of the Internal Revenue Code of 1939. For purposes of section 170(b)(1)(C) and this paragraph, the amount of income tax paid during a taxable year shall be determined (except as provided in subdivision (ii) of this subparagraph) by including all payments made by the taxpayer during such taxable year on account of his Federal income taxes (whether for the taxable year or for preceding taxable years). Such payments would include any amount paid during the taxable year as estimated tax for that year, payment of the final installment of estimated tax for the preceding taxable year, final payment for the preceding taxable year, and any payment of a deficiency for an earlier taxable year, to the extent that such payments do not exceed the tax for the taxable year for which payment is made. Any payment of income tax with respect to which the taxpayer receives a refund or credit shall be reduced by the amount of such refund or credit. Any such refund or credit shall be applied against the most recent payments for the taxable year in respect of which the refund or credit arose.

(ii) For any taxable year beginning after December 31, 1957, the applicability of the 10- and 20-percent limitations of section 170(b) may be determined either with reference to the income tax paid during the year or any prior year, or with reference to the income tax paid in respect of any such year or prior years. The 90-percent test of section 170(b)(1)(C) may be applied for the taxable year, or for any one or more of the preceding 10 taxable years, by taking into account the income taxes paid in respect of that year or years, and for the balance of the 10 years by taking into account the income tax payments made during those years. Thus, a taxable year which qualifies under either of the two permissible methods shall be considered as a qualifying year irrespective of whether the taxable year begins before or after December 31, 1957. However, a particular income tax payment may only be taken into account once, either with respect to the year of liability or for the year of payment.

(2) *Joint returns.*—(i) *Joint return for current taxable year.* If a husband and wife make a joint return for any taxable year, their deduction for charitable contributions is not subject to the 10- and 20-percent limitations of section 170(b), if, under the rules of subparagraph (1) of this paragraph, in the taxable year and in each of 8 of the 10 preceding taxable years (regardless of whether separate or joint returns were filed), the aggregate charitable contributions of both spouses paid during the year, plus their aggregate payments during the year on account of Federal income taxes (or, if the taxable year begins after December 31, 1957, the aggregate tax paid in respect of such taxable year or any preceding taxable year) exceed 90 percent of their aggregate taxable incomes for the year.

(ii) *Separate return by spouse or by unremarried widow or widower.* If a spouse, or the unremarried widow or widower of a deceased spouse, makes a separate return for any taxable year, his deduction for charitable contributions is not subject to the 10- and 20-percent limitations of section 170(b), if, under the rules of subparagraph (1) of this paragraph, in the taxable year and each of 8 of the 10 preceding taxable years—

(*a*) For which the taxpayer filed a joint return with his spouse, either their aggregate charitable contributions and payments of Federal income taxes made during the taxable year (or if the taxable year begins after December 31, [illegible] made in respect of such [illegible] or any preceding taxable year) [illegible] percent of their aggregate [illegible] come for that year, or the [illegible] separate charitable contributions [illegible] payments of Federal income [illegible] locable to his separate income [illegible] during the taxable year (or if the [illegible] able year begins after December [illegible] 1957, made in respect of such [illegible] year or any preceding taxable year) [illegible] ceeds 90 percent of his separate [illegible] income for that year, and

(*b*) For which the taxpayer did [illegible] file a joint return with his spouse, [illegible] gregate of his charitable contributions [illegible] and payments of Federal income [illegible] made during the taxable year (or, if [illegible] taxable year begins after December [illegible] 1957, the payments of income taxes [illegible] in respect of such taxable year or [illegible] preceding taxable year) exceeds 90 [illegible] cent of his taxable income for that year.

For the purpose of the preceding sentence, the word "spouse" does not include a spouse from whom the taxpayer has been divorced.

PAR. 4. Section 1.170–3 is amended by revising paragraph (a), and paragraph (c) of § 1.170–3 is amended by adding subparagraphs (3) and (4) thereto. As amended, § 1.170–3 reads as follows:

§ 1.170–3 Contributions or gifts by corporations.

(a) *In general.* The deduction by a corporation in any taxable year for charitable contributions, as defined in section 170(c), is limited to 5 percent of its taxable income for the year, computed without regard to:

(1) The deduction for charitable contributions,

(2) The special deductions for corporations allowed under part VIII (commencing with section 248), subchapter B, chapter 1 of the Code,

(3) Any net operating loss carryback to the taxable year under section 172, and

(4) The special deduction for Western Hemisphere trade corporations under section 922.

A contribution by a corporation to a trust, chest, fund, or foundation organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes or for the prevention of cruelty to children or animals is deductible only if the contribution is to be used in the United States or its possessions for those purposes. See section 170(c)(2). For the purposes of section 170, amounts excluded from the gross income of a corporation under section 115 (relating to sports programs conducted for the American National Red Cross) are not to be considered contributions. For certain charitable, etc., deductions, see paragraphs (c)(2), (e) and (f) of § 1.170–1.

• • • • •

(c) *Charitable contributions carryover of corporations.* • • •

(3) A corporation having a net operating loss carryover (or carryovers) must apply the special rule of section 170(b)

... subparagraph before com... subparagraph (1) of this ... the charitable contributions ... for any taxable year subject to ... Revenue Code of 1954. In ... the amount of charitable ... that may be deducted in ... taxable years succeeding the ... the contribution, the excess of ... made by a corporation in ... of contribution over the amount ... in such year must be re... by the amount by which such ex... taxable income (for pur... determining the net operating ... under the second sentence ... 172(b)(2)) and increases a ... loss carryover to a succeed... year. Thus, if the excess of ... contributions made in a taxable year ... amount deductible in the ... year is utilized to reduce tax... for such year for purposes ... the net operating loss de... for such year, thereby serving ... the amount of the net oper... loss carryover to a succeeding year ... years, no charitable contributions ... will be allowed. If only a ... of the excess charitable contribu... is so used, the charitable contri... carryover will be reduced only ... that extent.

(3) The application of the rule of ... paragraph (3) of this paragraph may ... illustrated by the following example:

Example. A corporation which reports its ... on the calendar year method makes ... contribution of $10,000 during ... year 1960. Its taxable income for ... is $80,000 (computed without regard to ... net operating loss deduction and com... in accordance with section 170(b)(2) ... regard to any deduction for chari... contributions). The corporation has ... operating loss carryover from 1959 of ... In the absence of the net operating ... deduction the corporation would have ... allowed a deduction for charitable con... of $4,000 (5 percent of $80,000). ... the application of the net operating ... deduction the corporation is allowed no ... for charitable contributions, and ... is a tentative charitable contribution ... of $10,000. For purposes of deter... the net operating loss carryover to ... the corporation computes its taxable ... for its prior taxable year 1960 under ... 172(b)(2) by deducting the $4,000 ... contribution. Thus, after the ... net operating loss carryover is applied ... the $76,000 of taxable income for ... (computed in accordance with section ...(3)), there remains a $4,000 net ... loss carryover to 1961. ($4,000) which was used to reduce ... income for 1960 (as computed for ... of the second sentence of section ...(b)(2)) and which thereby served to in... the net operating loss carryover to ... from zero to $4,000.

PAR. 5. Paragraph (a) of § 1.673(b)–1 is revised to read as follows:

§ 1.673(b)–1 Income payable to charitable beneficiaries.

(a) Pursuant to section 673(b) a grantor is not treated as an owner of any portion of a trust under section 673, even though he has a reversionary interest which will take effect within 10 years, to the extent that, under the terms of the trust, the income of the portion is irrevocably payable for a period of at least 2 years (commencing with the date of the transfer) to a designated beneficiary of the type described in section 170(b)(1)(A).

PAR. 6. Paragraph (c) of § 1.681(a)–2 is revised to read as follows:

§ 1.681(a)–2 Limitation on charitable contributions deduction of trusts with trade or business income.

* * * * *

(c) *Examples.* (1) The application of this section may be illustrated by the following examples, in which it is assumed that the Y charity is not a charitable organization qualifying under section 170(b)(1)(A) (see subparagraph (2) of this paragraph):

* * * * *

(2) If, in the examples in subparagraph (1) of this paragraph, the Y charity were a charitable organization qualifying under section 170(b)(1)(A), then the deduction allowable under section 512(b)(11) would be computed at a rate of 30 percent.

PAR. 7. Subparagraph (1) of paragraph (a) of § 1.681(b)–1 is revised to read as follows:

§ 1.681(b)–1 Limitation on charitable contributions deduction of trusts engaged in prohibited transactions.

(a) *In general.* (1) If a trust has engaged in a "prohibited transaction," the charitable contributions deduction which would otherwise be allowable to the trust under section 642(c) is limited by section 681(b)(1) to 20 percent of the taxable income of the trust (computed without any charitable contributions deduction), except that an additional deduction of up to 10 percent of such taxable income is allowed for amounts actually paid to organizations qualifying under section 170(b)(1)(A). There is no requirement that amounts subject to the 20-percent limitation be actually paid, if they are set aside or are to be used exclusively for charitable or other purposes so that they would be deductible under section 642(c).

PAR. 8. Paragraph (b) of § 1.681(c)–1 is revised read as follows:

§ 1.681(c)–1 Limitation on charitable contributions deduction of trusts accumulating income.

* * * * *

(b) *Extent of limitation.* If a trust is subject to the limitations of section 681(c) for any taxable year, the charitable deduction which would otherwise be allowable to the trust under section 642(c) is limited to amounts actually paid out during the taxable year, and is limited to 20 percent of the taxable income of the trust (computed without any charitable deduction), except that an additional deduction of up to 10 percent of such taxable income is allowed for amounts actually paid to organizations qualifying under section 170(b)(1)(A).

PAR. 9. Paragraph (b) of § 1.702–1 is revised to read as follows:

§ 1.702–1 Income and credits of partner.

* * * * *

(b) *Character of items constituting distributive share.* The character in the hands of a partner of any item of income, gain, loss, deduction, or credit described in section 702(a)(1) through (8) shall be determined as if such item were realized directly from the source from which realized by the partnership or incurred in the same manner as incurred by the partnership. For example, a partner's distributive share of gain from the sale of depreciable property used in the trade or business of the partnership shall be considered as gain from the sale of such depreciable property in the hands of the partner. Similarly, a partner's distributive share of partnership "hobby losses" (section 270) or his distributive share of partnership charitable contributions to organizations qualifying under section 170(b)(1)(A) retains such character in the hands of the partner.

DEPARTMENT OF THE INTERIOR

National Park Service

[36 CFR Part 7]

DINOSAUR NATIONAL MONUMENT, UTAH-COLORADO

Boats

Notice is hereby given that pursuant to the authority contained in section 3 of the act of August 25, 1916 (39 Stat. 535; 16 U.S.C. 3), Departmental Order 2640 (16 F.R. 5846), National Park Service Order No. 14 (19 F.R. 8824), Regional Director, Region Two, Order No. 3 (21 F.R. 1494), as amended, it is proposed to amend 36 CFR Part 7 as set forth below. The purpose of this amendment is to establish reasonable regulations which will provide adequate control over water-borne craft and insure a maximum of safety in their use.

It is the policy of the Department of the Interior whenever practicable, to afford the public an opportunity to participate in the rule making process. Accordingly, interested persons may submit written comments, suggestions, or objections with respect to the proposed amendment to the Superintendent, Dinosaur National Monument, 91 West Main, Room 12, Cooper Building, Vernal, Utah, within thirty days of the date of publication of this notice in the FEDERAL REGISTER.

EARL M. SEMINGSEN,
Superintendent,
Dinosaur National Monument.

Paragraph (a) is added to § 7.63 of Part 7 to read as follows:

§ 7.63 Dinosaur National Monument.

(a) *Boats—(1) Permit.* No privately owned boat, canoe, raft, or other waterborne or floating craft shall be placed or operated upon the waters of Dinosaur National Monument without a permit from the Superintendent, who shall have authority to revoke the permit and require the immediate removal of such craft upon the failure of the permittee to comply with the terms and conditions of this permit.

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

[7 CFR Part 729]

PEANUTS

Notice of Proposed Determinations To Be Made With Respect to Supply of Valencia Type Peanuts for 1962–63 Marketing Year

Pursuant to section 358(c) of the Agriculture Adjustment Act of 1938, as amended (7 U.S.C. 1358(c)), the Secretary of Agriculture is preparing to determine whether the supply of Valencia type peanuts for the 1962–63 marketing year will be insufficient to meet the estimated demand for cleaning and shelling purposes. Section 358(c) of the Act, as amended, reads in part as follows:

Notwithstanding any other provision of law, if the Secretary og Agriculture determines, on the basis of the average yield per acre of peanuts by types during the preceding five years, adjusted for trends in yields and abnormal conditions of production affecting yields in such five years, that the supply of any type or types of peanuts for any marketing year, beginning with the 1951–52 marketing year, will be insufficient to meet the estimated demand for cleaning and shelling purposes at prices at which the Commodity Credit Corporation may sell for such purposes peanuts owned or controlled by it, the State allotments for those States producing such type or types of peanuts shall be increased to the extent determined by the Secretary to be required to meet such demand but the allotment for any State may not be increased under this provision above the 1947 harvested acreage of peanuts for such State. The total increase so determined shall be apportioned among such States for distribution among farms producing peanuts of such type or types on the basis of the average acreage of peanuts of such type or types in the three years immediately preceding the year for which the allotments are being determined. The additional acreage so required shall be in addition to the national acreage allotment, the production from such acreage shall be in addition to the national marketing quota, and the increase in acreage allotted under this provision shall not be considered in establishing future State, county, or farm acreage allotments.

Prior to determining whether the supply of Valencia type peanuts for the 1962–63 marketing year will be insufficient to meet the estimated demand for cleaning and shelling, consideration will be given to any data, views and recommendations relating thereto which are submitted in writing to the Director, Oils and Peanut Division, Agricultural Stabilization and Conservation Service, United States Department of Agriculture, Washington 25, D.C. All written submissions must be postmarked not later than March 9, 1962.

Signed at Washington, D.C., on February 23, 1962.

E. A. JAENKE,
Acting Administrator, Agricultural Stabilization and Conservation Service.

FEBRUARY 23, 1962.

MILK IN GREATER BOSTON, SOUTHEASTERN NEW ENGLAND, SPRINGFIELD AND WORCESTER MARKETING AREAS

Notice of Recommended Decision and Opportunity To File Written Exceptions on Proposed Amendments to Tentative Marketing Agreements and to Orders

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Assistant Secretary, United States Department of Agriculture, with respect to proposed amendments to the tentative marketing agreements, and orders regulating the handling of milk in the Greater Boston, Southeastern New England, Springfield, and Worcester marketing areas. Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D.C., not later than the close of business the 5th day after publication of this decision in the FEDERAL REGISTER. The exceptions should be filed in quadruplicate.

Preliminary statement. The hearing on the record of which the proposed amendments, as hereinafter set forth, to the tentative marketing agreements and to the orders, were formulated, was conducted at Boston, Massachusetts on December 20, 1961, pursuant to notice thereof which was issued December 12, 1961 (26 F.R. 12037).

The material issue on the record of hearing relates to providing an exemption from pooling on all or a portion of any milk received by a pool handler from public and private institutions.

Findings and conclusions. The following findings and conclusions on the material issue are based on evidence presented at the hearing and the record thereof:

The provisions of the Greater Boston, Southeastern New England, Springfield and Worcester milk orders should be amended to provide in the alternative (a) an exemption from pooling on milk received by a pool handler from state and local governments which operate dairy farms, or (b) the pooling of all milk produced and received by a handler from any such governing body as "producer" milk." The exemption should apply only if the eligible governing body utilizes such milk on its premises and distributes no milk through commercial outlets.

A private, nonprofit institution operating a dairy farm should continue in its present status as a producer with respect to milk from such farm received at a fully regulated plant.

A small number of nonprofit institutions which operate dairy farms, and are "producers" under the respective orders, use facilities of pool handlers for the purpose of processing and packaging their milk in quantities required to fulfill their fluid needs. There are five such institutions, public and private, under the Greater Boston order, four under the Southeastern New England order and one each under the Worcester and Springfield orders. Of such 11 institutions, four are operated by governmental agencies.

The normal practice of these institutions is to deliver all milk produced on their farms to regulated handlers' plants. All or part of such milk is processed, packaged and returned to the institutions thereof. The milk not needed by the institutions is retained for disposition by the handlers.

The proportion of the milk so returned to these institutions individually varies from minor quantities of the milk produced to all of it. Institutions using facilities of Boston, Springfield and Worcester order pool plants require for their own use, on the average, about 40 percent of their aggregate production. Institutions in the Southeastern New England market utilize on the average about 12 percent of their total production.

Under the present provisions of the orders, a handler receiving such milk from an institution is required to pay the institution at least the applicable blended price for all deliveries. The milk returned to the institution is accounted for by the handler at the applicable order's Class I price. Thus, the handler incurs an obligation under the order of the difference between the Class I and blended price on the milk so returned. This order obligation customarily is passed on to the institution as part of the cost of processing the milk.

The proposal as presented would provide an exemption from order pricing on that portion of the milk produced by the institution, processed by a pool

...e, and returned for consumption ... the institution. The milk retained ... the processing handler would con... to be treated as "producer milk" ... would be priced accordingly.

Prior to September 1, 1960, an exemption from pooling was provided under the Boston, Worcester and Springfield orders on milk returned to all "dairy farmer-distributors." The Southeastern New England order has not provided such an exemption. Official notice is now taken of the Secretary's decision of August 10, 1960 (25 F.R. 7819), to amend the several New England orders, in which appears a discussion of the need for amending the "exempt milk" definition to exclude thereform milk returned to dairy farmer-distributors."

An important factor in such decision to amend the orders was that the exempt milk provision allowed dairy farmer-distributors to avoid the pooling and pricing provisions on fluid milk while at the same time receiving the blended price on any surplus milk associated with their fluid operations to the disadvantage of other producers. The decision found that in May, 1959, there were 68 such dairy farmer-distributors using the exempt milk provisions in this manner.

To adopt the provision proposed likewise would be disadvantageous to producers furnishing milk for commercial outlets since the institution would not be required to share its fluid consumption with other producers through market pooling, but nevertheless would be entitled to share in the fluid (Class I) sales of the other producers. While other producers share the full burden of the lower value of the market supply of milk not needed for fluid use, the institution would be required to share only a portion of such burden, since its own Class I consumption would not be pooled.

Several of the private institutions in question produce substantially more milk on a year-round basis than is required to meet their respective needs. In addition, several of such institutions use the production of their herds to supply self-operated private schools. The fluid milk needs of these schools vary widely, depending on whether classes are in session. During vacation periods the entire production is delivered to pool plants and is paid for at the applicable blended price. The institution thereby derives an additional significant benefit from pooling since it receives the blended price on milk which normally would be used for fluid purposes during the school year but has no fluid outlet in other months.

Most of the private institutions operate in a manner not substantially different from other producers in the market. The institution's production is not necessarily geared to its own fluid milk needs. In some of the cases, at least, the successful operation of the farm enterprise depends on receipt of the blended price on the substantial proportion of the milk production which is retained by the processing handler.

Although in each instance any effect on blended prices which would result from granting the proposed exemption would be small in terms of the entire market, an exemption would not be consonant with the marketing principles which make marketwide pooling an important stabilizing factor in the market. The successful application of pooling requires that all participants share proportionately in the higher value of all fluid milk sales and in the lower value of the surplus associated with such sales. Effective marketwide equalization could not persist if special consideration were given under the order in each case where it could be shown that the particular farm enterprise was in some respect different from that of the typical milk producer.

In the case of an institution operated under public authority, the opportunity should be provided for complete exemption from the "producer" definition and pooling provisions of the order for milk produced. As a matter of public policy, the operation of a dairy farm by a state-operated facility for the purpose of carrying out a sovereign, public function of the state need not meet interference from this Federal regulation designed to regularize commercial transactions. It is proposed, therefore, that state or local governmental bodies which operate dairy farms be provided a choice as to whether or not their entire deliveries of dairy farm production to a handler are to be pooled and priced as producer milk under the order.

The alternative of complete exemption will provide appropriate procedures for eliminating any order pricing requirement as to such operations. Complete exemption would provide that any milk produced in excess of such institution's requirements and retained by a pool handler would be paid for by negotiation between the institution and the handler. The receiving handler would not be required to pay the institution the minimum blended price for such milk as announced under the order. If an exemption were taken by the governmental body the effect would be to eliminate the pooling of the milk retained by the handler as well as that returned to the institution for consumption. The surplus over the fluid needs of the market thus would not be increased by any excess of milk produced by the institution over its own fluid requirements, with a consequent reduction in the blended price to other producers. Milk returned by the regulated handler to the institution would be covered by the definition of "exempt milk" and any milk retained by the regulated handler would be accounted for under the order in accordance with the order's definition of "outside milk" ("other source milk" in the Southeastern New England order), without payment obligation under the order unless utilized in Class I.

Because of the seasonal aspects of milk production and for administrative convenience the alternative of complete exemption should apply for not less than 12 consecutive months. If a governmental body elects the exemption, written notification to that effect should be given to the market administrator, and to the handler to which it delivers, on or before the last day of the first month for which the exemption would be applicable.

Rulings on proposed findings and conclusions. Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General findings. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreements and the orders, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing areas, and the minimum prices specified in the proposed marketing agreements and the orders, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreements and the orders, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Recommended marketing agreements and orders amending the orders. The following orders amending the orders regulating the handling of milk in the Greater Boston, Southeastern New England, Springfield, and Worcester marketing areas are recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreements are not included in this decision because the regulatory provisions thereof would be the same as those contained in the orders, as hereby proposed to be amended:

Greater Boston order amendments:

1. In § 1001.2(e) delete the word "nor," change the period at the end of the sentence to a comma, and add the following: "or a local or state government not engaged in the resale of any packaged fluid milk products on routes, if such governing body so elects by

written notification to the market administrator and the handler to which it delivers, in which event such election shall be effective for the 12 months beginning with the month in which the election is made, and for each subsequent month until cancelled in writing."

2. In § 1001.4(j), delete the word "or" at the end of subparagraphs (1) and (2), change the period at the end of subparagraph (3) to a semicolon (;), add the word "and" thereafter, and add a new subparagraph (4) to read as follows:

(4) Milk received at a regulated plant in bulk from the dairy farmer who produced it, in the amount of any packaged fluid milk products returned to such dairy farmer, if the dairy farmer is a state or local government which is not engaged in the resale on routes of any of the returned packaged fluid milk products and which has elected nonproducer status for the month pursuant to § 1001.2(e).

Southeastern New England order amendments:

1. Add the following immediately after the word *"Provided"* in § 1014.2(e): "That this definition shall not include a local or state government not engaged in the resale of any packaged fluid milk products on routes, if such governing body so elects by written notification to the market administrator and the handler to which it delivers, in which event such election shall be effective for the 12 months beginning with the month in which the election is made, and for each subsequent month until cancelled in writing: *And provided further,*".

2. In § 1014.4(g) delete the word "or" at the end of subparagraph (3), change the period at the end of subparagraph (3) to a semicolon (;) add the word "and" thereafter, and add a new subparagraph (4) to read as follows:

(4) Milk received at a regulated plant in bulk from the dairy farmer who produced it, in the amount of any packaged fluid milk products returned to such dairy farmer, if the dairy farmer is a state or local government which is not engaged in the resale on routes of any of the returned packaged fluid milk products and which has elected nonproducer status for the month pursuant to § 1014.2(e).

Springfield, Massachusetts order amendments:

1. In § 1006.2(e) delete the word "nor," change the period at the end of the sentence to a comma, and add the following: "or a local or state government not engaged in the resale of any packaged fluid milk products on routes, if such governing body so elects by written notification to the market administrator and the handler to which it delivers, in which event such election shall be effective for the 12 months beginning with the month in which the election is made, and for each subsequent month until cancelled in writing."

2. In § 1006.4(j) delete the word "or" at the end of subparagraphs (1) and (2), change the period at the end of subparagraph (3) to a semicolon (;), add the word "and" thereafter, and add a new subparagraph (4) to read as follows:

(4) Milk received at a regulated plant in bulk from the dairy farmer who produced it, in the amount of any packaged fluid milk products returned to such dairy farmer, if the dairy farmer is a state or local government which is not engaged in the resale on routes of any of the returned packaged fluid milk products and which has elected nonproducer status for the month pursuant to § 1006.2(e).

Worcester, Massachusetts order amendments:

1. In § 1007.2(e) delete the word "nor," change the period at the end of the sentence to a comma, and add the following: "or a local or state government not engaged in the resale of any packaged fluid milk products on routes, if such governing body so elects by written notification to the market administrator and the handler to which it delivers, in which event such election shall be effective for the 12 months beginning with the month in which the election is made, and for each subsequent month until cancelled in writing."

2. In § 1007.4(j), delete the word "or" at the end of subparagraphs (1) and (2), change the period at the end of subparagraph (3) to a semicolon (;), add the word "and" thereafter, and add a new subparagraph (4) to read as follows:

(4) Milk received at a regulated plant in bulk from the dairy farmer who produced it, in the amount of any packaged fluid milk product returned to such dairy farmer, if the dairy farmer is a state or local government which is not engaged in the resale on routes of any of the returned packaged fluid milk products and which has elected nonproducer status for the month pursuant to § 1007.2(e).

Signed at Washington, D.C., on February 23, 1962.

JOHN P. DUNCAN, JR.,
Assistant Secretary.

[F.R. Doc. 62-1998; Filed, Feb. 27, 1962; 8:49 a.m.]

[7 CFR Part 1126]

[Docket Nos. AO 231-A15, AO 231-A18]

MILK IN NORTH TEXAS MARKETING AREA

Decision on Proposed Amendments to Tentative Marketing Agreement and to Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), public hearings were held at Dallas, Texas, on April 24, 25 and 26, and August 29, 1961, pursuant to notices thereof issued on March 28, 1961 (26 F.R. 2750), and August 18, 1961 (26 F.R. 7837), respectively.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Assistant Secretary, United States Department of Agriculture, on January 9, 1962 (27 F.R. 412; F.R. Doc. 62-404) filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues on the record of the hearings relate to:

1. Classification and accounting for dietary products and other fortified fluid milk products.
2. Modification of the conditions for pooling plants also meeting the pooling requirements of another Federal order.
3. "Individual-handler" pooling in lieu of the present marketwide pooling.
4. Classification of fluid milk products disposed of for animal feed.
5. Application of handler location adjustments.

The notice of hearing contained a proposal (No. 6) relating to the establishment of more definite handler, location and cooperative responsibilities, under the order, for individual producer's weights and tests of milk. No testimony was offered either in support of or in opposition to Proposal No. 6, therefore, no further mention is made of this proposal.

Findings and conclusions. The following findings and conclusions on the material issues are based on evidence at the hearing and the record thereof:

1. *Classification and accounting for dietary products and other fortified fluid milk products.* Fortified fluid milk products should be classified as Class I only to the extent of the weight of an unmodified fluid milk product of the same nature and butterfat content, excluding the dry weight of nonmilk ingredients such as flavoring, sugar, etc. The skim milk equivalent of the nonfat milk solids not classified as Class I should be considered a Class II disposition.

The present order provisions provide for full skim milk equivalent accounting so that when nonfat milk solids in the form of nonfat dry milk or condensed skim milk are added to a fluid milk product to increase the nonfat milk solids content, the skim milk equivalent of the total nonfat milk solids in the product is classified as Class I. Producer milk is given priority of assignment in Class I and to the extent that producer receipts are available in the plant, producers receive credit for a Class I utilization on the full skim milk equivalent of other source nonfat milk solids received in concentrated form and used in fortification or reconstitution. When Class I utilization exceeds available producer receipts and "other source milk" is assigned to Class I a compensatory charge is applicable on such other source milk as assigned unless such milk has been classified and priced as Class I by another Federal order. Where nonmilk products such as sugar, flavoring, etc., are used in making any product, the weight of such additives is deducted before reconciliation of the pounds of skim and butterfat to be classified.

Proprietary handlers proposed that fluid milk dietary foods be classified as Class II in lieu of the present Class I classification and that the skim milk equivalent accounting for nonfat milk solids used in fortification be discontinued. It was their position that the product cost resulting from the present

...classification of dietary fluid milk ... placed them at a competitive ...tage with similar products in ...rm or in hermetically sealed con... made from non-Grade A milk ...milk products and distributed ...h grocery stores, drug stores, food ...ments and similar outlets. ...suggested that a Class II classifica... and pricing would permit more com... resale pricing and hence create a ...demand for their product. Their ...changes, they suggested, would ...to facilitate the economic disposi... of reserve supplies of milk of the ...f. They further contended that a ...I classification and pricing on the ...milk equivalent of nonfat milk ...used in the fortification of Class I ...is unrealistic and unduly in... handlers' costs.

...ers, on the other hand, opposed ...change in the present accounting ...re. It was their position that ...skim milk equivalent accounting is ...to protect the integrity of the ...tion scheme under the order and ...unless nonfat milk solids used in ...tion are accounted for on a skim ...equivalent basis in Class I, handlers ...opportunity to displace producer ...in Class I with lower priced other ...milk.

A great deal of the testimony on the ...was offered to substantiate that ...y milk products were, or were not, ...ed to be made from locally ap... milk under the various health ...ances in effect in the marketing ... Regardless of the intent of the ...ances it is apparent that the local ...authorities are not interpreting ...in a manner so as to require that ...products be made from locally ap... milk. However, this is of little ...quence since handlers are not per...d to bring fluid non-Grade A milk ...skim milk into their plants. Under ...circumstances it is clear that, be... of the perishability of the finished ...y product, handlers use only milk ...highest quality and hence they ...and rely on their regular Grade ...producers to furnish their full fluid ...requirements. Therefore, it is ap...ate and necessary that the Class I ...tion be retained.

Fortification of fluid milk products ...arily is accomplished by the addi... of concentrated nonfat milk solids ...fluid milk or skim milk to yield a ...d product of higher nonfat milk ...content than that of an equivalent ...nt of whole (producer) milk. Re...tituted products, on the other hand, ...ve the process of "floating" concen...d milk solids in water to yield a ...t of product approximately equal ...the weight of milk from which the ...ntrated product was first made by ...removal of water.

Nonfat dry milk and condensed skim ...milk are ordinarily derived from un...ced milk or milk which has been priced ...surplus under a Federal order. These ...ducts are not necessarily processed ...producer milk and may be made ...ungraded milk. An economic in...tive exists for handlers to substitute, ...where possible, reconstituted fluid milk products for fluid milk products processed from current receipts of producer milk. Since such substitution would displace an equivalent amount of producer milk in Class I, the application of skim milk equivalent accounting in this circumstance is economically sound and is necessary to maintain orderly marketing.

The same economic incentive does not exist, however, with respect to the use of nonfat dry milk or condensed skim milk to fortify a fluid milk product. If such solids are to be derived from producer milk, the skim milk must first be processed into usable form; i.e., nonfat dry milk or condensed skim milk. Such products processed from producer milk have no greater value for fortification purposes than similar products purchased on the open market. Concentrated products are used in fortification to increase the palatability of, and hence the salability of, the finished product. Fortification only slightly increases the volume of the product and under no circumstances can it be concluded that the added solids displace producer milk in Class I beyond the minor increase in volume which results.

When the skim milk equivalent provision is applied to fortified milk products, it inflates significantly the utilization and disposition of Class I milk. The inflation in the case of dietary food products results in a Class I classification of about two and one-half times the actual volume.

For reasons previously stated it is neither necessary nor appropriate that handlers continue to be required to account and pay for this inflated volume in Class I. Nevertheless, it is practical and administratively necessary to maintain full skim milk equivalent accounting. These conclusions can be reconciled by providing that fortified fluid milk products shall be classified as Class I only to the extent of the weight of an unmodified fluid milk product of the same nature and butterfat content, excluding the dry weight of any nonmilk additive such as flavoring, sugar, etc. The skim milk equivalent of the nonfat milk solids not classified in Class I should be considered as Class II disposition.

No change was proposed in the accounting procedure followed in cases where flavoring and other nonmilk additives are used in processing unfortified products. The dry weight of such additives should be deducted in determining the amount of skim milk and butterfat to be accounted for. This is generally consistent with the procedure now employed and the conclusions hereinbefore set forth relative to the accounting procedure to be employed for fortified products.

2. *Modification of the conditions for pooling plants also meeting the pooling requirements of another Federal order.* The pooling provisions of the order should be modified to permit a distribution plant meeting the requirements for full regulation under this order and another Federal order and with a greater proportion of its Class I disposition in the other market, but which was pooled under this order in the most recent month, to retain pooling status under this order until the third consecutive month in which a greater volume of Class I sales is made in such other marketing area. However, it must be recognized that the provisions of the other order may require such plant to be pooled under such other order. In such circumstances, the plant should be exempted from regulation under this order except for a requirement to file reports and permit verification. Provision should also be made to exempt a distributing plant doing a greater proportion of its total Class I business in this marketing area, but which, nevertheless, retains pooling status for the month under another order. Federal orders generally provide that a distributing plant meeting the pooling requirements for more than one order shall be regulated under that order covering the area in which the greater volume of Class I sales are made. Nevertheless, it should be recognized that other orders may contain similar provisions to those herein proposed to deter plants from changing back and forth between two orders on a month-to-month basis.

Under the present order provisions, any distributing plant which disposes of Class I milk in the marketing area is subject to full regulation under this order, unless, a greater volume of Class I disposition is made in another Federal order marketing area.

A handler operating pool distributing plants in both Dallas and Fort Worth and also distributing milk in the Central West Texas, Austin-Waco, and San Antonio Federal order markets, proposed that the order be amended to permit his plants to retain pooling status under this order unless Class I sales in another market exceeding Class I sales in this market over an extended period of time. He indicated that his sales in the Central West Texas market were of such nature that a small increase in sales in that market or decrease of sales in this market could result in regulation of the Fort Worth plant under the Central West Texas order. He foresaw the possibility that audit adjustments could result in removal of this plant from regulation under this order, in favor of the Central West Texas order, retroactively. It was this handler's position that a shift in regulation of either of his plants would tend to create disorder in the two markets because of the effect on the respective market blend prices and because of the different procedures prescribed under the two regulations for distributing returns to producers (North Texas has a base rating plan).

While it seems likely that proponent's initial proposal (an identical proposal was also made to amend each of the other Texas Federal orders) was made with the view that its adoption would permit him to bid in military and other government contracts in other Federal order markets without the possibility of losing pooling status under this order, it is apparent that the distribution from his plants is such that a relatively inconsequential change in the proportion of distribution as between the Central West Texas market and the North Texas mar-

ket could result in regulation under the Central West Texas order. It is also possible that the plant might later shift back to North Texas on a similar basis.

A plant doing business in several Federal order markets generally should be regulated under that order under which it does the greatest proportion of its Class I business. This is the principle under which the existing provisions were effected and this record provides no basis for changing this conclusion. Nevertheless, it must be recognized that with recent technological changes in the processing and distribution fields, milk is moved great distances and distribution routes have been greatly extended. It is apparent that while proponent has greatly increased his Central West Texas sales in recent years he does not contemplate or intend that his plant should become subject to regulation under that order. Such a change would have greater adverse affects on producers than on handlers since class prices as between the two orders are aligned. Nevertheless, it is possible, due to a management error or errors on the part of a plant employee or a route salesman that an inadvertent sale might result in an unintended change in pooling. It is also possible, as proponent suggests, that a change in classification during audit might produce the same result.

The situation can be substantially alleviated by adoption of the changes herein recommended. Under this procedure a handler would have two months warning that his plant was changing from one regulation to another, thus providing a reasonable time to permit adjustment of his business in cases where such change was not contemplated. At the same time, this change retains the principle of regulating a plant under that order where the greatest proportion of its Class I business is done. Since government contracts normally are made for longer periods than two months there is no reason to expect that the changes recommended will have any significant effect on the length of time in which a plant is pooled in a particular order where the change in the proportion of business is the result of gaining or losing a government contract.

While the situation prompting the proposal existed only between the Central West Texas and North Texas markets, and involved only one plant, nevertheless, because of the location of the North Texas, market in relation to other Federal order markets, it is possible that a similar situation could develop with a plant now regulated under another order or with some other plant now regulated under this order. The treatment herein prescribed would be equally appropriate in such instances.

While there is no indication that the existing pooling requirements for supply plants have presented any particular problem it cannot be presumed that this will be true in the future. Under the existing order provisions a supply plant which during any month ships 50 percent of its Grade A milk receipts to a pool distributing plant and which is assigned to reserve supply credit is eligible for pooling during such month. Under prescribed circumstances the plant may be pooled on the basis of 15 percent shipments if average shipments in the most recent four or less months equal 50 percent of Grade A milk receipts. A plant which is pooled in each of the months of September through December is eligible for automatic pooling status during the January–July period (and also August if a 15 percent shipping requirement is met) on application by the operator to the market administrator prior to January 31. During the September–December period any plant also meeting the pooling requirements of another order and which otherwise would be pooled under another order is exempted from regulation under this order.

During the short production months when milk is most needed to meet the fluid milk requirements of a market, it is desirable that supply plants meeting the pooling requirements of more than one order be pooled on a month-to-month basis under that order under which the greater qualifying shipments are made. This also is an appropriate standard for pooling plants during the flush production months except in the situation where a plant retains automatic pooling status under this order by virtue of performance during the short production months. During the flush production months when milk of supply plants is least likely to be needed for fluid uses this order (as well as many other Federal orders) provides automatic pooling status for supply plants which have been closely associated with the market in the previous short production months by virtue of substantial and regular shipments to the market. Requiring a supply plant with automatic pooling status under this order to be regulated under another order on the basis of casual shipments during any flush production month would normally adversely affect returns to established producers in the market to which shipments were made. It would therefore be more appropriate to permit such a plant to retain pooling status during the flush production months in the North Texas market with which it has had an established association and automatic pooling status. Any plant which might be qualified for automatic pooling status during the flush production months in another Federal order market would be required to make substantial shipments to the North Texas market (normally 50 percent) to qualify for pooling under this order during such months. Shipments of this magnitude could not be considered as casual shipments and under the circumstances it is appropriate to require that a plant shipping 50 percent or more of its supply and having it assigned to reserve supply be pooled under the order.

The recommended order revisions hereinafter set forth will implement the foregoing conclusions and in conjunction with changes recently recommended in the language of other Texas Federal orders will facilitate the determination of where a plant meeting the pooling requirements of more than one order should be regulated.

As was pointed out by proponent one of the major problems involved in the shifting of plants from one regulation to another, is the impact on producer returns where a base-excess plan is involved. Under the present order provisions, if a plant is removed from regulation under this order in favor of regulation under another order during any part of the base-forming period and subsequently again becomes regulated under this order during all or any part of the base-operating period, the returns to dairy farmers associated with such plant are adversely affected by the fact that such dairy farmers did not acquire a full base. Similarly, dairy farmers delivering to any plant acquiring pooling status for the first time during the base-operating period would be paid only the excess price during the base-operating period. This situation cannot be concluded to be equitable as among producers nor can it be considered to be in the interest of orderly marketing. Dairy farmers delivering milk to a fully regulated plant should share in returns from the market's Class I sales on the same basis as other producers.

The sole purpose of a base-excess plan is to encourage more even production throughout the year. This purpose will be implemented by providing opportunity for the operator of a newly regulated plant to establish his seasonality of receipts and hence, bases for each of the producers. However, the operator of the plant must assume the responsibility of providing the market administrator the necessary records to verify his receipts from each producer during the base-forming months. The recommended amendment to the computation of bases hereinafter set forth is necessary to implement these conclusions.

3. *Provision for individual-handler pooling in lieu of marketwide pooling.* The present provisions providing for a marketwide pooling should not be changed. The order has provided for marketwide pooling since its inception. Under this arrangement all handlers are required to account to the pool for all of their milk receipts on a classified use basis at specified minimum class prices. Each month the total value of the pool is distributed among all producers on the basis of a blended or uniform price, except that during the months of March through June one blended price is applicable to deliveries of milk not in excess of each producer's established base and another blended price is applicable to deliveries in excess of established bases.

A handler who generally receives little or no milk from members of the market's cooperative association, which represents approximately eighty-five percent of all producers on the market, proposed that individual-handler pooling be substituted for the present marketwide pooling. It is contended that marketwide pooling has deterred handlers' efforts to maintain self-imposed quality controls and management of producer milk supplies in line with Class I fluid milk requirements. It is also said that marketwide pooling has encouraged an oversupply of milk in the market and suggested that under individual-handler pooling distant producers would be encouraged to seek other outlets for their milk.

Another handler distributing a "breed" milk as well as regular Grade A milk supported the proposal for individual-handler pooling. He pointed out that he should not depend on the reserve market needed to supplement his requirements for "breed" milk and that he had no need for a proportionate share of the reserve supply in his regular Grade A operations. He contrasted with proponent, that marketwide pooling has attracted an excessive reserve supply which is adversely affecting producer returns. This he suggested would result in the interest of orderly marketing.

The proposal for individual-handler pooling was further supported by a number of producer witnesses most of whom deliver their milk to proponent's plant. The principal cooperative association opposed the proposal.

The pooling standards as set forth under the order establish what milk shall be subject to regulation. The prices established by the order are those prices which are deemed necessary to maintain adequate but not excessive supply of milk for the market. The Class I pricing formula includes a supply-demand adjustment mechanism which serves to raise the Class I price as supplies tend to become excessive and increases the price when supplies shorten. It is through this means that supply adjustments are intended under the Act to be accomplished and it is not intended that the market supply will be adjusted by reason of the type of pooling procedure.

The milk priced under the Federal order is that milk which the appropriate health authority deems acceptable for fluid disposition as Grade A milk in the marketing area and which is marketed in a way that meets prescribed performance requirements. While handlers may demand higher quality standards than those generally applicable in the market, it is not an appropriate function of the Federal order to re-enforce handlers' efforts in this respect.

When the order was promulgated the Acting Secretary in his decision of July 17, 1961, concluded as follows:

"The alternative to the marketwide pool is the individual-handler pool. Under this latter system producers delivering to each handler receive a uniform price based on each handler's utilization of milk. Because different handlers utilize different proportions of their milk as Class I and Class II, the uniform prices of individual handlers would vary one from the other. The order has been written to permit a cooperative association to become a handler when necessary to market the surplus milk of its members. Under these circumstances an individual-handler pool would result in an unequal sharing of the market among producers and would not be conducive to orderly marketing. It is concluded, therefore, that marketwide pools are necessary to distribute the returns from the sale of milk equally among producers and to create orderly marketing of producer milk."

It must be concluded that the marketwide pooling arrangement has tended to maintain equality among producers and to assure the orderly disposition of the market's reserve supply. Handlers in the market have very limited manufacturing facilities, other than for ice cream and cottage cheese. Except for proponent, they generally rely on the major cooperative association for balancing supplies and disposition of milk in excess of fluid requirements. The cooperative operates two manufacturing plants, one at Muenster and the other at Sulphur Springs, Texas. In 1960 these plants handled over 50 percent of the total Class II milk (239 million pounds) in the market. Under such circumstances, marketwide pooling is essential to assure that each producer will receive an equitable share of the proceeds from milk utilized in fluid form and that all producers share equally in the cost of handling the market's reserve supply. Clearly also, individual-handler pools would not result in the equitable sharing of the costs of handling market reserves and hence its adoption would engender disorderly marketing conditions in this market. Accordingly, the request for individual-handler pooling is denied.

4. *Classification of fluid milk products disposed of for animal feed.* The provisions specifying the conditions under which fluid milk products disposed of for animal feed may be classified as Class II should be modified and the present limitation on disposition as animal feed under a Class II classification should be eliminated.

Under the present order, skim milk and butterfat disposed of in the form of fluid milk products for use as animal feed may be classified as Class II milk up to one-half of one percent of the volume of skim milk and butterfat in fluid milk products disposed of in fluid form, provided certain conditions are met. A handler is required to keep detailed records of the amount and butterfat test of all products disposed of for animal feed, to notify the market administrator prior to such disposition so that he can physically verify disposition, and to furnish a receipt signed by the purchaser of such products setting forth the details of the transaction.

In September 1957, a provision which provided a Class II classification for milk disposed of for livestock feed was deleted from the order on the basis that normal shrinkage plus disposition for animal feed did not exceed the two percent shrinkage allowance in the order. Subsequently, in June 1959, the existing provisions were adopted because it was found that the two percent shrinkage allowance was inadequate to cover both normal loss incurred in plant operations and route returns of fluid milk products sold for livestock feed.

One handler proposed the elimination of the requirements for record keeping and prior notification when fluid milk products are disposed of for livestock feed. He claimed that these conditions were working a hardship on all handlers and on the members of the market administrator's staff. It was his position that it required virtually the full time of one of his employees to maintain the necessary records and meet other requirements necessary to permit a Class II classification for milk which he necessarily disposed of as livestock feed.

Another handler had no objection to the record keeping and reporting requirements, but proposed that the one-half of one percent maximum allowance in Class II for milk disposed of for livestock feed be deleted. He contended that disposition for livestock feed was costly at any price and handlers used this outlet only when there was no means of salvaging the milk for other uses. Hence, there was no need for limiting the volume which might be disposed of in this manner under a Class II classification.

The order does not set forth the specific records which must be kept or the form of reports which must be made to accommodate classification of milk disposed of for other than animal feed. It provides that the handler shall report to the market administrator in the detail and on forms prescribed by the market administrator. In the case of records the handler is required to maintain and make available to the market administrator—such accounts and records of his operations—as are necessary for the market administrator to verify or establish the correct data with respect to receipts and utilization, the weights and tests for butterfat, and other content of all milk and milk products handled. This authority is wholly adequate to permit the market administrator to prescribe the type of report and detail of information which he deems necessary to verify disposition for livestock feed and, accordingly, there is no need to set forth the detailed requirements now contained in the order. However, since the existing order provides that reports relative to receipts and utilization of milk shall be filed on or before the 7th day after the end of each month, it is desirable that the order be amended to provide for the filing of reports relating to disposition for animal feed in the manner and at such times as the market administrator may require. Elimination of the present specified requirements, from the order, will permit the market administrator flexibility to meet varied situations and may relieve handlers of some reporting or record keeping if all of the information now specifically required is not needed by the market administrator for satisfactory verification.

The Assistant Secretary concluded in his recommended decision that the record provided no basis for deletion of the present provision restricting classification of disposition for animal feed in Class II only up to one-half of one percent of Class I disposition. In support of this position he pointed out that the market administrator's statistics over the period since June 1959 indicated that in no month had the volume of disposition as animal feed in Class II for the market as a whole equaled the one-half of one percent provided. While some quantities of animal feed disposition were classified as Class I in each month, the record did not disclose whether this was the result of inadequate records or disposition in excess of the one-half of one percent limitation on the part of certain handlers.

Exceptors contend that there is no basis for limiting disposition for animal feed as Class II where such disposition can be verified to the satisfaction of

the market administrator. They, therefore, requested a Class II classification for all verified animal feed disposition.

It is concluded that there is no necessity for limiting the amount of Class II disposition as animal feed. However, the basic problem associated with animal feed disposition is verification. Hence, elimination of the limitation on Class II classification may not increase the amount of animal feed disposition allowed under a Class II classification. The burden of proof for such disposition is incumbent on the handler and he must maintain the records and make the reports required by the market administrator to verify to the administrator's satisfaction, disposition as animal feed.

5. *Modification of the procedure for computing handler location adjustment credits.* The procedure for computing location differential credits to handlers should be modified to the extent of providing that the computation shall be made on the basis of the volume of milk remaining after producer shrinkage (deducted in step (1) of the allocation provisions) has been added back (step (9)), less 5 percent of direct producer receipts at the plant.

Under the existing procedure location differential credits are computed on the basis of the volume of milk remaining after the assignment of opening inventories (step (8) in the allocation procedure), less 5 percent of direct producer receipts at the plant.

A proprietary handler who regularly obtains a substantial part of his milk supply from a Missouri plant submitted a proposal (included in the hearing notice) which, under certain circumstances would have substantially increased the volume of his Missouri supply which would be eligible for location differential credits. However, no testimony was offered in support of the proposal.

A witness for the North Texas Milk Producers Association proposed a modification of the proposal contained in the hearing notice. His proposal would decrease the amount of country plant milk receipts on which a location differential credit would be claimed. It was his position that the assignment of any direct receipts from producers to Class II as a step in computing the volume of receipts from country plants eligible for location differential credits was no longer appropriate. He suggested that the existing provision was placed in the order under conditions of short supply in recognition of the fact that additional country plant supplies were needed to assure handlers an adequate supply. Because the supply situation has substantially changed he contended the Missouri milk was no longer needed and local producers should not be called upon to subsidize the shipments of milk from distant sources.

Under the order a handler has freedom of choice as to his source of milk supply. However, if his direct producer receipts exceed 105 percent of the available Class I utilization plus shrinkage on producer milk no location adjustment credits are allowed on receipts from supply plants. Milk in excess of the market's fluid requirements and which is received at country plants need not be transported to the city for Class II disposition. Accordingly, no location adjustment credits are applicable to Class II milk.

The allocation of 5 percent of direct producer receipts to Class II prior to the allocation of receipts from country plants is intended to permit a handler to recover transportation on that milk which is lost in shrinkage and on that milk which is packaged and distributed but is returned and necessarily used in other than Class I uses. This procedure is concluded to be appropriate and should be continued. However, the existing provision permits location differential credits on a greater volume of milk. Since allowable shrinkage on producer receipts is two percent, the existing procedure has the effect of assigning seven percent of direct producer receipts to Class II rather than five percent, as was intended. This deficiency may be corrected by providing that location differential credits shall be considered on the basis of the volume of milk available after step (9) in the allocation procedure, rather than after step (8).

The original proponent of a modification of the procedure for computing location differentials excepted to the conclusions set forth in the recommended decision and suggested that the change in the classification of fortified fluid milk products would decrease the amount of location differential credits which he could claim. He further suggested that the classification of inventory as Class II under the existing order (not an issue at the hearing) also tendered to decrease the amount of his location differential credits and requested that inventory be excluded from Class II utilization for purposes of computing such location differential credits.

While the change in the classification of fortified fluid milk products will increase the volume of Class II disposition, this cannot be concluded to have an inappropriate affect on the application of location differential credits since other source milk in the form of nonfluid milk products is the source of nonfat milk solids used in fortification and producer milk is not moved to the market for use in fortifying fluid milk products. It is not clear why the classification of inventory should affect the amount of location differential credits since country plant milk allocated to inventory in the preceding month and reclassified in the current month would be subject to a reclassification charge of the difference between the Class II price for the preceding month and the Class I price for the current month applicable at the location of the shipping plant. Accordingly, the proposal to exclude inventory from Class II utilization in the application of location differentials is denied.

Rulings on proposed findings and conclusions. Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the records were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the request to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General findings. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Rulings on exceptions. In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement Regulating the Handling of Milk in the North Texas Marketing Area," and "Order Amending the Order Regulating the Handling of Milk in the North Texas Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which will be published with this decision.

Determination of representative period. The month of November 1961 is hereby determined to be the representative period for the purpose of ascer-

...whether the issuance of the aforesaid order amending the order regulating the handling of milk in the North Texas marketing area, is approved or favored by producers, as defined under the terms of the order as hereby proposed to be amended, and who, during such representative period, were engaged in the production of milk for sale within the aforesaid marketing area.

Signed at Washington, D.C., on February 23, 1962.

JOHN P. DUNCAN, JR.,
Assistant Secretary.

Order Amending the Order Regulating the Handling of Milk in the North Texas Marketing Area

§ 1126.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the North Texas marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Order relative to handling.* It is therefore ordered, that on and after the effective date hereof, the handling of milk in the North Texas marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

§ 1126.32 [Amendment]

1. Add a new paragraph (c) to § 1126.32 to read as follows:

(c) Each handler, with respect to fluid milk products disposed of for animal feed, shall report to the market administrator such information and at such time as the market administrator may prescribe.

§ 1126.41 [Amendment]

2. Delete paragraph (a) (1) of § 1126.41 and substitute therefor the following:

(a) Class I milk shall be all skim milk (including reconstituted skim milk) and butterfat:

(1) Disposed of in the form of milk, skim milk, buttermilk, flavored milk drinks, cream (except cultured sour cream), and any mixture (except eggnog and bulk ice cream and frozen dairy product mixes) of cream and milk or skim milk: *Provided*, That when any fluid milk product is fortified with nonfat milk solids the amount of skim milk to be classified as Class I shall be only that amount equal to the weight of skim milk in an equal volume of an unfortified product of the same nature and butterfat content;

3. Delete subparagraph (4) of § 1126.41 (b) and substitute therefor the following:

(4) Disposed of in the form of fluid milk products and used for livestock feed subject to inspection (at his discretion) by the market administrator;

4. Delete the period at the end of subparagraph (6) of § 1126.41(b) and insert a semicolon and add a new subparagraph (7) as follows:

(7) That portion of fortified products excluded from a Class I skim milk classification pursuant to paragraph (a) of this section.

§ 1126.53 [Amendment]

5. In the proviso of § 1126.53, delete the reference "§ 1126.46(a) (1) through (8)" and substitute therefor the reference "§ 1126.46(a) (1) through (9)".

6. Delete § 1126.61 and substitute therefor the following:

§ 1126.61 Plants subject to other Federal orders.

The provisions of this part shall not apply with respect to the operation of any plant specified in paragraph (a), (b) or (c) of this section except that the operator shall, with respect to total receipts of skim milk and butterfat at such plant, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

(a) A plant meeting the requirements of § 1126.10(a) which also meets the pooling requirements of another Federal order and from which, the Secretary determines, a greater quantity of Class I milk is disposed of during the month on routes in such other Federal order marketing area than was disposed of on routes in this marketing area, except that if such plant was subject to all the provisions of this part in the immediately preceding month, it shall continue to be subject to all the provisions of this part until the third consecutive month in which a greater proportion of its Class I disposition is made in such other marketing area unless, notwithstanding the provisions of this paragraph, it is regulated under such other order.

(b) A plant meeting the requirements of § 1126.10(a) which also meets the pooling requirements of another Federal order on the basis of distribution in such other marketing area and from which, the Secretary determines, a greater quantity of Class I milk is disposed of during the month on routes in this marketing area than is so disposed of in such other marketing area but which plant is, nevertheless, fully regulated under such other Federal order.

(c) A plant meeting the requirements of § 1126.10(b) which also meets the pooling requirements of another Federal order and from which greater qualifying shipments are made during the month to plants regulated under such other order than are made to plants regulated under this part, except during the months of January through August if such plant retains automatic pooling status under this part.

§ 1126.80 [Amendment]

7. Delete the period at the end of paragraph (a) of § 1126.80 and insert a semicolon and add a new paragraph (b) as follows:

(b) In the case of producers delivering milk to a plant which was not a pool plant during the entire base forming period, a daily average base for each such producer shall be calculated pursuant to paragraph (a) of this section on the basis of his deliveries of milk to such plant during August through January: *Provided*, That records of such deliveries to the plant are made available to the market administrator.

DEPARTMENT OF LABOR

Division of Public Contracts

[41 CFR Part 50-202]

MOTORS AND GENERATORS INDUSTRY

Tentative Decision in Determination of Prevailing Minimum Wages

A complete record of proceedings held under sections 1 and 10 of the Walsh-Healey Public Contracts Act (41 U.S.C. 35 and 43a) to determine the prevailing minimum wages for persons employed in the motors and generators industry has been certified by the hearing examiner. A tentative decision, including a statement of findings and conclusions, as well as the reasons and basis therefor, on all

---

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

material issues of fact, law, and discretion presented on the record, and any proposed wage determination, is now appropriate under the applicable rules of practice (41 CFR Part 50–203.21(b)) and the Administrative Procedure Act (5 U.S.C. 1007(b)).

Definition. The notice of hearing (26 F.R. 7970) defined the motors and generators industry as follows:

"The motors and generators industry is defined tentatively as that industry which manufactures electric motors and generators; prime mover generator sets (except complete steam, gas or hydraulic turbo-generators), such as gasoline or diesel-engine driven or wind driven generator sets; motor generator sets and other rotating equipment (except automotive) such as dynamotors, converters, inverters, rotating regulators, servomotors, synchro-motors, and gear motors; and motors, generators, and control apparatus for such land transportation equipment as gasoline-electric and diesel-electric locomotives, rail cars, trolleys, busses, and trucks. The manufacture of parts (including spare and renewal) specifically designed for the foregoing products is also included. The industry does not include the manufacture of the following products: Electric starting motors; automotive generators; complete steam, gas, or hydraulic turbo-generators; arc welding generators; battery-charging generators for internal combustion engines; control apparatus for storage-battery powered transportation equipment; and parts commonly recognized as products of industries other than the motors and generators industry, such as bearings; brushes; brush holders; built-in overload protecting devices; capacitors; filters; insulating materials; lead terminals, markers, and connectors; permanent magnets; recording and indicating instruments and devices; rectifiers; relays; and resistors."

The representatives of organized labor raised no objection to this definition. However, the National Electrical Manufacturers Association (NEMA) asserts that in interpreting this definition some manufacturers may erroneously conclude that motors and generators for storage-battery powered transportation equipment are excluded from the definition, and that the exclusion for "turbo-generators," means that the generator segment of turbine-generator sets is excluded. Therefore, in order to make it abundantly clear that motors and generators for storage-battery powered transportation equipment are included in the definition, whereas only the control apparatus for them is excluded, and that the generator segment of turbine generator sets is included whereas complete steam, gas or hydraulic turbine-generator sets are excluded from the definition, I have decided to:

(1) Amend the part of the definition concerning products included within the industry by changing the phrase in parentheses following the words "prime mover generator sets," to read "(except complete steam, gas or hydraulic turbine-generator sets)."

(2) Add a phrase following the words "• • • and motors, generators and control apparatus for such land transportation equipment as gasoline-electric and diesel-electric locomotives, rail cars, trolleys, busses, and trucks," to read "(except control apparatus for storage-battery powered transportation equipment.)"

(3) Delete the phrase "complete steam, gas, or hydraulic turbo-generators" from the items excluded from the definition.

(4) Delete the phrase "control apparatus for storage-battery powered transportation equipment" from the items excluded from the definition.

NEMA proposed that fractional and non-fractional motors and generators be considered separately for wage determination purposes. This was supported by uncontradicted evidence that fractional and nonfractional motors and generators were generally manufactured in different establishments. The economist representing the American Federation of Labor and Congress of Industrial Organizations (AFL–CIO) opposed separate determinations on the ground that subdividing narrowly defined industries may encourage a shopping about for differentiations between products which may result in administrative mischief and further complication of already excessively protracted Walsh-Healey procedures.

In view of the fact that there appears to be an appropriate basis for making the requested branch determinations for this industry and additional time will not be required for such division, I have decided to make the separate branch determinations requested by NEMA in the proposed wage determination for this industry.

Locality. The record contains extensive data prepared by the Wage and Hour and Public Contracts Divisions of the Department of Labor concerning the competition in this industry for contracts subject to the Walsh-Healey Act. These data indicate that the competition for Government contracts for both fractional and nonfractional motors and generators is not limited by the places where it is intended to use those products when bids are invited, so that there is no way to predict at that time the geographic area in which the successful bidder's plant will be located. Furthermore, it was stipulated at the hearing that "competition in the sale of motors and generators to the United States Government under contracts subject to the Walsh-Healey Act is nationwide and industrywide."

Accordingly, it is my finding that the locality in which products of the motors and generators industry are to be manufactured or furnished for any Government contract subject to the Walsh-Healey Public Contracts Act cannot be defined more narrowly than the entire area in which the industry operates. Under these circumstances, an industry-wide wage determination is essential to achieve the purposes of the statute. (See the tentative decision in the Textile Industry, 17 F.R. 11197; Mitchell v. Covington Mills, Inc., 229 F. 2d 506, certiorari denied, 350 U.S. 1002, rehearing denied, 351 U.S. 934.)

Prevailing minimum wages. The Bureau of Labor Statistics (BLS) prepared for use in these proceedings a comprehensive survey of the minimum wages paid by every establishment with ten or more employees in which the manufacture of motors and generators constituted 50 percent or more of the total value of sales in 1959. The data based on this survey show widely scattered plant minimum wage rates ranging from $1 an hour to over $2.70 an hour which were paid in October, 1960 by 315 establishments employing 51,540 persons who were engaged in work of a type covered by the Act when performing under a contract subject to it (to be referred to hereafter as "covered workers"). The survey presents separate data showing the wage rates paid to employees engaged in the manufacture of fractional horsepower items, to employees engaged in the manufacture of non-fractional horsepower items, and to both groups combined.

Four of the establishments within the scope of the survey refused to report their minimum wage rates to the BLS. Thus, the survey was, in fact, based upon direct information concerning the minimum wages paid in 211 establishments, and minimum wage rates were assigned to the other four upon the basis of their known characteristics. NEMA produced evidence indicating that eight establishments in the industry had made mistakes in filling out their copies of the questionnaires on which the BLS survey was based. As a result of this, appropriate corrections in the survey tables were made during the course of the hearing.

At the commencement of the hearing, counsel for NEMA made application for a subpoena duces tecum requiring production for its inspection of the answers of the individual plants to the BLS questionnaires which contain the underlying data which the survey presents in statistical and anonymous form. NEMA contended in effect that this material would help in providing it with a further basis for challenging the adequacy of the survey or for recommending additional adjustments in it. Counsel for the Government opposed the issuance of such a subpoena. The hearing examiner declined to issue the subpoena after taking evidence on the balance of convenience. Nevertheless, NEMA did not object to the admission in evidence of the tables in the survey on which this decision relies for its determination of prevailing minimum wages. NEMA did move to strike the whole survey at a later stage of the hearing. Though the motion recited an alternative ground that the survey was "based on a perusal of records which have not been made available," the only ground argued was the refusal of the hearing examiner to admit certain affidavits. These affidavits were amended and received by agreement at a later stage of the hearing. Accordingly, I have some doubt concerning whether the refusal to grant the subpoena was stated sufficiently to warrant its further consideration at this time. Nevertheless, I shall consider the propriety of the hearing examiner's rulings.

The objection to the issuance of the subpoena was occasioned by a pledge

... to members of this industry by the ... of Labor Statistics on the face ... questionnaires, that the answers ... be held confidential. Evidence ... received to the effect that to perform ... functions well, the Bureau must obtain much information from industrial establishments which would not be released to competitors and other industrial groups. In accordance with the evidence, I find that the nearly universal response the Bureau was able to obtain in this survey, the high ratio of response it obtains in its other surveys, and the excellent quality of such work, depends on giving and honoring assurances of confidential treatment—such as those received here. A representative from the Bureau of Labor Statistics testified that if the pledge of confidentiality were violated in these proceedings, "the Bureau could no longer guarantee its pledge of confidentiality and would in all likelihood go out of business." The apparent need for such a pledge is further evidenced by the fact that survey questionnaires sent out by NEMA to members of the industry also contained a pledge of confidence, which it also was scrupulous to honor at the hearing.

NEMA was afforded opportunity at a preliminary panel conference to participate in the formulation of the wage survey. At that time NEMA did not object to the pledge of confidence which was contained in the draft questionnaire received by the entire panel. In addition, upon examination at the hearing of the professional knowledge of the witness who prepared the survey was thrown open and availed of by NEMA without limitation. It included the conduct, methods, and evaluation of the Bureau's wage survey investigation, and its compilation and tabulation of the basic wage data received from the industry.

In determining whether the subpoena duces tecum should have been issued and enforced, the hearing examiner was called upon to balance NEMA's need for the material sought against the burden that would be imposed upon the BLS by requiring the production of such material. NEMA agrees that this is the issue presented. NEMA points out that the burden of proof is on the Government to justify the suppression of the subpoena and concludes that the Government has not shown the balance to tip in favor of such suppression.

It clearly appears, however, that what is being balanced is the possibility that NEMA may be able to find some reporting or tabulating mistakes in this survey on the one hand, and an end to all of the useful work of the BLS (See: United States Government Organization Manual, 1961–62, pp. 334–338), on the other hand. In such circumstances, I find that the Government has clearly established more than adequate justification for quashing the subpoena duces tecum and, therefore, I approve of the Hearing Examiner's rulings in regard to this matter.

NEMA contends that the BLS survey could not be relied upon for the purpose of determining the prevailing minimum wages in this industry. Its major argument is that the responses to the wage questionnaire are incorrect because the definition of covered workers, which it alleges is ambiguous, led many respondents to eliminate some covered workers, and thus produce an upward bias in the survey results. The limitations which were placed on the scope of the survey, i.e., the ten employee cutoff and 50 percent sales test were also criticized, as was the assignment of minimum wage rates to the four establishments which refused to report such information to the BLS.

In connection with these criticisms, NEMA conducted its own independent wage survey of the industry, using the following sources of information: (1) Alleged "copies" of the information provided the BLS by 72 establishments which were forwarded to NEMA; (2) Responses to NEMA's questionnaire, which was more detailed than the BLS questionnaire, that had been sent to about 350 companies; and (3) personal visits to ten large manufacturing plants.

Although NEMA received 90 usable responses to its own questionnaire, only 61 were from companies which also forwarded copies of the material sent to BLS. These 61 cases provided the basis for a comparative analysis by NEMA. According to NEMA, discrepancies in the reporting of total employment were disclosed in 30 cases, covered worker employment in 45 cases, lowest wage actually paid in 21 cases, and product classification in two cases.

Prior to the hearing, NEMA counsel offered the NEMA data to the BLS for examination. The results of such examination show that some of the data received were identical to that received by NEMA, but that in a considerable number of cases the material received by the BLS differed from the "copy" which the company forwarded to NEMA. There were also discrepancies between what was reported in the BLS and in the NEMA questionnaires. Finally, there were three establishments which had furnished NEMA with "copies" of their BLS questionnaires although they had not reported to BLS at all. In the crucial area of lowest rates actually paid, it appeared that of 21 cases where NEMA found discrepancies, two had not filed responses with the BLS. Of the remaining 19, ten reported higher rates to BLS than to NEMA; one reported the same rate; and eight reported lower rates. However, only one of the 18 establishments with wage data differences reported a minimum rate to NEMA which could alter the position of the prevailing minimum wage under principles which have been used and are used in this tentative decision to determine them. BLS contacted this establishment and found that the rate reported originally, rather than the rate reported to NEMA, was the correct one. With regard to the two errors in reporting principal product, the BLS found on further checking that NEMA had correctly classified these plants as producing nonfractional horsepower equipment. This resulted in two of the eight corrections made in the survey.

The NEMA survey was not offered in evidence because NEMA did not consider it sufficiently valid. Conflicts with BLS findings, the erroneous "copies" of the BLS questionnaire, as well as the small number of responses contributed to this decision, according to NEMA. NEMA asserted that the survey was not offered in evidence for the same reason the BLS survey was attacked, because both questionnaires were "misunderstood in crucial particulars."

To support its contentions and to provide a basis for correcting the BLS survey, NEMA presented affidavits from five establishments and direct testimony by an official of one large plant to the effect that the information originally submitted to the BLS was incorrect. Four of the six discrepancies could have stemmed from misconceptions of the meaning of covered workers. The fifth case involved a misunderstanding of the definition of "establishment" which led the company to report excessively high figures for total and covered employment; no changes in minimum rates were involved. In the sixth case, the company erroneously reported its motors and generators sales as 61 percent of total shipments when in fact it had been about 40 percent, and therefore outside the scope of the survey coverage. This evidence resulted in the other six corrections in the survey.

NEMA claimed that the Department had ostensibly conceded the existence of deficiencies in the covered worker definition by revising this definition in subsequent questionnaires, as, for example, that for the engines and turbines industry. Nevertheless, NEMA emphatically disclaimed that these revelations of errors carried the implication that BLS was wrong and NEMA was right. Rather, NEMA took the position that there is no way of knowing which of the three sets of data, if any, are correct. The only conclusion to be drawn, NEMA asserted, is that if the proven errors and discrepancies appearing in the eight cases presented could result in shifts in the wage data, the total survey results can be assumed to contain errors of similar magnitude. Thus, it is claimed that the reliability of the entire survey is destroyed. In the absence of an ideal solution, a new survey, NEMA contends that the only way to determine whether the current BLS survey is accurate is to permit NEMA to examine all the questionnaires received by BLS.

Since all of the errors in the BLS survey which were established at the hearing were corrected, the principal remaining issue is whether the evidence warrants the assumption that they are indicative of the existence of others, or whether these eight changes only constituted a basis for making minor improvements in a survey which was substantially accurate to begin with. The latter assumption appears to be warranted. The member companies in the Motors and Generators section of NEMA who were represented at the hearing included the leading manufacturers of motors and generators and their attempt to obtain information critical of the BLS survey appears to have been both diligent and extensive. NEMA has repeatedly asserted that it does not question the technical competence with which the survey was executed. It claims instead that the difficulties arose through the respondents' errors in comprehending the mean-

ing of the questions in the wage survey, particularly with respect to the definition of covered workers. However, a comparison of the definition in the survey, the revised definition used in the engines and turbines industry wage questionnaire, and the NEMA definition indicates that all three versions are readily comprehensible. The definition of covered employees used in the motors and generators questionnaire has been successfully used in recent years in wage surveys of many other industries, including several divisions of the electrical industry, which, like motors and generators, were being covered for the first time by special wage determinations. The occupational composition of these industries is similar in complexity and the management is of comparable legal sophistication. The major motor and generator manufacturers, including those whose representatives submitted affidavits or testified at the hearing, have had long experience in supplying the Government with vast quantities of materials, and must have had a general awareness of Walsh-Healey regulations, even though no wage determination applied specifically to motors and generators. Moreover, some of these same companies took an active part in other wage determination proceedings.

Nevertheless, it is widely recognized that some degree of reporting error is inherent in any statistical survey. The risk is, however, reduced to a minimum by the standard practice of BLS to review carefully and evaluate each response for internal consistency and subsequently to contact the company either through additional correspondence, telephone calls, or personal visits, on all doubtful matters. Furthermore, it is not clear that any alterations in the BLS survey questionnaire would have resulted in a more accurate survey of the industry than the one presented in the record. In fact, NEMA in effect admits that the responses which it obtained from the survey questionnaire which it composed were of no greater accuracy than it believed the BLS responses to be.

In regard to the criticism concerning the scope of the survey and the charge that the assignment of wage rates to the four non-respondents was improper, it is clear that by all accepted statistical standards the number of responses actually studied was more than adequate to provide reliable wage tabulations for the industry; that the inclusion in the survey of non-respondents was based on a well accepted standard statistical techniques; and that the survey was designed to provide the best possible assurance that the determination for the motors and generators industry would not reflect wages paid by establishments whose production was principally directed in other industry channels.

Based upon a careful evaluation of all the evidence of record I find that the BLS survey constitutes a sound basis for determining the minimum wages that prevail in this industry.

NEMA has requested that in determining prevailing minimum wages I should reconsider the adoption of the previously rejected interquartile theory. See the tentative decision in the metal business furniture and storage equipment industry, 25 F.R. 12363. This theory involves finding the prevailing minimum wage at a rate which is less than the minimum wages paid by 75 percent of the industry. On the basis of its application NEMA proposes a wage determination of $1.30 an hour for the fractional horsepower branch of this industry and $1.435 an hour for the nonfractional horsepower branch of this industry. I believe that these rates are less than the prevailing minimum wages in this industry and that their adoption would not achieve the purposes of the Act, "to obviate the possibility that any part of our tremendous national expenditures would go to forces tending to depress wages and purchasing power" (Perkins v. Lukens Steel Company, 310 U.S. 113, 128) and, "to use the leverage of the Government's immense purchasing power to raise labor standards" (Endicott Johnson Corp. v. Perkins, 317 U.S. 501, 507). Accordingly, this theory is again rejected.

The economist representing the AFL–CIO interprets the BLS survey to warrant a wage determination of $1.65 an hour for the fractional branch of the industry and $1.85 an hour for the nonfractional branch. He urges that the prevailing minimum wage attributed to a large establishment should not be based on a minimum wage paid to only one person whose wages may not be representative of the lower end of the plant's wage structure. He therefore contends that the prevailing minimum wage determination should be made at least in part on the basis of the first significant concentration of workers in each establishment. Since the survey provides data to the effect that establishments in the fractional branch of this industry employing 50.4 percent of the covered workers have no covered workers or fewer than one percent of their covered workers who are paid less than $1.65 an hour, and that establishments in the non-fractional branch of this industry employing 57.6 percent of the covered workers have no covered workers or fewer than one percent of their covered workers who are paid less than $1.85 an hour, he concludes that these wage rates are most representative of the minimum wages paid in this industry as of the survey date (October 1960). I reject this method of determining prevailing minimum wages because I cannot arbitrarily exclude the wages paid to any covered worker from consideration in viewing the minimum wages paid by an establishment when I am seeking to determine prevailing minimum wages which will be enforced with respect to all employees in an establishment when performing on a contract subject to the Act.

This economist also contends that the prevailing minimum wages should in no event be found to have been less than $1.56 an hour for the fractional branch of the industry and $1.76 an hour for the non-fractional branch on the survey date. This conclusion is based upon the fact that establishments employing a majority of the covered workers in each of these branches of the industry paid no covered worker less than these rates. These rates were, however, paid by establishments representing only a slight majority of the covered workers (i.e. 55.5 percent in the fractional branch and 54.7 percent in the non-fractional branch) employed in substantially less than a majority of the establishments (i.e. 33.6 percent in the fractional branch and 38.7 percent in the non-fractional branch) in the industry. I have concluded, therefore, that a prevailing minimum wage determination established at these levels would not give adequate consideration to the minimum wages paid in the several establishments of which the industry is composed.

Upon examination of the entire record, I find that the prevailing minimum wage in the fractional branch of this industry was $1.45 per hour and that the prevailing minimum wage in the non-fractional branch of this industry was $1.70 an hour on the survey date. These wage rates appear to be truly representative of the minimum wages paid in the industry as a whole, for 45.9 percent of the establishments employing 64.7 percent of the covered workers in the fractional branch paid no covered employee less than $1.45 an hour, and 49.5 percent of the establishments employing 61.5 percent of the covered workers in the nonfractional branch paid no covered worker less than $1.70 per hour.

On the basis of the evidence presented at the hearing concerning the changes in the prevailing minimum wages paid in this industry between the survey date (October 1960) and the hearing date (October 1961), the representatives of labor and management agreed that under the principles generally followed by the Secretary of Labor in wage determination proceedings a postsurvey increase of three cents an hour is warranted for both branches of the industry. This agreement accords with available information and is hereby adopted.

Delay in effective date. NEMA has taken exception to the proposal to reduce the delay in effective date of the final decision from 30 to 7 days. It argues that to make any determination effective 7 days after publication in the FEDERAL REGISTER would not allow adequate time for preparing and filing papers necessary for a stay by the courts of any determination. It must be pointed out, however, that an additional delay in the application of any wage determination made under the Walsh-Healey Public Contracts Act is now provided for in subpart A of Part 50–202 of Title 41 of the Code of Federal Regulations (26 F.R. 9043).

In view of this and for the reasons fully stated in the final decision for the paper and pulp and manifold business forms industries (26 F.R. 7698, 7699), this tentative decision finds good cause to provide a 7-day delay in the effective date of the final decision.

Proposed determination. Accordingly, upon the findings and conclusions stated herein, pursuant to authority under the Walsh-Healey Public Contracts Act (49 Stat. 2036; 41 U.S.C. 35 et seq.), and in accordance with the Administrative Procedure Act (60 Stat. 237; 5 U.S.C. 1001 et seq.), notice is hereby given that I

...to amend Title 41 of the Code of ... Regulations, Part 50–202, by the ... of § 50–202.29 to read as follows:

...50–202.29 Motors and generators in...dustry.

...(a) *Definition.* (1) The motors and ...erators industry is defined as that ...dustry which manufactures or fur...nishes electric motors and generators; ...prime mover generator sets (except com...bustion steam, gas or hydraulic turbine-...generator sets), such as gasoline or ...diesel-engine driven or wind driven gen...erator sets; motor generator sets and ...other rotating equipment (except auto...motive) such as dynamotors, converters, ...inverters, rotating regulators, servo...mechanisms, synchro-motors, and gear mo...tors; and motors, generators and control ...apparatus for such land transportation ...equipment as gasoline-electric and die...sel-electric locomotives, rail cars, trol...leys, buses, and trucks (except control ...apparatus for storage-battery powered ...transportation equipment). The manu...facture of parts (including spare and re...pair) specifically designed for the fore...going products is also included.

(2) The industry does not include the ...manufacture of the following products: ...Electric starting motors; automotive ...generators; arc welding generators; bat...tery-charging generators for internal ...combustion engines; and parts commonly ...recognized as products of industries other ...than the motors and generators indus...try, such as bearings; brushes; brush ...holders; built-in overload protecting de...vices; capacitors; filters; insulating ma...terials; lead terminals, markers, and ...connectors; permanent magnets; record...ing and indicating instruments and de...vices; rectifiers; relays; and resistors.

(b) *Minimum wages.* (1) The mini...mum wage for persons employed in the ...manufacture or furnishing of fractional ...horsepower motors and generators shall ...be not less than $1.48 an hour. Frac...tional horsepower motors and generators ...are deemed to include all motors built ...in frames smaller than that frame hav...ing a continuous rating of one horse...power, open construction, at 1700 to 1800 ...r.p.m. and all generators in the corre...sponding frame sizes.

(2) The minimum wage for persons ...employed in the manufacture or furnish...ing of non-fractional horsepower motors ...and generators shall be not less than ...$1.73 an hour. Non-fractional horse...power motors and generators shall be ...deemed to include all products within the ...scope of the motors and generators in...dustry that are not included in the defi...nition of fractional horsepower motors ...and generators provided in subparagraph ...(1) of this paragraph.

Within twenty-one days from the date of publication of this tentative decision in the FEDERAL REGISTER, interested persons may submit written exceptions to the proposed action described therein, together with supporting views. Exceptions shall be addressed to the Secretary of Labor, United States Department of Labor, Washington 25, D.C.

Signed at Washington, D.C., this 21st day of February 1962.

ARTHUR J. GOLDBERG,
Secretary of Labor.

FEDERAL AVIATION AGENCY

[14 CFR Parts 600, 601]

[Airspace Docket No. 61–NY–121]

FEDERAL AIRWAYS, CONTROLLED AIRSPACE AND REPORTING POINTS

Proposed Designation and Alteration of Federal Airways and Associated Control Areas, and Revocation of Reporting Point

Pursuant to the authority delegated to me by the Administrator (14 CFR 400.13), notice is hereby given that the Federal Aviation Agency is considering amendments to Parts 600 and 601 and §§ 600.6040, 600.6042, 600.6058, 600.6119, 600.6210, 600.6250, 600.6297, 601.6250, 601.6297, and 601.7001 of the regulations of the Administrator, the substance of which is stated below.

The Federal Aviation Agency has under consideration the following actions:

1. Low altitude VOR Federal airway No. 40 is designated in part from the Navarre, Ohio, VORTAC via the intersection of the Imperial, Pa., VORTAC 295° and the Ellwood City, Pa., VORTAC 241° True radials; to the Imperial VORTAC. It is proposed to realign this segment of Victor 40 and its associated control areas from the Navarre VORTAC direct to the Imperial VORTAC.

2. Low altitude VOR Federal airway No. 42 is designated in part from the Imperial VORTAC via the intersection of the Imperial VORTAC 074° and the Ellwood City VORTAC 122° True radials; to the Johnstown, Pa., VOR. It is proposed to realign this segment of Victor 42 and its associated control areas from the Imperial VORTAC via the intersection of the Imperial VORTAC 074° and the Johnstown VOR 296° True radials; to the Johnstown VOR.

3. Low altitude VOR Federal airways No. 58 and No. 210 are designated in part from the Imperial VORTAC via the intersection of the Imperial VORTAC 074° and the Carrolltown, Pa., VOR 274° True radials; to the Carrolltown VOR. It is proposed to realign these segments of Victor 58 and Victor 210 and their associated control areas from the Imperial VORTAC via the intersection of the Imperial VORTAC 074° and the Carrolltown VOR 276° True radials; to the Carrolltown VOR.

4. Low altitude VOR Federal airway No. 119 is designated in part from the Imperial VORTAC direct to the Clarion, Pa., VOR. It is proposed to realign this segment of Victor 119 and its associated control areas from the Imperial VORTAC via the intersection of the Imperial VORTAC 045° and the Clarion VOR 214° True radials; to the Clarion VOR.

5. Low altitude VOR Federal airway No. 250 is designated in part from the Imperial VORTAC direct to the Ellwood City VORTAC. It is proposed to extend Victor 250 and its associated control areas southward from the Imperial VORTAC to the intersection of the Imperial VORTAC 193° and the Pittsburgh, Pa., VORTAC 223° True radials.

6. Low altitude VOR Federal airway No. 297 is designated from Mansfield, Ohio, to Carleton, Mich. It is proposed to designate a segment of Victor 297 and its associated control areas from the Akron, Ohio, VOR via the intersection of the Akron VOR 130° and the Ellwood City VORTAC 282° True radials; Ellwood City VORTAC; to the Johnstown VOR.

7. It is proposed to designate low altitude VOR Federal airway No. 468 and its associated control areas from the Newcomerstown, Pa., VOR via the intersection of the Newcomerstown VOR 058° and the Wheeling, W. Va., VOR 306° True radials; to the Ellwood City, Pa., VORTAC.

8. It is proposed to revoke the East Liverpool Intersection (intersection of the Imperial VORTAC 295° and the Ellwood City VORTAC 241° True radials).

The Pittsburgh air traffic control procedures have been revised effective December 14, 1961, to increase the traffic flow capability and improve air traffic service in the Pittsburgh Metropolitan area. Alteration of the airway structure as proposed herein would provide the routes required by the revised traffic control procedures. The control areas associated with the segments of Victors 40, 42, 58, 119, and 210 are so designated that they would automatically conform to the altered airways. The vertical extent of these control areas would remain as designated pending review of the adjacent airspace. The control areas associated with Victors 250, 297, and 468 would extend from 700 feet above the surface to the base of the continental control area. Separate actions would be initiated to implement on an area basis Amendment 60–21 to Part 60 of the Civil Air Regulations. The revised traffic control procedures in the Pittsburgh terminal area have obviated the requirement for the East Liverpool Intersection. Accordingly, it is proposed to revoke this intersection as a reporting point.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Eastern Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, Federal Building, New York International Airport, Jamaica 30, N.Y. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C.

Any data, views or arguments presented during such conferences must also be submitted in writing in acordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on February 20, 1962.

CLIFFORD P. BURTON,
Acting Chief,
Airspace Utilization Division.

[14 CFR Parts 600, 601]

[Airspace Docket No. 61-HO-4]

FEDERAL AIRWAYS, CONTROLLED AIRSPACE AND REPORTING POINTS

Proposed Revocation of Segment of Federal Airway, Associated Control Areas and Reporting Point

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering amendments to §§ 600.287 and 601.4287 of the regulations of the Administrator, the substance of which is stated below.

Red Federal airway No. 87 (Hawaiian Islands) extends, in part, from the intersection of the 288° bearing from the Port Allen, Hawaii, radiobeacon and longitude 161°15'00" W.; to the Port Allen radiobeacon. The Federal Aviation Agency has under consideration the revocation of this segment of Red 87 and its associated control areas. It is the policy of this Agency to revoke L/MF airways wherever adequate VOR airways are available, and it appears that the route west of Port Allen would be adequately served by Hawaiian VOR Federal airway No. 15 which was designated in Airspace Docket No. 60-HO-4 (26 F.R. 2549) to become effective November 16, 1961. The effective date of Hawaiian Victor 15 was subsequently amended to February 8, 1962 (26 F.R. 9207). Therefore, it appears that the retention of this segment of Red 87 is unjustified as an assignment of airspace. Accordingly, the Federal Aviation Agency purposes to revoke the segment of Red 87, its associated control areas and reporting point west of Port Allen.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Pacific Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, P.O. Box 4009, Honolulu 12, Hawaii. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on February 20, 1962.

CLIFFORD P. BURTON,
Acting Chief,
Airspace Utilization Division.

FEDERAL POWER COMMISSION

[18 CFR Part 154]

[Docket No. R-207]

RATE SCHEDULES AND TARIFFS

Changes in a Tariff, Executed Service Agreement or Part Thereof; Notice of Proposed Rulemaking

FEBRUARY 20, 1962.

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. It is proposed to amend Part 154, Rate Schedules and Tariffs, Subchapter E, Regulations Under the Natural Gas Act, Chapter I of Title 18 of the Code of Federal Regulations, by revising § 154.63 thereof to read as set forth below. The section prescribes the basic data which is to be submitted by pipelines in support of proposed changes in rate schedules filed with the Commission pursuant to section 4(d) of the Natural Gas Act.

3. The basic purpose of the proposed revision is to expedite the processing of rate-increase filings. This section, substantially in its present form, was prescribed May 21, 1953, by Order No. 165, and has since been revised to reflect experience gained in the interim. The existing regulations provide for the submission of certain detailed data in support of filings for rate increases but such data do not contain the detailed explanations, computations, and analyses now considered necessary for expeditious processing of the proposed rate filings. This lack has required extensive work on the part of the staff in the natural gas companies' offices, has slowed [illegible] and, sometimes, has resulted in [illegible] venience to the company itself.

The Natural Gas Act and the public interest require that these cases be expedited. Accordingly, the proposed provisions of our regulations provide for the filing of more detailed data, of such composition, scope, and format that they could serve as the company's case-in-chief in the event the rates should be suspended. The availability of such information should permit our staff to perform in the Commission's own offices much of the work currently being performed by the staff in the companies' offices. It is anticipated (a) that it will facilitate a determination as to whether a rate should be suspended and (b) that it will serve, in instances when a rate is suspended, in shortening the period required to conclude the proceeding.

4. Most of the substantive changes proposed relate to the material to be submitted pursuant to the directions in Statements A through P, now set out following § 154.63(b)(3)(i)(*f*). Although there are three entirely new provisions (§ 154.63(e) (4), (5), and (6)), the changes proposed in the other subsections, paragraphs, and subdivisions of the present section amount only to a rearrangement of those provisions to simplify their use. The changes are indicated in the Analysis contained in the Attachment hereto.

5. The amendments to the Commission's regulations set forth in the Attachment hereto are proposed to be issued under the authority granted by the Natural Gas Act, as amended, particularly sections 4 and 16 thereof (15 U.S.C. 717c, 717o).

6. Any interested person may submit to the Federal Power Commission, Washington 25, D.C., on or before March 31, 1962, data, views, and comments in writing concerning the amendments proposed herein. The Commission will consider these written submittals before acting upon the proposed amendments. An original and nine (9) copies of any such submittals should be filed.

JOSEPH H. GUTRIDE,
Secretary.

Analysis of proposed revision of § 154.63, *Changes in a tariff, executed service agreement or part thereof.*

(a) *Definitions.*

(1) Changes other than in rate level (new).

(2) Major rate increase (formerly § 154.63(b)(3)(i)(*a*); divided into two parts, editorial revision).

(3) Minor rate increase (formerly § 154.63(b)(3)(i)(*b*); divided into two parts, editorial revision).

(4) Rate decrease (new).

(b) *Material to be submitted.*

(1) All filings (formerly § 154.63 (a) and (b)(1), editorial revision).

(2) Changes other than in rate level (formerly § 154.63(b)(2); editorial revision and amplified to require more specific data).

(3) Major rate increase (formerly § 154.63(b)(3)(i)(*a*); divided into two parts, editorial revision).

(4) Minor rate increase or rate decrease (formerly § 154.63(b)(3)(i)(*b*);

...into two parts, editorial re-...).

(b) *Submission and rejection.*

(1) Submission of material by refer-... (formerly § 154.63(b)(4); editorial ... includes part of § 154.63(b)(1) ... requires copies to be made available ... request).

(2) Reliance on other data (formerly § 154.63(b)(3)(i)(c); divided into two parts).

(3) Rejection for non-compliance (formerly § 154.63(b)(3)(i)(d); minor editorial revision).

(4) *Form and number of copies.*

(i) Changes other than in rate level ...).

(ii) Change in executed service agree-... (formerly § 154.63(b)(5) revised).

(iii) Rate changes (formerly part of § 154.63(b)(3)(i)(c)).

(c) Format of statements and sched-... (new).

(c) *Scope and composition of material for major increase.*

(1) Preparation for hearing (formerly § 154.63(b)(3)(ii), amplified to reflect that hearing will be held upon filing as company's case-in-chief).

(2) Test Period (formerly §154.63(b)(3)(i)(e); minor editorial revision).

(3) Joint facilities (formerly § 154.63(b)(3)(i)(f); minor editorial revision).

(4) Working papers and supporting data (new).

(5) Representation of chief account-...ing officer (new).

(6) Opinion of independent public ac-...countants (new).

(f) *Description of Statements A through N* (Statements A through N require more detailed data; Statement O (new) is a description of system operations; Statement P (new) relates to prepared testimony).

§ 154.63 Changes in a tariff, executed service agreement or part thereof.[1]

(a) *Definitions*—(1) *Changes other than in rate level.* Rate filings for changes other than in rate level include inter alia changes in service agreements (changed contract demand, new delivery points, etc.), tariff provisions (changed penalty provisions, changed delivery pressures, etc.), rate form (where no change in revenue is contemplated).

(2) *Major rate increase.* (i) Rate changes that will result in a general increase in revenues for the stated purpose of obtaining a fair rate of return on jurisdictional sales.

(ii) Rate changes that extend to all, or substantially all, of the jurisdictional sales, or

(iii) Rate changes associated with the delivery of substantially changed volumes of gas to existing customers.

(3) *Minor rate increase.* Minor rate increases usually relate to a few schedules and are designed to bring such schedules into harmony with general tariff policy, to eliminate inequities and to achieve other formal adjustments, in cases where any increase in revenue is subordinate to some other purpose. They include changes that are not designed to provide general revenue increases such as to offset increased cost or otherwise achieve a fair return on the overall jurisdictional business. For the purpose of compliance with the regulations of this part, proposed increases in rates or charges which, for the test period, do not exceed the smaller of $100,000 or 5 percent, of the revenues under the jurisdiction of the Commission shall be considered minor.

(4) *Rate decrease.* Changes in rate level no part of which directly or indirectly result in any increased charge to a customer or class of customers will be considered as a rate decrease.

(b) *Material to be submitted*—(1) *All filings.* With the filing of any tariff, executed service agreement or part thereof which changes or supersedes any tariff, contract or part thereof on file with the Commission, there shall be included the following:

(i) A letter of transmittal containing a list of the material enclosed, the date on which such filing is proposed to become effective, the docket number, if any, of the proceeding in which the change was authorized and a list of the names and addresses of the purchasers and State Commissions to whom it has been mailed.

(ii) A statement of the nature, the reasons, and the basis for the proposed change.

(2) *Changes other than in rate level.* In addition to the material required by subparagraph (1) of this paragraph there shall be submitted a comparative statement of sales made, or transportation, exchange, etc., performed, and revenues therefrom, by months and in total, under the present and proposed tariff, contract, or part thereof, setting forth in each instance the transactions for the twelve months immediately preceding and for the twelve months immediately succeeding the proposed effective date of the change in tariff, contract, or part thereof. Actual data shall be used as far as possible, and any estimated data shall be designated as such. The statements shall be subdivided by rate schedules, classes of service, customers, and delivery point when more than one is involved. Such data shall include billing quantities that are used to compute the charges including contract demands, billing demands, metered demands and volumes, heat content, rates and other determinants, in sufficient detail to permit complete verification of the revenues.

(3) *Major rate increase.* Class A companies (as defined in subchapter F, Uniform System of Accounts for Natural Gas Companies, of this chapter) shall submit, in addition to the material required by subparagraph (1) of this paragraph, Statements A to M inclusive and O and P described in paragraph (f) of this section. Class B, C, and D companies, defined as above, shall file only Statements L, M, N, O, and P. A natural gas company filing another major increase in rates or charges within a period of twelve months after the date of filing of Statements A through M and O and P or after the end of the test period used therein including the period of adjustments shown on Statements A through M, may submit for such other increase Statements L, M, and N in lieu of Statements A through M if the proposed new rate increase is filed to compensate only for an increase in the cost of purchased gas and there has been no material change in the company's facilities, sales volumes, and cost of service other than cost of purchased gas since such prior rate increase was filed.

(4) *Minor rate increase or rate decrease.* Only Statements L through P need be filed in addition to the material required by subparagraph (1) of this paragraph.

(c) *Submission and rejection*—(1) *Submission of material by reference.* If all or any portion of the information called for by this section has already been submitted to the Commission or is included among the data filed pursuant to this section, specified reference thereto may be made in lieu of resubmission in response to these requirements. Copies of material submitted by reference shall be made available to staff and parties on request.

(2) *Reliance on other data.* If the natural gas company has relied on data other than those in Statements A through P in support of its rate increase, such other data, appropriately identified and designated as such and separately stated, shall be submitted with the data required by Statements A to P but limited to the test period prescribed in paragraph (e)(2) of this section.

(3) *Rejection for non-compliance.* Where the data submitted in Statements A through P do not comply with the requirements of the rules and regulations, the rate filing is subject to rejection: *Provided, however,* That if the proposed rate increase is filed at least 45 days before the effective date proposed therefor and such filing does not comply with the requirements of this section, the natural gas company will be notified of the deficiencies, and if such deficiencies are properly cured within 10 days from the date of such notice, the requisite supplementary material will be deemed to have been filed as of the same date as the initial submittal of the proposed rate increase.

(d) *Form and number of copies*—(1) *Changes other than in rate level.* Filings for changes other than in rate level shall comply with § 154.26 of this chapter.

(2) *Change in executed service agreement.* Agreements intended to effect a change or revision of an executed service agreement shall be in the form of a superseding executed service agreement only. Service agreements shall not contain any supplements, but may contain exhibits (stating contract demand, delivery points, delivery pressures, names of industrial customers of the distributor-customer, names of distributors with one named as agent where delivery to several distributors is effected at the same delivery point and well names) which may be separately superseded.

(3) *Rate changes.* Ten sets of the statements and of the additional information, if any, shall be submitted, each set securely bound in a cover.

---

[1] The provisions of this section shall not be applicable to filings made pursuant to §§ 154.61 through 154.86, unless such filing results in a change in rate, charge, classification or service.

(4) *Format of statements and schedules.* Amounts purporting to represent book data included in statements and schedules required to be prepared or submitted as part of the filing shall be reported in a separate column or columns. All adjustments applied to book amounts and amounts which give effect to such adjustments ("as adjusted" amounts) shall also be reported in separate columns so that book amounts, adjustments thereto, and adjusted amounts will be clearly disclosed separately.

(e) *Scope and composition of material for major increase*—(1) *Preparation for hearing.* (i) A natural gas company filing for an increase in rates or charges shall be prepared to go forward at a hearing on reasonable notice on the data which have been submitted and sustain the burden of proof imposed by the Natural Gas Act of establishing that its proposed changes are just and reasonable and not unduly discriminatory or preferential.

(ii) The Commission is desirous of avoiding delays in processing rate filings. To this end, the material required to be included in the filing and supporting working papers should be of such composition, scope, and format that it could serve as the company's complete case-in-chief in the event the matter be set for hearing and the rates suspended.

(iii) The material shall be presented in full accord with prior decisions of the Commission applicable to the company. The company making the filing may include in the filing additional material in support of any other position it desires, subject to the requirements for submitting complete supporting work papers. However, a filing which would have the effect of requiring no more than a retrial of issues previously decided by the Commission may be rejected.

(2) *Test period.* (i) If the natural gas company has been in operation for 12 months at the time of the filing, the Statements A to M, inclusive, and O and P or, L through P, inclusive, as appropriate, and supporting schedules, shall be based upon a test period consisting of 12 consecutive months of most recently available actual experience, adjusted for changes in revenues and costs which are known and are measureable with reasonable accuracy at the time of the filing, and which will become effective within eight months after the last month of available actual experience utilized in the filing: *Provided, however,* That, for good cause shown, upon application of the natural gas company made to the Commission 30 days in advance of the rate filing, the Commission may allow reasonable deviation from the prescribed test period: *Provided further,* That the last day of the 12 months of actual experience shall not be more than three months prior to the date of filing the proposed change in rates and charges. The 12 months of experience shall be adjusted to eliminate nonrecurring items (except minor amounts), but this shall not preclude the filing company from including items which, on the basis of existing facts, it can show will be experienced or from including an appropriate normalizing adjustment, e.g., rate case expenses, in lieu of a nonrecurring item. If the natural gas company has had less than 12 months' experience, the test period may consist of 12 consecutive months ending not more than one year from filing date, provided, however, adjustments are not included for occurrences anticipated after the one year period.

(ii) Adjustments to experience, or estimates where 12 months' experience is not available, may include the amounts for facilities for which a permanent or temporary certificate has been granted, provided such facilities will be in service within the test period, but such adjustments or estimates shall not include any amounts for facilities in respect to which a certificate of public convenience and necessity must be obtained but which has not been issued at the date of filing, nor shall adjustments or estimates include any amounts for other facilities associated therewith. The bases and procedures, including the docket number of each such outstanding certificate and other significant data, used in the derivation of adjustments or estimates shall be submitted in sufficient detail on supporting schedules as to permit ready analysis of such adjustments or estimates.

(3) *Joint facilities.* If the natural gas company operates other departments in addition to the natural gas operations involved in the subject rate increase and has allocated to such natural gas operations any of its investment in joint or other department facilities and the operation, maintenance, depreciation costs or taxes associated therewith, it shall be shown on the statements required to be filed by this section, or the schedules in support thereof, the amounts so allocated together with the methods used in making such allocations: *Provided,* That if such allocations are recorded in the natural gas company's books on the basis of current accounting procedures the submittal may be confined to a brief description of the methods followed.

(4) *Working papers and supporting data.* (i) The data in support of the proposed increased rates shall include the required particulars of book data, adjustments and other computations and information on which the company relies to justify the increased rates sought.

(ii) Any data or summaries included in the filing purporting to reflect the books of account shall be supported by accounting working papers, which papers shall set forth all necessary particulars from which an auditor may readily identify the book data included in the filing in separate columns and verify that such data are in agreement with the company's books of account. All statements, schedules, and working papers shall be prepared in accordance with the classifications provided in the Uniform System of Accounts. Working papers prepared in accordance with similar standards and disclosing full particulars properly cross-referenced to the filing and within themselves and indexed shall be available for staff examination in support of all adjustments, computations and other information included in the filing. A copy of such working papers shall be supplied to the staff upon request.

(iii) Any company filing for a rate increase shall be responsible for preparing prior to filing and maintaining complete working papers to support the filing. Any failure to produce promptly such working papers on request by an authorized representative of the Commission prior to Commission action on the filing shall be cause for rejection of the tendered filing in its entirety.

(iv) In addition to the working papers supporting the following specific material related to the test period shall be available for staff verification and analysis, and a copy shall be furnished on request:

(*a*) Copies of monthly financial reports prepared for management purposes.

(*b*) Copies of accounting analyses of balance sheet accounts prepared by the company.

(c) Complete trial balances of all the balance sheet accounts at the beginning and end of the 12 months of actual experience, and revenue and expense accounts for the 12 months of actual experience used for the filing.

(*d*) Analyses of the various miscellaneous revenues and related expenses included in the submitted cost of service.

(*e*) Analyses of surplus and capital surplus accounts during the twelve months.

(5) *Representation of chief accounting officer.* The filing shall include a narrative statement executed by the chief accounting officer of the filing company representing that the cost statements and supporting data submitted or required to be prepared as a part of the filing and which purport to reflect the books of the company do, in fact, set forth the results shown by such books.

(6) *Opinion of independent public accountants.* The filing shall include an opinion obtained from independent public accountants showing that an independent examination of the book amounts and accounting adjustments thereto has been made for the test period.

(f) *Description of statements.* Description of Statements A through P and supporting schedules required to be filed pursuant to the directions set out in subparagraphs (3) and (4) of paragraph (b) of this section.

Statement A—Overall cost of service. This statement shall summarize the overall gas utility cost of service (operation and maintenance expenses, depreciation, taxes, credits to cost of service and return) developed from the supporting statements described below.

Statement B—Rate base and return. This statement shall summarize the overall gas utility rate base from the figures contained in Statements C, D, and E, with an appropriate deduction for Contributions in Aid of Construction, if any. The statement shall also include the claimed rate of return and shall show the application of the claimed rate of return to the overall rate base.

Statement C—Cost of plant. This statement shall show in summary form the amounts of gas utility plant classified by Accounts 101, 102, 103, 104, 105, 106, 107, and 117 as of the beginning of the 12 months of actual experience, the book additions and reductions (in separate columns) during the 12 months, together with the book balances at the end of the 12-month period. In adjoining columns there shall be shown the

...adjustments, if any, to the book ... and the total cost of plant. All ... shall be fully and clearly ... in the supporting material ...

...following schedules and additional ... shall be submitted as part of State...

...C:

...*Schedule C–1* in columnar form similar ... Statement C showing for each of the above ... the amounts by detailed plant ac... ... prescribed by the Commission's Uni... ... Accounts 101 and 105 shall be adjusted to ... the cost of major items of plant, ... retirement of which is expected by the ... of the test period. Accounts 106 and ... shall be adjusted to exclude plant in ... of construction which is not expected ... be in service by the end of the test ...

Schedule C–2 showing major plant addi... ... and retirement projects for the test ..., brief descriptions, approximate dates ... commercial operation or retirement from ..., and cost.

Schedule C–3 showing thirteen monthly ... balances during the 12 months of actual ..., for each detailed plant account, ... subtotal representing functional classi... ... and total plant; the averages of ... 13 monthly balances; and the effect of ... adjustments on each monthly bal... ... and the average.

Schedule C–4 summarizing the following ... years with respect to the book changes ... plant in service (Account 101) for the ... five years of the operations of the Com... ... or its predecessors and proposed adjust... ... to such account:

(a) Starting balance.

(b) Major additions and retirements by ... orders (small items grouped) includ... ... the following:

(i) Major completed work orders including ..., description, and amount.

(ii) Month of completion.

(iii) Period of construction.

(iv) Cross reference to FPC certification ... docket number and the dates the ... was issued and accepted.

(c) Principal other transactions recorded ... as corrections, clearings, etc. Show ... detail so that the nature of the ... changes will be clearly disclosed.

(d) Closing balance.

Schedule C–5 showing in respect of Ac... 106 and 107, at the beginning and ..., respectively, of the 12 months of actual ... a list of uncompleted work orders, ... the work order number, description ... amount of each, and the amounts of ... type of undistributed construction ...heads. Include: a main-line map show... ... major projects completed for the last ... calendar years, ending during the twelve ... of actual experience, with a key ... indicating major work orders in... ... each project and reference to FPC ...ificate numbers; a list of principal proj... ... certificated by FPC (including tempo... ...y certificates for the last five calendar ..., ending during the twelve months of ...ual experience), setting forth the actual ... estimated cost of the facility and indicat... ... the total increase in contract demand ... annual volumes associated with each ...jor certificate.

Schedule C–6 giving details of each storage project owned, showing cost by major functions, and base top gas storage volumes upon full use of the storage project as estimated and for the 12 months of actual experience also making reference to any special rate schedules relating thereto, with monthly volumes and associated dollars for the inputs and outputs for the 12 months of actual experience.

Schedule C–7. If company produces gas and owns non-operated acreage, a map, showing counties in the United States for both producing and non-operated acreage, each designated in separate colors.

Schedule C–8. A summary by producing areas of gas reserves owned and a complete explanation of methods and procedures used in amortizing capitalized well costs.

Schedule C–9 summarizing at end of period the cost of gathering facilities by producing areas, by type of plant, including a small-scale map of each gathering system.

Schedule C–10 giving full details including docket number of any acquisitions of gas in-place for the last five calendar years, ending during the twelve months of actual experience.

Schedule C–11. A summary cost of service for each gasoline extraction and major purification (CO_2) plant owned or operated by the company.

Schedule C–12. A complete statement of methods and procedures followed in capitalizing interest during construction and other construction overheads, including any policy changes, effective dates and reasons therefor for the last five calendar years, ending during the twelve months of actual experience.

Schedule C–13 showing any significant changes in intangible plant for the last five calendar years, ending during the twelve months of actual experience.

Schedule C–14 setting forth the cost and description of any plant carried on the company's books as gas utility plant which was not being used in rendering gas service.

Schedule C–15. A description of the continuing property records maintained by the company, including methods and procedures used to price retirements, and a list of retirement units used by the company in pricing retirements.

Schedule C–16 setting forth any operating units or systems acquired for the last five calendar years, ending during the twelve months of actual experience.

State original cost and method of recording, including reference to any Commission action. If final accounting has not been approved by the Commission, submit summary analysis of property acquired, proposed entries to record the acquisition and proposed disposition of any difference between cost and net original cost.

Statement D—Accumulated provisions for depreciation, depletion, amortization and abandonment. This statement shall show the accumulated provisions for depreciation, amortization, depletion, and abandonment (Accounts 108, 109, 110, 111.1, 111.2, 111.3, 112, 113.1, 113.2), as of the beginning of the 12 months of actual experience, the book additions and reductions during the 12 months, together with the balances at the end of the 12-month period. In adjoining columns there should be shown the adjustments, if any, to the book amounts and the total. All adjustments shall be clearly and fully explained in the supporting material submitted.

The following schedules and additional material shall be submitted as part of Statement D:

Schedule D–1 showing thirteen monthly book balances during the 12 months of actual experience for each account and functional plant classification, the averages of such 13 monthly balances, and the effect of proposed adjustments on each monthly balance and the average.

Schedule D–2 summarizing the following by years with respect to the book changes in each account set forth in Statement D since the date of the last prior staff review, and proposed adjustments to such accounts.

(a) Starting balance.

(b) Annual provision.

(c) Retirements (with cross-reference to plant schedule).

(d) Salvage.

(e) Removal costs.

(f) Adjustments (including particulars of any significant items).

(g) Ending balance.

Schedule D–3. A description of the methods and procedures followed in depreciating, depleting, or amortizing plant and recording abandonments followed by the company and any policy changes effective dates and reasons therefor for the last five calendar years, ending during the twelve months of actual experience.

Schedule D–4. With respect to each allocation of an overall account to obtain the amounts applicable to various functional groups of plant, a complete explanation of the method, procedures and significant data used in making the allocation.

Schedule E—Working Capital. This statement shall show the computation of the working capital claimed as a part of the gas utility rate base. The statement shall show the respective components of the claimed working capital and be in such detail as to show how the amount of each component was computed.

The components of working capital may include (a) an amount equivalent to 45 days of operating expenses, less: The cost of purchased gas; the cost of gas placed in underground storage (credit) and withdrawn from underground storage (debit); non-cash operating expenses, such as depreciation transferred through clearing accounts to operating expenses; and gas used in utility operations; and (b) an allowance for the average of 13 monthly balances of materials and supplies, prepayments and gas for current delivery from underground storage. Also, as a component of working capital, there shall be reflected a credit deducted from the gross working capital requirement in an amount equal to 50 percent of the computed portion of the claimed federal income tax allowance in the cost of service. Any working capital item claimed which is different from or in addition to those specified herein shall be specifically and completely explained and reasons for inclusion shall be given.

The following schedules and additional material shall be submitted as part of Statement E:

Schedule E–1 setting forth the balances for materials and supplies and prepayments in such detail as to disclose, either by subaccounts regularly maintained on the books or by analysis of the principal items included in the main account, the nature of the charges included therein.

Schedule E–2 setting forth monthly balances of material and supplies and prepayments on purchased gas for two years immediately preceding the 12 months of actual experience used in the filing.

Schedule E–3 showing the quantities and the respective costs of natural gas stored at the beginning of the test period, the input, output and balance remaining in Mcf and associated costs by months, method of pricing input, output and balance, and the claimed adjustments shall be disclosed and clearly and fully explained.

Schedule E–4 showing the computations, cross-references and sources from which the data used in computing claimed working capital are derived.

Statement F(1)—Rate of return claimed. This statement shall show the percentage rate of return claimed and the general reasons therefor.[2]

Statement F(2)—Rate of return computed. This statement shall show the computation of the rate of return claimed based upon the company's capitalization, the cost of debt capital and preferred stock capital and the return claimed on the stockholder's equity.

Statement F(3)—Debt capital. This statement shall show the weighted average cost of debt capital based upon the following data for each class and series of long-term debt outstanding according to the balance sheet as of the 12-months' actual experience:

(a) Title.
(b) Date of issuance and date of maturity.
(c) Interest rate.
(d) Principal amount of issue:
  Gross proceeds.
  Underwriters discount or commission:
    Amount.
    Percent gross proceeds.
  Issuance expense:
    Amount.
    Percent gross proceeds.
  Net proceeds.
  Net proceeds per unit.
(e) Cost of money:
  Yield to maturity based on the interest rate and net proceeds per unit outstanding determined by reference to any generally accepted table of bond yields.
(f) If issue is owned by an affiliate, state name and relationship of owner.

Statement F(4)—Preferred stock capital. This statement shall show the weighted average cost of preferred stocks capital based upon the following data for each class and series of preferred stock outstanding according to the balance sheet as of the end of the 12-months' actual experience:

(a) Title.
(b) Date of issuance.
(c) If callable, call price.
(d) If convertible, terms of conversion.
(e) Dividend rate.
(f) Par or stated amount of issue:
  Gross proceeds.
  Underwriters' discount or commission:
    Amount.
    Percent gross proceeds.
  Issuance expenses:
    Amount.
    Percent gross proceeds.
  Net proceeds.
  Net proceeds per unit.
(g) Cost of money:
  Dividend rate divided by net proceeds per unit.
(h) Whether issue was offered to stockholders through subscription rights or to the public.
(i) If issue is owned by an affiliate, state name and relationship of owner.

Statement F(5)—Common stock capital. This statement shall show for each sale of common stock during the five-year period preceding the balance sheet as of the end of the 12-months' actual experience:

(a) Number of shares sold.
(b)(1) Gross proceeds at offering price.
(2) Underwriters' discount or commission:
  Amount.
  Percent gross proceeds.
(3) Proceeds to applicant.
(4) Issuance expenses:
  Amount.
  Percent gross proceeds.
(5) Net proceeds:
  Offering price per share.
  Net proceeds per share.
(c) Book value per share at date immediately prior to issuance:
  Closing market price at latest trading date prior to date of issuance.
  Latest published earnings per share available at date of issuance.
  Dividend rate at date of issuance.
(d) Whether issue was offered to stockholders through subscription rights or to the public; whether common stock was issued for property or for capital stock of affiliate.

The following schedules and additional material shall be submitted as part of Statement F(5):

Schedule F(5)–1. Submit information respecting any stock dividends, stock splits or changes in par or stated value during the 5-year period preceding date of the balance sheet and by months for the twelve-month period ended that date.

Schedule F(5)–2. Submit following information on outstanding common stock for the five calendar years preceding the date of balance sheet and by months for the twelve-month period ended that date:

	Average number of shares outstanding [1]	Book value (per share) [1]	Annual earnings (per share) [2]	Annual dividend (rate per share)	Dividends (percent earnings)	Average market price (based on monthly high-low)	Earnings price ratio [3]	Dividend price ratio [4]
Years:								
1								
2								
3								
4								
Months:								
1								
2								
3								
4								
5								
6								
7								
8								
9								
10								
11								
12								

[1] This information need not be submitted by months.
[2] For monthly figures, show latest reported 12-month average.
[3] Relationship of annual earnings per share to average of the 12 monthly high-low market values of stock. In the case of monthly data use latest reported earnings in computing ratio of earnings to average high-low market value for month.
[4] Relationship of dividend per share to average high-low market value of stock.

Schedule F(5)–3. If the applicant relied upon ratios or other data concerning the common stocks of other specific companies in reaching its conclusion as to a fair allowance for earnings on common equity, submit the following information to the extent available from published sources respecting the common stock of such other companies:

(a) With respect to recent issuances, the same information as submitted under Statement F(5).

(b) With respect to outstanding issues, the same information as submitted under Schedule F(5)–2.

Schedule F(5)–4. Show the earnings per share of common stock which the claimed rate of return would yield.

Statement G—Gas operating revenues and sales volumes. This statement shall show the operating revenues from sales of gas and other sources classified in accordance with the operating revenue accounts prescribed by the Commission's Uniform System of Accounts, and the related volumes of gas and products. Sales and services and related volumes shall be classified as between jurisdictional and nonjurisdictional; items which are reflected as credits to cost of service in preparing Statement A, Overall Cost of Service, shall be identified. Statement G shall disclose the following, using supporting schedules as necessary:

(a) Revenues by months and the totals thereof for the 12 months of actual experience from jurisdictional sales as computed under the presently effective and proposed rates together with the differences in the annual revenues, and the actual annual revenues from the nonjurisdictional sales.

(b) Revenues by months and the totals thereof for 12 months of actual experience as adjusted for changes which are known and measureable and which are expected to be realized within 8 months of the last month of available actual experience from jurisdictional sales as computed under the presently effective and proposed rates together with the differences in the annual revenues for the test period, and the annual revenues from the nonjurisdictional sales under the rates effective during the test period.

Each jurisdictional sale for resale, and each jurisdictional transportation service, shall be shown separately but the multiple nonjurisdictional sales and nonjurisdictional field sales may be separately grouped and the other sales may also be grouped by the classifications prescribed by the Commission's Uniform System of Accounts for Natural Gas Companies. For each revenue item shown separately, there shall be shown the points of delivery, the billing quantities for each month and their determinants or adjustments (demands, volumes, Btu content, Btu adjustment, etc.), and the maximum single day's delivery in each month if available. In the event any sale shown separately is made through more than one delivery point, and conjunctive billing is provided by the tariff, the above data may be combined for all delivery points.

Adjustments to actual period sales volumes, jurisdictional and nonjurisdictional, shall be fully and clearly explained including reference to any certificate docket authorizing changes in sales.

All penalties paid by jurisdictional customers shall be stated separately from sales revenues.

The total jurisdictional revenues under the proposed increased rates shall be broken down to show demand revenues, commodity revenues, Btu adjustment, etc. The revenues and other data shall be grouped and totaled by rate schedules and by zones.

Credits to cost of service shall set forth the principal components comprising each

---

[2] If the natural gas company is controlled by or controls another company, or companies, as defined in the Uniform System of Accounts, then the information required by these statements in respect to debt capital, preferred stock capital and common stock capital shall be submitted and, in addition, the data described shall be submitted with respect to the debt and stock issues of all superimposed holding companies including the top holding company and subsidiary companies in the form of a consolidating statement. Furnish a copy of the latest prospectus issued by the natural gas company, any superimposed holding company or subsidiary companies.

...the various items which are reflected as ...to cost of service in preparing State... A. The amounts per books, adjust... and as adjusted shall be clearly set ...

...Statement G shall be included, in ...in the submittal to the Commission and ...all State commissions having jurisdiction ...the affected customers of the natural ...company. The submittal to each of the ...customers may be limited to ex... the above details by months except ...with respect to the gas sales to, or transpor... service for, that particular customer, ...a copy of Statement G, in full, is ...promptly submitted to any affected customer ...such customer's request.

Statement H(1)—Operation and maintenance expenses. This statement shall show the gas operation and maintenance expenses ...to each account of the Uniform ...of Accounts for Natural Gas Com... The expenses shall be shown under ...columnar-headings, as follows, ...subtotals for each functional classifi...: (a) Operation and maintenance ex... by months, as booked, for the 12 ...of actual experience, and the total ..., (b) adjustments, if any, to ex... as booked, and (c) total adjusted ...and maintenance expenses claimed. ...explanations of the adjustments, ...and the manner of their determina... shall be supplied, specifying the month ...during which the adjustments ...be applicable.

The following schedules and additional material shall be submitted as part of Statement H(1):

Schedule H(1)–1 showing the 12 months of actual experience and the adjustments thereto by functional classifications, the separate amounts for labor, materials and other charges included in each operation and maintenance expense account of the Uniform System of Accounts for Natural Gas Companies, per books and as adjusted. In the event monthly operation and maintenance expenses as presented per books reflect any special accrual or equalization accounting entries for internal purposes the effect thereof shall be fully disclosed and explained. Any amounts not currently payable, except depreciation charged through clearing accounts, included in operation and maintenance expenses shall be fully explained.

Schedule H(1)–2 in respect of those companies having production plant or which are conducting exploration activities showing for the 12 months of actual experience, by month, and for each of the previous four fiscal years the annual cost of:

(a) Delay rentals.
(b) Unproductive well drilling.
(c) Abandoned leases.
(d) Other exploration expenses.
(e) Overriding royalties including amount per Mcf and payee.
(f) Net profit payments to others with full particulars of computations and supporting data.

Schedule H(1)–3 showing the total annual cost of gas purchased for the 12 months of actual experience, the adjustments thereto and the total adjusted cost for the test period with data grouped and subtotaled by states and counties and detailed by vendor, rate schedule designation, field, volumes in Mcf at a common pressure base and price in total and in detail as to base price, tax reimbursement, Btu provision, gathering and compression charges, etc., for the rate schedules under which actual or adjusted volumes exceed 100,000 Mcf annually. If any of such prices are effective subject to refund, there shall be shown a comparable breakdown of all prior prices under the rate schedule which were suspended with Commission docket numbers and including the most recent price not suspended. Field purchases under rate schedules where the actual or adjusted volumes are less than 100,000 Mcf annually may be grouped by field or producing area, but with a statement of the extent to which prices effective subject to refund are included. Purchases from pipelines in any volume shall be shown in full detail by rate schedule including splits between demand and commodity costs.

In the event adjustments are made to the volumes of gas taken from any source during the 12 months of actual experience, a detailed explanation and data in support of the adjusted volumes shall be furnished. No adjustments are to be made to reflect the attachment of new gas supplies unless both the filing company and the supplier have each obtained the required certificates of public convenience and necessity and the necessary facilities by both are or will have been in operation during the test period.

In the event the adjustments to volume aggregate more than 10 percent of the total volume of gas purchased during the 12 months of actual experience, and are due to change in gas purchase pattern or additional gas supply, the minimum take-or-pay-for quantities for each source of supply, applicable at the end of the test-year period, and the reasons for making such adjustments shall be submitted.

If the company purchases and sells gas under exchange agreements, the method of recording on books, total gross volumes exchanged, net dollar amounts involved and details of each major exchange shall be submitted.

If the company records any amounts on its books in a given month during the 12 months of actual experience which apply to gas purchases for a previous month or other period, a schedule indicating month and amount of payment made and distribution of payment and volumes to months to which applicable shall be submitted.

Schedule H(1)–4. With respect to the following listed expense accounts, there shall be furnished in supporting schedules as designated, for the 12 months of actual experience and claimed adjustments, analytical details which will clearly disclose for each account: a classification of principal charges and credits (all minor items may be grouped); particulars of supporting computations and accounting bases; a description of services and related dollar amounts for which liability is incurred or accrued and name of the firm or individual rendering such services:

Schedule H(1)–4a. Account 913—Advertising expenses (analysis need only disclose principal types of advertising such as TV, newspaper, etc.).

Schedule H(1)–4b. Account 922—Administrative expenses transferred Credit.

Schedule H(1)–4c. Account 923—Outside services employed.

Schedule H(1)–4d. Account 926—Employee pensions and benefits (insofar as this account includes items other than pensions).

Schedule H(1)–4e. Account 928—Regulatory commission expenses.

Schedule H(1)–4f. Account 929—Duplicate charges—Credit.

Schedule H(1)–4g. Account 930—Miscellaneous general expenses.

Schedule H(1)–4h. Intercompany and interdepartmental transactions. If the expense accounts contain charges or credits from associated companies or nonutility departments of the company submit a schedule, or schedules, as to each such associated company or nonutility department showing:

(a) The amount of the charges, or credits, during each month and in total for the test year.

(b) The FPC account classification or classifications charged (or credited).

(c) Descriptions of the specific services performed for, or by, the associated company or nonutility department.

(d) Complete particulars as to the bases used in determining the amounts of the charges (credits).

Statement H(2)—Depreciation, depletion, and amortization expense. This statement shall show separately the gas plant depreciation, depletion, and amortization expense by functional classifications. These expenses shall be shown in separate columns, as follows: (a) Expenses for the 12 months of actual experience, (b) adjustments, if any, to such expense, and (c) the total adjusted expense claimed. The bases, methods, essential computations and derivation of unit costs for the calculation of depreciation, depletion and amortization expense for the 12 months of actual experience and for the adjustments thereto, if any, shall be fully and clearly explained. The amounts of depreciable plant shall be shown by the functions specified in Paragraph C of Account 108, Accumulated Provisions for Depreciation of Gas Plant in Service, of the Commission's Uniform System of Accounts for Natural Gas Companies, and, if available, for each detailed plant account (300 Series), together with the rates used in computing such expenses. Any deviation from the rates used in disposing of the applicant's last previous rate filing or determination by the Commission shall be explained, showing the rate or rates previously used together with supporting data for the new rate or rates used for this filing.

The following schedules and additional material shall be submitted as a part of Statement H (2):

Schedule H(2)–1. There shall be included in support of Statement H(2) a reconciliation of the depreciable plant shown therein with the aggregate investment in gas plant shown in Statement C, and the expense thereon charged in the first instance, to other than prescribed depreciation, depletion and amortization expense accounts.

Schedule H(2)–2 shall be submitted to show computations applicable to Statement H(2) and sources from which data used therein are derived.

Statement H(3)—Income taxes. This statement shall show the computation of allowances for federal and state income taxes for the test period based on the claimed return applied to the overall gas utility rate base. To indicate the accounting classification applicable to the amount claimed, the computation of the federal income tax allowance shall show separately the amounts designated as current tax and deferred tax, the latter representing 52 percent of the excess of liberalized depreciation and accelerated amortization of emergency facilities, in any, claimed under sections 167 and 168 of the Internal Revenue Code, respectively, over straight-line depreciation allowable for tax purposes.

The following schedules and additional material shall be submitted as a part of Statement H(3):

Schedule H(3)–1. In support of federal income taxes the company shall submit a complete reconciliation of the book net income with taxable net income as reported to the Federal Internal Revenue. Service for the most recent year for which a tax return was filed and the three previous years. A complete explanation of all items in the reconciliations shall be submitted. In the event the tax allowances claimed give effect to omission of items appearing in the reconciliation for the most recent tax return or inclusion of items not appearing therein, the reasons for such omissions or inclusions shall be submitted.

Schedule H(3)–2. Where tax depreciation differs from book depreciation, the company shall file a schedule showing the computation of the tax depreciation which will indicate (a) differences between book and tax depreciation on a straightline basis; and (b) the excess of liberalized depreciation and amortization of emergency facilities over straightline depreciation for tax purposes for the taxable year or years.

Schedule H(3)–3. If the company joins in the filing of a consolidated federal income tax return there shall be submitted a schedule showing the net taxable income or loss for each company in the consolidation, including an adjustment to effect the exclusion of the excess of liberalized depreciation and amortization of emergency facilities over straight-line depreciation for each company involved. There shall also be submitted with the statement of taxable net income or tax loss of each individual company participating in the consolidated returns, the details of consolidating adjustments, and a computation of the system tax liability based on the consolidated net income for the last tax year ending within the test period, or immediately prior thereto, for which a tax return was filed. In addition, there shall be included a computation showing the percentage of tax savings arising from consolidation for the taxable year or years covered by the test period.

Schedule H(3)–4. If the company claims an allowance for current tax in its cost of service which would be greater than the federal income tax which would actually be payable on the basis of the return allowed in cost of service, full disclosure thereof shall be made, including the allocation among utility and nonutility departments of the tax payable.

Schedule H(3)–5. In support of the claimed allowances for income taxes paid state governments, the company shall submit a schedule showing the income tax paid each state in the current or previous year covered by the test period including the effect of liberalized depreciation on such taxes paid.

Statement H(4)—Other taxes. This statement shall show the gas utility taxes, other than federal or state income taxes in separate columns, as follows: (a) Tax expense per books for the 12 months of actual experience, (b) adjustments, if any, to amounts booked, and (c) the total adjusted taxes claimed. The taxes shall be shown by states and by kind of taxes.

The following schedules and additional material shall be submitted as a part of Statement H(4):

Schedule H(4)–1 shall be furnished showing for each kind and amount of gas utility tax the rate at which such tax is assessed and paid, and explaining the basis for such assessment in the 12 months of actual experience and as adjusted. All adjustments shall be fully and clearly explained.

Schedule H(4)–2 shall be submitted showing computations and sources from which the data in Statement H(4) are derived.

Statement I—Allocation of overall cost of service. This statement shall show with respect to overall cost of service (Statement A): (a) Grouping and allocation of various items of cost and credits to cost of service into functional totals; (b) Classification of items of cost and credits into demand, commodity, customer or other appropriate categories; and (c) Allocation among jurisdictional and nonjurisdictional sales and service, including allocation factors used and data used in computing such allocation factors.

The following schedules and additional material shall be submitted as part of Statement I:

Schedule I–1. Particulars of allocating general or common (joint) costs to various functions.

Schedule I–2. Sufficient detailed breakdown of operation and maintenance expense accounts and taxes to disclose how component items (e.g., compressor station fuel, purchased gas, taxes other than income taxes) have been classified among demand, commodity, customer or other category of cost.

Schedule I–3. Separation of costs applicable to field or gathering system sales from costs applicable to sales from the transmission system.

Schedule I–4. Details on the cost of compression and transportation of gas by others setting forth the name of the transporter and the basis of payment for such service.

Schedule I–5. With respect to the various classes of service, the total number of metering points and the number of metering units grouped on the basis of the occurence of meter reading (such as 24-hour, 7-day, 30-day, etc.)

Schedule I–6. Deliveries to the jurisdictional and nonjurisdictional customers on three continuous days of maximum transmission system deliveries during the winter heating season within the 12 months of actual experience, classified as between firm, interruptible, exchange, transportation, gasoline plants, emergency, etc. If the 12 months of actual experience represent a calendar year these data shall be submitted for the winter heating seasons beginning immediately prior to such year and at the end of such year to the extent practicable. The deliveries made from field or gathering systems shall be reported for the same three continuous days as maximum transmission system deliveries. Full particulars and justification shall be furnished of any claimed adjustment to the actual experience of the peak periods used. The deliveries on each of the three days should be submitted together with withdrawals from storage, line-pack fluctuations and temperature. If abnormal amount is supplied from line-pack, the company shall supply the second and third highest three-day peaks, giving the same information on line-pack.

Schedule I–7 showing by months, and total thereof, for the twelve months of actual experience, the company's Gas Account, in the form required by the Commission's Annual Report Form No. 2, page 117. In addition, there shall be shown corresponding estimated data, if claimed to be different from actual experience.

Statement J—Allocation of cost of service by zones. If the rates on file are zoned, or if it is proposed to establish zone rates, the cost of service for the test period shall be further allocated to the existing or proposed rate zones. A detailed description of methods and procedures used to allocate cost to zones shall be given. Where zones are sought to be established for the first time, the reasons for this establishment and for the zone boundaries selected shall be set forth.

The following schedules and additional material shall be submitted as a part of Statement J:

Schedule J–1. If the system rates are zoned or are to be zoned the company shall furnish an allocation of system tranamission costs based upon a study and the classification of costs provided in prior Commission opinions applicable to the company.

Schedule J–2. If the company's zone costs are determined as provided in Schedule J–1 but the zone rate differentials depart from those resulting from the allocated unit zone costs, the company shall furnish in this schedule the development of the zone rate differentials proposed.

Schedule J–3. The company shall, where it has also furnished a cost allocation which has departed from the "Seaboard Formula", show the development of zone differentials predicated on that formula.

Statement K—Comparison of estimated revenues with cost of service. This statement shall consist of a comparison of the total jurisdictional revenues with the allocated cost of service for the test period. Where zone rates are in existence or are proposed, this statement shall also include a comparison of revenues and costs by zones.

The following schedules and additional materials shall be submitted as a part of Statement K:

Schedule K–1 showing the derivation of each of the increased rates shall be submitted. If the increased rates are predicated on costs as classified and allocated, all calculations involved in derivation of the rates shall be shown. If in computing the increased rates, weight is given in whole or in part to value of service, competition, historical revenue pattern, etc., a full and complete explanation and justification therefor shall be included.

Schedule K–2. In the event the demand and commodity charges of the proposed increased rates depart from the unit demand and commodity costs under the "Seaboard Formula" the deviation in the demand charge shall be shown in dollars and as a percentage of the total demand costs, together with an explanation of the necessity for such departure.

Statement L—Balance sheet. A balance sheet in the form prescribed by the Commission's Uniform System of Accounts for Natural Gas Companies as of the beginning and end of the 12 consecutive months of the actual experience utilized for the test period, including therein the notes, if any, applicable to the balance sheet; similarly, a balance sheet on a consolidating basis if the natural gas company is a member of a system group of companies.

Statement M—Income statement. An income statement in the form prescribed by the Commission's Uniform System of Accounts for Natural Gas Companies for the 12 consecutive months of actual experience utilized for the test period, including therein the notes, if any, applicable to the income statement; similarly, an income statement on a consolidating basis if the natural gas company is a member of a system group of companies.

Statement N—Cost determinants for minor changes in rate level. This group of schedules shall contain the principal determinants essential to test the reasonableness of the proposed rate or charge. Any adjustments to book figures shall be separately stated and the basis for the adjustment shall be explained. The following shall be submitted for the test period:

Schedule N–1. Cost of plant by functional classification as of the beginning and as of the end of the test period.

Schedule N–2. Accumulated provisions for depreciation, depletion, amortization, and abandonment by functional classifications as of the beginning and as of the end of the test period.

Schedule N–3. Working capital, setting forth the various components provided for in Statement E. Instead of 13 monthly balances, however, the average may be based on beginning and ending balances for the test period.

Schedule N–4. Rate of return claimed with a brief statement of the basis therefor.

Schedule N–5. Operation and maintenance expenses by functional classifications.

Schedule N–6. Depreciation, depletion, and amortization expense by functional classifications.

Schedule N–7. Income tax allowances computed on the basis of the rate of return claimed.

Schedule N–8. Other taxes.

Schedule N–9. Cost of service allocated to the sales or services for which the increase in rate, or charge is proposed, including the principal determinants used for allocation purposes.

Schedule N–10. Comparison of cost of service with revenues under proposed rates for the test period.

When this group of schedules is filed by a Class A company pursuant to Section 154.63 (b)(3) and the beginning of the 12 consecu-

...months of the most recently available ... experience is more than one month ... the 12 months of actual data used in ... rate increase filing, the natural ... company shall also report separately for ... intervening period actual data compar... to that required by Schedules N-1, N-2, ... INTERSTATE COMMERCE COMMISSION

[49 CFR Part 176]

[Ex Parte No. MC-51]

POOLING BY MOTOR COMMON CARRIERS OF HOUSEHOLD GOODS

Extension of Period for Compliance With Orders

There being under consideration (1) a petition filed November 30, 1961, by United Van Lines, Inc., seeking reconsideration and relief from the provisions of the separate orders of the Commission, Division 3, dated October 5, 1961, and reply thereto, (2) a petition filed December 30, 1961, by Anderson and Benson Corporation, et al., for clarification and expansion of the scope of questionnaire, filing of which, in completed form, as well as compliance with other provisions, is required by said orders on or before February 28, 1962, and (3) a request filed February 13, 1962, by Movers' & Warehousemen's Association of America, Inc., et al., for an extension of time to comply with the provisions of said orders of October 5, 1961, and good cause therefor appearing:

It is ordered, That the period provided for compliance by interested persons and parties of record with the provisions and requirements of said orders of October 5, 1961, (26 F.R. 9786, I0240) be, and it is hereby, extended to April 30, 1962.

Dated at Washington, D.C., this 15th day of February, A.D. 1962.

By the Commission, Commissioner Tuggle.

[SEAL] HAROLD D. McCOY, *Secretary.*

DEPARTMENT OF STATE

Agency for International Development

[Delegation of Authority No. 12]

ASSISTANT ADMINISTRATOR FOR NEAR EAST-SOUTH ASIA, ASSISTANT ADMINISTRATOR FOR LATIN AMERICA, ASSISTANT ADMINISTRATOR FOR AFRICA AND EUROPE, AND ASSISTANT ADMINISTRATOR FOR FAR EAST

Delegation of Authority

FEBRUARY 17, 1962.

Pursuant to the authority delegated to me by Delegation of Authority No. 104 from the Secretary of State in accordance with Executive Orders 10900 and 10973, as amended, I hereby delegate the following function to each of the Assistant Administrators listed above for the countries or areas within their responsibility, with authority to redelegate, retaining for myself concurrent authority to exercise any of the functions herein delegated:

Authority to negotiate, authorize, execute, and implement loan agreements pursuant to that portion of section 104(e) of the Agricultural Trade Development and Assistance Act of 1954, as amended, added by the Act of August 13, 1957, 71 Stat. 343, including authority to amend or make ancillary agreements relating to such loans and loans entered into heretofore by the Export-Import Bank of Washington.

This Delegation of Authority shall be effective immediately and shall continue in full force and effect until such time as it is rescinded by me.

FRANK M. COFFIN,
Acting Administrator.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ARIZONA

Notice of Proposed Withdrawal and Reservation of Lands

The United States Army Corps of Engineers has filed an application, Serial Number AR-031299 for the withdrawal of the lands described below, from all forms of appropriation under the public land laws, including the general mining and mineral leasing laws, subject to existing valid claims. The applicant desires the land for the establishment of a permanent sanitary fill area. The intended use will have a negligible effect on the surface or underground water under the jurisdiction of the State.

For a period of thirty days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, 3022 Federal Building, Phoenix 25, Arizona.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

GILA AND SALT RIVER BASE MERIDIAN, ARIZONA

T. 2 N., R. 1 W.,
Sec. 1, SE¼SE¼.

The area described above contains 40.00 acres.

Dated: February 16, 1962.

FRED J. WEILER,
State Director.

CIVIL AERONAUTICS BOARD

[Docket 13415; Order No. E-18043]

WEST COAST AIRLINES, INC.

"Use It Or Lose It" Investigation and Route Realignment; Order Instituting Investigation, and Statement of Tentative Findings and Conclusions and Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 21st day of February 1962.

In the Seven States Area Investigation (Order E-13254, December 8, 1958), the Board made extensive route awards and subjected them to the "use it or lose it" policy, which was simultaneously adopted. This policy contemplated an early reassessment of the traffic response to the newly authorized services in order to determine whether sufficient use was being made of them to warrant their continuation. The Board specifically set a minimum standard of use which required that each city, whether certificated on a temporary or an indefinite basis, originate an average of five passengers daily for the twelve months following the initial six months of service, and indicated that it would, in the absence of unusual or compelling circumstances, institute a formal investigation to determine whether a city should lose its air service for lack of use in the event it does not meet the standard. Further, the Board stated that it would similarly reassess the traffic results on each route segment for the same twelve months period. The minimum standard in this regard required an average passenger load of five passengers per flight during the trial period, and provided that an inadequate traffic response on any segment would result in the institution of appropriate proceedings to determine whether the subject segment should be suspended or deleted. In addition, with respect to those segments experiencing average passenger loads ranging between five and seven passengers per flight, it was provided that formal proceedings looking toward the termination of service would be instituted, except in those situations in which unusual circumstances such as extreme isolation or national defense needs may dictate the contrary.

Subsequent to the Seven States case, and in order to properly and adequately implement the "use it or lose it" policy, the Board adopted a regulation which required local service carriers to report to the Board on a monthly basis the passenger loads on all flights on each route segment of their respective systems.[1]

In Order E-14388, July 30, 1960, effective October 23, 1959, the Board decided the Pacific Northwest Area Local Service Case, and in Orders E-14386, July 31, 1959, effective October 23, 1959, and E-14460, September 15, 1959, effective September 15, 1959, the Board decided the Montana Area Local Service Case, and the certificates of the carriers who received awards therein were subject to the "use it or lose it" policy enunciated in the Seven States case. Pertinent traffic data for the full trial period is now available, or will become so in the near future. Consequently, we are in a position to proceed pursuant to our announced policy.

We have carefully examined the traffic data filed by West Coast Airlines, Inc. (West Coast) with respect to that portion of its system subsequent to the Pacific Northwest and Montana cases and involved in current proceedings. These materials are reflected in part in Appendices A, B, and C[2] and we find that an investigation should be instituted with respect to the points and segments set forth below, to determine whether they should be deleted from West Coast's certificate in the light of the use made of the various services.

---

[1] Part 241, Amendment 13, effective November 1, 1959, and Amendment No. 1 to Part 241, effective August 1, 1961. Passenger origination data were previously required to be filed as part of the carrier Form 41 reports.

[2] Filed as part of the original document.

...points averaging less than five originated passengers daily:

...ingham, Wash.	Oakland, Calif.
...-Redmond, Oreg.	Ogden, Utah.
..., Oreg.	Olympia, Wash.
...-Shelby, Mont.	Omak, Wash.
... Falls, Mont.	Pendleton, Oreg.
...view, Oreg.	Salem, Oreg.
..., Utah.	Whidbey Island, Wash.
...port-Toledo, Oreg.	

...segments experiencing average passenger loads between five and seven passengers per flight:

That portion of segment 1 between Klamath Falls, Oreg. and Boise, Idaho, via Lakeview and Burns, Oreg.; Segment 8 between ..., Wash./Coeur d'Alene, Idaho and ... Falls, Mont., via Kalispell and Cut ...-Shelby, Mont.;

Segment 9 between Seattle, Wash. and ...ingham, Wash., via Whidbey Island, ...

In the West Coast Temporary Points ...oval Case (Order E–16520, March ..., 1961), the Board concluded that Ontario-Payette and Baker should be ...ained, notwithstanding their low ...ffic generation. In reaching that de...sion the Board stated that West Coast's ...rvice to the two points had been unsatisfactory in meeting the needs of the ...blic and that this was accountable ...r the limited traffic generation. Following the Board's decision, West Coast ...ntinued to provide substantially the ...me service that it offered at the time ...f the hearing in the Temporary Points ...se and traffic statistics indicate that ...ker and Ontario-Payette continued to ...iginate far less than five passengers ...day.

...By Order E–17758, November 24, 1961, ...e Board issued an exemption to West ...ast that would permit it to offer an ...proved service between Baker and ...ntario-Payette, on the one hand, and ...rtland, on the other. However, the ...w service pattern has required the ...eration of an additional schedule by ...est Coast and, depending upon traffic ...sponse to the improved service, may ...aterially affect the cost picture that ...as before the Board in the Temporary ...ints Case. In view of the foregoing, ...e find it appropriate to reexamine West ...ast's authority at these points despite ...e relatively recent review in the Tem...rary Points Case. This will make it ...ssible after hearing to resolve the long ...isting service problem, either by re...iring West Coast, through imposition ...f an appropriate certificate condition or ...herwise, to provide a specified pattern ...f service to either or both of the points ...f this is found necessary, or by deleting ...ne or both of the points in the event ...he evidence dictates a result different ...om that reached in the Temporary ...ints Case.

As to the other points and segments ...aced in issue here, we find that there ...o not appear to exist such unusual cir...umstances as should preclude the in...itution of this investigation at this ...me under the "use it or lose it" policy.

In addition to the issues already out...ned above, and since Kalispell which ...as originated over five passengers per day, may lose air service through the deletion of segment 8, we will also consider in this proceeding the possibility of certificating Kalispell on Route 77F.[1] Also, as previously indicated, we will consider herein the elimination or suspension or air service at Olympia on segment 2 and Pendleton on segment 5, on the basis of the substandard traffic generation at these points during the past twelve months, even though West Coast's authority at Olympia and Pendleton was not affected in the Pacific Northwest or Montana cases. Further, although Whidbey Island, an intermediate point on segment 9 between Seattle and Bellingham, has not received air service, we are placing this point in issue in this case. West Coast has been unable to secure permission to use the Naval Air Station's facility on Whidbey Island, the only airfield suitable for commercial operations, and Order E–14566, October 20, 1959, granted West Coast authority to suspend service at Whidbey Island.

Because of the many points and segments which may be deleted as a result of this "use it or lose it" investigation, and in order to permit greater flexibility in scheduling flights and more operational efficiency and economy, we tentatively find and conclude that realignment of West Coast's route structure as indicated in Appendix I [2a] is required by the public convenience and necessity and we will direct interested parties to show cause why such action should not be taken.[2b] This realignment will not affect West Coast's basic authority, either as it now exists, or as it may exist subsequent to decision on the "use it or lose it" issues, and no new competitive issues are introduced by the suggested realignment.

We have reviewed those situations where points or pairs of points at issue for deletion in this case are also served by a trunkline carrier, and where there appears to be a possibility that by deletion of the trunkline's authority, the city would be adequately served and could generate sufficient traffic to justify retention on the local service carrier's system. We have considered the characteristics of the traffic generated at the city; which carrier provides service to the major communities of interest; and whether the local service carrier could provide appropriate replacement services. On these bases, we have concluded that the matter of suspension or deletion of United's authority over segment 2 of its Route 1, between Spokane, Washington, and Pendleton, Oregon, and on segment 7, at Salem, Oregon, should be placed in issue in this proceeding.

United Air Lines, Inc. (United) will, therefore, be made a party to this proceeding, as will Northwest Airlines, Inc. (Northwest).

In the investigation portion of this proceeding, we will be concerned solely with the possible elimination or reduction of unwarranted competitive services. Since this does not involve proposals as to additional route authorizations, we will not consider new or previously filed route applications nor possible certificate modifications, except as contemplated above, and we intend that this investigation be conducted so that it may proceed promptly and be disposed of in the shortest possible time allowing a decision upon an adequate record.

Accordingly, it is ordered:

1. That an investigation be and it hereby is instituted pursuant to section 401(g) of the Act to determine (a) whether the public convenience and necessity require continuation, and if so for what period, or suspension or elimination of the authority of West Coast Airlines, Inc. to serve:

Baker, Oreg.	Olympia, Wash.
Bellingham, Wash.	Omak, Wash.
Bend-Redmond, Oreg.	Ontario, Oreg.-Payette, Idaho.
Burns, Oreg.	Pendleton, Oreg.
Cut Bank-Shelby, Mont.	Salem, Oreg.
Great Falls, Mont.	Whidbey Island, Wash.
Lakeview, Oreg.	Segment 1 between Klamath Falls, Oreg. and Boise, Idaho.
Logan, Utah.	Segment 8.
Newport-Toledo, Oreg.	Segment 9.
Oakland, Calif.	
Ogden, Utah.	

(b) in the event the termination of any point results in nonstop service between points which some other carrier is already authorized to serve on a nonstop basis, whether the public convenience and necessity require the suspension or elimination of the entire segment or portion thereof, or change in the limitations contained in West Coast's certificate; (c) whether the public convenience and necessity require the certification of Kalispell, Montana, on Route 77F in the event segment 8 is deleted; and (d) whether, in the event Baker and Ontario-Payette are continued, the Board should by certificate amendment or otherwise specify the pattern of service to be provided these points.

2. That the investigation instituted herein include the question of whether United's certificate authority, over segment 2 of its Route 1, between Spokane, Washington, and Pendleton, Oregon, and, on segment 7, at Salem, Oregon, should be continued, and if so for what period, or suspended or deleted;

3. That West Coast submit as part of its direct exhibits in this case appropriate data reflecting the quality, quantity and other characteristics of service it has provided over the segments and at the points here in issue;

4. That all interested persons be and they hereby are directed to show cause why the Board should not issue an order modifying the certificate of West Coast by redesignating the various segments of

---

[1] In order to keep separate the issues subject to presidental approval and those concerning purely domestic issues, the Examiner should deal with the issue of possible inclusion of Kalispell on the foreign route in a separate recommended decision.

[2a] Filed as part of the original document.

[2b] Appendix I assumes the deletion of no points or segments placed in issue herein. However, the redesignation of West Coast's routes will of course, be modified to reflect deletion of any and all points and segments found to be required, and certificate condition will be appropriately deleted, amended, or added if such action is required to preserve the basic operating authority.

its route structure as indicated in Appendix I [a];

5. That any interested person having objection to the issuance of an order making final the findings and conclusions stated herein with respect to the redesignation of the route structure of West Coast as indicated in Appendix I [a] shall, within 14 days from the service date of this order, file with the Board and serve upon all persons hereafter made parties to this proceeding, written notice of objections;

6. That after expiration of the above period allowed for filing of objections the matter shall be heard before an Examiner of the Board, together with the "use it or lose it" matters;

7. That in the event there are no objections with respect to the redesignation issues all further procedural steps will be deemed to have been waived as to these issues, and that matter will be submitted to the Board for final action at the same time the "use it or lose it" issues are submitted;

8. That a copy of this order shall be served on West Coast Airlines, Inc., United Air Lines, Inc., Northwest Airlines, Inc., the cities of Oakland, Sacramento, and San Francisco, California; Boise, Burley, Coeur d'Alene, Haley, Idaho Falls, Ketchum, Lewistown, Moscow, Payette, Pocatello, Rupert, Sun Valley, and Twin Falls, Idaho; Cut Bank, Great Falls, Kalispell, and Shelby, Montana; Albany, Astoria, Baker, Bend, Burns, Coos Bay, Corvallis, Eugene, Klamath Falls, Lakeview, Medford, Newport, North Bend, Ontario, Pendleton, Portland, Redmond, Roseburg, Salem, and Toledo, Oregon; Logan, Ogden, and Salt Lake City, Utah; Aberdeen, Bellingham, Clarkston, Ephrata, Hoquiam, Kennewick, Moses Lake, Olympia, Omak, Pasco, Port Angeles, Pullman, Richland, Seattle, Spokane, Walla Walla, Wenatchee, Whidbey Island, and Yakima, Washington; and the Aeronautical Departments of the States of California, Idaho, Montana, Oregon, Utah, and Washington, who are hereby made parties to this proceeding;

9. That a copy of this order shall be served on Pacific Air Lines, Inc., Western Air Lines, Inc., and Frontier Airlines, Inc.; and

10. That this order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] HAROLD R. SANDERSON,
Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 14535]

RALPH DE SENO

Corrected Order To Show Cause

In the matter of Ralph De Seno, Neptune, New Jersey, Docket No. 14535, order to show cause why there should not be revoked the license for Radio Station 2A5739 in the Citizens Radio Service.

The Commission, by the Chief, Safety and Special Radio Services Bureau, under delegated authority, having under consideration the matter of certain alleged violations of the Commission's rules in connection with the operation of Citizens Radio Station 2A5739;

It appearing, that, at various times during April, 1961, the licensee participated in a scheme to conceal from detection by the Commission the identity of certain persons engaged in the operation of Citizens radio stations in the general vicinity of Asbury Park, New Jersey, by the use of call signs not assigned by the Commission to the stations being operated by such persons; and

It furthe appearing, that, by the licensee's participation in the above-mentioned scheme, and in the operation of his radio station, he has evidenced a predisposition to disregard the rules and regulations of the Commission and to cooperate with others in the violation thereof; and

It further appearing, that, had the Commission, at the time of the grant of the license for Citizens Radio Station 2A5739, been aware of the licensee's above-mentioned predisposition, it would have been warranted in refusing the grant of a license to such licensee and would have refused to grant a license to such licensee; and

It further appearing, that, at various times during April, 1961, the licensee used a call sign or signal which had not been assigned by proper authority to such station, in violation of § 19.83 of the Commission's rules; and

It further appearing, that, on November 1, 1961, the Commission, pursuant to section 308(b) of the Communications Act of 1934, as amended, requested that the licensee respond to certain interrogatories in order that it might have information upon which to base a determination as to whether or not the license for Citizens Radio Station 2A5739 should be revoked; and

It further appearing, that, on November 14, 1961, the licensee furnished information in reply to the above-mentioned interrogatories concerning the use of a call sign not assigned by the Commission to a station being operated by another person; which information was false; and

It further appearing, that, at various times between April 15, 1961, and July 15, 1961, and particularly on April 21, 1961, May 13, 1961, and July 14, 1961, the call sign of Citizens Radio Station 2A5739 was not transmitted at the beginning and termination of all communications, in violation of Section 19.62 of the Commission's rules; and

It further appearing, that, in view of the foregoing, the licensee has repeatedly violated §§ 19.62 and 19.83 of the Commission's rules; and

It further appearing, that, in view of the foregoing, the licensee has wilfully violated section 308(b) of the Communications Act of 1934, as amended;

It is ordered, This 20th day of February, 1962, pursuant to section 312(a) (1) (2) and (4) and (c) of the Communications Act of 1934, as amended, and section 0.291(b)(8) of the Commission's Statement of Delegations of Authority, that the licensee show cause why his license for Citizens Radio Station [illegible] should not be revoked and appear and give evidence in respect thereto at a hearing to be held at a time and place to be specified by subsequent order; and

It is further ordered, That the Acting Secretary send a copy of this order to Ralph DeSeno, d.b.a. Ralph's Oil Burner Service, 203 Poplar Place, Neptune, New Jersey, by Certified Mail—Return Receipt Requested.

Released: February 21, 1962.

DAKOTA MICROWAVE CO.

Order Continuing Hearing

In re application of Dakota Microwave Company, Turkey Ridge, South Dakota, Docket No. 14315, File No. 1046-C1-R-61; for renewal of the license for station KAQ71, a facility in the Domestic Public Point-to-Point Microwave Radio Service.

The Hearing Examiner having under consideration a Motion for Continuance of Hearing Date, filed February 21, 1962, by the Chief Common Carrier Bureau (Bureau), on behalf of Allen C. Harmes, d/b as Dakota Microwave Company (Mr. Harmes); wherein it is requested that the hearing presently scheduled to begin on February 26, 1962, be continued for a period of 90 days;

It appearing, according to the Bureau, that Mr. Harmes, who intends to represent himself in the proceeding herein, had a serious heart attack just prior to Thanksgiving and is under doctor's orders to remain close to his home and to refrain from any business activity for at least a period of six months; that upon informal inquiry by the Bureau, Mr. Harmes advised that he could attend the hearing presently scheduled for February 26; and further, that he has been unable to gather any data or other materials for presentation at the hearing in this matter;

It further appearing, that upon learning the foregoing the Bureau asked Mr. Harmes that, in view of his personal physical condition and in order to avoid a default, it would file the aforementioned Motion for Continuance of Hearing Date on his behalf;

It further appearing, that the Bureau has stated that it has no objection to the grant of a 90-day continuance of the hearing and also requests a waiver of those provisions of the Commission's rules (47 CFR 1.43) relating to the withholding of action on motions for a full day period; and

It further appearing, that good cause has been shown for a prompt grant of the motion;

It is ordered, This 21st day of February 1962, that the Motion for Continuance of Hearing Date is granted to the parties hereinbelow specified, and the hearing presently scheduled to commence on February 26, 1962, is rescheduled to commence on May 21, 1962, at 10:00 a.m., at the Offices of the Commission in Washington, D.C.

Released: February 23, 1962.

CLAY SERVICE CORP.

Order Continuing Hearing

In re application of Clay Service Corporation, Ashland, Alabama, Docket No. 14261, File No. BP-13795; for construction permit.

The Hearing Examiner having under consideration motion filed February 21, 1962, on behalf of Clay Service Corporation requesting that the hearing herein now scheduled for March 5, 1962, be rescheduled for April 2, 1962;

It appearing that good cause exists why said motion should be granted; there is no opposition thereto and Chief, Broadcast Bureau, the other party to the proceeding, has consented to a waiver of § 1.43 of the Commission's rules to permit immediate consideration of said pleading;

Accordingly, it is ordered, This 21st day of February 1962, that the motion is granted and that the hearing herein now scheduled for March 5, 1962, be and the same is hereby rescheduled for April 2, 1962, 10:00 a.m., in the Commission's offices, Washington, D.C.

Released: February 23, 1962.

[Docket No. 14534]

FRANCIS J. WORTHINGTON

Order To Show Cause

In the matter of Francis J. Worthington, 543 Edgemont Avenue, Lansdale, Pennsylvania, Docket No. 14534; order to show cause why there should not be revoked the license for Radio Station 3W3303 in the Citizens Radio Service.

The Commission, by the Chief, Safety and Special Radio Services Bureau, under delegated authority, having under consideration the matter of certain alleged violations of the Commission's rules in connection with the operation of the above-captioned station;

It appearing that pursuant to § 1.76 of the Commission's rules, written notice of violation of the Commission's rules was served upon the above-named licensee as follows: Official Notice of Violation mailed on October 23, 1961, alleging that on October 15, 1961, subject radio station was operated with a frequency deviation greater than a tolerance of 0.005 percent, type A-3 emission, QSA-3, on 27110.38 kc/s in non-compliance with § 19.33 of the Commission's rules.

It further appearing that the above-named licensee, received said Official Notice but did not make satisfactory reply thereto, whereupon the Commission, by letter dated December 12, 1961, and sent by Certified Mail—Return Receipt Requested (Cert. No. 125257), brought this matter to the attention of the licensee and requested that such licensee respond to the Commission's letter within fifteen days from the date of its receipt stating the measures which had been taken, or were being taken, in order to bring the operation of the radio station into compliance with the Commission's rules, and warning the licensee that failure to respond to such letter might result in the institution of proceedings for the revocation of the radio station license; and

It further appearing, that receipt of the Commission's letter was acknowledged by the signature of the licensee, Francis J. Worthington, on December 20, 1961, to a Post Office Department return receipt; and

It further appearing, that although more than fifteen days have elapsed since the licensee's receipt of the Commission's letter, no response was made thereto; and

It further appearing, that, in view of the foregoing, the licensee has repeatedly violated § 1.76 of the Commission's rules;

It is ordered, This 21st day of February 1962, pursuant to section 312(a) (4) and (c) of the Communications Act of 1934, as amended, and section 0.291(b) (8) of the Commission's Statement of Delegations of Authority, that the said licensee show cause why the license for the above-captioned Radio Station should not be revoked, and appear and give evidence in respect thereto at a hearing to be held at a time and place to be specified by subsequent order; and

It is further ordered, That the Secretary send a copy of this Order by Certified Mail—Return Receipt Requested to the said licensee.

Released: February 23, 1962.

[Docket No. 14546; FCC 62-224]

LOCAL TELEVISION PROGRAMMING IN CHICAGO, ILLINOIS

Notice of Inquiry

1. In our En Banc Programming Inquiry Report (20 Pike & Fischer RR 1902) we stated that:

> In the fulfillment of his obligation the broadcaster should consider the tastes, needs and desires of the public he is licensed to serve in developing his programming and should exercise conscientious efforts not only to ascertain them but also to carry them out as well as he reasonably can. He should reasonably attempt to meet all such needs and interests on an equitable basis. Particular areas of interest and types of appropriate service may, of course, differ from community to community, and from time to time. *However, the Commission does expect its broadcast licensees to take the necessary steps to inform themselves of the real needs and interests of the areas they serve, and to provide programming which in fact constitutes a diligent effort, in good faith, to provide for those needs and interests.* [Emphasis supplied.]

2. In the past, with the exception of individual hearing cases, we have relied in the most part on information contained in individual broadcast applications to assess whether the needs and interests of the public are being met. We believe it would be most helpful at this time to broaden the base of our knowledge on this question by holding a public inquiry in a specific community. Accordingly, we have decided to institute an inquiry addressed to this question in the City of Chicago. This inquiry will provide a forum where civic leaders and responsible and knowledgeable organizations and residents may have the opportunity to submit information and data on community needs and to submit their views on whether these needs and interests are being met by broadcast licensees. Obviously, participation in such a forum by community broadcast licensees is both necessary and appropriate.

3. We have selected the City of Chicago as the subject for this inquiry for two reasons: First, a large city presents an extremely complex challenge to a broadcast licensee. We believe it is of great importance to obtain the views of community leaders and organizations on how this challenge is being met in a large city. With the increasing urbanization of our country this question is of high importance. Chicago, as one of the largest cities in our country, as an important center for Agriculture, Industry, Education and the Arts, is a most appropriate place for such an inquiry. Second,

[a] Filed as part of the original document.

we have had a number of requests for such a hearing in the Chicago area.[1]

4. Because radio and television present somewhat differing problems, we have decided to confine ourselves in this inquiry to television. We will consider the appropriateness of a similar inquiry in the radio field at a later time. Further, since we have recently concluded hearings on the network program selection process, our main area of inquiry in this proceeding will be addressed to the local television programs offered by the Chicago stations.

5. In scheduling this informal inquiry, we emphasize the fact that this is a new and novel procedure; indeed, the first of its kind in recent Commission history. For this reason, we propose to hold just this one hearing until such time as we are able to determine its desirability and efficacy for use in selected future situations.

6. In light of the above, and on the Commission's own motion pursuant to the authority provided in section 403 of the Communications Act of 1934, as amended: *It is ordered*, That, a hearing be held before Commissioner Robert E. Lee on March 19, 1962, in Chicago, Illinois, at a place to be designated by further order, for the purpose of inquiring into, and obtaining full information concerning:

(a) The efforts made by Chicago television stations to determine the needs and interests of the residents of Chicago in the area of local live programming.

(b) The effectiveness with which television stations in Chicago have met the needs and interests of Chicago residents by broadcasting local live programs.

(c) The extent of public demand, if any, for additional or different types, of local live television programs, than those now broadcast by Chicago television stations.

7. *It is further ordered*, That interested parties and organizations desiring to appear and testify at the above hearing shall notify the Commission in writing of such intentions not later than March 12, 1962, and shall set forth in their notifications identifying information concerning the proposed witnesses, including home and business addresses and telephone numbers.

8. *It is further ordered*, That the licensees of Television Stations WNBQ, WTTW, WBBM–TV, WBKB and WGN–TV are made parties to this hearing for the purpose of presenting testimony relating to the subject of the inquiry.

Adopted: February 21, 1962.

Released: February 23, 1962.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Acting Secretary.

[F.R. Doc. 62–2005; Filed, Feb. 27, 1962; 8:50 a.m.]

FEDERAL POWER COMMISSION

[Docket No. G–2306 etc.]

AMERICAN LOUISIANA PIPE LINE CO. ET AL.

Notice of Amendment to Applications

FEBRUARY 21, 1962.

American Louisiana Pipe Line Company, Docket No. G–2306; Michigan Wisconsin Pipe Line Company, Docket No. G–2327; American Louisiana Pipe Line Company, Docket No. G–10396; Panhandle Eastern Pipe Line Company, Docket No. G–11061; Trunkline Gas Company, Docket No. CP60–22 (Phase Two); Panhandle Eastern Pipe Line Company, Docket No. CP60–40; Panhandle Eastern Pipe Line Company, Docket No. CP60–60; Panhandle Eastern Pipe Line Company, Docket No. CP61–36; Citizens Gas Company, Docket No. CP61–54; City of LaCygne, Kansas, Docket No. CP61–68; Central Illinois Light Company, Docket No. CP61–114; Central Illinois Light Company, Docket No. CP61–115; Panhandle Eastern Pipe Line Company, Docket No. CP61–136; Illinois Power Company, Docket No. CP61–160; Citizens Gas Company, Docket No. CP61–191; Citizens Gas Company, Docket No. CP61–192.

By orders issued December 1, 1960 (25 F.R. 12489), January 6, 1961 (26 F.R. 267) and February 9, 1961 (26 F.R. 1372), the above entitled matters were consolidated and fixed for hearing. Hearings were commenced on January 31, 1961, and have not yet been concluded.

Take notice that on February 19, 1962, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1348, Kansas City, Missouri filed in Docket Nos. CP60–40, CP60–60, CP61–36, and CP61–136) its Fourth Amendment to Applications pursuant to section 7 of the Natural Gas Act, by which it requests certificates of public convenience and necessity authorizing the construction and operation of certain facilities for the transportation and sale of additional volumes of natural gas in interstate commerce, all as more fully set forth in the Fourth Amendment to the Applications which is on file with the Commission and open to public inspection.

By the Fourth Amendment to its application in Docket Nos. CP60–60, et al., Panhandle seeks authorization to increase its winter contract demand by 391,032 Mcf per day rather than the 325,632 Mcf per day increase it had previously sought. Included in the instant amendment is a new proposal to sell 65,000 Mcf per day in addition to the 120,000 Mcf per day it now sells to the East Ohio Gas Company (East Ohio) under Panhandle's LS–1 Rate Schedule. Panhandle would terminate its existing sales of 12,500,000 Mcf per year to East Ohio now made under Panhandle's S–1 Rate Schedule. In addition, Panhandle requests authorization to initiate a new service to Michigan Consolidated Gas Company (Michigan Consolidated) under a proposed SS–1 Rate Schedule at an annual contracted volume of 46,438,000 Mcf, to be delivered during the months of April through October. Pri... to the construction of facilities as here... proposed, Panhandle would deliver ... sell to Michigan Consolidated a volu... of 100,000 Mcf per day, to be deliver... during the months of April throu... October, 1962. Panhandle is continui... in its requests for authorization to pro... vide related increases in contract de... mands to its general service custome... during the non-winter months. Pan... handle further renews its requests f... authorization to deliver volumes of g... for sale to the B. F. Goodrich Compa... (as previously proposed in Docket N... CP61–36) and General Portland Cem... Company (as previously proposed ... Docket No. CP60–40). Panhandle's pr... posed sale to the Ford Motor Compa... proposed in its second amended fili... will now be handled separately.

In addition to the mainline facili... for which Panhandle had previou... sought certificate authorization, Pa... handle now seeks authorization to co... struct and operate 95.82 miles of 30-i... pipeline and 22.84 miles of 26-inch pi... line between its existing Tuscola co... pressor station and the eastern end ... its main line, and an additional 22,... horsepower of compression units to b... compression for which prior authori... tion has been sought.

By this amended application, Pa... handle seeks authorization to utilize ... Waverly Storage Field, for wh... authorization to test has already b... granted by the Commission in Doc... No. G–19461. Panhandle now propo... to utilize Waverly Storage Field ... 25,000 Mcf of peak day capacity.

The proposed expansion is estima... to cost approximately $68,777,000. ... is anticipated that the expansion wo... be financed through the issuance ... debentures.

Panhandle alleges that it has adequ... gas supplies to support the expan... program reflected in the amen... application.

Those parties who have been p... mitted to intervene in the above-enti... consolidated proceedings shall be c... sidered interveners in the amen... applications.

Further protests, petitions to in... vene or notices of intervention in ... Dockets in which the herein-not... amendment has been filed may be ... with the Federal Power Commis... Washington 25, D.C. in accordance ... the rules of practice and procedure ... CFR 1.8 or 1.10) on or before March ... 1962.

The above-entitled consolidated ... ceedings have been recessed until M... 1, 1962. At such time as the pres... examiner may deem proper, but in ... event prior to March 13, 1962, the pr... ing examiner shall set a date on w... the matters involved in and the i... presented by the above-noted amen... applications may be heard.

JOSEPH H. GUTRID...

...RITIES AND EXCHANGE COMMISSION

[File No. 70-4011]

...RAL PUBLIC UTILITIES CORP.

...of Proposal to Issue Notes to ...ks Secured by Drafts to be ...wn Under Letters of Credit

FEBRUARY 20, 1962.

Notice is hereby given that General ... Utilities Corporation ("GPU"), 80 ... Street, New York 5, New York, a ...ered holding company, has filed a ...ration and an amendment thereto ... this Commission pursuant to the ... Utility Holding Company Act of ... ("Act"), designating sections 6(a) ... 7 thereof as applicable to the pro... transactions. All interested per... are referred to the declaration, on ... at the office of the Commission, for ...tement of the transactions therein ...osed which are summarized below.

GPU proposes, pursuant to a credit ...ement with a group of seven banks, ... promissory notes ("Notes") not ...ding an aggregate of $50,000,000 ...tanding at any one time, to evidence ...osed aggregate borrowings in that ...ment. The Notes, which will be issued ... time to time not later than De... 31, 1962, will be secured by drafts ...osed to be drawn by GPU under ...ers of credit opened by a syndicate ... Philippine banks through a U.S. ... and acquired by GPU by reason of ... sale of its entire investment in Ma... Electric Company ("Manila") to ...ippine interests. (See Holding ... Act Release No. 14556 (Jan... 3, 1962).) The borrowings will be ...id in nine equal annual installments ...encing on January 10, 1963, the ... of the last such installment being ...ary 10, 1971. The payments are ...ed to the dates when installments ... payable under the letters of credit, ... that the drafts proposed to be drawn ... the letters of credit can be auto...ically applied in payment of the ...es.

The aggregate face amount of the let... of credit now held by GPU is $54,-..., of which $31,762,500 has been ...firmed by a syndicate of 10 U.S. ... Although the balance of the let... of credit now held by GPU has not ... similarly confirmed, the purchaser ... GPU's investment in Manila has un...taken to use its best efforts to obtain ... confirmation. In addition, GPU ...ects to acquire supplemental letters ... credit in the approximate amount of ...,000,000, representing an adjustment ... the Manila sales price in respect of ...ila's undistributed earnings to the ... of sale. These supplemental letters ... credit will mature in nine equal annual ...tallments, and GPU expects that the ...unts payable thereunder during at ... the first 5 years will be confirmed ... U.S. banks.

The annual interest rate for Notes ...turing on or before January 10, 1967 ...d secured by drafts proposed to be ...awn under the letters of credit con...firmed by U.S. banks) will be the prime rate (at present 4½ percent) for commercial borrowings at The First National City Bank of New York and will fluctuate (with a 30-day interval) with fluctuations in that rate, except that said interest rate will not be less than 4 percent nor more than 5 percent per annum. The annual interest rate on Notes maturing after January 10, 1967 (and secured by drafts proposed to be drawn under the letters of credit not confirmed by U.S. banks) will be ½ of 1 percent in excess of said prime rate and will similarly fluctuate, except that said interest rate will not be less than 4½ percent nor more than 5½ percent per annum.

A commitment fee of ¼ of 1 percent per annum is to be payable with respect to the unused portion of the banks' commitments under the credit agreement, commencing on the day following the entry of an order by this Commission permitting this declaration to become effective. GPU may, at any time, reduce or terminate the banks' commitments and may prepay any or all borrowings under the credit agreement. No prepayment premium will be payable by GPU in connection with any such prepayment unless such prepayment is made from, or in anticipation of, other bank borrowings, in which event a prepayment premium of ½ of 1 percent will be payable.

The names of the seven banks and the amounts of the commitment of each under the credit agreement are as follows:

The First National City Bank of New York, New York, N.Y.	$15,000,000
Manufacturers Hanover Trust Co., New York, N.Y.	10,000,000
Morgan Guaranty Trust Co., New York, N.Y.	5,000,000
Mellon National Bank and Trust Co., Pittsburgh, Pa.	5,000,000
The Marine Midland Trust Co. of New York, New York, N.Y.	5,000,000
Chemical Bank New York Trust Co., New York, N.Y.	5,000,000
Bankers Trust Co., New York, N.Y	5,000,000
Total	50,000,000

The proceeds of the borrowings will be used by GPU (1) to pay the tax liability arising from the sale by GPU of its investment in Manila, (2) for investment from time to time in its subsidiary companies, and/or (3) to reimburse its treasury for such investments theretofore made.

The declaration states that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions. Fees and expenses in connection with the proposed transactions are estimated at $7,000, including counsel fee of $5,000.

Notice is further given that any interested person may, not later than March 8, 1962, request in writing that a hearing be held on such matters, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D.C. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon declarant, and proof of service (by affidavit or, in case of an attorney-at-law, by certificate) should be filed contemporaneously with the request. At any time after said date, the declaration, as amended or as further amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 24D-1917]

URAN MINING CORP.

Notice and Order for Hearing

FEBRUARY 21, 1962.

I. Uran Mining Corporation (issuer), 443 Powers Building, Rochester 14, New York, a New York corporation, filed with the Commission on September 6, 1955, a notification and offering circular and subsequently filed amendments thereto relating to a proposed public offering of 58,400 shares of its 10 cents par value Class A voting common stock and 233,600 shares of its 10 cents par Class B nonvoting common stock to be offered in units consisting of one share of Class A stock and four shares of Class B stock at $5 per unit for an aggregate of $292,000, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3(b) thereof and Regulation A promulgated thereunder.

II. The Commission on February 12, 1959, issued an order pursuant to Rule 261 of the General Rules and Regulations under the Securities Act of 1933, as amended, temporarily suspending the exemption under Regulation A and affording any person having an interest therein an opportunity to request a hearing pursuant to Rule 261. A written request for hearing was received by the Commission.

The Commission deeming it necessary and appropriate to determine whether to vacate the temporary suspension order or to enter an order permanently suspending the exemption.

It is hereby ordered, Pursuant to Rule 261 of the general rules and regulations under the Securities Act of 1933, as amended, that a hearing be held at 9:45 a.m., MST, on March 12, 1962, at the Denver Regional Office of the Commission, 802 Midland Savings Building, 444 17th Street, Denver 2, Colorado, with respect to the following matters and questions, without prejudice, however, to the specification of additional issues which may be presented in these proceedings:

Whether a device, scheme, or artifice to defraud has been employed in connection with the sale of the issuer's securities and the offering has been made in such manner as to operate as a fraud or deceit upon the purchaser, particularly with respect to statements that:

1. A mineralized tree root had been discovered on the issuer's mining claims which held a uranium content of .12 percent;

2. It had been established beyond a doubt that ore above commercial grade had been uncovered in several different locations on the issuer's claims;

3. There were at least 4,000,000 tons of uranium ore in a bed just below the surface of a ridge on the issuer's properties;

4. The estimate of 4,000,000 tons of uranium had been corroborated by core drillings;

5. The issuer had 740 acres of land, showing uranium oxide from .10 percent to 1.72 percent;

6. A representative of a large name mining company had visited the issuer's properties and was interested in the properties;

7. 100 tons of commercial grade ore had been stockpiled and were ready for shipment.

III. *It is further ordered*, That Sidney L. Feiler, or any officer or officers of the Commission designated by it for that purpose, shall preside at the hearing; that any officer or officers so designated to preside at any such hearing are hereby authorized to exercise all the powers granted to the Commission under sections 19(b), 21 and 22(c) of the Securities Act of 1933, as amended, and to hearing officers under the Commission's Rules of Practice.

It is further ordered, That the Secretary of the Commission shall serve a copy of this order by registered mail on Uran Mining Corporation; that notice of the entering of this order shall be given to all persons by general release of the Commission and by publication in the FEDERAL REGISTER. Any person who desires to be heard or otherwise wishes to participate in the hearing shall file with the Commission on or before March 9, 1962, a request relative thereto as provided in Rule 9(c) of the Commission's rules of practice.

It is further ordered, That Uran Mining Corporation, pursuant to Rule 7 of the rules of practice of the Commission (17 CFR 201.7), shall file an answer to the allegations set forth in Section II hereinabove. Such answer shall be filed in the manner, form and within the time prescribed by 17 CFR 201.7 and shall specifically admit or deny or state that Uran Mining Corporation does not have, and is unable to obtain, sufficient information to admit or deny each of the allegations set forth in Section II hereinabove.

Notice is hereby given that if Uran Mining Corporation fails to file an answer pursuant to 17 CFR 201.7 within fifteen days after service upon it of this notice and order for hearing, the proceedings may be determined against Uran Mining Corporation by the Commission upon consideration of this notice and order for hearing and said allegations in Section II above may be deemed to be true.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary*.

INTERSTATE COMMERCE COMMISSION

[Notice 199]

MOTOR CARRIER ALTERNATE ROUTE DEVIATION NOTICES

FEBRUARY 23, 1962.

The following letter-notices of proposals to operate over deviation routes for operating convenience only with service at no intermediate points have been filed with the Interstate Commerce Commission, under the Commission's deviation rules revised, 1957 (49 CFR 211.1 (c)(8)) and notice thereof to all interested persons is hereby given as provided in such rules (49 CFR 211.1(d)(4)).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 CFR 211.1(e)) at any time will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of publication.

Successively filed letter-notices of the same carrier under the Commission's deviation rules revised, 1957, will be numbered consecutively for convenience in identification and protests if any should refer to such letter-notices by number.

MOTOR CARRIERS OF PROPERTY

No. MC 40858 (Deviation No. 8), THE SILVER FLEET MOTOR EXPRESS, INC., Eastman Road, Kingsport, Tenn., filed February 12, 1962. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions over a deviation route as follows: From the junction of U.S. Highway 64 and Interstate Highway 24, west of U.S. Highway 41, at Monteagle, Tenn., over Interstate Highway 24 to junction U.S. Highway 41, approximately two miles north of Pelham, Tenn., and return over the same route, for operating convenience only, serving no intermediate points. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Chattanooga, Tenn., over U.S. Highway 41, via Monteagle, Pelham, Manchester and Murfreesboro, Tenn., to Nashville, Tenn., and return over the same route.

No. MC 40858 (Deviation No. 9), THE SILVER FLEET MOTOR EXPRESS, INC., Eastman Road, Kingsport, Tenn., filed February 14, 1962. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions over a deviation route as follows: From Cincinnati, [illegible] over Interstate Highway 75 to [illegible] U.S. Highway 25, south of Williamstown, Ky., thence over U.S. Highway 25 to junction Interstate Highway 75, [illegible] of Eagle Spring, Ky., thence over Interstate Highway 75 to junction U.S. Highways 62 and 460, east of Georgetown, Ky., thence over U.S. Highways 62 and 460 to Georgetown, Ky., and return over the same route, for operating convenience only, serving no intermediate points. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Cincinnati over U.S. Highway 25 to Mt. Vernon, Ky., and return over the same route.

No. MC 42487 (Deviation No. 12), CONSOLIDATED FREIGHTWAYS CORPORATION OF DELAWARE, 715 South 25th Avenue, Bellwood, Ill., filed February 14, 1962. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities* with certain exceptions over a deviation route as follows: From the junction of U.S. Highway 18 and Interstate Highway 90, near Madison, Wis., over Interstate Highway 90 to junction U.S. Highway 12, northwest of Wisconsin Dells, Wis., and return over the same route, for operating convenience only, serving no intermediate points. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Fairchild, Wis., over U.S. Highway 12 to Madison, and return over the same route.

No. MC 76266 (Deviation No. 6), MIDCHANTS MOTOR FREIGHT, INC., 2[illegible] Territorial Road, St. Paul 14, Minn., filed February 14, 1962. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Toledo, Ohio, over Interstate Highway 75 to Detroit, Mich., and return over the same route, for operating convenience only, serving no intermediate points. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Toledo over U.S. Highway 25, via Flat Rock, Mich., to Detroit, also over U.S. Highway 24 to Flat Rock, Mich., thence over U.S. Highway 25 to Detroit, and return over the same route.

No. MC 109538 (Deviation No. 1), CHIPPEWA MOTOR FREIGHT, INC., 2645 Harlem Street, Eau Claire, Wis., filed February 16, 1962. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route between Minneapolis, Minn., and Chicago, Ill., over Interstate Highways 90 and 94, for operating convenience only serving no intermediate points. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Minneapolis, Minn., over U.S. Highway 12, via St. Paul, Minn., to Chicago, and return over the same route.

MC 111231 (Deviation No. 19), ... TRUCK LINES, INC., 610 East ... Avenue, Springdale, Ark., filed ... 12, 1962. Carrier's represent... B. J. Wiseman, same address. ... proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: ... the junction of U.S. Highways 66 and 71, and Missouri Highway 96, near ...ge, Mo., over Missouri Highway ... to junction Missouri Highway 171, ... over Missouri Highway 171 to ...tion Missouri Highway 43, thence ... Missouri Highway 43 to Joplin, Mo., ... return over the same route, for operating convenience only, serving no intermediate points. The notice indicates that the carrier is presently authorized to transport the same commodities over pertinent service route as follows: ... Kansas City, Mo., over U.S. Highway 71 to Carthage, Mo., thence over ... Highway 66 to Springfield, Mo., and return over the same route.

No. MC 112713 (Deviation No. 5), YELLOW TRANSIT FREIGHT LINES, INC., P.O. Box 8462, Kansas City 14, Mo., filed February 19, 1962. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route between St. Louis, Mo. and Chicago, Ill., over Interstate Highway 55, for operating convenience only, serving no intermediate points. The notice indicates that the carrier is presently authorized to transport the same commodities over pertinent service routes as follows: From Champaign, Ill., over U.S. Highway 45 to junction Illinois Highway 115 (formerly U.S. Highway 66), thence over Illinois Highway 115 to junction U.S. Highway 45, thence over U.S. Highway 45 to Kankakee, Ill., thence over U.S. Highway 54 to Chicago; from St. Louis over U.S. Highway 66 to junction Alternate U.S. Highway 67 (formerly U.S. Highway 66), thence over Alternate U.S. Highway 67 to junction Edwardsville Road (formerly U.S. Highway 66), thence over Edwardsville Road to junction Nameoki Avenue (formerly U.S. Highway 66), thence over Nameoki Avenue to junction Illinois Highway 3, (formerly U.S. Highway 66), thence over Illinois Highway 3 to junction By-Pass U.S. Highway 66 (formerly U.S. Highway 66), thence over By-Pass U.S. Highway 66 to junction U.S. Highway 66, thence over U.S. Highway 66 to junction unnumbered highway (formerly U.S. Highway 66), near Mount Olive, Ill., thence over unnumbered highway, via Mount Olive to junction U.S. Highway 66, thence over U.S. Highway 66 to Litchfield, Ill., thence over Illinois Highway 16 to Mattoon, Ill., thence over U.S. Highway 45 to junction unnumbered highway (formerly U.S. Highway 45), thence over unnumbered highway, via Humboldt, Ill., to junction U.S. Highway 45, thence over U.S. Highway 45 to Champaign, Ill.; and from St. Louis over U.S. Highway 40 to junction Alternate U.S. Highway 40 (formerly U.S. Highway 40), thence over Alternate U.S. Highway 40, via Hagerstown and Vandalia, Ill., to junction U.S. Highway 40, thence over U.S. Highway 40 to Effingham, Ill., thence over Illinois Highway 16 to Paris, Ill., thence over Illinois Highway 1 to junction Illinois Highway 1A (formerly Illinois Highway 1), thence over Illinois Highway 1A to Chicago, and return over the same routes.

MOTOR CARRIERS OF PASSENGERS

No. MC 2890 (Deviation No. 14), AMERICAN BUSLINES, INC., 1805 Leavenworth Street, Omaha 2, Nebr., filed February 9, 1962. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *passengers and their baggage*, over a deviation route as follows: From the junction of U.S. Highway 40 and U.S. Highway 70, north of Montrose, Ill., over U.S. Highway 70 (relocated U.S. Highway 40) to junction unnumbered county road, south of Altamont, Ill., thence over unnumbered county road to junction U.S. Highway 40, at Altamont, Ill., and return over the same route, for operating convenience only, serving no intermediate points. The notice indicates that the carrier is presently authorized to transport passengers over a pertinent service route as follows: From Columbus, Ohio, over U.S. Highway 40 to St. Louis, Mo., and return over the same route.

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary*.

[Notice 423]

MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

FEBRUARY 23, 1962.

The following publications are governed by the Interstate Commerce Commission's general rules of practice including special rules (49 CFR 1.241) governing notice of filing of applications by motor carriers of property or passengers or brokers under sections 206, 209, and 211 of the Interstate Commerce Act and certain other proceedings with respect thereto.

All hearings and pre-hearing conferences will be called at 9:30 a.m., local daylight saving time (if that time is observed), unless otherwise specified.

APPLICATIONS ASSIGNED FOR ORAL HEARING OR PRE-HEARING CONFERENCE

MOTOR CARRIERS OF PROPERTY

The applications immediately following are assigned for hearing at the time and place designated in the notice of filing as here published in each proceeding. All of the proceedings are subject to the Special Rules of Procedure for Hearing outlined below:

SPECIAL RULES OF PROCEDURE FOR HEARING

(1) All of the testimony to be adduced by applicants' company witnesses shall be in the form of written statements which shall be submitted at the hearing at the time and place indicated.

(2) All of the written statements by applicants' company witnesses shall be offered in evidence at the hearing in the same manner as any other type of evidence. The witnesses submitting the written statements shall be made available at the hearing for cross-examination, if such becomes necessary.

(3) The written statements by applicants' company witnesses, if received in evidence, will be accepted as exhibits. To the extent the written statements refer to attached documents such as copies of operating authority, etc., they should be referred to in the written statement as numbered appendices thereto.

(4) The admissibility of the evidence contained in the written statements and the appendices thereto, will at the time of offer, be subject to the same rules as if the evidence was produced in the usual manner.

(5) Implementing oral evidence to correct errors or to supply inadvertent omissions in the written statements is permissible.

No. MC 18121 (Sub-No. 9), filed October 6, 1961. Applicant: ADVANCE TRANSPORTATION COMPANY, a corporation, 2115 South First Street, Milwaukee, Wis. Applicant's attorney: Eugene L. Cohn, One North La Salle Street, Chicago 2, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment); serving the plant site of Armour & Company at or near Bradley, Ill., as an off-route point in connection with applicant's otherwise authorized regular-route operations between Chicago, Ill., and Milwaukee, Wis.

NOTE: Applicant states the principal shareholders and directors of applicant are the officers and principal shareholders of Lindner Bros. Trucking, Inc., operating under Permit MC 17227 and Subs thereunder.

HEARING: April 11, 1962, at the Palmer House, Chicago, Ill., before Joint Board No. 149, or, if the Joint Board waives its right to participate before Examiner Lyle C. Farmer.

No. MC 80388 (Sub-No. 8), filed December 27, 1961. Applicant: CHICAGO-INDIANA FREIGHT LINES, INC, 3803 South Western Avenue, Chicago 9, Ill. Applicant's representative: Anthony T. Thomas, 3554 South Archer Avenue, Chicago 9, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal fats, animal oils, vegetable oils* (including products and blends thereof, with or without emulsified preservatives, coloring or additives), and *oleomargarine*, in packages, from Bradley, Ill., to Louisville, Ky., and points in Indiana, and *rejected shipments* of the above-specified commodities, on return.

HEARING: April 11, 1962, at the Palmer House, Chicago, Ill., before Joint Board No. 1, or, if the Joint Board waives its right to participate before Examiner Lyle C. Farmer.

No. MC 108912 (Sub-No. 4), filed October 18, 1961. Applicant: CHICAGO PITTSBURGH EXPRESS, INC., West Fourth Street, East Liverpool, Ohio. Ap-

plicant's attorney: Charles W. Singer, 33 North La Salle Street, Suite 3600, Chicago 2, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal fats, animal oils and vegetable oils (including products and blends thereof, with or without emulsifiers, preservatives, coloring or additives)*, and *oleomargarine*, in packages, from Bradley, Ill., to Pittsburgh, McKees Rocks, Oakdale, Bellevue, Baden, Avalon, and Carnegie, Pa., and Youngstown, Akron and Cuyahoga Falls, Ohio.

HEARING: April 11, 1962, at the Palmer House, Chicago, Ill., before Examiner Lyle C. Farmer.

No. MC 110193 (Sub-No. 41), filed October 13, 1961. Applicant: SAFEWAY TRUCK LINES, INC., 4625 West 55th Street, Chicago, Ill. Applicant's attorney: Howell Ellis, Suite 1210–12 Fidelity Building, 111 Monument Circle, Indianapolis 4, Ind. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal fats, animal oils, vegetable oils, including products and blends thereof, with or without emulsifiers, preservatives, coloring or additives*, in packages, and *oleomargarine*, in packages, from Bradley, Ill., to points in New York, New Jersey, points in the New York, N.Y., Commercial Zone, as defined by the Commission, points in Maine, Connecticut, Massachusetts, New Hampshire, and Rhode Island, and *refused and rejected shipments*, on return.

HEARING: April 11, 1962, at the Palmer House, Chicago, Ill., before Examiner Lyle C. Farmer.

No. MC 113843 (Sub-No. 43), filed October 12, 1961. Applicant: REFRIGERATED FOOD EXPRESS, INC., 316 Summer Street, Boston, Mass. Applicant's attorney: William J. Boyd, 30 North La Salle Street, Chicago 2, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal fats, animal oils, and vegetable oils, including products and blends thereof* with or without emulsifiers, preservatives, coloring or additives; and *oleomargarine*, in packages; from Bradley, Ill., to points in Connecticut, Rhode Island, Massachusetts, Maine, and New Hampshire, and *returned, rejected, and refused shipments*, on return.

HEARING: April 11, 1962, at the Palmer House, Chicago, Ill., before Examiner Lyle C. Farmer.

No. MC 114457 (Sub-No. 4), filed August 23, 1961. Applicant: DART TRANSIT COMPANY, a corporation, 780 North Prior Avenue, St. Paul 4, Minn. Applicant's representative: A. R. Fowler, 2288 University Avenue, St. Paul 14, Minn. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Animal fats, animal oils, and vegetable oils, including products and blends of said commodities*, in bulk, in tank vehicles, from Bradley, Ill., to points in Illinois, Minnesota, and Wisconsin, and (2) *animal fats, animal oils, and vegetable oils*, in bulk, in tank vehicles, from points in Illinois, Minnesota, and Wisconsin, to Bradley, Ill.

HEARING: April 11, 1962, at the Palmer House, Chicago, Ill., before Joint Board No. 141, or, if the Joint Board waives its right to participate before Examiner Lyle C. Farmer.

No. MC 114457 (Sub-No. 6), filed October 9, 1961. Applicant: DART TRANSIT COMPANY, 780 North Prior Avenue, St. Paul 4, Minn. Applicant's attorney: Charles W. Singer, 33 North LaSalle Street, Suite 3600, Chicago 2, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Animal fats, animal oils, and vegetable oils* (including products and blends thereof, with or without emulsifiers, preservatives, coloring or additives), and *oleomargarine*, in packages from Bradley, Ill., to St. Paul-Minnesota, Hopkins, Duluth, and Winona, Minn., and Fargo, N. Dak., and (2) *materials, equipment, and supplies* used in the manufacture of the above-described commodities, and *animal fats* from St. Paul, Minn., to Bradley, Ill.

HEARING: April 11, 1962, at the Palmer House, Chicago, Ill., before Examiner Lyle C. Farmer.

No. MC 115180 (Sub-No. 3), filed October 5, 1961. Applicant: ONLEY REFRIGERATED TRANSPORTATION INC., 345 West 14th Street, New York, N.Y. Applicant's representative: George A. Olsen, 69 Tonnele Avenue., Jersey City 6, N.J. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal fats, animal oils, and vegetable oils* (including products and blends thereof, with or without emulsifiers preservatives, coloring or additions), and *oleomargarine*, in packages, from Bradley, Ill., to Pennsylvania.

HEARING: April 11, 1962, at the Palmer House, Chicago, Ill., before Examiner Lyle C. Farmer.

No. MC 118272 (Sub-No. 5), filed October 9, 1961. Applicant: ZUZICH TRUCK LINE, INC., 120 Kansas Avenue, Kansas City, Kans. Applicant's attorney: Charles W. Singer, 33 North La Salle Street, Suite 3600, Chicago 2, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Animal fats, animal oils, and vegetable oils* (including products and blends thereof, with or without emulsifiers, preservatives, coloring or additions), *oleomargarine*, in packages, from Bradley, Ill., to Springfield, Joplin, Trenton, St. Joseph, and St. Louis, Mo., and Wichita, Kans., and (2) *animal fats* from St. Joseph, Mo., to Bradley, Ill.

NOTE: Applicant presently holds contract carrier authority under No. MC 69752 and subs thereunder.

HEARING: April 11, 1962, at the Palmer House, Chicago, Ill., before Joint Board No. 195, or, if the Joint Board waives its right to participate before Examiner Lyle C. Farmer.

No. MC 119741 (Sub-No. 1), filed September 26, 1961. Applicant: KIM FREIGHT LINES, INC., 4234 South Emerald Avenue, Chicago, Ill. Applicant's attorney: William J. Boyd, 30 North La Salle Street, Chicago, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Animal fats, animal oils, vegetable oils, including products and blends thereof*, with and without emulsifiers, preservatives, coloring and additives and (2) *oleomargarine*, in packages, from Bradley, Ill., to Akron, Springfield, and Columbus, Ohio, and *rejected shipments* of the above-described commodities, on return.

HEARING: April 11, 1962, at the Palmer House, Chicago, Ill., before Joint Board No. 58, or, if the Joint Board waives its right to participate before Examiner Lyle C. Farmer.

No. MC 124041, filed November 13, 1961. Applicant: JOSEPH F. BUCARIA, E. I. KOONS AND H. E. JOHNSON, doing business as J & K TRUCKING CO., 1710 West 47th Street, Chicago 9, Ill. Applicant's attorney: Charles W. Singer, 33 North La Salle Street, Chicago 2, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal fats, animal oils, and vegetable oils* including products and blends thereof, in tank vehicles, and *empty containers or other such facilities* used in transporting the above described commodities, between Bradley, Ill., and Chicago, Ill.

HEARING: April 11, 1962, at the Palmer House, Chicago, Ill., before Joint Board No. 21, or, if the Joint Board waives its right to participate before Examiner Lyle C. Farmer.

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary.*

MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

[Notice 424]

FEBRUARY 23, 1962.

The following publications are governed by the Interstate Commerce Commission's general rules of practice including special rules (49 CFR 1.241) governing notice of filing of applications by motor carriers of property or passengers or brokers under sections 206, 209, and 211 of the Interstate Commerce Act and certain other proceedings with respect thereto.

All hearings and pre-hearing conferences will be called at 9:30 a.m., local daylight savings time, if that time is observed, unless otherwise specified.

APPLICATIONS ASSIGNED FOR ORAL HEARING OR PRE-HEARING CONFERENCE

MOTOR CARRIERS OF PROPERTY

The applications immediately following are assigned for hearing at the time and place designated in the notice of filing as here published in each proceeding. All of the proceedings are subject to the Special Rules of Procedure for hearing outlined below:

SPECIAL RULES OF PROCEDURE FOR HEARING

(1) All of the testimony to be adduced by applicants' company witnesses shall be in the form of written statements which shall be submitted at the hearing at the time and place indicated.

(2) All of the written statements by applicants' company witnesses shall be offered in evidence at the hearing in the same manner as any other type of evidence. The witnesses submitting the written statements shall be made available at the hearing for cross-examination, if such becomes necessary.

(3) The written statements by applicants' company witnesses, if received in evidence, will be accepted as exhibits. To the extent the written statements refer to attached documents such as copies of operating authority, etc., they should be referred to in the written statement as numbered appendices thereto.

(4) The admissibility of the evidence contained in the written statements and the appendices thereto, will at the time of offer, be subject to the same rules as if the evidence was produced in the usual manner.

(5) Implementing oral evidence to correct errors or to supply inadvertent omissions in the written statements is permissible.

No. MC 55236 (Sub-No. 55), filed December 15, 1961. Applicant: OLSON TRANSPORTATION COMPANY, a corporation, 1970 South Broadway, Green Bay, Wis. Applicant's representative: George R. Bailey, P.O. Box 1187, Green Bay, Wis. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia, fertilizers, fertilizer compounds, fertilizer ingredients, urea, and urea feed mixtures* between Fort Madison, Iowa, and Meredosia, Ill., on the one hand, and on the other, points in Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

HEARING: April 18, 1962, at the Midland Hotel, Chicago, Ill., before Examiner Frank J. Mahoney.

No. MC 64932 (Sub-No. 303), filed November 20, 1961. Applicant: ROGERS CARTAGE CO., a corporation, 1934 South Wentworth Avenue, Chicago, Ill., Applicant's attorney: David Axelrod, 39 South La Salle Street, Chicago 3, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from Meredosia, Ill., to points in Indiana, Iowa, Kentucky, Illinois, Missouri, Minnesota, Michigan, Ohio, and Wisconsin.

HEARING: April 18, 1962, at the Midland Hotel, Chicago, Ill., before Examiner Frank J. Mahoney.

No. MC 64932 (Sub-No. 305), filed January 15, 1962. Applicant: ROGERS CARTAGE CO., a corporation, 1934 South Wentworth Avenue, Chicago, Ill. Applicant's attorney: David Axelrod, 39 South La Salle Street, Chicago 3, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from Fort Madison, Iowa, to points in North Dakota, South Dakota, Nebraska, Kansas, Missouri, Iowa, Minnesota, Wisconsin, Illinois, Kentucky, Indiana, Michigan, Ohio, and Wisconsin.

HEARING: April 18, 1962, at the Midland Hotel, Chicago, Ill., before Examiner Frank J. Mahoney.

No. MC 103880 (Sub-No. 245), filed January 25, 1962. Applicant: PRODUCERS TRANSPORT, INC., 224 Buffalo Street, New Buffalo, Mich. Applicant's attorney: David Axelrod, 39 South La Salle Street, Chicago 3, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia and manufactured fertilizer compounds*, in bulk, and in bags, from the plant site of the California Chemical Company, at or near Fort Madison, Iowa, to points in North Dakota, South Dakota, Nebraska, Kansas, Missouri, Iowa, Minnesota, Wisconsin, Illinois, Kentucky, Indiana, Michigan, and Ohio.

HEARING: April 18, 1962, at the Midland Hotel, Chicago, Ill., before Examiner Frank J. Mahoney.

No. MC 105375 (Sub-No. 11), filed January 18, 1962. Applicant: DAHLEN TRANSPORT OF IOWA, INC., 875 North Prior Avenue, St. Paul 4, Minn. Applicant's attorney: Leonard A. Jaskiewicz, Munsey Building, Washington 4, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia, fertilizer, fertilizer compounds, urea, ammonium nitrate, and nitrogen solutions*, from Fort Madison, Iowa, and Meredosia, Ill., and points within five (5) miles of each, to points in Nebraska, Missouri, Iowa, North Dakota, Minnesota, Wisconsin, Illinois, Kansas, Michigan, Ohio, Indiana, and Kentucky; and *rejected shipments* on return.

NOTE: Applicant states that joint control of applicant and Dahlen Transport, Inc. by John W. Dahlen and Edna A. Dahlen has been approved by the Commission. (MC-F-6554)

HEARING: April 18, 1962, at the Midland Hotel, Chicago, Ill., before Examiner Frank J. Mahoney.

No. MC 107496 (Sub-No. 220), filed December 22, 1961. Applicant: RUAN TRANSPORT CORPORATION, 408 Southeast 30th Street, Des Moines, Iowa. Applicant's attorney: H. L. Fabritz (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia, fertilizers, fertilizer compounds, urea, ammonium nitrate, and nitrogen solutions*, from Fort Madison, Iowa, and Meredosia, Ill., and points within five miles of each to points in Nebraska, Missouri, Iowa, North Dakota, South Dakota, Minnesota, Wisconsin, Illinois, Kansas, Michigan, Ohio, Indiana, and Kentucky.

NOTE: Applicant states it "is wholly owned by John Ruan. Applicant controls and owns all of the outstanding capital stock of Illinois-Ruan Transport Corporation, an Illinois corporation, which also operates as a common carrier by motor vehicle in interstate commerce for the transportation of petroleum and other products, in bulk, by authority of certificates issued by the I.C.C. and by various state regulatory commissions." Applicant holds contract carrier authority under MC 119136 and subs thereunder, therefore dual operations may be involved.

HEARING: April 18, 1962, at the Midland Hotel, Chicago, Ill., before Examiner Frank J. Mahoney.

No. MC 108449 (Sub-No. 136), filed December 11, 1961. Applicant: INDIANHEAD TRUCK LINE, INC., 1947 West County Road "C," St. Paul 13, Minn.

Applicant's attorney: Glenn W. Stephens, 121 West Doty Street, Madison 3, Wis. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia, fertilizers, fertilizer compounds, fertilizer ingredients, urea, urea feed mixtures, ammonium nitrate, and nitrogen solutions*, from Fort Madison, Iowa, and Meredosia, Ill., and points within five (5) miles of each to points in Nebraska, Missouri, Iowa, North Dakota, South Dakota, Minnesota, Wisconsin, Illinois, Kansas, Michigan, Ohio, Indiana, and Kentucky, *rejected and returned shipments* of commodities specified above, on return.

NOTE: Applicant states "Moore Motor Freight Lines, Inc., is a wholly owned subsidiary."

HEARING: April 18, 1962, at the Midland Hotel, Chicago, Ill., before Examiner Frank J. Mahoney.

No. MC 115331 (Sub-No. 25), filed January 19, 1962. Applicant: TRUCK TRANSPORT, INC., Highway 61, Crystal City, Mo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia, fertilizers, fertilizer compounds, fertilizer ingredients, urea, urea feed mixtures, ammonium nitrate, and nitrogen solutions*, from Fort Madison, Iowa, and Meredosia, Ill., and points within five (5) miles of each, to points in Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin; and *rejected or returned shipments* and *exempt commodities* on return.

HEARING: April 18, 1962, at the Midland Hotel, Chicago, Ill., before Examiner Frank J. Mahoney.

By the Commission.

MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

FEBRUARY 23, 1962.

The following publications are governed by the Interstate Commerce Commission's general rules of practice including special rules (49 CFR 1.241) governing notice of filing of applications by motor carriers of property or passengers or brokers under sections 206, 209, and 211 of the Interstate Commerce Act and certain other proceedings with respect thereto.

All hearings and pre-hearing conferences will be called at 9:30 a.m., local daylight saving time (if that time is observed), unless otherwise specified.

APPLICATIONS ASSIGNED FOR ORAL HEARING OR PRE-HEARING CONFERENCE

MOTOR CARRIERS OF PROPERTY

No. MC 531 (Sub-No. 107) (AS AMENDED AND CLARIFIED), filed July 29, 1960, published FEDERAL REGISTER, issue of November 9, 1960, republished as amended and clarified this issue. Applicant: YOUNGER BROTHERS, INC., P.O. Box 14287, Houston, Tex. Applicant's attorney: Ewell H. Muse, Jr., Suite 415, Perry Brooks Building, Austin, Tex. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, dry in bulk (except flour, catalyst, sugar, starch, barites, potash, carbon black cement, and fly ash), in tank vehicles, hopper vehicles, hydraulic unloading dump vehicles, cable unloading dump vehicles, or tank type gravity unloading dump vehicles; (a) between points in Texas and Louisiana, on the one hand, and, on the other, points in Arizona, California, Colorado, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Minnesota, Missouri, Tennessee, Wisconsin, Nebraska, Michigan, Oregon, Washington, Delaware, Alabama, Mississippi, Oklahoma, New Mexico, West Virginia, Virginia, Pennsylvania, New York, New Jersey, Maryland, and Utah; (b) between points in Texas, Oklahoma, Kansas, Nebraska, Iowa, Missouri, Arkansas, Louisiana, Colorado, New Mexico, Arizona, Mississippi, Tennessee, and Illinois.

HEARING INFORMATION: Referred to Examiner James O'D. Moran for hearing on the 26th day of February A.D. 1962, at 9:30 o'clock a.m., United States standard time, at the Baker Hotel, Dallas, Tex.; and on the 5th day of March A.D. 1962, at 9:30 o'clock a.m., United States standard time, at the Texas State Hotel, Houston, Tex., and for the recommendation of an appropriate order thereon, accompanied by the reasons therefor. This assignment is for the sole purpose of applicants' initial presentation and the time and place or places, if any, for hearing the remainder of applicants' case in chief, will be at the discretion of the presiding examiner to be fixed at the conclusion of the Houston hearing indicated above. If applicants complete their presentation at the Houston hearing, consideration will also be given to the time and place for protestants' presentation by the examiner.

No. MC 531 (Sub-No. 120), filed Feburary 2, 1962. Applicant: YOUNGER BROTHERS, INC., P.O. Box 14287, 4904 Griggs Road, Houston, Tex. Applicant's attorney: Ewell H. Muse, Jr., 415 Perry Brooks Building, Austin 1, Tex. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sulphur*, in bulk, (1) between points in New Mexico, Utah, and those in Texas located on and west of U.S. Highway 81; and (2) between points in New Mexico, Utah, and those in Texas on and west of U.S. Highway 81, on the one hand, and, on the other, points in Arizona, Colorado, Kansas, and Oklahoma.

NOTE: Applicant requests that the above be restricted against transporting liquid Sulphur, in bulk, in tank vehicles (1) from points in Gaines, Dawson, Andrews, Martin, Winkler, Ector, Midland, Ward, Crane, Hockley, Moore, and Upton Counties, Tex., to the site of the sulphuric acid plant of Kermac Nuclear Fuels Corporation located approximately 23 miles northwest of Grants, N. Mex., and (2) between the plant sites of the Pan American Petroleum Corporation and the Phillips Petroleum Company (Phillips Chemical Company) approximately 13 miles southeast of Artesia, N. Mex., on the one hand, and, on the other, points in Arizona, Oklahoma, and Texas. Applicant states that Younger Bros.-J. M. English Truck Lines, Inc., is an affiliated motor carrier engaged in transporting oil field commodities under the Mercer Case commodity description, as authorized in Docket No. MC 106809 and subs thereunder.

HEARING: April 2, 1962, at the Offices of the Interstate Commerce Commission, Washington, D.C., before Examiner Frank R. Saltzman.

No. MC 21866 (Sub-No. 46), filed January 2, 1961. Applicant: WEST MOTOR FREIGHT, INC., 740 South Reading Avenue, Boyertown, Pa. Applicant's attorney: Jacob Polin, 428 Barclay Building, City Line at Belmont Avenue, Bala-Cynwyd, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Butter*, (1) from the plant site of Keller's Creamery, Inc., in Franconia Township, Montgomery County, Pa., to Anderson, Columbia, Greenville, and Spartanburg, S.C., and points in Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, North Carolina, Ohio, Rhode Island, Virginia, West Virginia, and the District of Columbia, and (2) from New York, N.Y., Philadelphia, Pa., and points in New Jersey to the plant site above-described.

HEARING: April 12, 1962, in Room 300, U.S. Customs Building, Second and Chestnut Streets, Philadelphia, Pa., before Examiner James Anton.

No. MC 22195 (Sub-No. 83), filed February 19, 1962. Applicant: DAN S. DUGAN, doing business as DUGAN OIL & TRANSPORT CO., P.O. Box 946, 41st Street and Grange Avenue, Sioux Falls, S. Dak. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum* and *petroleum products*, in bulk, in tank vehicles, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, from points in Richland and Roosevelt Counties, Mont., to points in North Dakota, and *rejected shipments* of the above-specified commodities, on return.

HEARING: March 15, 1962, at the Yellowstone County Court House, Billings, Mont., before Joint Board No. 84, or, if the Joint Board waives its right to participate, before Examiner Richard White.

No. MC 22304 (Sub-No. 2), filed November 7, 1961. Applicant: G. E. OTTO LEEDS, doing business as W. D. LEEDS STORAGE WAREHOUSE, 330 Laurel Street, Williamsport, Pa. Applicant's attorney: John M. Musselman, 400 North Third Street, Harrisburg, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Doors and millwork*, between Williamsport, Pa., on the one hand, and on the other, points in Connecticut, Rhode Island, New Jersey, Delaware, Maryland, Virginia, Indiana, North Carolina, West Virginia, Ohio, and the District of Columbia.

HEARING: April 13, 1962, at the Pennsylvania Public Utility Commission, Harrisburg, Pa., before Examiner John

York.

MC 25798 (Sub-No. 65), filed 22, 1962. Applicant: CLAY TRUCKING LINES, INC., P.O. 1975, Dade City, Fla. Applicant's Thomas F. Kilroy, 1000 Connecticut Avenue NW., Washington 6, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Frozen foods products*, from Easton, Maine, to points in Alabama, Louisiana, Arkansas, Tennessee, Mississippi, and Texas, and to points in Georgia.

NOTE: Applicant advises, the proposed service will be restricted to partial unloading of shipments with service at Georgia points, points in Alabama, Mississippi, and Louisiana.

HEARING: April 18, 1962, at 346 Broadway, New York, N.Y., before Examiner James Anton.

No. MC 28478 (Sub-No. 15), filed December 26, 1961. Applicant: GREAT LAKES EXPRESS CO., a corporation, 111 Davenport Street, Saginaw, Mich. Applicant's attorney: Carl H. Smith, Sr., 510-514 Phoenix Building, Bay City, Mich. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Scrap metal*, in bulk; serving all points applicant is presently authorized to serve, over its regular routes, or in connection with its regular routes, located in Michigan, Illinois, Indiana, and Ohio, as authorized in Certificates MC 38478, and Sub-No. 10 thereunder.

NOTE: Applicant's regular-route operations in the above-named certificates cover the transportation of general commodities (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), in the states named above. A portion of applicant's regular-route authority in MC 28478 (Sub-No. 24) also authorizes the transportation of wire, seals, cable, and paper, in truckload lots, between Toledo, Ohio, and Tiffin, Ohio.

HEARING: April 25, 1962, at the Federal Building, Lansing, Mich., before Examiner Frank J. Mahoney.

No. MC 28956 (Sub-No. 5) (CORRECTION), filed December 14, 1961, published FEDERAL REGISTER, issue of February 14, 1962, and republished as corrected, this issue. Applicant: G. P. RYALS, doing business as RYALS TRUCK SERVICE, P.O. Box 234, Albany, Oreg. Applicant's attorney: Earle V. White, Fifth Avenue Building, 2130 Southwest Fifth Avenue, Portland 1, Oreg.

HEARING INFORMATION: Notice of the filing of the subject application, published in the FEDERAL REGISTER, issue of February 14, 1962, was in error. The application is correctly assigned for hearing March 27, 1962, at the Interstate Commerce Commission Hearing Room, 410 Southwest 10th Avenue, Portland, Oreg., before Joint Board No. 45, or, if the Joint Board waives its right to participate, before Examiner Richard White.

No. MC 29761 (Sub-No. 10), filed December 19, 1960. Applicant: DE ROSA TRANSPORTATION, INC., 2276 South Union Street, Chicago, Ill. Applicant's attorney: Edward G. Bazelon, 39 South La Salle Street, Chicago 3, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *General commodities* (except those of unusual value, livestock, Classes A and B explosives, and household goods as defined by the Commission), between points in Cook County, Ill., on the one hand, and, on the other, points in Lake and Porter Counties, Ind., on and north of U.S. Highway 30 and between points in Cook County, Ill., on and south of U.S. Highway 34, and those in Lake County, Ind., on and north of U.S. Highway 30, on the one hand, and, on the other, points in Michigan, on and south of U.S. Highway 12. (2) *General commodities*, except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, between points in Chicago, Ill.; and between Chicago, Ill., on the one hand, and, on the other, points in Illinois within 25 miles of Chicago.

HEARING: April 26, 1962, at the Palmer House, Chicago, Ill., before Examiner Lyle C. Farmer.

No. MC 35628 (Sub-No. 242), filed November 13, 1961. Applicant: INTERSTATE MOTOR FREIGHT SYSTEM, a corporation, 134 Grandville SW., Grand Rapids, Mich. Applicant's attorney: Leonard D. Verdier, Jr., 300 Michigan Trust Building, Grand Rapids 2, Mich. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except Classes A and B explosives, household goods as defined by the Commission, and commodities in bulk (except scrap metal in bulk), serving Stanley, Ky., as an off-route point in connection with applicant's regular-route operations to and from Owensboro, Ky.

HEARING: April 21, 1962, at the U.S. Court Rooms, Louisville, Ky., before Joint Board No. 105, or, if the Joint Board waives its right to participate, before Examiner Henry A. Cockrum.

No. MC 38320 (Sub-No. 8), filed December 26, 1961. Applicant: CENTRAL MOTOR EXPRESS, INC., P.O. Box 216, Campbellsville, Ky. Applicant's attorney: Robert M. Pearce, 221½ St. Clair Street, Frankfort, Ky. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, household goods as defined by the Commission, commodities in bulk and those requiring special equipment). (1) Between Campbellsville, Ky., and Lebanon, Ky., serving all intermediate points more than one (1) mile south of Lebanon, Ky., and off-route points within three (3) miles of that part of the route one (1) mile south of Lebanon, Ky.: From Campbellsville over Kentucky Highway 70 through Elk Horn to Mannsville; thence over Kentucky Highway 337 to junction with Kentucky Highway 49; thence over Kentucky Highway 49 to Lebanon, Ky., and return over the same route. RESTRICTIONS: No service shall be rendered between Louisville, Ky., and its commercial zone and the Louisville, Ky., gateway on the one hand, and on the other, Lebanon, Ky., commercial zone. (2) Between Elk Horn, Ky., and Columbia, Ky., serving all intermediate points and off-route points within three (3) miles of the described route: From Elk Horn over Kentucky Highway 76 through Knifley and Neatsville to Eunice; thence over Kentucky Highway 206 to Columbia and return over the same route. (3) Between Neatsville, Ky., and Mannsville, Ky., serving all intermediate points and off-route points within three (3) miles of the described route: From Neatsville over Kentucky Highway 206 to its junction with Kentucky Highway 70; thence over Kentucky Highway 70 through Clementsville to Mannsville and return over the same route. (4) Between Knifley, Ky., and junction of Kentucky Highway 551 with Kentucky Highway 70 (near Clementsville, Ky.), serving all intermediate points and off-route points within three (3) miles of the described route: From Knifley over Kentucky Highway 551 to junction of Kentucky Highway 551 with Kentucky Highway 70 and return over the same route. (5) Between Campbellsville, Ky., and Hodgenville, Ky., serving all intermediate points and off-route points within three (3) miles of the described route and serving Hodgenville for purposes of joinder only: From Campbellsville over Kentucky Highway 210 to Hodgenville and return over the same route. (6) Serving as off-route points in connection with carrier's authorized routes to and from Campbellsville and Columbia, Ky., all points in Adair and Taylor Counties, Ky. (7) Between Springfield, Ky., and High Grove, Ky., serving no intermediate points and serving Springfield and High Grove for purposes of joinder only, as an alternate route for operating convenience: From Springfield over U.S. Highway 150 to Bardstown; thence over U.S. Highway 31E to High Grove, and return over the same route. (8) Between Bardstown, Ky., and Buffalo, Ky., serving no intermediate points and serving Bardstown and Buffalo for purposes of joinder only, as an alternate route for operating convenience: From Bardstown over U.S. Highway 31E through Hodgenville to junction with Kentucky Highway 61 (approximately three (3) miles south of Hodgenville); thence over Kentucky Highway 61 to Buffalo, and return over the same route.

HEARING: April 11, 1962, at the U.S. Court Rooms, Louisville, Ky., before Joint Board No. 105, or, if the Joint Board waives its right to participate, before Examiner Henry A. Cockrum.

No. MC 39871 (Sub-No. 1), filed January 9, 1962. Applicant: EDWARD M. HOWEY, doing business as HOWEY'S EXPRESS, 666 Tatum Street, Woodbury, N.J. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, (except commodities of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), from Philadelphia, Pa., to points in Salem County, N.J.

HEARING: April 13, 1962, in Room 300, U.S. Custom Building, Second and Chestnut Streets, Philadelphia, Pa., before Examiner James Anton.

No. MC 42261 (Sub-No. 63), filed February 13, 1962. Applicant: LANGER TRANSPORT CORP., Route 1, Foot of Danforth Avenue, Jersey City, N.J. Applicant's attorney: Daniel J. Sweeney, 140 Cedar Street, New York 6, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Chemicals*, in bulk, in tank vehicles, from the plant site of B. F. Goodrich Company, approximately 13 miles east of Fort Wayne, Ind., in Milan Township, Allen County, Ind., to points in Illinois, Michigan, Ohio, West Virginia, and Wisconsin; and (2) *Returned and rejected shipments* of the above-specified commodities, from points in Illinois, Michigan, Ohio, West Virginia and Wisconsin, to the plant site of B. F. Goodrich Company, approximately 13 miles east of Fort Wayne, Ind., in Milan Township, Allen County, Ind.

HEARING: March 13, 1962, at the Offices of the Interstate Commerce Commission, Washington, D.C., before Examiner Samuel Horwich.

No. MC 52458 (Sub-No. 162), filed December 20, 1961. Applicant: T. I. McCORMACK TRUCKING COMPANY, INC., U.S. Route 9, Woodbridge, N.J. Applicant's attorney: Chester A. Zyblut, 1700 K Street NW., Washington 6, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and washing compounds*, in bulk, in tank vehicles, from the site of the Stepan Chemical Company plant located at or near Millsdale, Ill., to points in Connecticut, Indiana, Kansas, Kentucky, Maryland, Massachusetts, Michigan, Missouri, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, South Carolina, West Virginia, and Wisconsin, and *rejected shipments* of the above-specified commodities, on return. RESTRICTION: Applicant states the proposed operation shall not be joined or tacked to any existing authority.

HEARING: April 24, 1962, at the Palmer House, Chicago, Ill., before Examiner Lyle C. Farmer.

No. MC 52669 (Sub-No. 6) (CORRECTION), filed October 25, 1961, published FEDERAL REGISTER, issue of January 31, 1962, and republished as corrected, this issue. Applicant: CARGOCARE TRANSPORTATION COMPANY, INCORPORATED, 522 Nance Street, Rocky Mount, N.C. Applicant's attorney: Milton P. Fields, P.O. Box 725, Rocky Mount, N.C. The purpose of this republication is to show that the materials, supplies and equipment are those used in the handling, marketing, packing, prizing, redrying, shipping and storing of UNMANUFACTURED tobacco.

HEARING: Remains as assigned March 7, 1962, in the Conference Room, Heart of Raleigh Motel, 227 East Edenton Street, Raleigh, N.C., before Examiner A. Lane Cricher.

No. MC 57239 (Sub-No. 7), filed December 18, 1961. Applicant: RENNER'S EXPRESS, INC., 1350 South West Street, P.O. Box 613, Indianapolis, Ind. Applicant's attorney: Louis E. Smith, 511 Fidelity Building, Indianapolis 4, Ind. Authority sought to operate as a *common carrier*, by motor vehicle, over a regular route, transporting: *General commodities*, including *articles of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk*, and *those requiring special equipment*, between Muncie, Ind., and New Castle, Ind., over Indiana Highway 3, serving no intermediate points, restricted to shipments having either an immediately prior or an immediately subsequent movement by rail.

HEARING: March 16, 1962, in Room 908, Indiana Public Service Commission, New State Office Building, 100 North Senate Avenue, Indianapolis, Ind., before Joint Board No. 72, or, if the Joint Board waives its right to participate, before Examiner Reece Harrison.

No. MC 61825 (Sub-No. 24), filed February 5, 1962. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. Applicant's attorney: Spencer T. Money, Mills Building, Washington, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (a) *Glass containers* and *closures for glass containers, fibreboard boxes and parts* when shipped with glass containers, not to exceed ten percent (10%) of total weight of shipment, from Kane (McKean County), Knox (Clarion County), Marienville (Forest County), Parkers Landing (Armstrong County), and Sheffield (Warren County), Pa., and Gas City (Grant County), Ind., to points in North Carolina, Virginia, and the District of Columbia; (b) *cartons, equipment, machinery, materials, including packaging materials and raw materials entering into manufacture or packaging of glass containers*, from points in North Carolina, Virginia and the District of Columbia to origin points named in (a) above, traversing Maryland, Ohio, and West Virginia for operating convenience only; and (c) *empty containers or other such incidental facilities* (not specified), used in transporting the above-described commodities, on return.

NOTE: Applicant states that Mr. Roy Stone, its president, is a minority stockholder in R. P. Thomas Trucking Company, Martinsville, Va.

HEARING: April 2, 1962, at the Offices of the Interstate Commerce Commission, Washington, D.C., before Examiner Alton R. Smith.

No. MC 66562 (Sub-No. 1866) (CORRECTION), filed December 15, 1961, published FEDERAL REGISTER, issue of January 4, 1962, corrected February 13, 1962, republished as corrected this issue. Applicant: RAILWAY EXPRESS AGENCY, INCORPORATED, 219 East 42d Street, New York 17, N.Y. Applicant's attorney: William H. Marx (same as above). The purpose of this republication is to correct paragraph (2) of the subject application, which was incorrectly shown in previous publication. The authority sought correctly reads: "Also from junction U.S. Highway 2 and Maine Highway 157, over Maine Highway 157, to Millinocket, Maine, and return over the same route."

NOTE: Notice of filing of the application was originally published as a matter in which handling without oral hearing was requested. The proceeding has been assigned for hearing at a time and place to be later fixed.

No. MC 75317 (Sub-No. 12), filed January 29, 1962. Applicant: CENTRAL DISPATCH, INC., New Market Avenue, South Plainfield, N.J. Applicant's representative: Bert Collins, 140 Cedar Street, New York 6, N.Y. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Mineral wool* (rock, *slag and glass*), *Mineral wool products*, and *building and industrial insulation*, from South Plainfield, (Middlesex County), N.J., to points in McKean, Cameron, Clearfield, Cambria, Somerset, Warren, Forest, Elk, Jefferson, Indiana, Westmoreland, Fayette, Greene, Washington, Allegheny, Armstrong, Clarion, Venango, Erie, Crawford, Mercer, Lawrence, Butler and Beaver Counties, Pa., points in Allegany and Garrett Counties, Md., and points in Virginia, West Virginia, and Maine; (2) *materials and supplies used in the manufacture, distribution and packaging of the above commodities*, except liquid commodities, in bulk, in tank vehicles, from the above-described destination territories to South Plainfield, N.J.; and (3) *returned, rejected or damaged shipments* from the above-described destination territories to South Plainfield, N.J.

NOTE: Applicant states that the operation will be limited to transportation service performed under a continuing contract or contracts with the United States Gypsum Company of Chicago, Ill. Applicant further states that it presently holds contract authority in Delaware, District of Columbia, Baltimore, Md., 21 Maryland counties, and 43 Pennsylvania counties.

HEARING: April 20, 1962, at 346 Broadway, New York, N.Y., before Examiner James Anton.

No. MC 82492 (Sub-No. 12), filed October 23, 1961. Applicant: MICHIGAN & NEBRASKA TRANSIT CO., INC., 200 Monroe Avenue NW., Grand Rapids, Mich. Applicant's attorney: L. P. Richardson, Michigan National Tower, Lansing 8, Mich. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cereal food preparations, bakery goods*, and *baby pants*, from Fremont, Mich., to points in Iowa and Nebraska, and *rejected and returned shipments* of the above-specified commodities, on return.

NOTE: Applicant states the proposed service will be restricted to transportation of these commodities when moving in mixed shipments with an incidental to transportation of commodities authorized in applicant's presently held certificates authorizing service from Fremont, Mich., to points in Iowa and Nebraska.

HEARING: April 25, 1962, at the Federal Building, Lansing, Mich., before Examiner Frank J. Mahoney.

No. MC 87231 (Sub-No. 15) (REPUBLICATION), filed November 24, 1961, published FEDERAL REGISTER, issue of December 20, 1961, and republished this

Applicant: BAY AND BAY TRANSFER CO., INC., 315 Ninth Avenue North, Minneapolis, Minn. Applicant's attorney: Earl Hacking, 1121 Seventh Street, Minneapolis, Minn. The instant application was the subject of a consolidated hearing involving similar applications, heard February 1, 1962, at Minneapolis, Minn., Hearing Examiner Henry C. Darmstadter, presiding. Notice of the filing of the application was previously published in the FEDERAL REGISTER. At the hearing, the scope of the authority sought was amended. As amended, the proposed operations are as follows: Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Fertilizer compounds* (manufactured fertilizers), *urea, ammonium nitrate fertilizer*, and *superphosphate*, from Port Cargill, Minn., and points within one mile thereof, to points in Iowa, Minnesota, North Dakota, South Dakota, Wisconsin, and Nebraska, and *returned and rejected shipments* of the above-specified commodities, on return.

NOTE: The amendment removes the restrictions on the commodities as previously published and adds the State of Nebraska as a destination State. Any person or persons who might have been prejudiced by the publication of the amendment, may, within 30 days from the date of this publication in the FEDERAL REGISTER, file an appropriate pleading.

No. MC 94704 (Sub-No. 2), filed January 17, 1962. Applicant: WALTER NEUROTH, doing business as NEUROTH TRUCK LINE, Conrad, Iowa. Applicant's representative: William A. Landau, 1307 East Walnut Street, Des Moines 16, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Livestock and poultry waterers, yard hydrants*, and *pig warmers*, from Conrad, Iowa, to points in Illinois, Indiana, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

HEARING: April 17, 1962, in Room 411, Old Federal Office Building, Fifth and Court Avenues, Des Moines, Iowa, before Examiner Lyle C. Farmer.

No. MC 95540 (Sub-No. 401), filed February 14, 1962. Applicant: WATKINS MOTOR LINES, INC., Albany Highway, Thomasville, Ga. Applicant's attorney: Duane W. Acklie, Box 2041, Lincoln, Nebr. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, and meat by-products, dairy products, and articles distributed by meat packinghouses* as described in Appendix I to descriptions in *Motor Carriers Certificates* 61 M.C.C. 209, from Lexington, Nebr., to points in the United States (except Hawaii).

HEARING: March 29, 1962, at the Hotel Sheraton Fontenelle, Omaha, Nebr., before Examiner Armin G. Clement.

No. MC 95540 (Sub-No. 402), filed February 15, 1962. Applicant: WATKINS MOTOR LINES, INC., Albany Highway, Thomasville, Ga. Applicant's attorney: Joseph H. Blackshear, Gainesville, Ga. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods* from points in Connecticut to points in Florida.

HEARING: April 2, 1962, at the Offices of the Interstate Commerce Commission, Washington, D.C., before Examiner Alfred B. Hurley.

No. MC 96448 (Sub-No. 7), filed January 16, 1962. Applicant: BROOKLEDGE, INC., 943 Amboy Avenue, Fords, N.J. Applicant's representative: Bert Collins, 140 Cedar Street, New York 6, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Horses* (other than ordinary livestock), and *equipment and paraphernalia* incidental to the transportation, care, and display of such horses, (a) Between points in Florida, Georgia, Illinois, North Carolina, South Carolina, Michigan, Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, Kentucky, Ohio, Indiana, and the District of Columbia, on the one hand, and, on the other, points in Missouri, Kansas, Oklahoma, Texas, New Mexico, and Arizona, and (b) Between points in Missouri, Kansas, Oklahoma, Texas, New Mexico, and Arizona.

NOTE: Applicant states it is presently operating between points in the States of Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, West Virginia, and the District of Columbia.

HEARING: April 16, 1962, at 346 Broadway, New York, N.Y., before Examiner James Anton.

No. MC 100598 (Sub-No. 3), filed February 1, 1962. Applicant: CHARLES KOTZE, 2428 Merrick Road, Bellmore, N.Y. Applicant's attorney: Martin Werner, 2 West 45th Street, New York 36, N.Y. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Rubber tires and tubes*, from the warehouse site of The Kelly-Springfield Tire Co., in Lodi, N.J., to New York, N.Y., and points in Nassau and Suffolk Counties, N.Y., and *returned, refused and rejected shipments of rubber tires and tubes*, on return.

NOTE: Applicant states the proposed operation will be under a continuing contract or contracts, with The Kelly-Springfield Tire Co., Lodi, N.J.

HEARING: March 30, 1962, at the Offices of the Interstate Commerce Commission, Washington, D.C., before Examiner Abraham J. Essrick.

No. MC 103880 (Sub-No. 242), filed December 28, 1961. Applicant: PRODUCERS TRANSPORT, INC., 224 Buffalo Street, New Buffalo, Mich. Applicant's attorney: David Axelrod, 39 South La Salle Street, Chicago 3, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals* and *washing compounds*, in bulk, in tank vehicles, from the plant site of Stepan Chemical Company, located at or near Milladale, Ill., to points in Connecticut, Kentucky, Michigan, New York, Rhode Island, West Virginia, Indiana, Maryland, Missouri, Ohio, South Carolinia, Wisconsin, Kansas, Massachusetts, New Jersey, and Pennsylvania.

NOTE: Applicant states that it is not seeking to join or tack the authority requested herein with any of its existing authority.

HEARING: April 24, 1962, at the Palmer House, Chicago, Ill., before Examiner Lyle C. Farmer.

No. MC 104960 (Sub-No. 28), filed December 18, 1961. Applicant: MOTOR FUEL CARRIERS, INC., 404 Elm Avenue (P.O. Box 2288), Panama City, Fla. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum, petroleum products* and *petroleum by-products*, in bulk, in tank vehicles, from the terminal site of the Tenneco Oil Company (formerly Bay Petroleum Corporation), Bay County, Fla., to points in South Carolina and points in Georgia more than 175 miles from Panama City, Fla.; and *rejected shipments* on return.

HEARING: March 13, 1962, at the Mayflower Hotel, Jacksonville, Fla., before Joint Board No. 354, or, if the Joint Board waives its right to participate, before Examiner A. Lane Cricher.

No. MC 106456 (Sub-No. 37), filed January 3, 1962, published FEDERAL REGISTER, issue of January 17, 1962, and republished, this issue. Applicant: SUPER SERVICE MOTOR FREIGHT COMPANY, INC., Box 180, Fessler Lane, Nashville, Tenn. Applicant's attorney: James R. Browder, Box 180, Nashville, Tenn.

HEARING INFORMATION: The subject application previously scheduled for hearing April 19, 1962, has been advanced to March 16, 1962, at the Midland Hotel, Chicago, Ill., before Joint Board No. 149.

No. MC 107012 (Sub-No. 41), filed December 11, 1961. Applicant: NORTH AMERICAN VAN LINES, INC., P.O. Box 988, Fort Wayne, Ind. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pianos*, uncrated, from Bluffton, Ind., to points in the United States.

HEARING: April 13, 1962, in Room 908, Indiana Public Service Commission, New State Office Building, 100 North Senate Avenue, Indianapolis, Ind., before Examiner Frank J. Mahoney.

No. MC 107323 (Sub-No. 37), filed January 29, 1962. Applicant: GILLILAND TRANSFER COMPANY, a corporation, 21 West Sheridan, Fremont, Mich. Applicant's attorney: J. M. Neath, Jr., Michigan Trust Building, Grand Rapids 2, Mich. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Animal, fish and poultry feed, insecticides, fungicides and animal medicines* from Bloomington, Ill., and Davenport, Iowa, to points in Michigan, and (2) *animal, fish and poultry feed and damaged and rejected shipments*, on return.

HEARING: April 23, 1962, at the Federal Building, Lansing Mich., before Examiner Frank J. Mahoney.

No. MC 107403 (Sub-No. 381), filed February 14, 1962. Applicant: E. BROOKE MATLACK, INC., 33d and Arch Streets, Philadelphia 4, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquefied petroleum gas*, in bulk, in tank vehicles, from the plant site of the Century Refining Company, at or near New Baltimore, Mich., to points in Indiana and Ohio.

NOTE: Applicant has contract carrier authority under MC-117657 and Subs thereunder, therefore, dual operations may be involved. It is further noted that common control may be involved.

HEARING: April 18, 1962, at the Midland Hotel, Chicago, Ill., before Joint Board No. 9.

No. MC 107496 (Sub-No. 223), filed December 28, 1961. Applicant: RUAN TRANSPORT CORPORATION, 408 Southeast 30th Street, Des Moines, Iowa. Applicant's attorney: H. L. Fabritz (same as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Grain fumigant* (agricultural insecticide), in bulk, in tank vehicles, from Des Moines, Iowa, to points in Minnesota, Missouri, and North Dakota.

NOTE: Common control may be involved. It is further noted that applicant has contract authority under MC 119136 and Subs thereunder, therefore, dual operations may be involved.

HEARING: April 16, 1962, in Room 401, Old Federal Office Building, Fifth and Court Avenues, Des Moines, Iowa, before Examiner Lyle C. Farmer.

No. MC 109435 (Sub-No. 23), filed January 29, 1962. Applicant: ELLSWORTH BROS. TRUCK LINE, INC., Drawer J, Stroud, Okla. Applicant's attorneys, Lybrand and Morgan, 443 American National Building, Oklahoma City, Okla. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cement*, in bulk, from Conway, Ark., to missile sites at or near Albion, Antioch, Blackwell, Center Hill, Greenbrier, Holland, Mount Vernon, Pearson, Plainview, Plumerville, Quitman, East Rose Bud, St. Vincent, Springfield, Velvet Ridge, Spring Hill, Southside, and Junction of Highways 65 and 25, Ark.

NOTE: Applicant states that Pryor, Okla., is the originating point for the shipments and they will move by rail to Conway, Ark., where they will be transferred to motor vehicles and moved to the destination points in Arkansas, the movements being continuous from Pryor to the missile sites, with no in-transit storage.

HEARING: April 20, 1962, at the Arkansas Commerce Commission, Justice Building, State Capitol, Little Rock, Ark., before Joint Board No. 215, or, if the Joint Board waives its right to participate, before Examiner Henry A. Cockrum.

No. MC 109478 (Sub-No. 47), filed December 26, 1961. Applicant: WORSTER MOTOR LINES, INC., East Main Road, R.D. No. 1, North East, Pa. Applicant's attorney: William W. Knox, 23 West 10th Street, Erie, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Canned or frozen fruit and vegetable concentrates and essences* and *fruit juice and vegetable juice concentrates and essences* from North East, Pa., and points in that portion of Chautauqua County, N.Y., within five (5) miles of the shore of Lake Erie, to points in Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Delaware, Maryland, West Virginia, and the District of Columbia. (2) *Grape juice concentrate and essences, tomato juice concentrate and essences, frozen fruit juice concentrates and essences* and *frozen tomato juice concentrate and essences* from North East, Pa., and Westfield, Brocton, and Silver Creek, N.Y., to points in Indiana and Illinois. (3) *Fruit juice concentrates and essences* and *vegetable juice concentrates and essences* (a) from points in Erie County, Pa., to points in New York and Ohio and (b) from points in Chautauqua and Erie Counties, N.Y., to points in Pennsylvania and Ohio. (4) *Frozen fruit juice concentrates and essences* between Erie and North East, Pa., and Brocton, Silver Creek, and Westfield, N.Y., on the one hand, and on the other, points in the lower peninsula of Michigan. (5) *Fruit juice concentrates and essences* and *frozen fruit juice concentrates and essences* from Geneva, Ohio, to points in New York (except New York City), Pennsylvania, New Jersey, Maryland, Illinois, Indiana, Delaware, the lower peninsula of Michigan, and the District of Columbia. (6) *Frozen foods* from Geneva, Ohio, to points in New York (except Auburn, Binghamton, Cortland, Elmira, Geneva, Ithaca, Endicott, Johnson City, Oneonta, Oswega, Rochester, Rome, Schenectady, Syracuse, Utica, and points on and south of a line from Glenn Falls, N.Y., to the Vermont-New York State line, due east of Glenn Falls, and on and east of a line from Glenn Falls along U.S. Highway 9 to Albany, and thence along U.S. Highway 9–W to New York City, and points in the New York, N.Y., commercial zone), points in Pennsylvania (except points in the Philadelphia, Pa., commercial zone), in New Jersey (except points in the New York, N.Y., commercial zone), in Maryland, Illinois, Indiana, Delaware, the lower peninsula of Michigan, and the District of Columbia.

NOTE: Applicant states that its president, David B. Worster, with others, has been authorized by I.C.C. to assume control of McKay and MacLeod Corp. (MC-80413) and F.D. McKay, Inc. (MC-97496).

HEARING: April 19, 1962, at the Hotel Buffalo, Washington and Swan Streets, Buffalo, N.Y., before Examiner John L. York.

No. MC 109370 (Sub-No. 1), filed January 26, 1962. Applicant: PAUL L. HUNTER AND FRANCIS C. HUNTER, doing business as HUNTER MOVING AND STORAGE, a partnership, 95 South Main Street, Union City, Pa. Applicant's attorney: William W. Knox, 23 West 10th Street, Erie, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture* uncrated and *turned wood stock* uncrated and crated, from Union City, Pa., to points in Illinois, Indiana, Maryland, Michigan, New Jersey, New York, Ohio, and Delaware, and *empty containers or other such incidental facilities* (not specified) used in transporting the above described commodities, on return.

HEARING: April 20, 1962, at the Hotel Buffalo, Washington and Swann Streets, Buffalo, N.Y., before Examiner John L. York.

No. MC 109767 (Sub-No. 2), filed November 29, 1961. Applicant: CARL CULP AND ROY CULP, a partnership, doing business as CULP BROS., R.R. No. 1, Remington, Ind. Applicant's attorney: John E. Lesow, 3737 North Meridian Street, Indianapolis 8, Ind. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer and fertilizer ingredients*, from Remington, Ind., and points within a ten mile radius of Remington, Ind., to points within a 250 mile radius of Remington, Ind., located in Illinois, Ohio, and Michigan, and *rejected shipments*, on return.

HEARING: April 12, 1962, in Room 908, Indiana Public Service Commission, New State Office Building, 100 North Senate Avenue, Indianapolis, Ind., before Examiner Frank J. Mahoney.

No. MC 110393 (Sub-No. 6), filed December 18, 1961. Applicant: FRIED FOOD EXPRESS, INC., 2754 Seventh Street Road, Louisville, Ky. Applicant's attorney: Rudy Yessin, Sixth Floor, McClure Building, Frankfort, Ky. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Dairy products*, and *empty containers or other such incidental facilities* (not specified), used in transporting the above-specified commodity, between Springfield, Ky., on the one hand, and, on the other, points in Alabama, Florida, Georgia, Indiana, Louisiana, Maryland, Mississippi, New Jersey, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, West Virginia, and Washington, D.C.

HEARING: April 9, 1962, at 11:00 o'clock a.m. United States standard time, at the U.S. Court Rooms, Louisville, Ky., before Examiner Henry A. Cockrum.

No. MC 111812 (Sub-No. 145), filed January 11, 1962. Applicant: MIDWEST COAST TRANSPORT, INC., Wilson Terminal Building, P.O. Box 747, Sioux Falls, S. Dak. Applicant's attorney: Donald L. Stern, 924 City National Bank Building, Omaha 2, Nebr. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, in packages and containers other than bulk, (1) from Buffalo, N.Y., and Emlenton and Farmers Valley, Pa., to Denver, Colo., and points in Kansas, Minnesota, Iowa, Nebraska, North Dakota, South Dakota, and Wisconsin, and (2) from Emlenton, Pa., and St. Marys, W. Va., to points in Arkansas.

NOTE: Applicant indicates that the authority sought in (1) above will be restricted to transportation of shipments originating at Buffalo, N.Y., with stops to complete

loading at Emlenton or Farmers Valley, Pa. Applicant also states that the wife of its president holds a 50 percent interest in Garden Express, Inc.

HEARING: April 16, 1962, at the Hotel Buffalo, Washington and Swan Streets, Buffalo, N.Y., before Examiner John L. York.

No. MC 111812 (Sub-No. 153), filed February 15, 1962. Applicant: MIDWEST COAST TRANSPORT, INC., P.O. Box 747, Wilson Terminal Building, Sioux Falls, S. Dak. Applicant's attorney: Donald L. Stern, 924 City National Bank Building, Omaha 2, Nebr. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from Hillsboro, Marshall, Macon, Moberly, and Shelbina, Mo., to points in Minnesota, North Dakota, Montana, Idaho, Oregon, and Washington.

NOTE: Common control may be involved.

HEARING: March 21, 1962, at the U.S. Court House and Custom House, 1114 Market Street, St. Louis, Mo., before Examiner Garland E. Taylor.

No. MC 113267 (Sub-No. 60), filed January 11, 1962. Applicant: CENTRAL & SOUTHERN TRUCK LINES, INC., 312 West Morris Street, Caseyville, Ill. Applicant's representative: Fred H. Fryer, 312 West Morris Street, Caseyville, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Meat, meat products, meat by-products, dairy products* and *articles distributed by meat packing houses;* (2) *frozen and prepared foods*, when shipped in mixed shipments with commodities named in (1) above, when transported in vehicles equipped with mechanical refrigeration, from Shreveport, La., to points in Arkansas, Louisiana, Mississippi, Oklahoma, and Texas.

NOTE: Applicant states that its officers are officers and stockholders in Industrial Bus Lines, Inc. (MC 114168), Vandalia Bus Lines, Inc. (MC 2698), and that Oliver and Kathryn Anderson are officers and stockholders in Caseyville Bus Lines, Inc. (MC 110645). Dual operations may be involved.

HEARING: April 19, 1962, at the Arkansas Commerce Commission, Justice Building, State Capitol, Little Rock, Ark., before Examiner Henry A. Cockrum.

No. MC 113617 (Sub-No. 11), filed January 24, 1962. Applicant: L. D. EASTER, E. M. EASTER, M. E. EASTER, L. W. EASTER, L. B. EASTER, AND M. M. MORSE, a partnership, doing business as HIGHWAY TRANSPORT COMPANY, 643 East 43d Street, Des Moines 17, Iowa. Applicant's representative: William A. Landau, 1307 East Walnut, Des Moines 16, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New automobiles*, and *parts*, in initial movements, in truckaway service, from Kenosha, Wis., to points in Iowa.

NOTE: Applicant presently holds authority to perform the proposed service to approximately two-thirds of the State of Iowa. No duplicating or conflicting rights are sought.

HEARING: April 18, 1962, in Room 401, Old Federal Office Building, Fifth and Court Avenues, Des Moines, Iowa, before Examiner Lyle C. Farmer.

No. MC 114019 (Sub-No. 75), filed December 27, 1961. Applicant: MIDWEST EMERY FREIGHT SYSTEM, INC., 7000 South Pulaski Road, Chicago 29, Ill. Applicant's attorney: Clarence D. Todd, 1825 Jefferson Place NW., Washington 6, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Mineral mixtures*, in containers, (1) from Rittman, Ohio, to points in Illinois, Indiana, Michigan, New York, Pennsylvania, West Virginia, and points in New Jersey within the New York, N.Y., Commercial Zone, as defined by the Commission, and points in New Jersey within the Philadelphia, Pa., Commercial Zone, as defined by the Commission, St. Louis, Mo., Covington, Newport, and Louisville, Ky., (2) from Akron, Ohio, to points in Delaware, Maryland, Virginia, West Virginia, and the District of Columbia, points in Pennsylvania on and east of U.S. Highway 219, points in New York on and east of New York Highway 14, and points in New Jersey within the New York, N.Y., Commercial Zone, as defined by the Commission and points in New Jersey within the Philadelphia, Pa., Commercial Zone, as defined by the Commission, (3) from Silver Springs, N.Y., to points in Pennsylvania, West Virginia, and points in New York on and south of U.S. Highway 6, and points in New Jersey within the New York, N.Y., Commercial Zone, as defined by the Commission, and points in New Jersey within the Philadelphia, Pa., Commercial Zone, as defined by the Commission, and (4) from Akron, Ohio, Manistee and St. Clair and Marysville, Mich., and points within five (5) miles of each, to points in Illinois, Indiana, Ohio, Michigan, Wisconsin, points in that part of Pennsylvania on and west of U.S. Highway 219, points in that part of New York on and west of New York Highway 14, Covington, Newport, and Louisville, Ky., and St. Louis, Mo.

NOTE: Applicant states it presently holds authority to transport salt, and pepper, in packages, in mixed shipments with salt, from the origins and to the destination territory described in (1) (2) (3) and (4) above. Applicant proposes to transport the described commodity in straight or in mixed loads with salt. Applicant also states it and Midwest Transfer Company of Illinois are commonly controlled and managed.

HEARING: April 25, 1962, at the Palmer House, Chicago, Ill., before Examiner Lyle C. Farmer.

No. MC 114608 (Sub-No. 13), filed January 29, 1962. Applicant: CAPITAL EXPRESS, INC., 1621 Century Avenue SW., Grand Rapids, Mich. Applicant's attorney: Wilhelmina Boersma, 2850 Penobscot Building, Detroit 26, Mich. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Dehumidifiers*, from Grand Rapids, Mich., to points in Ohio, Indiana, and Illinois, when moving in mixed loads with other appliances applicant is authorized to transport.

NOTE: Applicant states the proposed operation will be performed under a continuing contract, or contracts, with Kelvinator Division of American Motors Corporation.

HEARING: April 23, 1962, at the Federal Building, Lansing, Mich., before Examiner Frank J. Mahoney.

No. MC 115841 (Sub-No. 169), filed February 7, 1962. Applicant: COLONIAL REFRIGERATED TRANSPORTATION, INC., 1215 Bankhead Highway West, P.O. Box 2169, Birmingham, Ala. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sugar* from New Orleans, La., to Springdale, Ark.

HEARING: April 18, 1962 at the Arkansas Commerce Commission, Justice Building, State Capitol, Little Rock, Ark., before Joint Board No. 218, or, if the Joint Board waives its right to participate, before Examiner Henry A. Cockrum.

HEARING: April 3, 1962, at the Offices of the Interstate Commerce Commission, Washington, D.C., before Examiner Samuel C. Shoup.

No. MC 119226 (Sub-No. 42), filed January 25, 1962. Applicant: LIQUID TRANSPORT CORP., 3901 Madison Avenue, Indianapolis 27, Ind. Applicant's attorney: Robert W. Loser, 409 Chamber of Commerce Building, Indianapolis, Ind. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Grain neutral spirits*, in bulk, in tank vehicles, from Lawrenceburg, Ind., to Chicago, Ill., and Detroit, Mich.

HEARING: April 11, 1962, in Room 908, Indiana Public Service Commission, New State Office Building, 100 North Senate Avenue, Indianapolis, Ind., before Examiner Frank J. Mahoney.

No. MC 119837 (Sub-No. 2), filed January 4, 1962. Applicant: M. M. HIGGINBOTHAM, doing business as OZARK MOTOR LINES, 806 Michigan Street, Memphis, Tenn. Applicant's attorney: Edward G. Grogan, Commerce Title Building, Memphis 3, Tenn. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Hardy, Ark., and Mammoth Springs, Ark.; from Hardy over U.S. Highway 62 to Salem, Ark., thence over Arkansas Highway 9 to Mammoth Springs, and return over the same route, serving all intermediate points.

HEARING: April 17, 1962, at the Arkansas Commerce Commission, Justice Building, State Capitol, Little Rock, Ark., before Joint Board No. 91, or, if the Joint Board waives its right to participate, before Examiner Henry A. Cockrum.

No. MC 112223 (Sub-No. 57) (REPUBLICATION), filed November 24, 1961, published FEDERAL REGISTER, issue of December 20, 1961, and republished this issue. Applicant: QUICKIE TRANSPORT COMPANY, a corporation, 1121 South Seventh Street, Minneapolis, Minn. Applicant's attorney: Earl Hacking (same address as applicant). The instant application was the subject of a consolidated hearing involving similar applications, heard February 5, 1962, at Minneapolis, Minn., Hearing Examiner Henry C. Darmstadter, presiding. Notice of the filing of the application was previously published in the FEDERAL REGISTER. At the hearing, the scope of the authority sought was amended. As amended, the proposed operations are as follows: Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Fertilizer compounds* (manufactured fertilizer), *urea, ammonium nitrate fertilizer*, and *superphosphate*, from Port Cargill, Minn., and points within one mile thereof, to points in Iowa, Minnesota, North Dakota, South Dakota, Wisconsin, and Nebraska, and *return and rejected shipments* of the above-specified commodities, on return.

NOTE: The amendment removes the restrictions on the commodities as previously published and adds the State of Nebraska as a destination State. Any person or persons who might have been prejudiced by the allowance of the amendment, may, within 30 days from the date of this publication in the FEDERAL REGISTER, file an appropriate pleading.

No. MC 123304 (Sub-No. 4) (AMENDED), filed November 13, 1961, published in FEDERAL REGISTER issue of January 31, 1962, republished February 7, 1962, and republished this issue as amended February 16, 1962. Applicant: SOUTHERN COURIERS, INC., 1316 North Carroll, Dallas, Tex. Applicant's attorney: Ewell M. Muse, Jr., Perry Brooks Building, Suite 415, Austin 1, Tex. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Commercial papers, documents and written instruments such as are used in the businesses of banks and banking institutions* (excluding coin, currency bullion and negotiable securities), between Wichita Falls, Dallas, and Fort Worth, Tex., points in Oklahoma and points in Montgomery County, Kans., and McDonald County, Mo.; and (2) *sales audit media consisting of cash register tapes, charge sales and cash tickets, applications for credit and other documents involved in processing a day's business for sales audit media, punch cards, payroll time sheets, employee personnel records, payroll checks, including recaps of time sheets and payroll records, data processing papers, magnetic tape, punch paper tape, and other business records and documents used in processing audit media* (not including ordinary office supplies and stationery), between Dallas, Tex., on the one hand, and, on the other, points in Oklahoma.

NOTE: This republication is for the purpose (a) of indicating that the commodities proposed to be transported as set forth in the original publication, will be transported between Wichita Falls, Dallas, and Fort Worth, Tex., points in Oklahoma and points in Montgomery County, Kans., and McDonald County, Mo., instead of merely between Dallas, Tex., and points in Montgomery County, Kans., and McDonald County, Mo.; and (b) to add the commodities and the point of origin and points of destination as set forth in (2) above.

HEARING: Remains as assigned March 20, 1962, at the Federal Building, Oklahoma City, Okla., before Examiner Walter R. Lee.

No MC 123614 (Sub-No. 1), filed October 11, 1961. Applicant: JAMES TROWBRIDGE, 99 Ridge Street, Shavertown, Pa. Applicant's attorney: Charles L. Casper, Miners National Bank Building, Wilkes-Barre, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Feed*, in bags, from Binghamton, N.Y., to Noxen, Tunkhannock, and Dushore, Pa.

HEARING: April 27, 1962, at the U.S. Court Rooms, Binghamton, N.Y., before Examiner John L. York.

No. MC 123856 (Sub-No. 1), filed January 31, 1962. Applicant: WIECK'S FEED AND LIVESTOCK, INCORPORATED, Dysart, Iowa. Applicant's attorney: Stephen Robinson, 412 Equitable Building, Des Moines 9, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Ingredients and pre-mixed ingredients used in the manufacture of livestock feed*, (1) from Ladora, Iowa, to Freemont and Grand Island, Nebr., and (2) (a) between Ladora, Iowa, and Hutchinson, Kans., and (b) between Ladora, Iowa, and Rittman, Ohio.

HEARING: April 20, 1962, in Room 401, Old Federal Office Building, Fifth and Court Avenues, Des Moines, Iowa, before Examiner Lyle C. Farmer.

No. MC 123948 (Sub-No. 2), filed January 30, 1962. Applicant: ABNER TERRY, JR., 470 South Second Avenue, Mt. Vernon, N.Y. Applicant's attorney: Edward M. Alfano, 2 West 45th Street, New York 36, N.Y. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Scrap iron*, loose, in bulk, from Bronx, N.Y., to Burlington, Camden, and Florence, N.J.

NOTE: Applicant states the proposed operation is restricted to a continuing contract with Pascap Co., Inc. of Bronx, N.Y.

HEARING: April 19, 1962, at 346 Broadway, New York, N.Y., before Examiner James Anton.

No. MC 124042, filed November 13, 1961. Applicant: B. B. MOTOR CARRIERS, INC., 111 Walton Avenue, Newville, Pa. Applicant's attorney: [illegible] V. Graf, 407 North Front [illegible], Harrisburg, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Radio-active materials, including* [illegible] *90*, between Philipsburg, [illegible] County, Pa., on the one hand, and, [illegible] other, Quehanna, Clearfield [illegible], Pa.

HEARING: April 12, 1962, at the Pennsylvania Public Utility Commission, Harrisburg, Pa., before Examiner John L. York.

No. MC 124063 (CORRECTION), filed November 24, 1961, published FEDERAL REGISTER issue of January 24, 1962, and republished as corrected this issue. Applicant: L. T. McCULLOUGH, doing business as MIDWAY TRAILER SALES, [illegible] West Cummings Highway. Applicant's attorney: Raymond A. Graham, [illegible] Guaranty & Trust Co. Building, 615 Walnut Street, Chattanooga, Tenn. Notice of the filing and assignment for hearing of the subject application was published in the FEDERAL REGISTER, issue of January 24, 1962. The hearing information was incomplete in that the city at which the hearing was scheduled was not designated. Correctly set forth, the application is assigned for hearing March 19, 1962, at the Dinkler-Andrew Jackson Hotel, Nashville, Tenn., before Examiner Francis A. Welch.

No. MC 124083 (Sub-No. 2), filed December 22, 1961. Applicant: SKINNER RENTAL EQUIPMENT, INC., 6341 West Minnesota Street, Indianapolis, Ind. Applicant's attorney: Walter F. Jones, Jr., 1017-19 Chamber of Commerce Building, Indianapolis 4, Ind. APPLICATIONS IN WHICH HANDLING WITHOUT ORAL HEARING IS REQUESTED

MOTOR CARRIERS OF PROPERTY

No. MC 31600 (Sub-No. 523), filed ...ruary 15, 1962. Applicant: P. B. ...TRIE MOTOR TRANSPORTATION, ..., Calvary Street, Waltham 54, Mass. ...icant's attorney: H. C. Ames, Jr., ...portation Building, Washington ..., D.C. Authority sought to operate as ... *common carrier*, by motor vehicle, over ... routes, transporting: *Sodium ...*, in bulk, in tank vehicles, from ..., N.Y., to Wilmington, Mass.

...: Applicant states that the purpose of ... application is to eliminate the necessity ... observing the Bergen County, N.J., gate... in serving the above points under its ... authority.

No. MC 103378 (Sub-No. 228), filed ...ruary 15, 1962. Applicant: PETRO... CARRIER CORPORATION, 369 ...garet Street, Jacksonville, Fla. Ap...icant's attorney: Martin Sack, At...tic National Bank Building, Jackson... 2, Fla. Authority sought to ...erate as a *common carrier*, by motor ...icle, over irregular routes, transport...: *Liquid alum*, in bulk, in tank ve...s, from East Point, Ga., to Coosa ..., Ala.

No. MC 124078 (Sub-No. 2) (AMEND...ENT), filed February 5, 1962, published February 14, 1962, amended February 19, 1962 and republished as amended this issue. Applicant: SCHWERMAN TRUCKING CO., a corporation, 620 South 29th Street, Milwaukee 46, Wis. Applicant's attorney: James R. Ziperski (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cement*, from the plant site of the Penn-Dixie Cement Corporation in or near Kingsport, Tenn., to points in Casey, Russell, Cumberland, Boyle and Clinton Counties, Ky.

NOTE: Applicant presently holds contract carrier authority in MC 113832 and subs thereto, therefore, dual operations may be involved.

The purpose of this republication is to add the County of Boyle to the destination territory.

No. MC 124105 (Sub-No. 2), filed February 14, 1962. Applicant: BAGGETT BULK TRANSPORT, INC., 2 South 32d Street, Birmingham 5, Ala. Applicant's attorney: Harold G. Hernly, 1624 Eye Street, NW., Washington 6, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lime*, in bags, moving in mixed shipments of *cement and mortar cement* from the plant site of the National Cement Company at Ragland (St. Clair County), Ala., to points in Alabama, Georgia, North Carolina, South Carolina, Florida, Mississippi, and Tennessee.

NOTE: Applicant states that it is controlled by Baggett Transportation Company who in turn also controls Alabama Highway Express, Inc. The common control of applicant by Baggett and its majority stockholder, W. D. Sellers, Jr., was approved by order of the Commission Division 1, in MC 119223 embracing MC-F 7589, decided December 4, 1961. Applicant also conducts operations in Permit MC 119223 and subs thereunder, therefore, dual operations may be involved.

MOTOR CARRIERS OF PASSENGERS

No. MC 102538 (Sub-No. 13), filed February 19, 1962. Applicant: YELLOW COACH LINES, INCORPORATED, P.O. Box 287, 415 Sycamore Street, Bristol, Va. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage*, and *express, mail,* and *newspapers*, in the same vehicle with passengers, between Bristol, Va.-Tenn. and Tri-City Airport, Tenn.; from Bristol over U.S. Highway 11-W to junction of Tennessee unnumbered highway, thence over Tennessee unnumbered to Blountville, Tenn., thence over Tennessee Highway 37 to junction of Tennessee unnumbered highway, thence over Tennessee unnumbered highway to Tri-City Airport, and return over the same route, serving all intermediate points.

APPLICATIONS FOR CERTIFICATES OR PERMITS WHICH ARE TO BE PROCESSED CONCURRENTLY WITH APPLICATIONS UNDER SECTION 5, GOVERNED BY SPECIAL RULE 1.240 TO THE EXTENT APPLICABLE

MOTOR CARRIERS OF PROPERTY

No. MC 117642 (Sub-No. 4), filed February 19, 1962. Applicant: F. P. NIELSON, WILLIS F. NIELSON, IVAN R. NIELSON, and LARS P. NIELSON, a partnership, doing business as ARIZONA SALES COMPANY, 116 West Fourth Avenue, Mesa, Ariz. Applicant's attorney: Lynn S. Richards, 716 Newhouse Building, Salt Lake City 11, Utah. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry fertilizer*, in bags and in bulk, from Garfield and Geneva, Utah, to points in Arizona on and south of U.S. Highway 70.

NOTE: This application is directly related to MC-F 8078, published FEDERAL REGISTER, issue February 21, 1962.

APPLICATIONS UNDER SECTIONS 5 AND 210a(b)

The following applications are governed by the Interstate Commerce Commission's special rules governing notice of filing of applications by motor carriers of property or passengers under section 5(a) and 210a(b) of the Interstate Commerce Act and certain other proceedings with respect thereof. (49 CFR 1.240)

MOTOR CARRIERS OF PROPERTY

HENNIS FREIGHT LINES, INC., is authorized to operate as a *common carrier* in Georgia, South Carolina, North Carolina, Virginia, Michigan, Ohio, Indiana, Illinois, Maryland, New York, Pennsylvania, and New Jersey. Application has been filed for temporary authority under section 210a(b).

No. MC-F-8085. Authority sought for purchase by HOLT TRUCK LINE, INC., Conway, Ark., of the operating rights and property of HERMAN B. LITTLE, an individual, doing business as HOLT TRUCK LINE, Front and Deer Streets, Conway, Ark., and for acquisition by JACK F. POWELL, 800 South Main Street, Searcy, Ark., C. K. POWELL, 1511 East Fourth Street, Little Rock, Ark., and DON E. POWELL, 620 Pryor Street, West Memphis, Ark., of control of such rights and property through the purchase. Applicants' attorneys: S. Harrison Kahn, 1110–1114 Investment Building, Washington 5, D.C., and Louis Tarlowski, 601 Rector Building, Little Rock, Ark. Operating rights sought to be transferred: *General commodities*, excepting, among others, household goods, but not excepting commodities in bulk, as a *common carrier* over regular routes between Little Rock, Ark., and Conway, Ark., serving the intermediate point of North Little Rock, Ark., between North Little Rock, Ark., and Camp Joseph T. Robinson, Ark., serving no intermediate points, between Little Rock, Ark., and junction U.S. Highway 64 and Arkansas Highway 5, serving no intermediate points, between Conway, Ark., and junction U.S. Highway 64 and unnumbered county road near El Paso, Ark., serving all intermediate points, and points within five miles of the described portion of U.S. Highway 64, between Hamlet, Ark., and Center Hill, Ark., serving all intermediate points and points within five miles of the described portion of Arkansas Highway 36, and between Center Hill, Ark., and junction unnumbered county road and U.S. Highway 64 near El Paso, Ark., serving all intermediate points and points within five miles of the described portion of unnumbered county road. Vendee holds no authority from this Commission. However, C. K. POWELL, JACK F. POWELL, and DON E. POWELL, stockholders controlling vendee, are stockholders in, and control, POWELL TRUCK LINE, INC., 800 South Main, Searcy, Ark., which is authorized to operate as a *common carrier* in Tennessee, Missouri, and Arkansas. Application has been filed for temporary authority under section 210a(b).

No. MC-F-8086. Authority sought for purchase by H & W MOTOR EXPRESS COMPANY, 3000 Elm Street, Dubuque, Iowa, of the operating rights and property of WHITE'S MOTOR TRANSPORT, INC., Francis & River, Decorah, Iowa, and for acquisition by CYRIL H. WISSEL and MARIE C. HAAS, both of Dubuque, Iowa, of control of such rights and property through the purchase. Applicants' representative: Cyril H. Wissel, 3000 Elm Street, Dubuque, Iowa. Operating rights sought to be transferred: *General commodities*, excepting, among others, household goods and commodities in bulk, as a *common carrier* over regular routes between Williamstown, Iowa, and New Hampton, Iowa, serving certain intermediate and off-route points, *general commodities*, excepting, among others, household goods, but not excepting commodities in bulk, between Waterloo, Iowa, and Decorah, Iowa, serving certain intermediate and off-route points, and operations under the Second Proviso of Section 206(a)(1) of the Interstate Commerce Act in the State of Iowa as more specifically described in No. MC-13420 Sub-9. Vendee is authorized to operate as a *common carrier* in Iowa, Minnesota, and Illinois. Application has not been filed for temporary authority under section 210a(b).

NOTE: An application will be filed at a later date as a matter directly related.

No. MC-F-8087. Authority sought for control and merger by GREGORY HEAVY HAULERS, INC., 2 Main Street, Nashville, Tenn., of the operating rights and property of CHARLOTTESVILLE HAULING COMPANY, INCORPORATED, 635 Third National Bank Building, Nashville, Tenn., and for acquisition by E. T. GREGORY, C. O. GREGORY, and MRS. E. T. GREGORY, all of 2 Main Street, Nashville, Tenn., of control of such rights and property through the transaction. Applicants' attorneys: Wilmer B. Hill, 529 Transportation Building, Washington 6, D.C., and Charles H. Hudson, Jr., 206 Broadway Bank Building, Nashville, Tenn. Operating rights sought to be controlled and merged: *Road-construction machinery, equipment, and supplies*, except coal, as a *common carrier* over irregular routes between points in Virginia, on the one hand, and, on the other, points in West Virginia, and from points in Ohio to points in Virginia. GREGORY HEAVY HAULERS, INC., is authorized to operate as a *common carrier* in Virginia, Illinois, Wisconsin, Michigan, Iowa, Minnesota, Indiana, Tennessee, Kentucky, and North Carolina. Application has not been filed for temporary authority under section 210a(b).

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary*.

[Notice 601]

MOTOR CARRIER TRANSFER PROCEEDINGS

FEBRUARY 23, 1962.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 179), appear below:

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC 64763. By order of February 19, 1962, the Transfer Board approved the transfer to Elmer G. Filomeo and Bruno Nardi, a partnership, doing business as Diablo Transportation Co., Concord, Calif., of Certificates Nos. MC 105682 Sub 9 and MC 105682 Sub 14, issued May 12, 1958 and May 13, 1958, respectively, to Elmer G. Filomeo, Joseph Martinelli, and Bruno Nardi, a partnership, doing business as Diablo Transportation Co., Concord, Calif., authorizing the transportation of: General commodities, except Class A and B explosives, and household goods, between the site of Fairfield-Suisun, Calif., Army Air Base, on the one hand, and, on the other, the sites of Sacramento Municipal Airport, McClellan Field, Mather Field, Sacramento Signal Corps Depot at Folk, San Francisco Municipal Airport (Mills Field), Oakland Municipal Airport, Sacramento, San Francisco, Oakland, Alameda, and Emeryville, Calif.; and automobile parts, chemicals, small arms ammunition, and turpentine, from Sierra Ordnance Depot, Herlong, Calif., to Oakland, Calif. Pete H. Dawson, 1261 Drake Avenue, Burlingame, Calif., Representative for applicants.

No. MC—FC 64767. By order of February 19, 1962, the Transfer Board approved the transfer to E & R Lines, Inc., Brockport, N.Y., of Certificate No. MC 1236, issued June 10, 1949, to Norman J. Redman, doing business as E. & R. Lines, Brockport, N.Y., authorizing the transportation of: General commodities, excluding household goods, commodities in bulk, and other specified commodities between Rochester, N.Y., on the one hand, and, on the other, points in Monroe and Orleans Counties, N.Y., within 30 miles of Rochester, N.Y. Robert V. Glanaimy, 25 Exchange Street, Rochester 14, N.Y., Attorney for applicants.

No. MC-FC 64814. By order of February 19, 1962, the Transfer Board approved the transfer to Arledge Transfer, Inc., 2131 Summer Street, Burlington, Iowa, of Certificates Nos. MC 101186, MC 101186 Sub 8, and MC 101186 Sub 9, issued October 22, 1945, January 24, 1957, and March 16, 1960, issued to James G. Arledge, doing business as Arledge Transfer Company, 2131 Summer Street, Burlington, Iowa, authorizing the transportation of general commodities, excluding commodities in bulk, but including household goods, between Burlington, Iowa and Quincy, Ill., serving the intermediate points of Fort Madison and Keokuk, Iowa; between Fort Madison, Iowa, and Dallas City, Ill., serving the intermediate point of Niota, Ill., and off-route point of Nauvoo, Ill.; between Burlington, Iowa, and Quincy, Ill., serving all intermediate points and off-route points of Fort Madison and Keokuk, Iowa, and Nauvoo, Niota, La Harpe, Colusa, Adrian, Burnside, and Ferris, Ill.; between Burlington, Iowa, and Milwaukee, Wis., serving no intermediate points; between Burlington, Iowa, and specified junctions in Illinois; general commodities, excluding household goods and commodities in bulk, between Burlington, Iowa, and Oskaloosa, Iowa, serving all intermediate points; between Burlington, Iowa, and Cedar Rapids, Iowa, serving all intermediate points, and the off-route points of Washington, Riverside, Muscatine, Grandview, Wapello, Wever, Fort Madison, Montrose, and Keokuk, Iowa; between Burlington, Iowa, and Chicago, Ill., serving the intermediate point of Monmouth, Ill., and points between Monmouth and Chicago, Ill., and between points in Iowa City, Iowa; such merchandise as is dealt in by manufacturing, wholesale, retail, and chain drug companies, and in connection therewith materials and supplies used in the conduct of such business, between Burlington, Iowa, and Peoria, Ill., serving all intermediate points and off-route points of Stronghurst, Raritan, and Camden, Ill.; and from Keokuk, Iowa, to Rushville, Ill., serving all intermediate points and the off-route points of Stronghurst, Raritan, and Camden, Ill.; household goods and emigrant movables, between Wever, Iowa, and points within 10 miles of Wever, on the one hand, and, on the other, points in Illinois; household goods between Burlington, Iowa, and points within 50 miles thereof, on the one hand, and, on the other, points in Missouri, Minnesota, Wisconsin, Michigan, and Indiana; malt beverages and empty containers, between Fort Madison and Keokuk, Iowa, and Galesburg, Ill., on the one hand, and, on the other, Milwaukee, Wis., and between Burlington, Fort Madison, and Keokuk, Iowa, on the one hand, and, on the other, La Crosse, Wis., Peoria, Ill., St. Paul and Mankato, Minn., St. Louis, Mo., and Fort Wayne, Ind.; soap, soap powder and flakes, and scouring compounds, between Burlington, Iowa, on the one hand, and, on the other, specified points in Illinois, Indiana, Wisconsin, and Minnesota; soap, in truckloads, from Burlington, Iowa, to Wausau, Wis., specified area in Wisconsin, and Winona, Minn.; canned fruit and vegetables, from points in Wisconsin, with certain exceptions, to Burlington; canned goods, from Columbus Junction, Iowa, and Lomax, Ill., to points in Illinois, Iowa, Missouri, and Minnesota; insecticides and agricultural chemicals (not including feeds or fertilizers), agricultural chemical equipment for the spreading or application of such insecticides and agricultural chemicals (not including general farm machinery or equipment), anti-freeze, and dog food, from Lockridge, Iowa, and specified points in Illinois (except Chicago), Indiana, Minnesota (except 72 specified points) and specified points in Missouri and Wisconsin; fresh meat and packinghouse products, cheese, canned goods, animal food, soap, advertising matter, and butchers' supplies, from Des Moines, Iowa, to 32 specified towns in Ill.; and from Burlington, Iowa, to 67 specified towns in Illinois and 23 towns in Iowa, from Ottumwa, Iowa, to 14 specified towns in Illinois, soap and soap powders, from Burlington, Iowa, to 27 towns in Illinois; bakery goods and macaroni products, from Burlington, Iowa, to points in Illinois (except Chicago, Ill.), Indiana, Nebraska, North Dakota, South Dakota, Minnesota, Wisconsin, and Michigan, and rejected shipments on return; dressed poultry, dairy products, and eggs, from a specified area of Iowa to specified points and area in Iowa.

No. MC-FC 64818. By order of February 19, 1962, the Transfer Board approved the transfer to James D. John, Thayer, Kans., of Certificate No. MC 5116, issued May 5, 1950, to Glen Solomon, Chanute, Kans., authorizing the transportation of livestock, over regular routes, between Petrolia, Kans., and Kansas City, Mo., feed, seed, farm machinery, grease and oil in containers and groceries, from Kansas City over the above specified route to Petrolia with service authorized to intermediate and off-route points within 26 miles of Petrolia for delivery only; and livestock and agricultural commodities, over irregular routes, from points in Webster, Clifton, Colfax, Prairie, Guilford, Pleasant Valley, and Benedict Townships, Wilson County, Kans., to Kansas City, Mo.; and general commodities, excluding household goods, from Kansas City to the above-specified Kansas points. Neil L. Toedman, P.O. Box 216, Yates Center, Kans., representative for applicants.

No. MC-FC 64822. By order of February 19, 1962, the Transfer Board approved the transfer to Otto Larson, 408 North Lewis Street, Ludington, Mich., of Certificate No. MC 98354, issued March 1, 1940, to Emil Larson, 510 North Robert Street, Ludington, Mich., authorizing the transportation of household goods, furniture, and store fixtures, between points in Mason, Lake, Manistee, and Oceana Counties, Mich., on the one hand, and, points in Ohio, Indiana, Illinois, and Wisconsin, on the other.

[SEAL] HAROLD D. McCOY,
Secretary.

FOURTH SECTION APPLICATIONS FOR RELIEF

FEBRUARY 23, 1962.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 37567: *Petroleum residual fuel oil to Minnesota and Wisconsin.* Filed by Southwestern Freight Bureau, agent (No. B–8159), for interested rail carriers. Rates on petroleum residual fuel oil, in tank-car loads, from producing points in Arkansas, Kansas, Louisiana, New Mexico, Oklahoma and Texas, to specified points in Minnesota and Wisconsin.

Grounds for relief: Market competition.

Tariff: Supplement 252 to Southwestern Freight Bureau tariff I.C.C. 4279.

FSA No. 37568: *Methanol from Texas City, Tex., to Joliet, Ill.* Filed by Southwestern Freight Bureau, agent (No. B–8157), for interested rail carriers. Rates on methanol (methyl alcohol), in tank-car loads, from Texas City, Tex., to Joliet, Ill. (applicable only for deliveries on railroad tracks serving the Amoco Chemical Company at Joliet, Ill.).

Grounds for relief: Unregulated water and market competition.

Tariff: Supplement 223 to Southwestern Freight Bureau tariff I.C.C. 4064.

FSA No. 37569: *Lime from Eden, Wis., to Newell, Ark.* Filed by Southwestern Freight Bureau, agent (No. B–8158), for interested rail carriers. Rates on lime, common, lump, crushed, pulverized or hydrated, in carloads, from Eden, Wis., to Newell, Ark.

Grounds for relief: Market competition.

Tariff: Supplement 89 to Southwestern Freight Bureau tariff I.C.C. 4021.

By the Commission.

[SEAL] HAROLD D. MCCOY,
Secretary.

SMALL BUSINESS ADMINISTRATION

[Delegation of Authority 30–II–3 (Rev. 1)]

ADMINISTRATIVE OFFICER

Delegation Relating to Administrative Functions

1. Pursuant to the authority delegated to the Regional Director by Delegation of Authority No. 30 (Revision 6), as amended (25 F.R. 1706, 7418, 26 F.R. 177, 1456, 27 F.R. 372), there is hereby delegated to the Administrative Officer the authority:

1. To administer oaths of office.

2. To approve (a) annual and sick leave, except advanced annual and sick leave, and (b) leave without pay not to exceed 30 days for employees in the region.

3. To (a) make emergency purchases chargeable to the Administrative expense fund, not in excess of $50 in any one object class in any one instance but not more than $100 in any one month for total purchases in all object classes; (b) make purchases not in excess of $10 in any one instance for "one-time use items" not carried in stock subject to the total limitations set forth in (a) of this paragraph; and (c) to contract for the repair and maintenance of equipment and furnishings in an amount not to exceed $25 in any one instance.

4. In connection with the establishment of Disaster Loan Offices, to (a) obligate Small Business Administration to reimburse General Services Administration for the rental of office space; (b) rent office equipment; and (c) procure (without dollar limitation) emergency supplies and materials.

5. To administratively approve all types of vouchers, invoices and bills submitted by public creditors of the Agency for articles or service rendered.

6. To (a) authorize or approve official travel; and (b) administratively approve travel reimbursement claims.

7. To procure from General Services Administration all standard forms and all supply items listed in Part I of the SBA Index of Standard Supply Items.

8. To rent motor vehicles from the General Services Administration and to rent garage space for the storage of such vehicles when not furnished by this Administration.

9. To establish and classify all non-technical positions subject to the Classification Act of 1949, as amended, in Grades GS–1 through GS–7.

II. The authority delegated herein may not be redelegated.

III. All authority delegated herein may be exercised by an SBA employee designated as Acting Administrative Officer.

IV. All previous authority delegated to the Administrative Officer is hereby rescinded without prejudice to actions taken under all such delegations of authority prior to the date hereof.

Effective date: January 25, 1962.

CHARLES H. KRIGER,
Regional Director,
New York Regional Office.

[F.R. Doc. 62–1968; Filed, Feb. 27, 1962; 8:46 a.m.]

[Delegation of Authority 30–XI–10 (Rev. 1) Amdt. 1]

BRANCH MANAGER, SALT LAKE CITY BRANCH OFFICE

Delegation Relating to Financial Assistance, Procurement and Technical Assistance, and Administrative Functions

Delegation of Authority No. 30–XI–10 (Revision 1), 26 F.R. 10462, is hereby amended by:

1. Adding subsection I. A. 7, as follows:

7. To disburse approved loans.

2. Deleting Section II in its entirety and substituting the following in lieu thereof:

II. The specific authorities delegated in subsections I. A. 1 through 6 may not be redelegated.

Effective date: January 17, 1962.

HAROLD R. SMITHELLS,
Regional Director,
Denver Regional Office.

[F.R. Doc. 62–1969; Filed, Feb. 27, 1962; 8:46 a.m.]

[Declaration of Disaster Area 361]

IDAHO

Declaration of Disaster Area

Whereas, it has been reported that during the month of February 1962, because of the effects of certain disasters, damage resulted to residences and business property located in Bonneville, Bingham, Caribou, Bannock, Madison, Fremont, and Gooding Counties in the State of Idaho;

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected;

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act.

Now, therefore, as Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 7(b)(1) of the Small Business Act may be received and considered by the Offices below indicated from persons or firms whose property, situated in the aforesaid Counties and areas adjacent thereto, suffered damage or destruction resulting from flood and accompanying conditions occurring on or about February 11, 1962.

Offices—

Small Business Administration Regional Office, Smith Tower, Room 1206, 506 Second Avenue, Seattle 4, Wash.

Small Business Administration Branch Office, 214 Sonna Building, 910 Main Street, P.O. Box 933, Boise, Idaho.

2. Applications for disaster loans under the authority of this Declaration will not be accepted subsequent to August 31, 1962.

Dated: February 14, 1962.

JOHN E. HORNE,
Administrator.

1961–62 Edition

UNITED STATES GOVERNMENT ORGANIZATION MANUAL

[Revised as of June 1, 1961]

Official handbook of the Federal Government, describing the organization and functions of the agencies in the legislative, judicial, and executive branches

Price: $1.50

Published by Office of the Federal Register, National Archives and Records Service, General Services Administration

Order from Superintendent of Documents, Government Printing Office, Washington 25, D.C.

FEDERAL REGISTER

Telephone WOrth 3-3261

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Office of the Federal Register, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D.C.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D.C.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements vary.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER, or the CODE OF FEDERAL REGULATIONS.

- Small Business Administration 1001
- State Department 1001, 1109
- U.S. Arms Control and Disarmament Agency 1109, 1313, 1718

HOSPITALS, GOVERNMENT, certain positions in:
Exclusion from provisions of Federal Employees Pay Act and Classification Act:
- Clinical psychology interns, Navy Department 1313
- Psychodrama interns and residents 1208

Stipends, maximum, prescribed:
- Clinical psychology interns, Navy Department 1313
- Psychodrama interns and residents 1208

PAY REGULATIONS:
Government hospitals, stipends prescribed:
- Clinical psychology interns, Navy Department 1313
- Psychodrama interns and residents 1208

Veterinarian positions, certain; pay rate increase 1129

TRAINING REGULATIONS:
- Agreements to continue in service 1349
- Reports 1349
- Waiver of limitations on use of non-Government facilities 1349

TRAVEL AND TRANSPORTATION EXPENSES, appointees to certain positions where there is manpower shortage; patent administration, patent attorney, etc 1375

Civilian Manpower Mobilization:
Emergency preparedness functions of Secretary of Labor (Executive Order 11000) 1532

Coast Guard:
EQUIPMENT, installations, or materials; approvals and termination of approval 1223, 1502
TANK VESSELS, venting of cofferdams; proposed rules 1801

Commerce Department:
See Business and Defense Services Administration.
International Programs Bureau.
Maritime Administration.
Patent Office.

APPOINTMENTS without compensation and statements of business interests under Defense Production Act of 1950 1196, 1227, 1228, 1374, 1428, 1505
AUTHORITY DELEGATIONS:
- By Secretary to Commissioner, U.S. Science Exhibit; negotiate certain contracts 1076
- From General Services Administrator, establishment of special police force to protect Maritime Administration installations; revocation 1037

CUBAN TRADE EMBARGO, functions (Proclamation 3447) 1085
EMERGENCY PREPAREDNESS FUNCTIONS (Executive Order 10999) 1527
GREAT LAKES PILOTAGE ADMINISTRATION; pilotage pool, application for establishment 1504
ORGANIZATION AND FUNCTIONS:
- National Bureau of Standards, Boulder Laboratories 1227
- Under Secretary of Commerce for Transportation, duties and responsibilities 987

Commission, Presidential, To Investigate Railroad Labor Dispute:
Change in membership (Executive Order 10991) 1207

Committees and Boards:
ADVISORY COMMITTEES, regulations (Executive Order 11007) 1875
ADVISORY AND CONSULTATIVE BOARDS, policies respecting conflict of interests (Memorandum of February 9, 1962) 1341
EMERGENCY BOARD to investigate labor dispute between Eastern Air Lines, Inc., and employees (Executive Order 11006) 1789
EMPLOYMENT OF THE HANDICAPPED, PRESIDENT'S COMMITTEE ON; establishment (Executive Order 10994) 1447

Committees and Boards—Continued Page

PETROLEUM STUDY COMMITTEE, submission of data 1779
RADIO ADVISORY COMMITTEE, INTERDEPARTMENT (Executive Order 10995) 1519

Commodity Credit Corporation:
AUTHORITY DELEGATIONS by Executive Vice President to certain Agricultural Stabilization and Conservation Service officials; sight drafts and certificates 1427
EXPORTS; flour, Durum wheat, cash payment (GR-346), terms and conditions 1753
LOAN PROGRAM; 1961 crop:
- Maryland tobacco 1753
- Puerto Rican tobacco 1753

LOAN AND PURCHASE AGREEMENT PROGRAM; 1961 crops:
- Barley 1407, 1753
- Flaxseed 1407
- Grain sorghums 1407
- Rye 963, 1407
- Wheat 1408, 1753

NAVAL STORES; gum price support program, 1962 1593
PRICE SUPPORT PROGRAMS:
- Naval stores; gum 1593
- Sales of certain commodities acquired through price support operations; monthly sales list, February 1962 1326

Communist Countries:
Restrictions on teaching equipment from 1554

Comptroller of Currency:
First National Bank of Provincetown, application for branch in Chatham, Mass.; hearing 951

Conduct Standards:

Exports:
See Imports and exports.

F

Farm Equipment:
Emergency preparedness functions of Secretary of Agriculture (Executive Order 10998) 1524

Federal Aviation Agency:
AIRPORTS:
- Anchorage and Fairbanks airports in Alaska; deletion 1454
- Public airports; reimbursement for damage by Federal agencies, deletion 1454

AIRWORTHINESS DIRECTIVES:
- Boeing 1313
- Brantly 1885
- Douglas 986, 1313
- Fairchild 1480
- Marvel-Schebler 1454
- Navion 1009
- Piper 1313
- Sud Aviation helicopters 1479
- Vickers 1565

AIRWORTHINESS REQUIREMENTS; lighting systems, exterior, experiments (SR-392B and SR-392C) 1008

BALLOONS, free and hot-air; pilot certificates, requirements, limitations, etc., proposed rule 1363

CERTIFICATES:
- Flight radio operator certificate, deletion 1452, 1454
- Ground instructor; test requirements for original issuance, deletion 1594
- Pilots; proposed rules:
  - Free balloon pilot certificates; requirements, limitations, etc 1363
  - Private pilot certificates; aeronautical experience, dual instruction 1073
  - Student pilot certificates; solo flight requirements, dual instruction 1073

CONTROL AREAS, CONTROL ZONES, etc.; designation:
- Control areas; alterations:
  - Colored Federal airways, low altitude (amber, blue, green, red) 1033, 1161, 1323, 1596, 1773
  - Continental control area 1114
  - Extension of control areas 1114, 1118, 1211, 1324, 1354, 1455, 1597, 1773
  - VOR Federal airway control areas; low altitude: Domestic 943, 949, 1069, 1114, 1221, 1323, 1412, 1424, 1454, 1494, 1495, 1552, 1595, 1596, 1658, 1728, 1774, 1796, 1846, 1917; Hawaii 976
- Control zones:
  - Alterations 1033, 1034, 1074, 1221, 1364, 1454, 1596, 1597, 1757, 1885
  - Designation; proposed rule 1324
- Positive control areas; designation, proposed rule 1323
- Reporting points; alterations:
  - Colored Federal airways, low altitude (amber, blue, red, green) 1161, 1323, 1596, 1773, 1918
  - VOR Federal airways reporting points: Hawaii 1210; Low altitude 1249, 1454, 1917
- Transition areas; designation 1221, 1249, 1324, 1461

DEFINITIONS AND ABBREVIATIONS (NEW); proposed rule 1655

EMERGENCY PREPAREDNESS FUNCTIONS (Executive Order 11003) 1540

EXPLOSIVES and other dangerous articles; magnetic materials, cargo location, packing and marking requirements, proposed rule 1074

Federal Aviation Agency—Continued Page

FEDERAL AIRWAYS, designation; alterations:
- Colored Federal airways, low altitude (amber, blue, green, red) 1033, 1161, 1162, 1323, 1454, 1552, 1596, 1773, 1918
- VOR Federal airways:
  - Intermediate altitude 1009, 1068, 1160, 1194, 1220, 1353, 1354, 1412, 1454, 1494, 1566, 1728, 1774, 1796
  - Low altitude; domestic 942, 943, 949, 1033, 1069, 1074, 1114, 1161, 1193, 1194, 1210, 1220, 1323, 1354, 1412, 1424, 1454, 1461, 1494, 1495, 1552, 1595, 1596, 1658, 1728, 1757, 1774, 1846, 1917

INSTRUMENT FLIGHT RULES:
- Altitudes, minimum en route IFR; particular routes and intersections:
  - Colored Federal airways (amber, blue, green, red) 1210
  - Direct routes 1210
  - VOR Federal airways 1210
  - Hawaii 1213
- Approach procedures, standard, for takeoff and landing at particular airports; alterations:
  - Landing system procedures 980, 1485
  - Radar procedures 982, 1487
  - Radio range procedures 977, 1481

IRREGULAR AIR CARRIERS:
- Large aircraft, proving tests for; proposed rule 1219
- Lighting systems, exterior; experiments (SR-392B and SR-392C) 1008
- Passenger emergency exit markings, illumination 1453
- Persons aboard all-cargo aircraft, carriage of (SR-432A) 1208
- Reports, mechanical reliability 1242

JET ROUTES, advisory areas; designation and alterations:
- Jet advisory areas:
  - Enroute 1324, 1454, 1597
  - Terminal 1034, 1035, 1597
- Jet routes 1412, 1413, 1454

OPERATION RULES; lighting systems, exterior, experiments (SR-392B and SR-392C) 1008

ORGANIZATION AND FUNCTIONS; Office of Plans, abolishment, transfer of certain functions and personnel 1199

PROCEDURAL REGULATIONS; enforcement procedures 1110

RESTRICTED AREAS over military installations, etc.; alterations:
- Alaska 1757
- California 1035
- Indiana 1162, 1658
- Maryland 1659
- Nebraska 1033
- Nevada 1354
- Ohio 1114
- Wyoming 1355

SCHEDULED AIR CARRIERS:
- Helicopters, certification and operation rules:
  - Passenger emergency exit markings, illumination 1453
  - Reports, mechanical reliability 1247
- Lighting systems, exterior; experiments (SR-392B and SR-392C) 1008
- Passenger emergency exit markings, illumination 1452
- Persons aboard all-cargo aircraft, carriage of (SR-432A) 1208
- Reports, mechanical reliability 1242

TECHNICAL STANDARD ORDERS, C Series:
- General provisions; definitions, basis and purpose, authorization, records, etc 974, 1720
- Minimum performance standards; airborne ATC transponder equipment (C74), proposed rule 1363

TRAINING GRANTS, Inter-American aviation; deletion 1454

Feed Program:
Livestock emergency program ---- 1408

Fertilizer:
Emergency preparedness functions of Secretary of Agriculture (Executive Order 10998) ---- 1524

Fire Control, Rural:
Emergency preparedness functions of Secretary of Agriculture (Executive Order 10998) ---- 1524

Fish:
Cod, haddock, etc., tariff-rate quota, 1962 ---- 1295

Fish and Wildlife Service:
AUTHORITY DELEGATIONS:
By Director, Commercial Fisheries Bureau, to certain officials; personnel administration ---- 1504
By Director, Sport Fisheries and Wildlife Bureau, to regional directors and field personnel; national fish hatcheries, exchange of fish and fish eggs ---- 1122
From Secretary of Interior:
Area Redevelopment Act functions respecting Indian reservations ---- 987
Lands and minerals, leasing and permitting ---- 987
HUNTING AND POSSESSION OF WILDLIFE:
Areas open to hunting and fishing. *See under* Wildlife refuges.
Migratory birds; proposed rules, hearings:
Hunting methods, exceptions ---- 1174
Permits ---- 1174
MIGRATORY BIRDS. *See* Hunting and possession of wildlife.
PRIBILOF ISLANDS, administration; landing and use of liquor, deletion of restriction ---- 1420

Fish and Wildlife Service—Continued Page
PROCESSED FISHERY PRODUCTS; approved identification, removal of labels bearing inspection marks, processor's accountability, proposed rule ---- 1771
WILDLIFE REFUGES, NATIONAL:
See also Hunting and possession of wildlife.
Areas open to hunting or sport fishing:
Arkansas; White River, sport fishing ---- 1419
California; sport fishing:
Colusa ---- 993
Modoc; proposed rule ---- 949
Florida; St. Marks, sport fishing ---- 1072
Kentucky; Kentucky Woodlands:
Hunting ---- 1172
Sport fishing ---- 1999
Missouri; Mingo, sport fishing ---- 1727
Nebraska; Valentine, sport fishing ---- 1727
Oklahoma; Washita, sport fishing ---- 1681
South Carolina; Carolina Sandhills, sport fishing ---- 1072
Wyoming; Pathfinder, sport fishing, correction ---- 1419

Fishing:
COMMERCIAL FISHING, applicability of Fair Labor Standards Act provisions ---- 1284
SPORT FISHING in certain wildlife refuge areas. *See* Fish and Wildlife Service.

Flaxseed:
Loan and purchase agreement program, 1961 crop ---- 1407

Flour:
EXPORT PROGRAM, cash payment (GR–346) ---- 1783
IMPORTS, Shmurah wheat flour (Proclamation 3448) ---- 1999

Food:
Emergency preparedness functions (Executive Order 10998, 11001) ---- 1524, 1594

Food Additives:
See Food and Drug Administration.

Food and Drug Administration:
ALIMENTARY PASTES, macaroni and noodle products, enriched vegetable; identity standards, label statements of optional ingredients ---- 1317
ANEMIA, pernicious, preparations for treatment; statement of policy and interpretation, proposed rule ---- 1500
ANTIBIOTIC and antibiotic-containing drugs. *See* Drugs.
BACITRACIN:
Certification of batches ---- 1780
Tablets, proposed procedure for testing disintegration time ---- 1422
Tests and methods of assay; tablets, proposed procedure for testing disintegration time ---- 1421
BREAD, white, and rolls, standards of identity; label statement of optional ingredient, *l*-cysteine ---- 1318
CHLORAMPHENICOL:
Certification of batches; tablets, proposed procedure for testing disintegration time ---- 1422
Tests and methods of assay; tablets, proposed procedures for testing disintegration time ---- 1421
CHLORTETRACYCLINE:
Certification of batches ---- 1318
Tablets, proposed procedure for testing disintegration time ---- 1422
Food additive in medicated animal feed for calves and psittacine birds ---- 948, 986
Rolitetracycline, name changed from pyrrolidinomethyl tetracycline; proposed rule ---- 1322
Tests and methods of assay ---- 1322
Tablets, proposed procedure for testing disintegration time ---- 1421
COTTAGE CHEESE, plain or creamed; standards of identity, proposed rules ---- 1173
DRUGS:
Antibiotic and antibiotic-containing drugs:
General regulations:
Definitions ---- 945
Rolitetracycline, name changed from pyrrolidinomethyl tetracycline; proposed rule ---- 1322
Laboratory diagnosis of disease, antibiotics intended for use in; antibiotic sensitivity discs:
Certification procedure ---- 945
Tests and methods of assay ---- 945

Food and Drug Administration—Continued Page
DRUGS—Continued
New drugs; organizational units, name changes:
Division of New Drugs ---- 1797
Division of Veterinary Medicine ---- 1797
Potassium permanganate preparations as prescription drugs, labeling; policy statement ---- 1009
Prescription and veterinary drugs, use commonly known to practitioners; exemption of certain labeling requirements ---- 1317
Extension of effective date ---- 1490
ENFORCEMENT REGULATIONS, labeling requirement exemptions for prescription and veterinary drugs, use commonly known to practitioners ---- 1317
Extension of effective date ---- 1490
FOOD ADDITIVES; specific tolerances for listed chemicals in animal feed, certain foods; and food processing and packaging, rules proposed or adopted:
Animal or poultry feed or supplements:
Animal feed:
Colloidal silicon dioxide as anti-caking agent ---- 948
Ethion on citrus pulp ---- 1421
Ethyl alcohol containing denaturants for weight gain and feed efficiency, withdrawal of petition ---- 948
Calves:
Chlortetracycline and neomycin tolerances in edible tissues ---- 948
Chlortetracycline and sulfamethazine with vitamins in medicated feed; withdrawal of petition ---- 985
Psittacine birds; medicated feed containing chlortetracycline for treatment of psittacosis ---- 985
Turkey feed; zoalene ---- 1421
Definitions, procedural and interpretative regulations; further extension of effective date of statute for certain specified food additives:
Direct additives ---- 943
Indirect additives ---- 944
Human consumption:
Beans, processed; calcium disodium EDTA for color retention ---- 1362
Chewing gum base; masticatory substances ---- 1362
Dietary supplements; polysorbate 80 as emulsifier for edible oils ---- 1257
Maple sirup; paraformaldehyde residues on trees treated for fungal growth ---- 1554
Sorbitol in certain vitamins, dietary supplements, dried fruits, etc ---- 1728
Tea, dried; tetradifon residues ---- 1758
Vitamin-mineral preparations; nicotinamide-ascorbate as source of vitamin C ---- 1728
Wine; diethyl pyrocarbonate as sterilizing agent ---- 948
Yeast, primary dried and dried; safe use petition ---- 985
Packaging or processing materials, containers, coatings, paper, etc.:
Containers or equipment contact, additives affecting food:
Ethylene-butene-1 copolymer ---- 1173
Filters, resin-bonded for milk and edible oils ---- 1254
Milk and milk products:
66/610 Copolymer nylon resins ---- 948
Filters, resin-bonded ---- 1254
Polyethylene ---- 1173
Polyoxypropylene-polyoxyethylene condensate ---- 1219
Resinous and polymeric coatings ---- 1252, 1845
Styrene copolymer coatings ---- 1887
Textiles, fibers and adjuvant substances; list ---- 1214, 1358
Dry bulk food packaging; polyurethane resins ---- 1728
Octadecylamine in steam systems of food processing plants, as corrosion inhibitor ---- 1461
Paper and paperboard components ---- 948, 1758
HAZARDOUS SUBSTANCES; small packages, exemption from labeling requirements:
Felt-tip ink-marking devices ---- 1318
Paste-wax preparations ---- 945
ICE CREAM, French, ice milk, sherbets, etc., standards of identity; proposed rules ---- 1294
MACARONI products, enriched vegetable; standards of identity, label statement of optional ingredients ---- 1317
NEW DRUGS, organizational units, name changes; Divisions of New Drugs, and Veterinary Medicine ---- 1797
NOODLE products, enriched vegetable; standards of identity, label statement of optional ingredients ---- 1317

Food and Drug Administration—Continued Page
PEANUT BUTTER; stay of order establishing identity standard ---- 943
PENICILLIN:
Certification of batches ---- 944, 945
Tablets, proposed procedure for testing disintegration time ---- 1422
Methicillin sodium, name changed from dimethoxyphenyl penicillin sodium ---- 945
Tests and methods of assay ---- 944, 945
Tablets, proposed procedure for testing disintegration time ---- 1421
PESTICIDE CHEMICALS; specific tolerances or exemptions, for residues of listed chemicals on various agricultural commodities, rules proposed or adopted:
2,4-Dichloro-6-*o*-chloroanilino-*s*-triazine ---- 1887
Ethion ---- 1421
6,7,8,9,10,10-Hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin-3-oxide ---- 1501
1-Naphthyl *N*-methylcarbamate ---- 1173, 1421
Sodium 2,2-dichloropropionate ---- 1010
Tetradifon (2,4,5,4'-tetrachlorodiphenyl sulfone) ---- 1421
Toxaphene ---- 948
PINEAPPLE, canned, artificially sweetened; standard of identity ---- 1497
STREPTOMYCIN:
Certification of batches; tablets, proposed procedure for testing disintegration time ---- 1422
Streptonicozid sulfate; name changed from streptomycylidene isonicotinyl hydrazine sulfate; proposed rule ---- 1502
Tests and methods of assay; tablets, proposed procedure for testing disintegration time ---- 1421

Foreign Assets Control:

PAYMENT PROGRAM for shorn wool and unshorn lambs 983

CODIFICATION GUIDE

The following numerical guide is a list of the titles and sections of the Code of Federal Regulations affected by documents published in the *Federal Register* during February 1962. Page numbers of documents affecting CFR sections but not specifically amending the text thereof appear in brackets.

Cumulative Codification Guides are separately published annually and at the end of each quarter. In the intervening period, monthly Codification Guides are carried with the monthly indexes, Daily Guides follow the Contents of each issue of the *Federal Register* and within-the-month cumulations appear at the end of each issue.

PARALLEL TABLE OF STATUTORY AUTHORITIES AND RULES

(Additions to 2 CFR; February 1962)

This table lists the sections of the U.S. Code which were added to 2 CFR as a result of new citations of authority carried in the *Federal Register* during February 1962.

In order to determine the *Federal Register* page numbers of the parallel CFR citations, users should consult the Codification Guide above.
